Jaffa, t. Palestine, near the coast of the Mediterranean, called anciently *Joppa*. It is celebrated in Scripture history as the place whence Jonah embarked for Tarshish, and as that where St. Peter restored Tabitha to life. It is now inhabited by Turks and Arabs, with a mixture of Greeks, Maronites and Armenians. The general appearance of the place is now very desolate. Its harbour is one of the worst in the Mediterranean. It is a resort of pilgrims to the Holy Land, being situated directly in the way to Jerusalem. In 1799, Jaffa being taken by Bonaparte, became the scene of that massacre of prisoners, of which so many reports have been spread. According to Sir Robert Wilson, four days after its surrender, 3,800 were led to a field near the town, and publicly shot. Bonaparte has since acknowledged to lord Ebrington and Mr. Warden, that it took place to the extent of 500; and he justified it on the ground that these were Naplousian prisoners, who, after being taken and dismissed on parole, had joined the garrison of Jaffa. 40 m. Jaffna, or *Jaffnapatam*, district in the N. extremity of Ceylon, and considered as the most healthy and populous of the island. It is nearly surrounded by the sea, which renders it cool; and being clear of woods, it produces abundance of fruit and vegetables, and raises a considerable quantity of sheep and poultry. The woods which separate this district from the Candian provinces are inhabited by a savage people, known by the name of Vaddahs, and supposed to have been the aborigines of the country. The Wesleyan Methodists, and the American Board of Foreign Missions, have stations in this district. See *Ceylon*.

Jaffna, the capital of the above district, is at some distance from the sea, but communicates with it by a river navigable for large boats. It has a manufacture of cotton goods; and its artificers are esteemed the best in the island. The inhabitants are principally Mahometans; but since Ceylon was taken by the English, many of the country born Dutch families have settled there, as being a cheaper and healthier place than Colombo. It is also the residence of the superintendent of the district, is garrisoned by the British troops, and is esteemed the second town on the island. Lon. 80° 9' E. Lat. 9° 45' N.

Jamaica, one of the West India islands belonging to Great Britain. It is of an oval form, about 150 miles long, and on a medium, 40 broad. Extent, 6,200 sq. miles. It is divided into three counties, namely, Middlesex, Surry, and Cornwall. A lofty range of mountains runs through the whole island from E. to W. dividing it into two parts, and rising in some of its most elevated peaks to 7,431 feet above the level of the sea. On the north side of the island the land rises from the shore into hills. In the centre, the elevated mountains are clothed with almost boundless forests. On the S. side, vast plains stretch along the foot of the mountains, chiefly covered with the

sugar cane. The soil of Jamaica is in some places deep and fertile, but the greatest part of the island is incapable of cultivation. Out of 4,080,000 acres which the island contains, about 2,000,000 have been granted to individuals by patent from the crown, and not more than 1,000,000 is at present under cultivation. Of this number, about 639,000 acres are laid out in sugar plantations, and 280,000 in breeding farms.—The legislature of Jamaica is composed of a governor, of a council nominated by the crown, consisting of 12 gentlemen, and a house of assembly containing 43 members, who are elected by the freeholders.—The most important exports are sugar, rum, molasses, and coffee, and next to these cocoa, cotton, indigo, pimento, and ginger. The amount of sugar exported has gradually increased from 11,000 hhds. in 1722, to 140,000 in 1802. In 1791, the coffee exported amounted to about 600,000 lbs. In 1804, it had increased to 22,000,000 lbs.; and in 1807, to 28,500,000 lbs. The whole value of the exports in 1744, was 600,000*l.*; in 1809, 3,033,234*l.*; and in 1810, 2,303,179*l.* The value of the imports in 1809, was 4,068,897*l.*; in 1810, 4,303,337*l.* The population of Jamaica in 1746, was 112,428 slaves, and about 10,000 whites; in 1812, according to an official return, 319,912 slaves, and the number of whites and free people of color was estimated at 40,000, making a total of 359,912. The United Brethren, the Baptists, and the Methodists employ missionaries in this island, principally among the negroes. The centre of the island is in lon. 76° 45' W. lat. 18° 12' N.

James River, Virginia, rises in the valley on the E. side of the Alleghany mountains, and breaking through the Blue Ridge, pursues a course S. of E. and falls into the southern part of Chesapeake bay. A 40 gun ship can ascend as far as Jamestown; vessels of 250 tons to Warwick, and those of 125 tons to Rockets, a mile below Richmond. At this city, the navigation was formerly interrupted by the Great Falls, which in 7 miles descend 43 feet; but a canal around them is now completed, and the river has been rendered navigable 230 miles further for boats drawing 12 inches water. The Board of Public Works in Virginia have reported in favor of a canal to connect James river with the Ohio. Such a canal, they suppose, would have many advantages over the Grand canal in New York, and would divert much of the trade of the western country to the ports of Virginia.

James river, Arkansas, rises in the highlands a few miles S. of the Gasconade, and running S. W. 200 miles, during which course it receives Findley's river and other streams, enters White river 1,000 miles from its mouth. The soil on its banks is among the most fertile of any in the valley of the Mississippi. Lead mines occur on its banks 20 m. above the junction of Findley's river.

Janeiro, *Rio de*, a jurisdiction of Brazil, bounded N. by the province of Espiritu Santo, E. and S. by the Atlantic ocean, and W. by Minas Geraes. It is of an extremely fertile soil, and produces sugar in great abundance.

Janeiro, *Rio de*, city, S. America, and capital of Brazil, is on a river of the same name, at the head of a large bay, near the foot of several high mountains which rise behind it. The houses are generally built of stone or brick, and the streets are

straight, well paved, and have excellent foot-paths. The harbor is one of the finest known, for capaciousness and security. The entrance, which is about a mile wide, is bounded on one side by a lofty inclining conical hill, and on the other by the huge mass of granite which supports the castle of Santa Cruz. Near the middle lies a small island on which Fort Lucia is built. Though at first narrow, it gradually widens to about three or four miles, and has an excellent muddy bottom. This city is the chief mart of Brazil, and especially of the provinces of Minas Geraes, St. Paul's, Goyas, and Cuyaba. Since the emigration of the court of Portugal to Brazil, this extensive country has been opened to the commerce of Great Britain. Janeiro appears to be already reaping the fruits of this liberal system. Its population has increased, and every thing indicates the thriving condition of the place. The city is gradually extending, by the erection of public and private buildings. The population is variously estimated. According to Mr. Mawe's estimate, including the negroes, the most numerous class, it amounts to 100,000. Lon. 42° 1' 30" W. Lat. 22° 56' S.

Japan, an extensive empire, consisting of several large islands, at the eastern extremity of Asia. The principal of these is Nippon, which is 700 miles long. The next two are Sikokf and Kiu-siu, the former 90 miles long, the latter 200. The large island of Jesso, immediately N. of Nippon, has been colonized and governed by Japan, though it is scarcely reckoned an integral part of the empire. The extent of the three original islands may be computed at 90,000 square miles. This great empire has long rejected almost all communication with Europeans. The general aspect of these islands is rugged and irregular, bristling with mountains, rocks and hills. The coast is rocky and precipitous: the sea which surrounds it is full of shallows and whirlpools, and subject to violent tempests; so that there are few parts of the coast which can be approached with safety. Volcanoes and earthquakes are felt in every part of the empire, often to a desolating extent. The minerals are copper, which is the principal article of export; coal in sufficient quantities to supply the islands with fuel; gold and sulphur, in abundance. Pearls are found almost in the whole circuit of the island of Sikokf. The principal vegetables are the *rhus vernix*, or varnish tree, affording a milky juice, with which the natives varnish, or, as we call it, *japan*, all their household furniture, dishes and plates. The mulberry tree, the tea shrub, the laurel and camphor tree, are very common. Among cultivated vegetables, rice takes

the lead, and forms the main article of subsistence throughout the Empire. Agriculture is carried to the same perfection as in China. The government presents a striking anomaly in the combined dominion of a spiritual and temporal ruler. The former, called the Dairi, was the sole original sovereign, and was regarded by his subjects almost as a divinity. At the end of the 16th century, however, one of his generals seized the whole secular power; and left to the Dairi only a shadow of dominion. The Dairi resides in the imperial city of Meaco, and has the revenue of it and the surrounding district allotted to him for the support of his establishment. The secular emperor resides in pomp at Jeddo. His revenues have been estimated at the sum of £28,000,000, but they are paid chiefly in produce. The army maintained by the emperor is stated at 100,000 foot and 20,000 horse. Japan, however, is seldom engaged in foreign war. When the dynasty of Zingis conquered China, they fitted out a great armament, and invaded Japan, but were completely repulsed by that brave people. Energy, pride, and a lofty sense of honor, form prominent features in the character of the Japanese. Although no regular form of liberty exists, there yet prevails a spirit of independence, and force of public opinion, which deters the rulers from any flagrant injustice. The Japanese are intelligent and inquisitive, and acquire knowledge with great facility. They possess the arts of printing and engraving, though in a style much inferior to that of Europe.

The history of their own country is written by them very carefully. Poetry is a favorite pursuit and they are passionately fond of music. They have extensive works on botany and zoology, and have translated several European works. The principal manufactures are silk and cotton, and lacquered ware, which from them we call japaned ware. The foreign commerce of Japan is carried on only with the Dutch and Chinese. That of the Dutch is confined to the single port of Nangasaki in the island of Kiu-siu, and is embarrassed by so many restrictions, that it is not very profitable. The Japanese are particularly jealous of the English and Russians. They believe the encroachments of the Russians along the northern, and of the English along the southern coast of Asia, to have the subjugation of Japan for their main and ultimate object.

Java, large isl. in the Eastern seas, between 6° and 9° S. lat. and 105° and 115° E. lon. 642 miles long from E. to W. and on an average 96 broad. To the N. W. lies Sumatra, from which Java is separated by the Straits of Sunda. The island is divided nearly in its whole length by a range of mountains, running E. and W. and rising to their greatest elevation towards the centre. The northern coast is low and swampy, intersected by a great number of rivers and fine bays; whereas, the south coast, as far as it has been explored, rises into high and rugged hills, and is almost inaccessible. The climate along the northern coast is hot and sultry; at Batavia, the thermometer seldom falls below 76° of Fahrenheit. But in the mountainous districts it frequently descends to 60° and in some places to 50° . All the productions of Europe, hardly one of which will flourish below, are in these districts cultivated with success. Java possesses a soil of extraordinary fertility. It consists generally of a pure vegetable mould, resting on clay or argillaceous iron-stone, or coarse limestone, of a loose and porous texture. In no part of the world is vegetation so richly luxuriant, or the wants of man so easily supplied. The staple produce is rice, which is cultivated nearly the whole length of the northern coast, many miles in breadth, and is brought to Batavia, and exported in great quantities. Sugar, to the amount of 10 millions of pounds annually, is made, as well for the consumption of the island as for exportation. Most of the sugar mills are kept and worked by the Chinese. Pepper is produced in great abundance and perfection. Indigo of a very superior quality is also produced here. Cotton is cultivated in almost every part of the island. The coffee plantations are extremely luxuriant. The population of Java has been variously estimated: by a census, said to have been taken by the Dutch governor, in 1808, it is stated at 3,000,000; and by the latest surveys of the British, at 5,000,000. The inhabitants are chiefly composed of Javanese; the Malays also form a large class; and on the coasts and in the seaports, there is a considerable proportion of Chinese.—The professed religion of

both the Malays and Javanese is Mahometanism, but they seem to be very careless of its rites. Few of them obey the laws of their prophet in abstaining from wine. The Chinese in Java were severely taxed by the Dutch; notwithstanding which, they always found means, from their habits of industry, not only to pay the tribute imposed on them, but to accumulate wealth. Many of them carry on a very considerable trade with their native country. In all the principal towns, they are the great capitalists. This island was taken by the English, under Sir Samuel Auchmutty, in 1811, but it has been restored to the Dutch.

It has lately revived, the woollen manufacture having been established here in 1770. Within the last ten or

twelve years more especially, great improvements have taken place. Pop. in 1813, 2,827. 11 m. W. Kelso, 45 S. Edinburgh.

Jedo, or *Jeddo*, a great city of Japan, and one of the capitals of the empire, being the residence of the Kubo Sama, or civil and military ruler. Meaco, the residence of the spiritual emperor, was the original capital, and is still in some degree considered as such; but since the Kubo Sama has fixed his residence at Jedo, that city has far eclipsed the other in magnitude and splendor. Its magnificence is not probably surpassed by that of any city in Asia. All the princes and great men are obliged to make it their residence for half the year. It contains, therefore, many splendid palaces, which stand by themselves, surrounded by large court yards and stately gates. All these are eclipsed, however, by the palace of the emperor, which is surrounded with walls and ditches, and contains several fortified buildings, that have the appearance of castles. The centre of the inclosure contains the palace or residence of the emperor. Behind the palace are gardens and orchards of great extent and beauty. The city is said to be seven miles long, five broad, and twenty in circumference. It stands on a great bay at the mouth of a large river. Besides being the residence of the monarch, Jedo is the seat of an extensive commerce, and contains many flourishing manufactures. Lon. 140° E. Lat. 36° 30' N. Pop. estimated at 1,000,000.

Jersey, Isle of, a thriving and very populous island in the English channel, 17 miles from the French coast. It is 12 miles long, and on an average 5 broad. Extent, 40,000 acres, or 62½ square miles. Pop. in 1806, 22,855. A barrier of rocks nearly encircles the whole island. The climate is exceedingly mild, the soil fertile, and the situation well adapted to commerce. The principal production is cider, of which 24,000 hhd. are made annually. The inhabitants, though nominally subject to England, are really free: they make their own laws, are exempt from naval and military service, and from the dominion of the English church; have the benefit of a free port, and trade with the enemies of England, even in time of war; above all, they are free from the taxes with which the mother country is loaded. In 1812, 59 vessels, altogether of 6,000 tons burden, and navigated by 550 seamen, belonged to the island. The island having been occupied as a great military depot, various fortresses have been erected on it. The coast is also defended by a chain of martello towers, and by numerous redoubts and batteries. Lon. of St. Aubin, 2° 11' W. Lat. 49° 13' N.

Jerusalem, an ancient and celebrated city of Asia, capital of the ancient Judea, and the modern Palestine. It is supposed to be the Salem mentioned in Genesis; but when the Israelites entered the land of Canaan, it was called Jebus, from the Jebusites, whose capital it was, and who were not completely expelled, till the reign of David. That monarch made Jerusalem the capital of his kingdom. Solomon, on succeeding to the throne, surrounded it with stronger and better walls, and adorned the interior with that temple, the splendour of which was so much admired in the ancient world. On the separation of the kingdoms, after the death of Solomon, Jerusalem became the capital of Judah, till A. C. 417, when Nebuchadnezzar put an end to the kingdom, and carried king Jehoiachin captive to Babylon. The second temple built by Cyrus, was finished A. C. 515. During the reign of Tiberias, Jerusalem was rendered memorable by the death and resurrection of our Lord and Saviour Jesus Christ, who was crucified on Friday, April 3d, at 3 o'clock P. M. on Mount Calvary, a hill on the N. side of the city. The city was taken and destroyed by Titus, A. D. 70. At the siege, according to Josephus, 97,000 prisoners fell into the hands of the conqueror, 11,000 perished with hunger, and the whole number slain and taken prisoners, during the war, was 1,460,000. In 130, Adrian erected on its ruins a Roman town, which he called Aelia Capitolina. This name remained till, by the conversion of Constantine, Christianity became the ruling religion of the Roman empire. Jerusalem then resumed its original name, and became an object of pious veneration. The empress Helena, at the advanced age of eighty, repaired to the holy city, and caused a handsome fabric to be erected, called the church of the holy sepulchre, which was supposed to include all the spots connected with the crucifixion and entombment of our Saviour. As the empire became more generally Christian, Jerusalem became the resort of numerous pilgrims of all descriptions, sexes, ages, and nations. In 636 it fell into the hands of the Saracens, who allowed the Christians to resort thither as formerly, upon the payment of a considerable tax; so that Jerusalem was nearly as much frequented as ever, till the inroad of the Turks in 1076. The Turks committed such outrages on the pilgrims, that they could no longer visit the holy sepulchre in safety. The report of these violences being carried to Europe, produced the Crusades; the first result of which was, to wrest Jerusalem from the hands of the infidels. It was taken in 1099 by the army under Godfrey of Bouillon, and was ruled during upwards of sixty years, by five Latin kings, when it yielded to the arms of Saladin. After changing successively its Moslem masters, it was annexed to the Turkish empire, of which it still forms a part. Under the dominion of the Turks, it appears to be in a state of gradual decline. It has been exposed at once to the oppression of the Pachas and the inroads of the Arabs. Dr. Clarke, however, in his recent visit, by no means found it to present that aspect of desolation which some travellers have reported. On obtaining the first view of it in the approach from the north, instead of a wretched

and ruined town, he beheld a flourishing and state-ly metropolis, presenting a magnificent assemblage of domes, towers, palaces, churches, and monasteries; all of which, glittering in the sun's rays, shone with inconceivable splendour. The streets of Jerusalem are cleaner than those of any other city of the Levant; but like all of them, are very narrow. The houses are lofty, and as no windows appear on any of the lower stories, and those above are latticed, the passage appears to be between blank walls. The present population is estimated, though by vague conjecture, at 20,000 or 30,000. The most splendid edifice which the city now contains, is the mosque, erected in the seventh century, by the caliph Omar. It appeared to Dr. Clarke superior to any example of modern architecture in the Turkish empire, even to the celebrated mosque of St. Sophia. It is built upon the site of the temple. The edifice, which has always been the object of visitation and respect to Christian pilgrims, is the church of the holy sepulchre. Although this place, however, has been so long revered and visited by Christian pilgrims, an eminent modern traveller seems to have proved that it cannot possibly have been the theatre of the great events which have been so often commemorated upon it. It is certain there is not the least trace of a hill, such as Calvary is described to be, the ground being entirely plain, except the small rise of about twenty steps leading up to the altar, the supposed scene of crucifixion.—The sacred scenes which Jerusalem presents, have rendered it long the abode of numerous monks. These consisted originally of various nations and professions, each of which had a quarter assigned to it; but the number has of late been reduced to four, the Latins, Greeks, Armenians, and Copts. Each fraternity has altars and a sanctuary specially allotted to their own use. The manufactures of Jerusalem are confined almost exclusively to one branch, that of beads, crosses, shells, and other objects, supposed to derive sanctity from their local origin. Lon. 35° 20' E. It is situated in a barren sandy district, destitute of water. The English are the only European nation who carry on a trade here, and it was formerly considerable; but the numerous exactions to which they were exposed have now reduced it to a low ebb. The imports consist almost exclusively of piece goods from the

coast of Coromandel; to which is added a small quantity of spices, beetle-nut, opium, sugar, tin and tobacco. Almost the only export is coffee. Lon. 39° 15' E. Lat. 21° 29' N. Pop. 5,000

Joanna, or *Anjouan*, the largest of the Comorro islands, off the E. coast of Africa, 30 miles long and 15 broad. It is entirely mountainous, and exhibits a very picturesque appearance. The sovereign of Joanna takes the title of Sultan, and formerly bore sway over the whole group of the Comorro islands, from which he still makes a claim of tribute. Grose reckons the population at 130,000; but M. Capmartin, a much more recent visitor, supposes that it does not exceed six or seven thousand. In fact, this and the other Comorro islands have been desolated for thirty years, by the inroads of a band of most desperate pirates, called the Marati or Malgaches, who have established themselves on the N. W. coast of Madagascar. This island is considerably frequented by Europeans, and particularly by English vessels, for water and provisions. Lon. 44° 30' E. Lat. 12° 54' S.

Joannina, a large and flourishing city of European Turkey, the capital of Albania. The situation and environs are extremely beautiful. The population of Joannina appears to be between 35,000 and 40,000, composed of Greeks and Alba-

means, and in a small proportion (about a tenth) of Turks and Jews. Their language is the Romaic or modern Greek. It is chiefly known as the capital of the celebrated Ali Pacha, a chief who, in this part of the Ottoman empire, exercises an almost unlimited power, and who has brought under his dominion, not only the whole of Albania and ancient Epirus, but also a considerable part of Thessaly. His annual revenue is £500,000; his regular force, about 10,000 men; his militia, 40,000. Joannina is the see of an archbishop. 70 m. W. Larissa, (in Thessaly) 115 S. W. Juggernath, **Juggernaut**, or **Jagatnatha**, a celebrated temple and place of Hindoo worship, on the sea coast of Orissa, a few miles N. E. of the Chilka lake. Seen from a distance, it is a shapeless mass of building, but forms an excellent landmark for navigators in approaching so low a coast. It is surrounded by several courts or inclosures, into the interior of which no European is admitted. The idol of Juggernath is said to be made of wood, to have a frightful black visage, with a distended mouth foaming with blood. On each side of him is seated another image, one of which is painted white, the other yellow: the first is said to be the image of his sister Shubudra, the other his brother Balaram. On particular festivals, the images are superbly dressed, and placed on an immense chariot or moving tower, which is dragged by the pilgrims a certain distance, and then returned to the temple. It is during this procession that some of the devotees sacrifice themselves, by falling under the wheels of the machine. The concourse of Hindoo pilgrims to this shrine is immense; and the revenue derived from them amounts to 12,000*l.* per annum. Lon. 86° 5' E. Lat. 19° 49' N.

Kamschatka, a peninsula in the N. E. of Asia, forming part of the Russian government of Irkoutsk. On the E. it has the Pacific ocean, and on the W. the sea of Okhotsk. It extends from N. to S. between 51° and 62° N. lat. is 600 miles long, and nearly 300 broad. A range of very lofty mountains extends through the whole length of the peninsula, and contains several volcanoes. The cold climate and barren soil prevent the production of grain even in the smallest quantity. In the absence, however, of vegetable productions, the land swarms with wild animals, which yield the richest and most valuable furs. The sable is more plentiful here than in Siberia. The coasts and rivers swarm with fish, which forms the main article of food to the inhabitants. This region is inhabited by a native race peculiar to itself. They are in general below the common height; have broad shoulders, and a large head. The face, and particularly the nose, is long and flat, the eyes small and sunk, the lips thin, and they have scarcely any beard. Dogs are universally used for labour and draught. This country was first known to the Russians in 1690. It is now wholly under their dominion. The natives have suffered much from the introduction of ardent spirits, and from the small pox. Their number which at first was estimated at 15,000, does not, by the late census, exceed 2,843. Besides the natives, there are Cossacks and Russian soldiers, to the number of 300, and about 1,000 criminals, convicted of murder and other atrocious crimes, who, as a punishment equal to death, are banished to this remote and in-

hospitable region. The trade of Russia with Kamschatka is carried on from Irkoutsk by way of Okhotsk. The imports, besides brandy, are nankeens and other Chinese stuffs, together with various commodities of Russian and foreign manufacture. The only export is furs, the amount of which is valued at from 50,000 to 100,000 rubles.

Karass, a Tartar village, at an equal distance from the Euxine and Caspian seas, under the Russian government, within a few days' journey of Persia, and Bukharia, and within 50 miles of Turkey. This place is occupied by the Scotch Missionaries, sent out by the Edinburgh Society in 1803. Besides endeavouring to instruct the Tartars in Christianity, they have purchased many native youths, slaves to the Circassians and Kuban Tartars, and have formed a school, in which they are taught the Turkish and English languages. The Russian government has made a grant of land to the mission, and annexed to the grant some important privileges. The New Testament and several Tracts have been translated by the Missionaries, and widely dispersed, by means of travellers and pilgrims. Many difficulties have arisen from the unsettled state of the country, and the perpetual irruptions of the hostile Tartars.

About 100 miles from its mouth are the Great Falls, where the river descends perpendicularly 50 feet. The principal branch of the Kenhawa is Greenbriar, which enters it 40 or 50 miles above the falls. On the banks of this river, 66 m. from its mouth, are the Kenhawa salt-works.

Kenhawa, *Little*, r. Va. which falls into the Ohio a little below Marietta, (Ohio.) It is navigable 10 miles.

Kenilworth, called by corruption *Killingworth*, t. Eng. in Warwickshire, between Coventry and Warwick. The town is principally noted for its magnificent castle, which, along with an extensive chase and park, formed at one time the pride and ornament of all this part of the kingdom. The remains of the castle present one of the most splendid and picturesque wrecks of castellated strength

to be found in England, and still impart a melancholy grandeur to the town and neighborhood.— This castle was founded by Geoffrey de Clinton, chamberlain and treasurer to king Henry I. Most of the buildings, of which the remains are still visible, were built by John of Gaunt, who had acquired the castle by marriage. Through his son Henry IV. the castle again returned into the hands of the crown, and continued so, until queen Elizabeth conferred it on Robert Dudley, earl of Leicester. This nobleman spent immense sums in adorning and enlarging the building; and when all was finished, he entertained the queen here for 17 days, in a style of extraordinary magnificence, the particulars of which are still preserved. 5 m. Kennebeck, r. Maine, next to Penobscot, the largest in the State. It has two principal branches. The eastern branch rises in Moosehead lake. The western called Dead river, rises in the highlands, which separate Maine from Canada, and unites with the eastern branch about 20 miles below Moosehead lake. After the junction, the river flows south to the Atlantic. Its whole course is about 300 miles. It is navigable for ships 12 miles, to Bath; for sloops, 45 miles, to Augusta, at the head of the tide; and for boats 60 miles, to Waterville. At Waterville the navigation is interrupted by Teconic falls, which afford numerous sites for mills. The lands on the Kennebec are fertile, and well adapted to tillage and pasture.

Kent, maritime co. Eng. forming the S. E. angle of the kingdom, bounded N. by the Thames, which divides it from Essex, E. and S. E. by the German ocean and straits of Dover, S. by Sussex, and W. by Surry. It contains about 900,000 acres, or 1,460 sq. miles, with 263 inhabitants to each. The general aspect of this county is very beautiful, from the diversity of the surface, and the richness and variety of the scenery. It is essentially an agricultural county; and every department of husbandry is here prosecuted to a great extent, and with great ability and success. Pop. in 1811, 373,095; families 76,265, of which number 27,077 were engaged in agriculture, 27,996 in trade and manufactures, and 21,192 otherwise.

Kentucky, one of the U. S. bounded N. by Illinois, Indiana, and Ohio; E. by Virginia; S. by Tennessee; and W. by the Mississippi. It extends from lat. $36^{\circ} 30'$ to $39^{\circ} 10'$ N. and from lon. $81^{\circ} 50'$ to $89^{\circ} 20'$ W. Length on the southern line, 300 miles. Extent, 39,000 sq. miles, or 24,960,000 acres. Pop. in 1790, 73,677; in 1800, 220,959; in 1810, 406,511; in 1820, 564,317. Slaves 126,732. Engaged in agriculture 132,161; in commerce 1,617; in manufactures 31,469.

Kentucky is almost insulated by navigable rivers. The Big Sandy, the Ohio, and the Mississippi form its boundary on three sides, while the Cumberland intersects its southern border. The principal rivers which lie wholly within the State are Licking, Kentucky, and Green.—The only mountains are the Cumberland range which sep-

arates it from Virginia in the S. E. The eastern counties are mountainous. A tract along the banks of the Ohio, from 5 to 20 miles wide, and extending through the whole length of the State, is hilly and broken, but has a good soil; the part of this tract lying immediately upon the Ohio, for about one mile in width on an average, consists of bottom lands, and is subject to periodical inundation. Between this tract, the eastern counties and Green river, lies the garden of the State. It is about 150 miles long, and from 50 to 100 miles wide, and comprises the counties of Mason, Fleming, Montgomery, Clarke, Bourbon, Fayette, Scott, Harrison, Franklin, Woodford, Mercer, Jessamine, Madison, Garrard, Casey, Lincoln, Washington, and Green. The surface of this district is agreeably undulating, and the soil black and friable, producing black walnut, black cherry, honey locust, buckeye, pawpaw, sugar tree, mulberry, elm, ash, cotton wood, and white thorn. The country between Green and Cumberland rivers is called "the barrens." In 1800 the legislature of Kentucky made a gratuitous grant of this tract to actual settlers, under the impression that it was of little value; but it proves to be excellent land; and hogs and cattle are raised in abundance. The whole State, below the mountains, rests on an immense bed of limestone, usually about 8 feet below the surface. There are every where apertures in this limestone, through which the waters of the rivers sink into the earth. The large rivers of Kentucky, for this reason, are more diminished during the dry season, than those of any part of the United States, and the small streams entirely disappear. The banks of the rivers are natural curiosities; the rivers having generally worn very deep channels in the calcareous rocks over which they flow. The precipices formed by Kentucky r. are in many places awfully sublime, presenting perpendicular banks of 300 feet of solid limestone, surmounted with a steep and difficult ascent, four times as high. In the S. W. part of the State, between Green river and the Cumberland, there are several wonderful caves: one, called the Mammoth cave, is said to be 8 or 10 miles long.

The principal productions of Kentucky are hemp, tobacco, wheat, and Indian corn. Salt springs are numerous, and supply not only this State, but a great part of Ohio and Tennessee with this mineral.—The principal manufactures are cloth, spirits, cordage, salt, and maple sugar. The value of the manufactures in 1810 was estimated at \$6,181,024. Hemp, tobacco, and wheat are the principal exports. These are carried down the Ohio and Mississippi to New Orleans, and foreign goods received from the same place in return. Louisville, on the Ohio, is the centre of this trade. The introduction of steam-boat navigation on the Ohio has been of incalculable benefit to the commercial and manufacturing interests of Kentucky.

The principal religious denominations are Baptists, Presbyterians, and Methodists. The principal literary institution is the Transylvania university at Lexington. A charter for another college, to be established at Danville, was granted early in the year 1819.—The legislature consists of a senate and house of representatives: the former hold their seats 4 years, the latter are chosen annually. The governor is chosen for 4 years, and is ineligible the succeeding 8. More

than 50 banks have been incorporated in this State.

Kentucky, r. Kentucky, rises in the highlands in the S. E. part of the State, and running N. W. falls into the Ohio, at Port William, 77 miles above the rapids at Louisville. It is 150 yards wide at its mouth, and is navigable for boats of considerable size 180 miles in the winter floods. The banks are generally high and rocky, presenting in some places perpendicular precipices of limestone of 300 feet.

Killarny, lake, in the S. W. part of Ireland, which discharges its waters through Lane river into Dingle bay. It is remarkable for its picturesque scenery, and for several natural curiosities. It is about 10 miles long and from 1 to 7 broad, and is divided into three parts, called the Lower, Middle and Upper Lakes. The shores of the Lower lake are diversified with the most beautiful scenery, and on the south side are lofty mountains, from one of which O'Sullivan's cascade falls into the lake with a tremendous roar, opposite the romantic island of Innisfallen, the seat of an ancient noted abbey. In the Middle lake is the celebrated rock called the Eagle's Nest, a place wonderful for its echoes; the sound of a bugle horn producing tones equal to 100 instruments, and the discharge of a musket, causing a succession of peals equal to the loudest thunder. The Upper lake is entirely surrounded by mountains, and near the summit of one of them is a circular lake, called the Devil's Punch Bowl, which, from its immense depth and continual overflow of water, is considered as one of the principal curiosities of Killarney. After heavy rains the water falls

down the side of the mountain in the form of a beautiful cascade.

Kingston, p-t. Upper Canada, the largest and most populous of the province. It is advantageously seated at the E. extremity of Lake Ontario. It is regularly laid out, and contains a government-

house, a court-house, a Protestant and a Catholic church, a market-house, a jail, hospital, and about 370 dwelling-houses. For the last 20 years the town has obtained considerable mercantile importance. It is now the main entrepot between Montreal and all the settlements along the lakes to the westward. From the commencement of spring until the latter end of autumn, great activity prevails. The harbour is well sheltered and convenient, accessible to ships not requiring more than three fathoms water, with good anchorage close to the N. E. extremity of the town; the entrance to it is defended by a battery on Mississaga Point, and another on Point Frederick, which, with the shoal stretching from the former, with only five feet of water upon it, are quite sufficient for its protection. Kingston possesses one of the best harbours on the lake; and it is the naval arsenal of Great Britain in this quarter, where ships of war, even of the first rate, have been constructed. 190 m. N. W. Kirghises, or **Kirguis**, a numerous and widely extended people of independent Tartary, occupying the immense uncultivated plains or steppes, which extend to the east of the sea of Aral, and from the Aral to the Caspian, along the southern frontier of Asiatic Russia. They are divided into three hordes, called the Little, the Middle, and the Great Horde. The Kirghises of the Little Horde occupy the most westerly position, and wander over the plains to the S. and E. of the Oural, and between the Caspian and Aral. They bring their flocks in summer to the steppes between the Oural and the Volga. The Middle Horde live farther to the east, in vast plains, to the north of the Aral. These two hordes subsist entirely on their flocks. The Great Horde are established farther to the east and south, beyond the Aral, on the banks of the Sirr or Sihon; and extend southwards to the frontiers of Bukhara and Cashgar. The Kirghises of the Great Horde have few relations with the Russian empire; and though some of them are pastoral, a considerable proportion cultivate the land, and inhabit fertile, mild, and well watered countries. The Little and Middle Hordes have acknowledged themselves subjects of the Russian empire. The Russian government, however, do not exact from them even the smallest tribute; on the contrary, they pay regular pensions to all the principal chiefs, to prevent them from plundering on the Russian frontier. The Little and Middle Hordes are said to consist each of about 30,000 tents or families. Their property consists chiefly of horses, sheep, and goats, with a few camels. Some of them are very rich in these possessions.

Korassan, province of Persia, having Irak and Mazanderan to the W. Seistan to the S. Bukharia and Balk to the N. and E. It is in general a level country, though intersected by lofty and irregular ranges of mountains; some part of it also consists of sandy deserts. The soil is generally excellent, producing corn, wine, fruit, rice, and silk, plentifully and of excellent quality. The authority of the king of Persia at present extends only over the western district. The southern parts, including Herat, have fallen under the dominion of the Afghans; the eastern and northern are occupied by the king of Bukharia, and by wandering tribes of Turcomans. These nations carry on constantly a predatory warfare, and their parties of flying horse are incessantly scouring the country, and laying it waste.

Labrador, country, N. America, between 50° and 60° N. lat. bounded S. by Canada and the gulf of St. Lawrence, E. by the Atlantic ocean, N. by Hudson's straits, and W. by Hudson's bay. The whole of this vast tract of country is of the most barren and dreary aspect, the surface mountainous, and of a poor soil, covered only with

coarse plants, adapted to the nourishment of deer and other wild animals. The inhabitants on the coast are the Eskimaux Indians. They are of small stature, and in their language, persons, and manners, bear a near resemblance to the Greenlanders. Their food consists chiefly of the flesh of seals, rein-deer, and fish, and their dress is made entirely of skins. Three settlements have been formed in this desolate country by the Moravian missionaries; who, since the year 1764, have been labouring to promote the conversion of the inhabitants to the Christian religion, and to train them to habits of civilization. The name of the settlements are Nain, Okkak, and Hopedale, and a new settlement at Kangertluksoak, it was expected would be formed in the course of the year 1821. The three settlements contain about 600 inhabitants.

Lanarkshire, or *Lanerkshire*, sometimes called *Clydesdale*, a county of Scotland, bounded N. and N. W. by Renfrew, Dumbarton, and Stirling; N. E. by Linlithgow and Edinburgh; E. by Peeblesshire; S. by Dumfries-shire; and S. W. by Ayrshire. Extent, 870 square miles, or 556,800 acres. Lanarkshire has long been celebrated for its minerals, particularly coal. It is calculated that the coal stretches through this county in one solid mass, over nearly 110 square miles, or 55,000 acres, and that its average thickness cannot be less than five yards, and the quantity of coal produced annually amounts to about 760,000 tons. There are about 18,000 bars of lead smelted annually, each weighing 9 stones. But this county is chiefly distinguished by its rapid progress in commerce and manufactures, in which it is decidedly pre-eminent over all the other counties of Scotland. Among the manufactures are yarn, which is spun in immense quantities, in different parts of the county, the cotton and muslin manufactures, the printing of calicoes, the dying of Turkey red, and the preparation of various dyes. Glass and crystal manufactures are also carried on to a great extent. There are three royal burghs, Lanark, the city of Glasgow, and the town of Rutherglen. Pop. in 1811, 192,726.

Lanark, a royal burgh, Scotland, and cap. of Lanarkshire, on a slope of rising ground, within half a mile of the Clyde. Cotton, the great staple of the county, is the chief manufacture. The falls of the Clyde in the vicinity, have been visited from all quarters by the lovers of the picturesque. Pop. of the burgh about 3,000, the parish 6,964. 25 m. S. E. Glasgow, 30 W. Edinburgh. Lon. 3° 5' W. Lat. 55° 34' N.

Lancashire, a maritime co. Eng. on the N. W. coast. It includes part of the great coal fields of the north of England; and with these natural advantages for trade and manufactures, it has gradually risen to be one of the greatest manufacturing counties in the kingdom, containing Manchester, the centre of the cotton manufactures, and Liverpool, the emporium of the west. It is bounded W. by the Irish sea, E. by Yorkshire, S. by Cheshire, N. by Westmoreland and Cumberland. Extent, 1,800 square miles, or 12,000,000 acres, with 450 inhabitants to each mile. The manufactures are chiefly those of cotton, in all its branches; also of silk, woollen, and linen, hats, stockings, pins, needles, nails, watch tools and movements, tobacco and snuff, earthen ware, porcelain, paper, &c. Manchester is the principal seat of the cotton manufacture. From thence it spreads on all sides; to the south and east into Cheshire and Yorkshire; but especially to the north and west, over the greatest part of Lancashire, extending from Furness to Derby on the one hand, and from Liverpool to Halifax on the other. The population has increased with great rapidity. In 1700, it was 166,200; in 1750, 297,400; in 1801, 695,100; and in 1811, 828,309, of whom 23,365 families were employed in agriculture, 114,522 in manufactures, and 24,072 otherwise.

Lancaster, t. Eng. and cap. of Lancashire, on the Lune or Loyne. Of the public buildings, the castle is the most important. It is now occupied as a prison, and is one of the completest establish-

ments of this kind in the kingdom, and is capable of containing 5,000 men within the walls. About a mile N. E. of the town, is the great aqueduct bridge, by which the Lancaster canal is carried over the Lune. It is justly considered the most magnificent structure of the kind in the kingdom. By means of the canal its inland communications are extensive, reaching into Westmoreland, Yorkshire, Cheshire, Staffordshire, &c. But its communication with the sea is greatly obstructed by shoals in the river Lune. The trade of Lancaster is principally to America and the West Indies. In 1800 the registered shipping consisted of 140 ships, 19,094 tons burden, and navigated by 1,926 men. The town has been long famous for its cabinet-making. Pop. in 1811, 9,247. 54 m. N. W. Languedoc, before the revolution, a province in the S. of France, extending on the E. to the Rhone, and on the W. to the Garonne. At the revolution it was divided into the departments of Gard, Herault, Ardeche, Lozere, Tarn, Upper Garonne, and Aude. Extent, 16,000 square miles. Pop. about 2,000,000. Vines, olives, and mulberries are here produced in profusion. The great articles of export are wine and brandy. The celebrated canal of Languedoc, which was dug in the reign of Louis XIV. commences near Cette, and extends from E. to W. about 140 miles, until it reaches the navigable part of the Garonne near Toulouse, thus effecting a communication by water from the Atlantic to the Mediterranean. There are 71 bridges over the canal, 58 aqueducts, and 103 sluices. The most remarkable tunnel in its whole course is at the hill of Malpas, and is 500 feet long and 20 broad.

Lapland, the most northern country in Europe, bounded N. by the Arctic ocean, E. by the White sea, S. by Sweden, and W. by Norway and the Atlantic. Extent, about 150,000 sq. miles. Pop. 60,000. Lapland is divided into three parts, called Russian, Swedish, and Norwegian. Russian Lapland the most dreary of the whole, includes all east of the Tornea, under the appellation of Circle of Kola, with a population of about 20,000. Swedish Lapland is subdivided into 6 provinces, called Torneo-Lapmark, Lulea-Lapmark, Pithea-Lapmark, Umea-Lapmark, Jamtland-Lapmark, and Asele-Lapmark; but by the recent division of the Swedish territory, the whole belongs to the government of Umea. The extent is about 53,000 square miles. Pop. about 13,000. Norwegian Lapland, or Finnmark, now belongs also to Sweden. It is the most northerly of all, and may be styled Lapland beyond the mountains. It has an extent of 27,000 sq. miles. Pop. about 20,000, or one to a square mile.—The part of Lapland lying along the N. shore of the gulf of Bothnia, consists of an extensive plain, abounding in immense forests of spruce and Scots fir; but at the distance of 80 miles the ground becomes gradually elevated, and is at last full of lofty mountains.—Very few vegetables are cultivated in this inhospitable region. The little grain consumed, is imported from southern countries. The rein-deer is the most valuable gift that nature has bestowed on the poor Laplander. It serves as the principal beast of burden; its milk is highly valued; its flesh supplies the chief nourishment of the inhabitants during part of the year; its sinews are made into thread; and its skin furnishes a great part of their dress.—The Laplanders were converted to Christianity in the 17th century. Those of the Russian province are professedly of the Greek church, while those subject to Sweden are Lutherans.

Leeds, a large trading and manufacturing t. Eng. in the W. Riding of Yorkshire, the principal seat of the woollen trade in the kingdom. Its situation is peculiarly favourable for trade and manufactures. The river Aire, which bounds it on the S. is navigable from the Humber up to the town, whence the Leeds and Liverpool canal proceeds on the other hand to the W. The cloth halls are the most remarkable buildings in Leeds. It is here that all the great sales of woollen cloth take place. The halls are open only two days in the week, and for about an hour and a half each time; yet in this short period transactions are often completed to the amount of £15,000 or £20,000. The first stages of the manufacture of woollen cloth are carried on in the towns and villages in the surrounding district, where the wool goes through the operations of spinning, weaving, and fulling. From all these scattered establishments the cloth is sent, in its rough state, to Leeds, where it is finished. Besides the woollen manufacture, here are several cotton mills. Here are likewise manufactures for flat and green glass, and for fine and

coarse pottery goods. Several founderies have been erected; and there is a large manufacture of steam engines. The borough of Leeds, which comprises the whole parish, is governed by a mayor, 12 aldermen, and 24 common-councilmen. It sends no member to parliament. Since 1775, the population of Leeds has more than doubled. In 1801, it was 30,669, and in 1811, 35,950; that of the town and parish being in the same years 53,162, and 62,534. 8 m. N. Wakefield, 9 E. Leghorn, t. on the W. coast of Italy, in the grand duchy of Tuscany. It is situated in a marshy district. On the side of the sea it is well fortified, but towards the land it is merely inclosed by a stone rampart. The maritime accommodations consist of a roadstead, an outer and an inner harbour. The outer harbour, which is the real port, is difficult to enter, and is frequently encumbered with mud. Leghorn, though far from the largest city, is perhaps the greatest commercial depot of Italy. It is the residence of consuls from the principal states of Europe, and the chief medium of Italian commerce with the Levant and the coast of Barbary. It is annually visited by upwards of 4,000 vessels, great and small. It supplies the interior of Italy with the produce of the rest of Europe, of the Levant, and of the colonies. The chief branch of manual industry is the working of coral and alabaster. The population in 1819, was about 50,000, of whom 8,000 were Jews. 15 m. S. W. Pisa, 47 W. S. W. Florence, and 140 N. N. W. Leicester, an inland county of England, nearly in the centre of the kingdom. It is most distinguished as an agricultural county, and in that department particularly which relates to the breeding and feeding of stock. It is bounded on the N. by the counties of Derby and Nottingham, S. by Warwick and Northampton, E. by Lincoln and Rutland, and W. by Warwick and Derby. Extent, 816 square miles, or 522,000 acres. The minerals are chiefly coal and lime; the mines are situated near the borders of Derbyshire. The manufactures of Leicestershire are almost entirely of wool. Pop. in 1801, 130,082; and in 1811, 150,419; of whom 11,700 families were employed in agriculture, 17,027 in trade and manufactures, and 2,753 otherwise.

Leipsic, Circle of, a province of the kingdom of Saxony, bounded E. by the circle of Meissen, S. by that of the Erzgebirge, and the principality of Altenburg, and W. and N. by the Prussian part of Saxony. Extent, 1,537 sq. miles. Pop. 217,000.

Leipsic, or **Leipsic**, city, Saxony, in a plain, on the river Pleisse. It was formerly fortified, but has long been dismantled. The town is divided into four quarters, has four handsome free-stone gates, eight churches, six hospitals, and one spacious square. The university of Leipsic was founded in 1409. The number of regular professors is 27, exclusive of extra professors, private lecturers, and teachers of the living languages and fashionable exercises. The number of students varies from 900 to 1,200; but the library contains only about 40,000 volumes. There are several literary and scientific societies in Leipsic, such as the belles lettres, the economical, the philological, the Linnean, the Collegium Philobiblicum, and the academy of the fine arts. Leipsic is the chief commercial city in the interior of Germany, its central position and other circumstances having made it a general *entrepot*. A great part of its business is carried on at the three great fairs, which take place at the new year, Easter, and Michaelmas. These fairs are attended by an immense concourse of people, not only from every town of consequence in Germany, but from other countries. From Bohemia are brought glass-ware and linens; from Silesia chiefly linens; from Poland, leather, wax, and wool; from Prussia and Pomerania, woollen and silken stuffs; from Nuremberg, toys; from Suabia, linen and jewellery; from Austria and Hungary, leather, wine, and dye stuffs; from Switzerland, woollen, silken, and linen stuffs; from Russia, leather, skins, furs, hemp and flax; from Italy, silk; from France, lace and millinery; and from England, Holland, and Hamburg, colonial produce, printed cottons, and hardware. The total value of the business transacted here in a year is computed at 18,000,000 of dollars, or £3,000,000 sterling, exclusive of the book trade, which forms a remarkable and a peculiar object in the commerce of Leipsic. Here the booksellers of every large town in Germany assemble at the Easter fair, each bringing a portion of the books printed by him since the last year. These they exchange for other books. Foreign books are likewise bought and sold at the Leipsic fair. The number of booksellers settled at Leipsic is between fifty and sixty. The number from other parts who attend the fair, varies from 200 to 300. The new publications exhibited for sale, are computed at an average of 5,000 distinct works; and the value of the books sold or exchanged, is about £200,000 in a year.

Leipsic and its neighbourhood have been repeatedly the scene of military conflicts. The most celebrated was that between the French and allies, on the 16th Oct. 1813. The opposing masses were the greatest of which we read in authen-

ated history; the allies were 240,000 strong, the French were 160,000. The French were defeated, with the loss of 40,000 or 50,000 men, in killed, wounded and prisoners. 64 m. W. by N. Leith, t. Scotland, in Edinburgh co. and the seaport of Edinburgh, about 2 m. N. E. of the metropolis, on the Water of Leith, at its confluence with the frith of Forth. The harbor has been gradually improved, according to the increase of shipping and trade. In 1800, a magnificent suit of wet docks was planned, and the first of these beautiful basins, 250 yards in length, by 100 in breadth, sufficient to accommodate 40 ships of 200 tons was opened for the use of the shipping in 1806; a second dock has been since completed, and was opened in 1817. The harbour of Leith has only nine feet depth of water at neap tides, and sixteen at spring tides.

Leith carries on an extensive trade with the Baltic, Holland, France, Spain, Portugal, and the Mediterranean; also with the West Indies and America, besides a great coasting trade to the different parts of England and Scotland. The Greenland fishery is also prosecuted with great activity. It has several extensive rope walks and canvass manufactories: six or seven glass-houses, where bottles and flint glass are manufactured in great quantities; sugar refineries, soap works, and several breweries. The number of vessels that traded at the port of Leith for the year 1818, was 4,411. Pop. of the parishes of North and South Leith, 20,363. Lon. $3^{\circ} 12'$ W. Lat. $55^{\circ} 58'$ N.

Lexington, p-t. and cap. Rockbridge co. Va. on the N. branch of James river, 30 m. S. W. Staunton, 151 W. Richmond. Lon. 79° 40' W. Lat. 37° 50' N. The situation of the town is healthy and agreeable. It contains a court-house, jail, meeting-house for Presbyterians, a college, and about 100 dwelling-houses. The college is called Washington College, after General Washington, who endowed it with 100 shares in the James river canal. It was originally incorporated as an academy, in 1782, under the name of Liberty Hall Academy, but the canal stock having become within a few years very productive, it has assumed the form of a college. It has a philosophical apparatus, a library of about 2,000 volumes, a president, 2 professors, and about 50 students. The canal shares have in some years produced an income of more than \$3,000.

Lexington, p-t. and cap. Fayette co. Ken. is delightfully situated in a beautiful valley on Town Fork, a small stream which falls into the S. branch of Elkhorn river, 25 m. E. S. E. Frankfort, 76 E. Louisville, 88 S. Cincinnati. Lat. $38^{\circ} 6'$ N. Lon. $85^{\circ} 8'$ W. It is regularly laid out, and contains a court-house, a market-house, a masonic hall, 3 banks, a public library, a university, 2 female academies, 3 printing-offices, and 7 houses of public worship, 3 for Presbyterians, and 1, each, for Episcopalians, Baptists, Methodists, and Roman Catholics.—The growth of this town has been exceedingly rapid. In 1797, it contained only about 50 houses, and the best farmers lived in log cabins. It is now a large and beautiful town, covered with stately and elegant buildings, and in wealth and refinement is scarcely surpassed by any place in the western country. Pop. 5,279. The manufacturing establishments are various and extensive. Here are 4 nail factories, which manufacture 70 tons of nails yearly, 2 copper and tin manufactories, several cotton and woollen manufactories, 3 steam grist mills, 2 steam paper mills, ropewalks on a large scale, besides tanneries, breweries, distilleries, &c.—The country around Lexington is much admired for the beauty of its scenery, and is adorned with more than 50 handsome country seats.

Transylvania University in this place, was originally incorporated before the separation of Kentucky from Virginia. In 1818, it was re-organized under a board of thirteen trustees, who are chosen biennially by the legislature. In 1820, the officers were a president, who is also professor of the philosophy of the human mind, moral philosophy, and the elements of civil policy, rhetoric, logic, and philosophical grammar; 4 medical professors; a professor of common and civil law; a professor of chemistry; a professor of natural philosophy and mathematics; a professor of botany and natural history, and teacher of modern languages; 3 tutors; 2 assistant tutors; and the principal of the preparatory department. The number of students in 1822, was 384, of whom 46 were law students, 138 medical students, 133 undergraduates and 62 in the preparatory department. The buildings consist of two college edifices of brick, one erected several years since; the other, erected in 1818, is a spacious building, 130 feet by 50, 3 stories high, containing a chapel, four recitation rooms, a room for the library, and 30 rooms for students. The library contains about 3,000 volumes, and a considerable sum has recently been expended in the purchase of a chemical and philosophical apparatus.

Leyden, city, Netherlands, in S. Holland. It ranks among the largest cities of Holland, and is inferior to none in the spaciousness of its streets. It stands on a small branch of the Rhine. The canals that traverse the town, form, by their various intersections, upwards of fifty petty islands. The fortifications consist of a circular mound of earth, partly covered with turf, and partly faced with brick. Along this mound are fine shady walks, and outside of it a deep and broad moat. The uni-

versity of Leyden was formerly famous throughout Europe. It was founded in 1575. The number of professors is 21; viz. 4 of theology, 4 of law, 4 of medicine, 4 of philosophy, and 5 of languages. Their lectures are delivered in Latin. Their salaries, independent of a house and the small fees paid by the pupils, are somewhat more than £250. The number of students is at present (1819) about 300: of these about 80 study medicine, 100 philosophy and languages, and the others divinity and law. Belonging to the university is a valuable botanical garden, a cabinet of natural history, an anatomical theatre, an observatory, and a library. In the last, the manuscripts are said to form 10,000 volumes; the number of printed volumes is about 40,000. Printing, especially the printing of classical books, was formerly a great branch of trade here; but it is now much reduced. Leyden sustained a famous siege in 1573, against the Spaniards. 10 m. N. Liege, province, Netherlands, in the S. E. part of the kingdom, surrounded by the Prussian province of the Lower Rhine, the grand duchy of Luxemburg, and the province of Namur, South Brabant, and Limburg. Extent, 2,200 sq. miles. The aspect of the country is that of an undulating plain, except in the S. and E. where it is hilly and covered with extensive forests. Before the French revolution, this country was subject to the bishop of Liege, a member of the Germanic body. The revenue exceeded 100,000*l.* a year, and the bishopric had a regular constitution; but it is now abolished, and the province is incorporated with the new kingdom of the Netherlands. Its inhabitants, amounting to 354,000, are for the most part Catholics.
Liege, t. Netherlands, cap. of the preceding province, is on the Maese, in a pleasant valley,

surrounded with cultivated hills. The town is gloomy, and ill built. The inhabitants are actively engaged in trade and manufactures. The principal products of the surrounding territory are coal, iron and alum; also tobacco in considerable quantities. Liege has very extensive iron works; and is particularly famous for its manufactures of arms. The manufactures of clock-work are extensive; those of nails employ in the town and neighborhood from 10,000 to 14,000 workmen. 14 m. S. S. W. Maestricht, 53 E. by S. Brussels. Lima, province, Peru, bounded N. by Truxillo, E. by Tarma and Guancavelica, W. by the Pacific, and S. by Arequipa.

Lima, city, S. America, and cap. of the kingdom of Peru; also called *Ciudad de los Reyes*, or City of Kings, was founded in 1535, by Pizarro. It is situated in the spacious and delightful valley of Rimac, an Indian word, and the true name of the city itself. It is surrounded with a brick wall, flanked with 34 bastions, but without platforms or embrasure; the intention of it being merely to inclose the city, and render it capable of sustaining any sudden attack of the Indians. The houses, though low, are generally commodious, and of a handsome appearance. They are constructed of wood, on account of the frequent earthquakes. The grand square in the middle of the city is of great extent and beauty. In the centre is a large and magnificent fountain. On its sides are the cathedral and the archbishop's palace, the viceroy's palace, the town-house and prison. The other principal buildings of the city are the churches and chapels, which are partly built of stone, and decorated in the most splendid style with paintings and ornaments of the greatest value. The number of inhabitants in 1795, was 52,627, of whom about 20,000 were whites, and the rest negroes, indians, mulattoes, and mestizoes. Of the whites about 3,000 were monks and nuns. Luxury in dress, and a fondness for splendid retinues, constitute the prevailing passion of the inhabitants of Lima; and the public walks and malls are always crowded with carriages. All classes are fond of fine clothing, and wear the richest stuffs of Europe as ordinary dresses.

Lima, besides being the capital of Peru, has always been the emporium of the kingdom. The principal exports are gold and silver. The European goods in greatest request in Lima, and generally in Peru, are silk, superfine cloth, lace, fine linen, and other articles of luxury and show. Cutlery, and all instruments of iron are also in great request. Lima is about 2 leagues from the coast, and 30 from the Cordilleras. Lon. $77^{\circ} 7' 30''$ W. Lat. $12^{\circ} 2' 34''$ S.

Limerick, co. Ireland, bounded N. by the river Shannon, which separates it from the county of Clare; S. by Cork; N. E. and E. by Tipperary; W. by Kerry. Extent, 622,975 acres, or 970 sq. miles. The land is generally fertile, and peculiarly adapted for rearing sheep and other cattle. The flat grounds, which extend along the banks of the Shannon, are considered the richest and most fertile in Ireland. Pop. 250,000, of whom by far the greater proportion are Catholics.

Limerick, city, Ireland, and cap. of Limerick county, on the Shannon, about 60 miles from its mouth. It is large, elegant, and populous, and justly reputed the third city in Ireland. The principal public buildings are the custom house, the cathedral, and the bishop's palace. It contains four Protestant churches, and eight chapels for the Roman Catholics. There is also an extensive barrack for 22 companies of foot and four troops of horse. Limerick carries on manufactures of linen, woollen, and paper. Its export trade is also very considerable. It is a market for American produce. Its imports are rum, sugar, timber, tobacco, wine, bark, salt, and coals; and it exports beef, pork, butter, hides, rapeseed, and yarn. Vessels of 300 tons burden may discharge their cargoes at the custom house. Being naturally a city of great strength, from its position in the river Shannon, it has always been deemed a place of considerable importance. The population is variously estimated from 50,000 to 60,000. 94 m. S. W. Dublin. Lon. 8° 31' W. Lat. 52° 36' N.

Lincoln, a maritime county, Eng. on the E. coast, between the estuaries of the Humber and the Wash. It is bounded E. by the German ocean, N. by the river Humber, W. by York, Nottingham, and Leicester, and S. by Rutland, Northampton, and Cambridge. Extent, 2,787 sq. miles, or 1,783,680 acres. Throughout the whole of the eastern half of the county the land is uniformly low, marshy, and fenny. The fens were formerly inundated by the sea, but being protected by great embankments, form now one of the richest tracts in the kingdom. The drainage of them has been in a great measure accomplished within the last 40 or 50 years; it is still going on, and is perhaps one of the greatest works ever undertaken in the kingdom. Mr. Young reckons, that for 30 years previous to 1808, not less than 150,000 acres had been recovered. The fertility of the improv-

ed lands is extraordinary. They are adapted to all the ordinary crops, but are chiefly devoted to grazing. Pop. in 1811, 237,891; of whom 29,881 families were employed in agriculture; 13,184 in trade and manufactures; and 7,839 otherwise.

Lincoln, city, Eng. cap. of Lincolnshire, on the N. bank of the Witham. It is a city of great antiquity, and is the see of a bishop, whose diocese is the most extensive in the kingdom. Lipari Islands, a group of 12 islands in the Tuscan sea, belonging to Sicily, and situated between the N. coast of that island and the Italian continent. They extend from 13° 15' to 15° 39' E. lon. and from 38° 20' to 38° 50' N. lat. The whole group bears evident marks of a volcanic origin. Four of the islands only are inhabited. The collective population somewhat exceeds 20,000. Their principal exports are alum, sulphur, nitre, and other volcanic products, such as pumice stone, with which they supply a great part of Europe. *Lipari*, the largest of the group, is 20 miles from Melazzo, in Sicily, and 40 from Cape Vaticano, on the Italian continent. It has an extent of about 100 square miles. Pop. 15,000. It produces large quantities of good wine. *Lipari*, the chief town of the island, is on a bay, on the E. side.

Lisbon, the capital of Portugal, is on the N. bank of the Tagus, which here expands into a fine body of water, 9 miles in breadth. The appearance of Lisbon at a distance is extremely beautiful, picturesque, and majestic. But the interior of the city ill corresponds to its external beauty. Lisbon lies along the river, in the form of a half-moon, four miles in length, and from a mile to a mile and a half in breadth. It is unfortified, and open on all sides. It is divided into three parts, called *Affama*, *Bairro Alto*, and *Melo*. It has also three suburbs, to which may be added *Belem*, a pleasant town immediately adjoining Lisbon on the west. *Belem* enjoys in its upper part a pure air and delightful prospect. It has in consequence long been the residence of the court. Lisbon stands on three hills, the most westerly of which begins at a small river, flowing between the city and *Belem*. The number of public buildings in Lisbon is very considerable, there being in all 40 parish churches, 99 chapels, 75 convents or monasteries, and various hospitals. There are also thirteen squares, great and small. But of architectural curiosities, the greatest is the aqueduct, which, though not half a mile in length, passes in one part through a tunnel, in another across a defile. It is to the north of the city, and is partly of Roman, partly of Gothic architecture; the principal arch is Gothic, of the width of 107 feet, and is accounted one of the finest specimens of the kind in Europe. It is of such solidity, that at the great earthquake it withstood the shock, though the key-stone sunk several inches.

The earthquake of November 1st, 1755, the most violent in modern times, destroyed all the public buildings, and 6,000 of the dwelling houses. The loss of lives was computed at more than 30,000. Lisbon is the seat of the public offices not only of the government, but of the church. It is well provided with hospitals. The royal hospital, called *St. Joseph*, is an excellent institution. The number of patients admitted in a year amounts frequently to 12,000 or 15,000. The commerce of Lisbon is very great, comprising all the colonial, and perhaps three-fourths of the foreign trade of the kingdom. The harbour is uncommonly capacious and safe. With Spain a great deal of smuggling takes place in sugar, tobacco, and spices. 313 m. W. by S. Madrid, 9 E. of the mouth of the Tagus. Lon. 9° 8' 25" W. Lat. 38° 42' 20" N. Pop. 230,000.

Lisle, or *Lille*, city, France, cap. of the department of the North, on the Deule. Lisle, like most towns of Flanders, stands in a dead flat, the soil of which is rich and productive. Lisle presents an imposing appearance, from its extent, its fortifications, its canals, its squares, and its public buildings. Few cities of France, can vie with it in the straightness and width of its streets, the regularity of its buildings, and its general air of neatness.

Lisle is a fortress of the first rank. Its citadel, the *chef d'œuvre* of Vauban, is the first in Europe after that of Turin. It is a mile in circuit, and is situated to the N. W. of the town, from which it is separated by a spacious esplanade and a canal. It is surrounded by a double moat. Though distant from the sea, the trade of Lisle is extensive. Its manufactures consist of camlets, serges, and other woollen stuffs; cotton, calico, linen, silk, velvet, lace, carpets, soap, starch, tobacco, leather, glass, and earthenware. 18 m. E. W. corner, is 700 feet above the river at its base.—Litchfield Great pond, the largest in the State, is a beautiful sheet of water, comprising an area of about 900 acres. At its outlet, are numerous valuable mill-seats. There are in Litchfield 4 forges, 1 slitting-mill, 1 nail manufactory, 18 saw-mills, 6 fulling mills, 5 large tanneries, besides several other manufacturing establishments. There are 8 houses of public worship; 4 for Congregationalists, 3 for Episcopalians, and 1 for Baptists. In the Society of South Farms is Morris Academy, a flourishing institution, established in 1790. The Latin and Greek languages are taught at this seminary, and particular attention is paid to the morals of the students.

Litchfield village, incorporated in 1818, is pleasantly situated along the summit of a hill, commanding an extensive and delightful prospect. It contains a court-house, a jail, a bank, 2 meeting-houses, and 84 dwelling-houses. Here, also, is a private school for young ladies, which maintains a very distinguished reputation. The Litchfield Law School was established in 1784, by the Hon. Tapping Reeve. In 1798, the Hon. James Gould was associated as a joint instructor. This has been justly considered as the most respectable and systematic law school in the United States. The number of students educated since its establishment is more than 600.

Liverpool, s-p. Eng. in Lancashire, the principal commercial town in the British dominions except London, is situated near the mouth of the Mersey, which opens to it a ready access from the western sea, while a great system of canal navigation affords an inland communication with all parts of England. The Mersey affords an excellent anchorage for any number of vessels of any burden. The town extends along the E. bank of the river about three miles, and, at an average, about a mile inland. On the W. side of it, lie the docks, which, with the wharfs, ware-houses, &c. extend in an immense range along the bank of the river. On the other side, the town is prolonged into numerous suburbs, consisting of villas and country houses. The houses are built of brick, and covered with slate. The streets are mostly spacious and airy, some of them elegant, and the greater part lighted with gas from coal.

The buildings are in a style of costly elegance and splendour, suitable to the taste and opulence of its inhabitants. The principal of these are the town-hall, exchange buildings, corn exchange, lyceum, athenæum, Wellington-rooms, infirmary, work-house, blue-coat school, dispensary, and asylum for the blind. There are at present twenty churches belonging to the establishment; a greater number of chapels belonging to various denominations of dissenters; with 4 Roman Catholic chapels, a meeting-house for quakers, and a Jews' synagogue. The charitable institutions are numerous and well conducted. Among the literary establishments are the royal Liverpool institution, opened in 1817. The funds were raised by a subscription of 30,000*l.* in 100*l.* shares. The Botanic garden was established in 1801, by public subscription, at an expense of about 10,000*l.* The exchange buildings were erected in 1803, at an expense of upwards 100,000*l.* They are, perhaps, the most splendid structure ever raised in modern times for purposes purely commercial.

The fortunate situation in which Liverpool is placed, has given to its commercial career an impulse unknown to any other city in the old world. The most important branch of commerce is the trade with Ireland, whence is annually imported from 2,300 to 2,500 cargoes of provisions, grain, &c. for the supply of Liverpool and its shipping, Manchester, and other populous places in the neighbourhood; and, in return, are trans-shipped salt, coals, earthen ware, &c. The second branch of commerce is with the U. S. of America. Of this commerce, cotton forms the chief article, which may be termed the staple trade of Liverpool. In this branch, Liverpool far excels all other ports in the kingdom. The amount of cotton imported, in 1818, into Liverpool, was 423,120 bales:—London, 186,700;—Glasgow, 48,000;—

other ports, 6,700. The trade of Liverpool to other parts of the globe is very great, and rapidly increasing; and the opening of the out-ports to the East India trade will probably be an important era in her commercial history.

The most remarkable feature in the port of Liverpool, and for which it is distinguished from all other ports in Great Britain, is the convenience it presents in the construction and arrangements of the docks. The whole area covered by the various docks and basins, when complete, will be 77 acres. The number of vessels which paid dock duties in 1813 was 5,341, measuring 547,426 tons; and the amount of duties paid was 50,177*l*. In 1819 the number of vessels had increased to 7,849, measuring 867,318 tons, and paying 110,127*l*.

The manufactures of Liverpool are chiefly those connected with shipping, or the consumption of the inhabitants.

The city sends two members to parliament.

The population has regularly and rapidly increased for more than a century. In 1700 it was only 5,000; in 1760, 26,000; in 1790, 56,000; in 1801, 77,653; in 1811, 94,376, exclusive of 7000 sailors, and the inhabitants in villages nearly connected with the town; making, in the whole, probably 120,000.

The town and shipping are supplied with excellent water, from springs in the vicinity, through iron pipes, laid through all the streets. It is 17 m. N. Chester, 37 W. Manchester, 50 S. Lancaster, 103 N. by W. Birmingham, 206 N. W. London. Lon. 2° 59' W. Lat. 53° 25' N.

Loango, country, W. Africa, N. of the river Zaire or Congo. Its limits are somewhat vague. In the widest extent, it stretches from Cape St. Catharine to the Zaire, a coast of upwards of 400 miles. The climate is said to be very fine. It is never subject to hurricanes, nor even to violent winds. The soil is in general very fertile. The lakes and rivers abound with fish, and the forests with game. These gifts of nature are very little improved by an indolent people. The inhabitants are not supposed by Degrandpre to exceed 600,000. The government is despotic, and the dignity is transmitted only in the female line. The object for which, almost exclusively, Europeans have resorted to this coast, is the trade in slaves.

Loango, city of, capital of the kingdom of Loango. The land in the vicinity is extremely fertile, and the water excellent. The entrance of the bay of Loango is attended with danger, in consequence of a bank of rocks stretching half way across it. Lombardo-Venetian Kingdom, the name given, since the congress of Vienna in 1815, to the whole of Austrian Italy. See *Italy*, *Italy Austrian*, *Milan*, and *Venice*.

Lombardy, country of Northern or Upper Italy. The name though properly applicable only to the Vale of the Po, is commonly given to the whole tract of country lying between the Alps and the Appennines, or, to speak with more precision, between the frontiers of Switzerland and Tuscany. It is about 250 miles in length, and 150 at its greatest breadth. It corresponds in a great measure to the *Gallia Cisalpina* of the Romans, and derived its present name from the Lombards, a people who conquered it in the sixth century, and retained it under the form of a kingdom till the eighth. It comprehends the Milanese, along with a portion of the Sardinian territory, Parma, Modena, the Papal legations and a considerable part of the Austro-Italian government of Venice.

London, the capital of England, and metropolis of the united kingdom of Great Britain and Ireland, comprises in its widest sense the ancient city of that name, the city of Westminster, the borough of Southwark, and their respective suburbs. These form one vast metropolis, which is certainly the largest and most wealthy, and perhaps the most populous in the world. The cathedral church of St. Paul, which is nearly in the centre of the city, is in lat $51^{\circ} 31'$ N. and lon. $0^{\circ} 5' 37''$ W. The cities of London and Westminster are in the county of Middlesex, on the N. bank of the Thames; and the borough of Southwark is on the S. bank, in the county of Surry. The greatest extent of London is from W. to E. nearly 7 miles. The circumference is about 30 miles. The inclu-

ded area is 11,520 square acres. London may be considered as divided into five separate districts. 1st, *The City of London*, where the commerce and most of the trade of the metropolis is conducted; which accordingly consists chiefly of shops, warehouses, wharves, public offices, and counting-houses. 2dly, *Westminster*, which contains the royal palaces, the houses of lords and commons, the courts of law, and government offices. 3dly, *The West end of the Town*. This is the best and most fashionable part of the town. 4thly, *The East end of the Town*, which is devoted to commerce, to ship building and the various trades connected with shipping. Here are also the London, West India, and East India docks. 5thly, *Southwark*, and the places contiguous, which are also devoted to commerce and ship-building; and distinguished by a vast number of manufactories, iron-foundries, glass-houses, &c.

The main streets of London run parallel with the Thames from E. to W. and the cross streets run mostly from N. to S. The streets near the Thames, and most of the cross streets in the city, are very narrow. All the streets are well paved with granite stones, set end-ways for the carriages, and on the sides with flag-stones, for foot passengers. Underneath the pavements are large vaulted sewers, which communicate with each house by drains, with each other by proper openings, and with the surface of the streets by gratings, so as to carry off all the filth and waste water into the river Thames. The subterranean works of London, consisting of sewers, drains, water pipes, and gas pipes, are most extensive and curious. The city contains about 8,000 streets, lanes, alleys, courts, &c.; 60 squares, and 160,000 houses, warehouses, and other buildings. These are mostly built of brick, of a pale colour.

The principal public buildings in the city, and in the eastern part of the town, are the tower; the new mint; the Trinity-house; the bank; the mansion-house; the royal exchange; the East India house; the auction mart; the commercial mart; the London institution; the custom-house; the excise-office; guildhall; the bridges of London, Southwark, and Blackfriars; the monument; the post-office; Newgate; Giltspur-street compter; Whitecross-street prison; St. Luke's hospital; the churches of St. Paul, St. Stephen's, Walbrook, St. Mary-le-bone, and St. Bride's, Fleet-street. The tower is chiefly used as a state prison and depository for arms, records, and property belonging to the crown. The cathedral church of St. Paul holds the most distinguished rank among the modern works of architecture in the British empire. It was commenced in 1675 and finished in 1710, by one architect, sir Christopher Wren, at an expense of 747,954*l*. The principal public buildings west of the city, exclusive of the royal palaces and houses of the nobility, are Westminster abbey; Westminster hall; Somerset-house; the king's theatre, or opera-house; the theatres of Covent-garden, Drury-lane, the Hay-market, the English opera-house, and the British museum.

But the most interesting architectural objects in London are its bridges. London bridge, however, is a clumsy structure. The narrowness of its arches obstructs and endangers the navigation, while their unequal sizes offend the eye. This bridge is, in fact, like a thick wall, pierced with small unequal holes, through which the current ushes with great velocity. The fall at about

half ebb tide is very great, and the passage dangerous for boats and barges. This bridge is 915 feet long, and 45 broad. It has been calculated that there pass daily over London bridge, 89,640 foot passengers, 769 waggons, 2,924 carts and drays, 1,240 coaches, 485 gigs and taxed carts, and 764 saddle horses. Westminster bridge cost 400,000*l.* and Blackfriar, 150,840*l.* The Strand, or Waterloo bridge, is one of the noblest structures of the kind in the world. It was begun in 1811, and opened in 1817, on the anniversary of the battle of Waterloo. It consists of nine equal arches, each of 120 feet span. It is built of granite, under the direction of John Rennie, Esq. and cost the subscribers upwards of 1,000,000*l.* The Southwark bridge, opened in May, 1819, was built by private subscription, under the direction of Mr. Rennie. It consists of three arches, of which the centre is 240 feet span, and each of the side ones 210 feet. The arches are of iron, springing from stone piers and abutments. The Vauxhall bridge contains nine arches of 78 feet span each.

The following table shews the increase of the population of London from 1700 to 1811. In this calculation, one twenty-fifth part is added for occasional visitants, sailors, &c.

	1700.	1750.	1801.	1811.
London within the walls,	139,300	87,000	78,000	57,700
Without the walls,	69,000	57,300	56,300	68,000
Westminster, Out parishes within the bills of mortality,	130,000	152,000	165,000	168,000
Parishes not within the bills of mortality,	326,900	357,600	477,700	593,700
Total,	9,150	22,350	123,000	162,000
	674,350	676,250	900,000	1,050,000

The annual mortality has greatly diminished since 1700, when it was 1 in 25; it is now about 1 in 38.

It is calculated that London contains 122 churches of the established religion, 120 chapels of ease, in parishes where the population is too great for their respective churches; 30 churches and chapels belonging to foreign Christians; six synagogues of the Jews; and about 200 meeting-houses of the different denominations of dissenters and Roman Catholics.—The public charities of London, (exclusive of parochial establishments,) chiefly consist of 22 hospitals for the sick, hurt, lunatic, and pregnant; 41 free schools, with perpetual endowments, for the maintenance and education of 3,500 poor children; 18 asylums of refuge for destitute foreigners, repentant prostitutes, juvenile delinquents, and the children of criminals; 107 almshouses, 20 dispensaries for affording to the poor, medicines and advice gratuitously. The average amount of the poor's rate during the three years, from 1813 to 1815, was more than 530,000*l.* and the number of poor relieved was 117,316 annually. The whole amount annually expended in the metropolis, in support of charitable institutions, including the poor's rate, is estimated at one million sterling.

The commerce of London has increased won-

derfully within a century. In 1701, there were 560 vessels belonging to this port, carrying 84,882 tons, and 10,065 men; in 1732, 1,417 vessels, carrying 178,557 tons, and 21,797 men. The official value of the imports in 1800 was 18,843,172*l.* 2*s.* 10*d.*, and of the exports, 25,428,922*l.* 16*s.* 7*d.* Their real value was 68,000,000*l.* nearly two thirds of the whole trade of the kingdom. The total amount of the imports and exports of London, is now about 70,000,000*l.* annually. The vessels belonging to the port now amount on an average to 3,000, carrying 600,000 tons, and 45,000 men. About one-sixth of the tonnage, and one-fourth of the men are employed in the East India trade, and about one-sixth of the tonnage, and about one-third of the men, in the West India trade. The manufactures of London consist chiefly of silk, cutlery, jewelry, watches, japan-ware, cut glass, books, cabinet work, carriages, and other fine goods and articles of elegant use. The manufactures of silk in Spitalfields, and of watches in Clerkenwell, usually employ about 7000 people each. In general the London manufactures are esteemed the most excellent of their respective kinds, and produce higher prices than those of any other place.

The following are among the calamities recorded in the history of London. In 664, the city was ravaged by the plague. In 764, 798, 801, and 1077, it suffered severely by fires. In 1090, a tremendous hurricane overthrew 600 houses. In 1258, 20,000 persons died of hunger. In 1348, a terrible pestilence commenced, which lasted several years, and destroyed about 100,000 inhabitants. In 1407 the plague carried off 30,000; in 1500, 30,000, and 1603, a greater number. In 1665, the great plague carried off 68,850 persons, according to the bills returned, but the real number was much greater. The next year a fire broke out which destroyed 13,200 dwelling houses, and the loss was estimated at more than 10,000,000*l.* sterling. In 1739, 1740, happened one of the most intense frosts ever known in England.

Long Island, isl. belonging to the State of New York. It extends in length from the city of New York, in an easterly direction, 140 miles. Its average breadth is 10 miles, and it contains 1,400 sq. miles. It is divided into three counties, King's, Queen's, and Suffolk; and these again into 19 townships. The north side of the island is rough and hilly, but the soil is well calculated for raising grain, hay, and fruit. The south side of the island lies low, with a light sandy soil, but well adapted to grain, particularly Indian corn. On the sea coast are extensive tracts of salt meadows, which extend from Southampton to the W. end of the island. King's county, at the west end of the island, is inhabited chiefly by Dutch. This county, and the western part of Queen's, have been rendered fertile and productive by husbandry. The greater part of Suffolk has a poor thin soil,

and much of it is not worth cultivating, yet it is well furnished with wood, and sends large quantities of this article to the New York market. A narrow beach of sand and stones runs along the S. side of the island for 100 miles. There are various inlets through the beach, which admit vessels of 60 or 70 tons. The long narrow bay formed by the beach is in the widest places, 3 miles broad. Pop. in 1790, 41,782; in 1800, 42,097; in 1810, 48,752, and in 1820, 56,978.

Loochoo Islands, called by Mr. Macleod, *Lew-chew*, and by others, *Liqueo*, or *Lieoukiou*, a group in the Eastern ocean, S. of Japan, and about 400 or 500 miles E. of China. They consist of 36 islands. Great Loochoo is 50 miles long, and from 12 to 15 broad. It was very imperfectly known to Europeans, till visited by Captains Maxwell and Hall, in their return from the late embassy to China. The climate and soil seem to be among the happiest on the globe. The whole coast is surrounded with coral reefs. There are, however, several excellent harbours. The inhabitants are of a diminutive stature, the average height of the men not exceeding five feet two inches. They are, however, strong, well made, and athletic. Their lineaments and appearance indicate a descent from Japan or Corea. In complexion they are quite as fair as the natives of Spain or Portugal. Their disposition appears to be peculiarly gay, gentle, and amiable, and they seem to be gifted with a re-

markable natural politeness. The capital is Kintching, in lon. $127^{\circ} 52'$ E. lat. $26^{\circ} 14'$ N.

Louisburg, t. and cap. of the island of Cape Bre-ton, on a point of land on the S. E. side of the isl- and. The harbour is excellent. It is more than half an English mile in breadth in the narrowest part, and six miles in length from N. E. to S. W. and has six or seven fathoms of water in every part of it. In winter it is totally impracticable, being en- tirely frozen. The principal trade of Louisburg is the cod fishery. It was taken from the French by the American forces, commanded by Sir Wil- liam Pepperel, and the English fleet, under Sir Peter Warren, in the year 1745; but afterwards restored to France by the treaty of Aix-la-Cha- pelle, in 1748. It was again taken by the English, under admiral Boscawen and lieutenant-general Amherst, on the 27th of July 1758, and its fortifi- cations since demolished. Lon. $59^{\circ} 50'$ W. Louisiana. This name was originally applied to the whole country west of the Mississippi, in- cluded within the limits of the present States of Louisiana and Missouri, and of the Arkansas and Missouri territories. In 1803, this country was purchased by the U. S. from France, for about \$15,000,000. Its boundaries have been a subject of much dispute; but by the treaty with Spain, ratified the present year, (1821) the controversy is finally settled. By this treaty, the boundary on the side of the Spanish dominions, begins in the gulf of Mexico, at the mouth of Sabine river, and proceeds up that river to the parallel of 32° N. lat.; thence due N. to Red river; thence up Red river to the meridian of 100° W. lon.; thence along that meridian to Arkansas river; thence up the Arkansas to its source, and to the parallel of 42° N. lat.; thence along that parallel to the Pa- cific ocean. The cession of Florida by Spain puts an end to the dispute respecting the boundary in that quarter. The northern boundary remains to be adjusted.

Louisiana, one of the U. S. bounded N. by Ar- kansas Territory; E. by the State of Mississippi; S. by the gulf of Mexico; and W. by the Spanish dominions. The boundary, runs as follows: Be- ginning in Mississippi river, at 33° N. lat. it pro- ceeds down the river to lat. 31° ; thence E. along that parallel to Pearl river; down Pearl river to the gulf of Mexico; along the gulf of Mexico, in- cluding all the islands within six leagues of the shore, to the mouth of the Sabine; up the Sabine

to the parallel of 32° N. lat.; thence due N. to the parallel of 33° ; thence E. along that parallel to the place of beginning. It extends from lat. 29° to 33° N. and from lon. 89° to 94° W. and contain- 48,220 square miles, or 30,860,800 acres. On the gulf of Mexico it reaches from Pearl river to the Sabine. The Mississippi river forms the eastern boundary of the State from lat. 33° to 31° N. In lat. 31° Red river empties itself into the Mississip- pi from the N. W. Below the mouth of Red riv- er, instead of receiving the tribute of inferior streams, it divides into numerous branches or out- lets, which, diverging from each other, slowly wind their way to the sea, forming what is called the Delta of the Mississippi. Of these outlets, the most western is the Atchafalaya, which leaves the main stream 3 miles below the mouth of Red river, and diverging westward, flows into Atchafalaya bay, in the gulf of Mexico. About 128 miles below the Atchafalaya, is the outlet of the Plaquemine, whose main stream unites with the Atchafalaya; though it has other communications intersecting the country in different directions. Thirty-one miles below the Plaquemines, and 81 above New- Orleans, is the outlet of La Fourche, which com- municates with the gulf of Mexico by two mouths. Below La Fourche, numerous smaller streams branch off from the river at various points. On the east side of the Mississippi, the principal out- let is the Iberville, which communicates with the gulf of Mexico, through lakes Maurepas, Ponchar- train, and Borgne.—A large extent of country in this State is annually overflowed by the Mississip- pi. From lat. 32° to 31° the average width of overflowed land may be estimated at 20 miles; from lat. 31° to the efflux of La Fourche, a lit- tle above lat. 30° the width is about 40 miles. All the country below La Fourche is overflowed. The whole extent of lands thus inundated is 8,340 sq. miles; and if to this be added 2,550 square miles for the inundated lands on Red river, the whole amount in the State will be 10,890 square miles. It must not be imagined, however, that this ex- tensive tract is one continued sheet of water. It is rather intersected by innumerable canals and lakes, which interlocking in a thousand mazes, chequer the whole face of the country. The area actually submerged, is estimated at only 4,000 square miles. It is remarkable that the banks of the Mississippi, and several of its branches are considerably elevated above the level of the ad- jacent country. This is occasioned by a more co- pious deposition along the margins, than at a dis- tance from them. Hence it happens that all these rivers are skirted with a rich border of alluvial land, from 400 yards to a mile and a half in breadth, while the surface in the rear is covered with lakes and impassable swamps. The fertile tracts of alluvial land which every where border the shores of the Mississippi, have given rise to an artificial work of great extent, for confining its stream, and for securing the country from the ef- fects of its inundations. This work is an embank- ment on the margin of the river, called the *Lecce*. On the E. side of the Mississippi, this embankment commences about 60 miles above New-Orleans, and extends down the river for more than 130 miles. On the W. shore, it commences at Point Coupée, 172 miles above New-Orleans. It is here that the navigator in descending the river emerges from a gloomy wilderness, presenting detached settlements at long and tedious intervals, into beautiful and finely cultivated plantations. On the side of this elevated artificial bank, is a range

of handsome, neatly built houses, appearing like one continued village, as far as the city of New-Orleans.

The N. W. section of the State has been till recently but very partially explored. It is intersected by Red river, which enters the State in one undivided stream, and after flowing about 30 miles, spreads out into a number of channels and lakes, forming an inundated swamp, six miles wide, and fifty long. The part of the State between Red river and the Mississippi, is intersected by the Wachitta.

Along the southern border of the State from Teche river to the Sabine, are vast prairies, which for every purpose of a general sketch, may be described as one immense meadow. The part about the mouths of the Mississippi, for 30 miles, is a continued swamp, destitute of trees, and covered with a species of coarse reed, 4 or 5 feet high.—Nothing can be more dreary than the prospect from a ship's mast, while passing this immense waste.

The best parts of the State which have been brought under cultivation are the narrow strips of rich alluvial land on the banks of the Mississippi, the Teche, Red river, and Wachitta, and also the country called Feliciana. The staple productions are cotton, sugar, and rice. Tobacco and indigo could be as extensively cultivated as cotton, but they do not afford the same profit. On the banks of the Mississippi, La Fourche, the Teche, and the Vermillion, below lat 30° 12' N. wherever the soil is elevated above the annual inundations, sugar can be produced; and the lands are generally devoted to this crop. In all other parts of the State cotton is the staple. The best districts for cotton are the banks of Red river, Wachitta, Teche, and the Mississippi. Rice is more particularly confined to the banks of the Mississippi, where irrigation can be easily performed.—The quantity of land within the State adapted to the cultivation of the three staples, has been estimated as follows: sugar, 250,000 acres; rice, 250,000; cotton, 2,400,000. Some of the sugar planters have derived a revenue in some years of \$600 from the labor of each of their slaves; from \$350 to \$450 is the ordinary calculation. The cultivation of cotton is believed to be equally profitable. The amount of sugar made in Louisiana in 1810, was about 10,000,000 lbs.; in 1814, not less than 15,000,000; and in 1817, 20,000,000, or nearly one-third of the whole amount consumed in the United States.—The extensive prairie land, in the S. W. part of the State, embracing the district of Opelousas, and the greater part of Attacapas, is most admirably adapted to the rearing of cattle, and has hitherto been used almost exclusively for that purpose. Many of the richer planters on the Teche and Vermillion, have stock farms established on Mermantau and Calcasieu rivers, and count their cattle by the thousand.

Louisiana was admitted into the Union in 1811. In 1810 it was called the Territory of Orleans, and contained 76,556 inhabitants, of whom 34,311 were whites, 7,585 free blacks, and 34,660 slaves. To this number may be added 10,000, as the population of that part of West Florida, which was annexed to the State in 1812. In 1820, the whole number was 153,407. Slaves 69,064. Engaged in agriculture 53,041, in commerce 6,251, in manufactures 6,041. This population is principally confined to the settlements on the Mississippi. In the upper settlements the inhabitants are principally Canadians; in the middle, Germans; and

in the lower, French and Spaniards. A few years since a majority of the inhabitants were Roman Catholics. The clergy of this order, however, are not numerous; and the constant introduction of emigrants from the north is effecting a rapid revolution in all the institutions of the country.

In journeying from New-Orleans to the mouth of Sabine river, we meet with men in every stage of civilization. In New-Orleans, and other places on the banks of the Mississippi, the sugar and cotton planters live in splendid edifices, and enjoy all the luxury that wealth can impart. In Attacapas and Opelousas, the glare of expensive luxury vanishes, and is followed by substantial independence. In the western parts of Opelousas are found herdsmen and hunters; the cabins are rudely and hastily constructed, and the whole scene recalls to the imagination the primeval state of society.

The exports from Louisiana are not confined to its own produce. The bulky articles of all the western States go down the Mississippi, and are cleared out at New-Orleans. The value of the exports in 1804, was \$1,600,362; in 1806, \$3,887,323; in 1815, \$5,102,610; in 1817, \$13,501,036, nearly two thirds as much as that of the whole United States in 1791. The number of arrivals and clearances at the port of New-Orleans during the year ending October 1st, 1817, was 1,030. During the same year, 1,500 flat-bottomed boats, and 500 barges, arrived in the city from the upper country. The duties on merchandize paid in this State in 1804, was \$279,272; in 1807, \$480,275; in 1815, \$934,909.

Louisville, p-t. and cap. Jefferson co. Ky. is pleasantly situated on an elevated and beautiful plain, on the S. bank of the Ohio, immediately above the rapids, 120 m. below Cincinnati, 50 W. Frankfort. Lat. 38° 10' N. Lon. 85° 30' W. Pop. 4,012. It contains an elegant court-house; a jail; a theatre; 3 banks, one of them a branch of the U. S. bank; an insurance company; a market-house; a hospital; 3 houses for public worship, 1 for Roman Catholics, 1 for Presbyterians, and 1 for Methodists; 3 printing offices; and 670 dwelling houses, principally brick.—Among the manufacturing establishments is a distillery, established by a company formed in New-England in 1816, and incorporated in this State, under the name of the Hope Distillery company. It is the most extensive establishment of the kind in the U. S. yielding 1,200 gallons per day. Here also are 5 tobacco manufactories; a factory for the construction of steam engines, in which about 60 workmen are employed; a soap and candle manufactory, supposed to be the largest in the western country, and producing 12,000 pounds of soap, and 6,000 pounds of candles per week; a sugar refinery; a steam flour mill, and 2 steam saw mills. The commerce of Louisville and

Shippingport has increased astonishingly within a few years. There are now upwards of 25 steamboats, measuring together 6,050 tons, employed in their commerce. A canal around the rapids of the Ohio at this place has long been in contemplation; but nothing effectual has yet been done.

Lubec, p-t. and port of entry, Washington co. Maine, in Passamaquoddy bay, on the main land which is here separated from the island of Campobello by a strait 12 rods wide, called the Narrows or Western entrance of the Bay. The harbor is spacious, sheltered from every wind, and never closed by ice. The principal settlement is at Flagg's point on the Narrows. It was com-

menced in 1815, and is a flourishing village, containing in 1822, 64 dwelling houses, 34 stores, several shops, etc. and a handsome church for Congregationalists. The inhabitants are chiefly engaged in commercial pursuits, particularly in the lumber trade and the fisheries. Most of the plaister received into the United States from the British Provinces is shipped through this port. Here is kept the custom-house for the district of Passamaquoddy. On West Quoddy head is a light-house. Lubec lies 3 m. S. of Eastport, with which it has communication by a ferry. 28 E. Machias. Pop. 1,430. Lon. 67° 5' W. Lat. 44° 47' N.

Lubeck, a free city in the north of Germany, on the Trave, a navigable river, which joins the Baltic about 8 miles below. It is surrounded by walls; but the other military defences, which were of great strength, were demolished after the town was surrendered to the French in 1806, and the moat has been filled up. Lubeck was formerly a bishop's see, and still has a cathedral and four parish churches. The council-house was in former ages the place of meeting for the deputies from the Hanse towns, among which Lubeck had the precedence. The imports consist chiefly of wine from France, and manufactures from England; the whole to no great amount, Hamburg having great advantages, from its easier access to the ocean, and more extensive communication with the interior. Lubeck now forms part of the Germanic confederation, and along with the other free towns sends a deputy to the diet. Pop. of the city, 25,000, but including the annexed territory, it is 40,650. 33 m. Lucca, a dutchy of Italy, surrounded by Tuscany, Modena, and the Mediterranean. Extent, 420 square miles. Pop. 138,000. Two-thirds of its territory are supposed to be covered by mountains and defiles; the remainder comprises the delightful plain around the city, and a number of fertile vallies. From the middle of the 15th century till 1805, Lucca was an independent republic. In 1805 its government was changed by the French; but in 1815, by the 101st act of the congress of Vienna, it was erected into a dutchy, and given as an indemnity to the infant of Spain, Maria Louisa.

Lucca, a city of Italy, capital of the dutchy of the same name, is situated in a fertile plain, watered by the Serchio, and surrounded with beautifully cultivated hills. Its fortifications, though regular, and in good repair, are not of great strength. It is the seat of the government offices, and the see of an archbishop. It has likewise an university, a large school, and an academy of arts and sciences. The chief manufactures are of cloth and silk; and the trade in the latter article, and in olive oil, is very considerable. 19 m. N. N. E. Leghorn, 28 W. Florence. Lon. 10° 34' E. Lat. 43° 54' N. Lusatia, formerly a province of the German empire, with the title of a margraviate, lying between the Elbe and the Oder, and surrounded by Brandenburg, Bohemia, Silesia, and part of Saxony. It was divided into Upper and Lower Lusatia, both of which belonged to Saxony until 1815. Extent of the whole, about 4,250 sq. miles. Pop. about 465,000. Upper Lusatia formed the southern and larger part of the margraviate, and contained 2,300 sq. miles. The chief wealth of this country arises from its manufactures: among which are woollens, linen, cotton, leather, stockings, gloves and hats. By the treaty of Vienna, the half of this province was annexed to Prussia, and is now included in the government of Liegnitz in Silesia. The part that remains to Saxony, is computed at 1,170 sq. miles, and the population at 170,000. Lower Lusatia formed the northern part of the margraviate, and now belongs entirely to Prussia. Its surface is computed at 1,940 sq. miles.

Lyons, or more properly *Lyon*, a large and celebrated city of France, before the revolution cap. of a province called Lyonnois, and now cap. of the department of the Rhone. It is built at the conflux of the Rhone and Saone. The houses are for the most part of hewn stone, and are generally five or six stories high, built in a heavy style of architecture, remarkable for nothing but its solidity. There are 4 public squares, one of which, called *La Place de Bellecour*, is entitled to rank among the finest in Europe. Among the literary institutions, are an academy of sciences, founded in 1700, and an academy of fine arts, in 1724. The public library is said to contain about 120,000

volumes. Lyons is the first manufacturing town in France, and is particularly noted for its silks. In former years it supplied a great part of Europe with silk goods. In 1789, the number of bales of raw silk consumed in France, was about 12,000, of which three-fourths were used at Lyons. Its manufactures were greatly injured during the troubles of the revolution. In 1800, the quantity of silk used in France was only 5,500 bales, of which Lyons used from 3,000 to 4,000. The other manufactures suffered in proportion. The number of looms at Lyons for velvet, silk, gauze, crape, and thread, was, at the commencement of the revolution, 9,335, and the persons employed, 58,600; in 1803, there were 7,000 looms, but only 1,553 at work. The large manufactory of felt hats, which formerly employed 8,000 hands, had fallen to 1,500. The printing and bookselling of this place are next to Paris in importance. The merchants of Lyons have very extensive connections; they trade with Spain, Italy, Holland, Switzerland, and even with the states of the north. From Spain they import fine wool; from Italy, large quantities of raw silk. Their transactions with the Levant were at one time extensive. There are four annual fairs, in January, May, August, and November, all well frequented. Within a few years, the fine silk manufactures are beginning to resume their former activity. The orders for goods in 1818 could scarcely be answered, and the quantity exported in that year, was valued at 60,000,000 francs. Pop. before the revolution, 150,000; at one period since, it was reduced to about 80,000; but is at present nearly 120,000. The town is the see of an archbishop, and the seat of the provincial courts. 190 m. N. by W. Marseilles, 280 S. S. E. Paris, 300 E. N. E. Bourdeaux. Lon. 4° 49' E. Lat. 45° 45' N.

Macao, t. China, on a peninsula, or rather island in the bay of Canton. It belongs to the Portuguese, and is the only European settlement within the limits of the Chinese empire. The English and other nations have factories here. Macao is a place of some extent; the streets are narrow and irregular; the houses are built of stone, on the European plan, but not elegantly. Vessels of burden cannot enter the harbour; but must anchor six or seven miles to the east. The place is defended by strong forts, mounted with heavy cannon; but the Portuguese garrison seldom exceeds 250. Vessels destined for Canton, are commonly detained about twenty-four hours in Macao roads, till the Chinese government send out a pilot, and permission to enter the Tigris.— This was at one time a place of the greatest importance to the Portuguese, being the centre of their trade, not only with China, but with Japan, Siam, Cochin-China, and all the countries in this part of Asia. Since the general decline of their Indian trade, which has been prosecuted by other nations with such superior success and activity, Macao has sunk into a place of comparatively little importance. 60 m. from Canton. Pop. 700,000. The soil is in general fertile, and the climate serene and healthy. In the southern districts, and particularly on the coast, are produced great quantities of corn, cotton, wine, oil, and tobacco. But the wealth of the country at large lies in its flocks of sheep, whose wool is in great request. Upwards of 150,000 bales of it, to the value of nearly £1,500,000 sterling are annually exported to Germany, France, and Italy, through the medium of the port of Salonica.

After the junction of the two branches, the river widens into a bay called Machias bay, which communicates with the ocean at Cross island, 6 miles below. There are falls on each of the branches, about 3 miles above their confluence, which afford numerous seats for mills.

Machias, p-t. port of entry, and cap. Washington co. Maine, on Machias bay, 236 m. N. E. Portland. Lat. 44° 40' N. Pop. in 1810, 1,570; in 1820, 2,033. The principal settlement is at the falls of the west branch of Machias river. At the falls of the east branch of the river, is another considerable village. A bridge is erected across Middle river between the two villages, which, with the causeway, is 1,900 feet long. Machias contains a court-house, jail, Congregational church, and 2 academies. Washington Academy in this town was incorporated in 1792. Its funds consist of Plantation No. 11, lying on the E. side of Machias bay. This tract is now rapidly settling, and will soon be incorporated as a town. The academy in the eastern village was recently established. The building, which is 50 feet by 38, and two stories high, was presented by the inhabitants of the village, together with a library and philosophical apparatus valued at \$1,500. In addition, the academy is endowed with \$14,000 productive funds. It went into operation in 1823. There is a post-office at each of the settlements. Machias is a thriving town, and carries on considerable trade, principally in lumber. Here are 26 saw-mills, which cut on an average upwards of 10,000,000 feet of boards in a year.

It is intersected throughout its whole length by a chain of very lofty mountains. The forests contain a prodigious variety of most beautiful trees. Timber fit for masts and ship-building is abundant. Iron mines of excellent quality are dispersed throughout the mountainous districts. The island has a fine soil, and a genial climate. The soil enables the earth, with very little tillage, to produce the most abundant crops. Rice is the vegetable chiefly cultivated, and the staple food of the inhabitants. Potatoes are also a considerable object of culture. Under European cultivation, the number of products might be infinitely varied. The sugar cane is raised with particular success. Silk in great abundance is produced spontaneously. The sheep yield a very fine wool. The cocoa nut, the banana, and other useful trees flourish here, to which are added a number of species peculiar to the island. The population is estimated at 4,000,000. The inhabitants are of a considerable variety of races, much intermingled with each other. But it is still possible to discover the race of real negroes, having flat features and woolly hair, as on the coast of Africa. Some of these claim their descent from the Arabs, others from the Jews. The former profess the Mahometan religion. The French made several fruitless attempts to form settlements on the island. Their most permanent establishment was at Fort Dauphin, in the S. E. quarter.

Madeira, isl. off the N. W. coast of Africa. It is 54 miles long and 21 broad, and contains 1,100 sq. miles. It belongs to the Portuguese. In 1807, however, when the Portuguese government were compelled to emigrate to Brazil, Britain occupied the island in trust for her ally, and in that capacity has since continued to hold it.—Madeira consists altogether of a collection of lofty mountains, the highest of which rises upwards of 5,000 feet above the level of the sea. On the declivity of these mountains, all the productions of the island are raised. The lower slopes are covered with vines, the loftier summits with forests of pine and chestnut. The isle produces wheat, barley, and oats; but in such small quantity, that two-thirds of the consumption of grain must be drawn from the Azores, and from America. The population is estimated by Mr. Barrow at 90,000. The commerce of the island consists almost entirely in the export of its wine, to the annual amount of from 15,000 to 17,000 pipes. The best is that called London particular Madeira; the second, which is inferior, is called London market; the third is that suited to the India market; the fourth is for the New-York market; and there is a fifth, and still inferior kind, which is called cargo. The prices of these wines have experienced an extraordinary rise within the last twenty-five years. That of the best kind, or London particular, has since 1793 been at the following rates per pipe: 1793, 35*l.*; 1798, 42*l.*; 1806, 44*l.*; 1811, 54*l.*—The imports from Great Britain amounted in 1809, to 518,148*l.* of which nine-tenths consisted of British manufactures. The Americans also import provisions, lumber, &c. to the value of about \$590,000. Adjacent to Madeira is Porto Santo, a small island, rather high, and with a good roadstead; and the Deserters, which, as their name imports, are uninhabited. These, with Madeira itself, compose the group of the Madeiras. Funchal, the capital, is in lon. $17^{\circ} 6'$ W. Lat. $32^{\circ} 37'$ N.

Madras Territory, country, India, which has gradually increased within the last 70 years, from a barren slip of land of 5 miles in length, to the extent of a very large and populous kingdom. The countries subject to the British presidency of Fort St. George, or Madras, now comprehend nearly the whole of India south of the river Kistnah, and the extensive province denominated the Northern Circars; within these boundaries, however, there are still three native princes, who collect the revenues, and exercise a certain degree of authority in their respective states; but are wholly dependent on the British government, are protected by a military force, and pay a large annual tribute. These princes are the rajahs of Mysore, Travancore, and Cochin. The revenues of Madras arise principally from the land, but the charges exceed the receipts by above 500,000*l.* per annum.

Madras, a celebrated city and fortress of the south of India, and cap. of the British possessions in that quarter. It is situated on a flat sandy shore, where the surf runs with extreme violence. Madras was taken by the French in 1744, but restored to the British, in 1749, since which it has been gradually improved, and is now one of the strongest fortresses in India. All the offices of government, and courts of justice, are in the fort, which is called Fort St. George. The native, or black town, is north of the fort, at the distance of nearly a mile. It is surrounded by fortifications sufficient to repel any sudden attack. In 1794, the population was estimated at 300,000. The government of Madras is subordinate to the supreme government of Bengal. A college has been lately instituted, for instructing the junior civil servants in all the native languages. The soil in the vicinity of Madras is very poor, and formerly provisions were very scarce and dear. Considerable trade is carried on with Europe, China, Ceylon, New Holland, and different parts

of India; but owing to the want of a navigable river, and the difficulty of landing goods, the town labours under great disadvantages. The black town is inhabited by persons from all parts of the world, who are left to the free enjoyment of their religion. It contains an Armenian and Portuguese church, a mosque, and several Hindoo temples. There are 12 missionaries at Madras in the employment of the English missionary Societies. They have established a printing press, and several schools. The climate is very hot, but not unhealthy. Lon. $80^{\circ} 25'$ E. Lat. $13^{\circ} 5'$ N.

Madre de Popa, t. New Granada, 54 m. E. Cartagena.

Madrid, the capital of Spain, is situated near the centre of the kingdom, in New Castile, near the small river Manzanares, about 300 miles from the sea on each side. It stands on several eminences in the centre of a large plain, which is elevated 2,200 feet above the level of the sea, so that Madrid is the most elevated capital in Europe. It is surrounded by a high earthen wall, but has no ditch, or any other means of defence. The old streets are narrow and crooked, but many of the others are wide, straight, and regular; they are now kept clean, and well lighted. The private houses of Madrid are uniform, and have very little striking in their exterior; they are generally low with grated windows. The public buildings are not remarkable for their architecture. The most splendid is the royal palace, which is of a square form, its walls extending each way 404 feet, and being 86 feet in height: the inclosed court is 120 feet square. It is strongly built; its walls are thick; its foundations deep; its pillars strong; and every room is vaulted, no wood being admitted into its construction. It is elegantly ornamented on the outside; the stair case is grand, and the apartment spacious, particularly the hall of audience to foreign ambassadors. This palace contains a large collection of paintings by the best masters of Flanders, Italy, and Spain: also the crown, jewels, and other regalia.—Madrid enjoys almost always a cloudless sky, and a pure and serene atmosphere; but the air is extremely keen, and produces very severe effects on weak constitutions. The population, including military, clergy, and strangers, is nearly 200,000. Bull fights are the favourite amusements of all ranks. There are academies for the study of history, and for painting, sculpture, and architecture; also for the Spanish language. The royal library contains above 100,000 volumes.—The hospitals and other charitable institutions, are numerous. Madrid is not an ancient city. The court of Spain was not permanently fixed here till 1563. 650 m. S. S.W. Paris, 850 W. by S. Rome. Lon. $3^{\circ} 33'$ W. Lat. $40^{\circ} 25'$ N.

Extent, 4,400 sq. miles. Pop. 446,000. It is divided into 15 circles. It consists almost entirely of a fertile level tract. Corn is raised for exportation; and the quantity of flax and hemp is very large. The area of the old dutchy of Magdeburg was 2,060 square miles. Pop. 290,000.

Magdeburg, large city Prussian states, cap. formerly of a dutchy, now of a district, in the province of Saxony, situated in a very beautiful, though flat country, on both sides of the Elbe. It is one of the strongest fortresses in Germany, being surrounded with a number of out-works, and having a citadel on an island in the river, with an arsenal and store-houses. Magdeburg is well built, and has several beautiful squares. The most remarkable public buildings are the royal exchequer, the house where the different courts used to assemble; the ducal palace, the regency house, the government house, the new and old arsenals, &c. The manufactures are extensive, and consist of woollen, linen, stockings, hats, leather, tobacco, soap, and wax. The navigation of the Elbe is of great importance to trade, particularly since relieved by the congress of Vienna, (1815,) from a part of the numerous tolls collected at different places. 75 m. W. S. Magindanao, isl. in the eastern seas, the most southerly of the Philippines, about 300 miles long, and 800 in circumference. Sq. miles, 30,000. It has so many points running into the sea, with large bays of corresponding depth, that it is extremely favourable for piracy, as it affords harbours, and lurking places in case of pursuit. The soil is well watered. Rice is produced in great plenty; as also yams, sweet, potatoes, cocoa nuts, oranges, limes, and all fruits common to tropical climates. The inhabitants are all given to piracy, and even depend on it as a resource for subsistence. They cruize among the Philippines, where they attack trading vessels, and frequently extend their depredations to Java, Sumatra, Borneo, and Celebes. They had the temerity to attack the settlement at Prince of Wales' island, soon after its establishment in 1788, but were repulsed with loss. In 1803, they fitted out a fleet of 40 prows, with the intention of invading the India company's settlements in Celebes, but were met and defeated. Mahratta Territory, a very extensive country of Hindostan, which, till very recently, extended across what is called the peninsula of India, from Gujerat nearly to the banks of the Ganges, and southerly to the northern borders of the Mysore. The Mahrattas are the most formidable Hindoo power, and of late have been frequently engaged in wars with the British. Their whole army till lately, was composed of cavalry. They are not,

however, very formidable as a regular force, depending much more on the celerity of their motions, and sudden incursions, than in boldly meeting their enemy; their only arms are a sword and spear, and their only camp equipage blankets or horse cloths. Thus unincumbered, and their horses being fed indiscriminately on the dry thatch of the houses, or the growing corn of the fields, they march at the rate of 50 miles a day.

Maina, a mountainous district of Greece, in the Morea, comprising the S. E. part of the ancient province of Laconia. It is the least fertile part of the peninsula, consisting chiefly of the extensive ridge of mountains, known by the name of Taygetus. The inhabitants called Mainotti or Mainotes, amount to between 40,000 and 50,000. They style themselves the descendants of the ancient Lacedemonians; and, aided by the natural strength of their mountains, have defended their liberty against the Turks, with a bravery and constancy not unworthy of such distinguished ancestors.

Maine, one of the U. States, bounded N.W. and N. by Lower Canada; E. by New Brunswick; S. by the Atlantic, and W. by New Hampshire. It lies between 43° 05' and 48° N. lat. and between 66° 49' and 70° 55' W. lon. and is estimated to contain 32,000 sq. miles, or 24,480,000 acres. It is divided into 9 counties and 246 towns. Pop. in 1790, 96,540; in 1800, 151,719; in 1810, 228,705; and in 1820, 297,335: of whom there were engaged in agriculture 55,031, in commerce 4,297, in manufactures 7,643. The most populous parts of the State are the counties on Kennebeck river, and the sea-coast, particularly in the S.W. The northern half of the State is yet uninhabited, and almost unexplored. The principal lakes are Umbagog, which lies partly in New-Hampshire, Moosehead, Chesuncook, and Sebago. The principal rivers are the Penobscot, Kennebeck, Saco, Androscoggin, and in the northern part of the State, the St. John and its branches. An extensive district in the N.W. part of the State, around the great lakes and head waters of the Kennebeck and Penobscot, is mountainous. The rest of Maine is generally hilly, and the hills diminish in height on every side, as you recede from the mountains. The south-western part of the State, and the tract of country along the sea-coast, from 10 to 20 miles wide, has generally a poor soil, though in some places tolerably fertile. The land on the Kennebeck, and between that river and the Penobscot, is excellent. East of the Penobscot, it is less productive. The mountainous tract in the N.W. has a poor soil. The lands on St. John river and its numerous branches, are said to be very fertile, but this part of the State is not yet settled. The principal productions of Maine are grass, Indian corn, wheat, barley, rye, and flax. A large portion of the State is yet covered with forests. Lumber is the great article of export. It is brought down all the rivers in large quantities. The other articles are fish, potash, beef, and pork. Maine is finely situated for commerce. It has an extensive sea-coast, abounding with fine harbours, and is intersected by numerous navigable rivers, which open an easy communication with the interior.—The nearest market for the S. W. section of the State, is Portland; for the country on the Kennebeck, Hallowell; for the country on the Penobscot, Bangor. The natural market for the northern half of the State, which is yet unsettled, will be Quebec, in Lower Canada, and Frederickton in New Brunswick. The value of the exports for the year ending Sept. 30th, 1820, was \$1,108,030. The value of the manufactures in 1810, was \$3,741,116. The principal literary institutions, are Bowdoin college in Brunswick, the Maine charity school at Bangor, and the Literary and

Theological Institution at Waterville. The Congregationalists and Baptists are the most numerous religious denominations. They have each more than 100 congregations. Maine was admitted into the Union in 1820. The Hon. William D. Williamson, of Bangor, is preparing a history of the State.

Maine, large r. which rises in the Fichtel mountains, in the centre of Germany, and at first consists of 2 branches, the Red and White Maine, which unite at Steinhaus. It then flows through Upper and Lower Maine, passes by Frankfort, and falls, with a wide channel and copious stream, into the Rhine, opposite to Mentz. It is navigable as far as Bamberg. Its principal tributaries are the Regnitz, Saale and Tauber.

Maine, Lower, a circle of the Bavarian States, comprising certain territories acquired by the treaty of Vienna, in 1815, and the exchanges consequent on that treaty. These are the grand duchy of Wurzburg, the principality of Fulda, and certain portions of the grand duchies of Hesse and Fulda. The whole form an extensive province adjoining Baden, Hesse-Cassel, and Hesse-Darmstadt. Extent, 3,000 square miles. Pop. 423,000. The majority of the inhabitants are Catholics. The chief town is Wurzburg.

Maine, Upper, a circle of the Bavarian States, comprising the principalities of Bamberg and Upper Bayreuth, with the northern part of the Upper Palatinate. It lies contiguous to Bohemia and Saxony, has an area of 3,460 square miles, and 434,000 inhabitants. The chief town is Bayreuth.

Maine-and-Loire, a department in the W. of France, contiguous to the departments of the Mayenne, the Sarthe, and the Indre-and-Loire. Extent, nearly 4,000 square miles. Pop. 404,600. Angers is the capital.

Maine-and-Tauber, a circle in the N. E. part of the grand duchy of Baden. Pop. 96,000.

Malabar, a province, Hind. between 10° and 13° N. lat. bounded N. by Camara, S. by the rajah of Cochin's territories, E. by the Western Ghauts, and W. by the sea. The part bordering on the sea has a level poor soil; the rest consists of different ranges of hills, extending to the foot of the mountain. Some of these hills, and all the vallies between are extremely fertile. The chief produce of this region is timber, sandal-wood, cocoa nuts, coir, and black pepper. Its principal towns are Calicut, Tellicherry, and Cananore. There are several colonies of oriental Christians, Jews, and Mahometans, established in Malabar. The descendants of Portuguese, and converts to the Roman Catholic religion are now very numerous, but are not on good terms with the Nestorian or oriental Christians. The province now belongs to the British, and in 1807, yielded a revenue of 250,000*l*. The name of Malabar is frequently, but erroneously applied to the whole of the western coast of India.

Malabar, Cape, or **Sandy Point**, the S. E. extremity of Cape Cod. Lon. $70^{\circ} 3'$ W. Lat. $41^{\circ} 33'$ N.

Malabar Point, a remarkable promontory on the island of Bombay, near which there is a celebrated temple, an object of Hindoo pilgrimage.

Malacca, a country of India beyond the Ganges, consisting of a large peninsula, connected with Siam by the isthmus of Kraw. At all other points it is surrounded by the sea, having on the W. the Indian ocean and the straits of Malacca, which

separate it from Sumatra; on the E. the gulf of Siam and the Sea of China. It extends from 1° to 11° N. lat. being 775 miles long, and on an average, 125 broad. The country is traversed by a chain of very lofty mountains, and covered with extensive forests and marshes. It was formerly subject to Siam, but all the southern part of the peninsula has now shaken off the yoke, while the northern states pay only a moderate tribute. The leading inhabitants are of the race called Malays, who are well known, and widely diffused throughout all the eastern seas, and whose piratical habits render them the terror of Asia. In the pursuit of plunder and of conquest, they are brave, ferocious, and vindictive. They are merciless to enemies and strangers, and capricious even to friends. Piracy is most deeply rooted in their nature. The Malay language is distinguished above all others in the east for its smoothness and softness, in which respects it has been compared to the Italian. It has become like the French in Europe, a sort of current and universal language over all the sea coasts, and in all mercantile societies of eastern Asia. This distinction it has attained in consequence of the extensive traffic which the Malays carry on throughout all these countries.

Malacca, the capital of the country above described, is on the W. coast, on the straits of Malacca. It was formerly one of the principal Portuguese settlements, and the key of their trade with the seas beyond India; but in 1640 it was taken by the Dutch, and retained by them till 1795, when it was subjected by a British force. After the formation, however, of the settlement at Pulo Penang, or Prince of Wales' Island, that at Malacca was found to be of little or no use as a place of trade. The garrison and stores were therefore withdrawn, the fortifications razed, and the whole place dismantled. Since that time its commercial importance is almost entirely lost. The imports are opium, piece goods, silks, and dollars; and the exports chiefly tin, pepper, sago, canes, elephants' teeth, and some gold dust. Malacca is one of the most important stations of the London Missionary Society. They have five missionaries here; and a printing-office, from which two periodical works are issued, and Tracts in great numbers, both in the Malay and Chinese languages. The printing-office affords regular employment to sixteen men and boys. In 1818, an Anglo-Chinese college was established, the object of which is to instruct Chinese youth in the English language and the principles of Christianity, and to impart to missionaries and others a knowledge of the language and literature of China. Lon. $102^{\circ} 12'$ E. Lat. $2^{\circ} 14'$ N.

Malacca, Straits of, a narrow sea between the island of Sumatra and the country of Malacca, extending from the equator to lat. 5° N.

Malaga, city, Spain, in Granada, on the coast of the Mediterranean, at the extremity of a deep bay, with a large plain to the N. while on the E. and W. it is sheltered by lofty mountains. The harbour is capable of containing about 400 merchant vessels and 20 ships of the line, and those of the greatest burden may come up close to the quay. Ships may enter with all winds, and are perfectly sheltered. The rivers Guadalmedina and Guadalorce discharge their waters at this place into the ocean, after traversing a succession of the most fertile vallies in Europe: and in these are produced those fruits in which the city carries on so ex-

tensive a trade. These are figs, almonds, oranges, lemons, and olives; but the great export is wine. The vineyards on the surrounding hills produce annually between 2,000 and 3,000 pipes of wine, of which the one half is exported. 55 m. W. S. W. Granada, 203 S. by W. Madrid. Lon. 4° 25' W. Lat. 36° 43' N. Pop. 52,000.

Maldivcs, a cluster of islands formed from coral, in the Indian ocean, lying between the equator and the 8th degree of N. lat. and between 72° and 74° E. lon. They were formerly much frequented by trading ships from India; but from the difficulties experienced in procuring a cargo for a large vessel, and the dangerous navigation, this trade has been given up, and it is now carried on in their own boats, some of them of 30 tons burden. The chief produce of these islands is cocon-nuts, and the small shells called cowrie, which pass as coin all over India.

Malstrom, or *Moskoe-strom*, a violent whirlpool on the coast of Norway, near the island of Moskoe. It is dangerous to shipping, except during a short time at high and low water; but it is most terrific when the N. W. wind blows in opposition to the tide. It then forms an immense whirlpool, which draws to its centre and swallows up the boats and fish that approach it, while its roaring noise is heard at a distance of several miles. At these times, ships have been known to be attracted to it from a distance of 5 or 6 English miles. Lon. $10^{\circ} 40'$ E. Lat. $68^{\circ} 8'$ N.

Malta, isl. of the Mediterranean, 20 miles long, 12 broad, and 60 in circumference; its distance from Sicily about 50. Its coast is in general steep and rugged, the only good harbors being those of Marza and Marza Murzet, which are separated by the peninsula on which La Valetta, the chief town is situated. The two small islands of Gozzo and Comino belong to Malta, being separated from it only by a narrow channel. Extent of the three islands, 170 sq. miles. Pop. 90,000, of whom above 75,000 are in Malta, which is thus one of the most populous spots on the globe. The soil is formed of a reddish loamy mould, lying on a basis of rock, and seldom exceeding from 10 to 16 inches in depth. Every spot is cultivated with the greatest care; and soil, when deficient, is sup-

56

plied in ship loads from Sicily. Most of the productions, both of Europe and the tropical climates, which have been tried here, have succeeded. From 1530 to 1798, Malta was in possession of the knights of St. John of Jerusalem, who highly distinguished themselves by their resistance to the Turks. In 1798, the French expedition to Egypt, commanded by Bonaparte, took the island without resistance. In 1800, it was taken by the British, and was confirmed to them by the treaty of Paris in 1814. The Maltese have retained the greatest part of their ancient rights and usages. In no fortress in Europe are the defences more imposing. In Gibraltar admiration is excited by the work of nature; in Malta, by the work of art. To garrison the latter completely, would require 30,000 men. The religion of the Maltese is Roman Catholic. The Church Missionary Society occupy the island as one of their stations, and employ two missionaries here. Lon. $14^{\circ} 12'$ E. Lat. $35^{\circ} 50'$ N.

Mamelukes, people of Egypt, who originally consisted of Georgian and Circassian slaves, brought into the country by the caliphs in the 13th century, and made a part of the military power of the state. They rose against their masters, massacred or expelled them, and assumed the dominion of Egypt. In the beginning of the 16th century, the Turks compelled them to acknowledge the authority of the pacha appointed by the Grand Seignor. Upon the invasion of Egypt by the French in 1798, the strength of the Mamelukes was broken by successive defeats, and most of their chiefs were treacherously massacred. Those who escaped have settled in Nubia, where they still cherish the hope of regaining their ancient power.

Man, Isle of, isl. in the Irish sea, nearly equidistant from the coasts of England, Scotland, and Ireland. It is about 30 miles long, and 70 in circumference, and contains 220 sq. miles. Pop. 30,000. The interior and central part of the isl. and is mountainous. The soil of the Isle of Man is naturally poor, but is every where greatly fertilized by the abundance of sea-weed which is cast ashore and used as manure. Agriculture has of late years made great progress here. Barley is raised in great quantities, and oats are also cultivated. Large crops of wheat are now raised, of the cleanest and best quality. Great quantities of turnips and potatoes are also raised. Cattle are annually fattened for exportation. The isl. and is now subject to the king of England as land proprietor, and is ruled by a governor, a council of public affairs, and the house of keys, the representatives of the people. The whole island contains 17 parishes or kirks, and is under the ecclesiastical jurisdiction of a bishop, who is styled bishop of Sodor and Man. As the inhabitants are exempt from the taxes which prevail in the mother country, living is comparatively cheap. The port of Douglas is 60 m. S. E. by S. Liverpool.

Manchester, t. Eng. in Lancashire, the great centre of the cotton trade, the greatest manufacturing town in the kingdom, and, except London and Liverpool, the largest in population, industry and wealth. It is on the Irwell, at the junction of the Irk and the Medlock. The streets are well paved. In the winter they are brilliantly lighted with gas, and nearly all the foot paths are laid with flags. The public buildings are numerous, handsome, and many of them elegant. No town in England is more distinguished for the number of its charitable institutions. The seminaries of education are also numerous; and a liberal spirit is diffused in the town for the promotion of knowledge, literature, and science. Manchester is supported, and has risen to its present consequence, entirely by its manufactures, and the various trades growing out of them. Of these manufactures, by far the principal, and the source of most of the rest, is that of cotton. The greater part of the cotton trade of Great Britain, which, besides its own consumption, supplies that of all Europe, America and the West Indies, centres in Manchester, extending around it in all directions to Furness and Derby on the N. and S. and to Leeds and Liverpool on the E. and W. The various branches of the manufacture are carried on more or less

through all this district; but by far the most extensive, especially the spinning, in Manchester. Manchester is, besides, the centre from which the raw material is distributed to all parts of the district, and into which the scattered merchandize is again collected, when finished, to be sent to Hull, Liverpool and London, and thence all over the world.

The principal articles manufactured at Manchester at present are velvets, fustians, dimities, calicoes, checks, tickings, jeans, shirtings, gingham, quiltings, handkerchiefs, nankeens, diapers, muslinets, muslins, cambrics, and almost every kind of fancy cotton, and cotton and silk goods. The spinning trade is becoming every year more extensive, and considerable quantities of yarn are annually exported. The spinning is almost entirely performed by means of machinery, aided by a number of boys and girls. In 1818, several new factories were built in the neighbourhood, and at present the whole number of spinning-mills and factories in the town amounts to about 60. The weaving is also carried on to a great extent; and the invention of power looms, or looms worked by machinery, has been recently introduced, and has extended considerably. Various other operations are performed by machinery, and nearly the whole of these machines are now wrought by the steam engine. The erection and keeping up of this various and complicated machinery has give rise to great iron foundries. Besides the weaving and spinning, the printing, dyeing and bleaching business are carried on to a very great extent in and around Manchester.

The principal cause which has rendered Manchester a great emporium of manufactures, is the natural situation of the place, on the banks of a navigable river, in the midst of inexhaustible fields of coal, near the centre of the kingdom, and capable of having its external and internal communication greatly improved by art. By means of canals, Manchester enjoys a communication by water both with the eastern and western seas, being situated directly in the line of navigation which here extends across the island from shore to shore; while it is equally open to the north and south by various branches from the main trunk. Although one of the largest towns in the kingdom, Manchester sends no member to Parliament. Pop. in 1757, 19,800; in 1773, 42,900; 1788, 50,000; 1791, 70,000; 1811, 98,000; and at present estimated at 111,000.

Mandingo, or *Manding*, a mountainous territory in Central Africa, bounded E. by Bambarra, N. by Fooladoo, S. and W. by Gadour and Jallonkadoo. The whole region is watered by the Niger in its early course. The Mandingoes have spread themselves through all the countries on the banks of the Niger, the Senegal, and, above all, of the Gambia, and have become the most numerous of all the race in West Africa. They are a very gentle race, cheerful in their dispositions, inquisitive, credulous, simple, and fond of flattery. Their chief defect appears to be an insurmountable propensity to theft. The Mandingo language is more

copious, more refined and polite in its phraseology, than that which is spoken by the other negro tribes. It is the language of commerce being understood with few exceptions, through all West Africa. Almost every district, indeed, is traversed by troops of Mandingo merchants, resembling in their habits and manners the Arabic caravan traders.

Manilla, t. in the isl. of Lucon, and cap. of the Spanish settlements in the Philippines, on a bay of the same name, at the mouth of the Pasig. Pop. 38,000, of whom 1,000 or 1,200 are Spaniards, and the rest mulattoes, Indians or Chinese. Manilla, though regularly fortified, could not be defended against an European force. From its advantageous position in relation to India, China and America, Manilla might, under a liberal and wise government, rise into great importance as an emporium of commerce; but under Spanish policy its trade has been repressed by the most harassing and absurd restrictions. The chief exports are cordage, resinous substances, pitch and tar, cloths, rushes, rattans, indigo of an excellent quality, rice and cotton. Three leagues S. W. from Manilla lies the port of Cavite, at which large ships generally unload. In 1772, Manilla was taken by the English; and to save it from destruction, it agreed to pay a million sterling for its ransom. Lon. 120° 54' E. Lat. 14° 38' N.

It is watered by the Po, the Oglio, the Mincio, the Secchio, and a number of smaller streams. The soil is of great fertility, except in some marshy tracts.

Mantua, city, Austrian Italy, cap. of the province of the same name, on islands formed by the

Mincio. It is both by nature and art one of the strongest places in Europe. Most of the streets are broad, regular, and well paved; the houses are of stone, and in general well built; and the public squares are spacious and elegant. In the centre of one of the squares stands Virgil's monument, a column of marble, resting on a pedestal of the same material, with a bronze statue of the poet at the top. The principal public edifice is the cathedral, a beautiful building, surmounted by a fine dome. Mantua is the seat of a university, founded in 1725. The population and manufactures have greatly declined since the end of the 17th century. In 1796, and 1799, both were much reduced by dreadful sieges. In 1780, the population was nearly 30,000. At present it does not exceed 23,000; of these between 4,000 and 5,000 are Jews. 70 m. W. S. W. Venice, 70 E. S. E. Milan. Lon. 10° 46' E. Lat. 55° 8' N.

Marseilles, a large and commercial city in the S. of France, cap. of the Mouths-of-the-Rhone, on the Mediterranean. The city, with its environs, is inclosed by rocky hills. It is divided into the Old and New Town. The New Town, containing nearly two-thirds of the whole, is equal in beauty to any town of France. Its streets are broad and straight, its squares spacious and handsome, its buildings remarkable for their elegance. The port extends into the heart of the town, is completely sheltered from all winds, and remains perfectly tranquil in the most violent storms. It owes this security chiefly to the narrowness of the

entrance, which does not exceed 100 yards, being confined by two projecting rocks, one on each side. On these are situated two forts for the defence of the harbour. The harbour is capable of containing nearly 1,000 merchant vessels; but it is not of sufficient depth to float ships of war.

From its advantageous position, and the security of its harbour, Marseilles has long enjoyed a large share of the foreign trade of France. It is, on account of its lazaretto, the exclusive medium of intercourse between France, the Levant, and the N coast of Africa. To these countries alone it exports annually, to the value of a million sterling, in light woollens, silk, and colonial produce.

It is a central point for the trade with Spain and Italy. It has also extensive transactions with Holland, England, the Baltic, North America, and the W. Indies. The most important manufactures are soap; of these there are 75 separate establishments, which consume annually from 1,200 to 1,500 tons of olive oil. 180 m. S. by E. Lyons, 300 E. N. E. Maryland, one of the United States, bounded N. by Pennsylvania; E. by Delaware and the Atlantic; S. and W. by Virginia. It lies between lon. 75° 10' and 79° 20' W. and between lat. 38° and 39° 44' N. and contains 13,959 sq. miles, or 8,933,760 acres, of which one fifth is water. Chesapeake bay runs through the state from N. to S. dividing it into two parts. The part east of the bay is called the eastern shore, and the part west of the bay, the western shore. The State is divided into 19 counties, 11 of which are on the western shore, and 8 on the eastern. Pop. in 1790, 319,728; in 1800, 349,692; in 1810, 380,546; in 1820, 407,300, of whom 260,264 were whites, 107,288 slaves, and 39,748 free blacks. Engaged in agriculture 79,135, in commerce 4,771, in manufactures 18,640.

In the counties on the eastern shore of the Chesapeake, the land is generally level and low, and in many places is covered with stagnant waters, giving rise in the summer and fall months to agues, and intermittent fevers. On the western shore, the land below the lowest falls of the river, is principally level, and free from stones. Above these falls the country becomes successively uneven and hilly, and in the western part of the State is mountainous. The principal range of mountains is the Blue Ridge or South Mountains, which pass through the State in a northerly direction from Virginia into Pennsylvania. The extreme western part of the State is crossed by the Alleghany mountains. Between these and the Blue Ridge are several inferior chains, as Will's mountain, Evi's Warrior, and Ragged mountains, and Sideling hill. The soil is well adapted to the culture of tobacco and wheat, which are the staple productions of the State. Some cotton of inferior quality is also raised, and in the western counties, considerable quantities of flax and hemp. Two articles are said to be peculiar to Maryland; the genuine *white* wheat, which grows in Kent, Queen Ann's, and Talbot counties, on the eastern shore; and the bright *kite's foot* tobacco, which is produced on some parts of the western shore, south of Baltimore. The forests abound with various kinds of nuts, used for fattening hogs, which run wild in the woods, and are killed in considerable numbers for exportation. Apples and peaches are abundant, and are raised for distillation.

Excellent roads proceed from Baltimore in various directions. There is a turnpike from Baltimore to Cumberland on the Potomac, a distance of 135 miles. From Cumberland to Brownsville on the Monongahela in Pennsylvania, there is now completed by the U. S. a free turnpike road, of the most superior construction. The distance is 72 miles, making the whole distance from Baltimore to Brownsville 207 miles. This is the shortest and best communication yet opened between

the tide water of the Atlantic and the navigable western waters. A turnpike extends from Baltimore in a N. W. direction 16 miles, to Reister town, and there divides: one branch turning more to the N. meets the Pennsylvania line in 19 miles; the other in a W. N. W. direction, runs 29 miles in Maryland. A company was incorporated many years since by the States of Delaware and Maryland, for opening a communication between Delaware bay and the Chesapeake, by means of a canal from Elk river to Christiana creek. When completed it will be 22 miles long, and is intended for vessels of 70 tons. The expense is estimated at \$850,000.

Maryland was originally settled by Roman Catholics, and they are the most numerous denomination of Christians. The other denominations are Episcopalians, who had in 1811. 30 churches, and 35 clergymen; Baptists, Friends, Presbyterians, &c. There are several very respectable literary institutions in Baltimore, and academies in various places. The legislature is styled the general assembly, and is composed of a senate consisting of 15 members, chosen for five years by electors, and a house of delegates, consisting of 4 from each county, and 2 from each of the cities of Annapolis and Baltimore, chosen annually. The governor and an executive council of 5 persons, are chosen annually by a joint ballot of both houses.

Iron ore abounds in various parts of the State, and coal is found in inexhaustible quantities, and of a superior quality, on the Potomac, in the neighborhood of Cumberland. Furnaces have been erected in various places for the manufacture of iron and iron ware. Glass, paper, and whiskey are also made in considerable quantities. The value of manufactures in 1810, was \$11,468,794. The principal exports are flour and tobacco. The value of the exports for the year ending Sept. 30th 1820, was \$6,609,364, of which \$1,927,766 was foreign produce. Maryland is the third state in the Union in amount of shipping. In 1815, the number of tons was 156,062.

Mascat, the most considerable seaport on the E. coast of Arabia. All the ports from Rosalgate to the entrance of the gulf, are tributary to it. The trade is extensive with the British settlements in India, the Malay peninsula, the Red Sea, and the E. coast of Africa. The government of the Imaum is the most civilized and orderly of any either in Persia or Arabia. Britain favours the flag of Mascat, recognizing it as neutral; and in war it often becomes the channel of communication with the enemy's ports. In short, Mascat is resorted to as a sort of magazine, for goods, by vessels from every port in Persia and Arabia. English vessels sailing between India and Bassorah, usually stop here. It carries on also a very large trade by caravans, with the Arabs of the interior. The town is walled round, and strongly fortified. Lon. 59° 15' E. Lat. 23° 38' N.

Massachusetts, one of the U. States, bounded N. by Vermont and New-Hampshire; E. by the Atlantic; S. by Rhode Island and Connecticut; and W. by New-York. It lies between 41° 23' and 43° 52' N. lat. and between 69° 50' and 73° 10' W. lon. It contains 7,250 square miles, or 4,644,000 acres. It is divided into 14 counties, and 290 towns. Pop. in 1790, 378,787; in 1800, 422,845; in 1810, 472,040; and in 1820, 523,287; engaged in agriculture 63,469, in commerce 13,301, in manufactures 33,464. It has on an average 72 persons to each square mile, and is the most thickly settled state in the Union. Many thousand persons emigrate every year to other States.

There are several ranges of mountains which come from Vermont and New-Hampshire, and run across the western part of the State into Connecticut. To the east of these mountains the country is hilly, except in the southern counties, where it is level and sandy. On the sea coast the land is generally poor, particularly in the S. E. The rest of the State has generally a strong, good soil, well adapted to grazing and grain. The valleys of the Connecticut and the Housatonnuc, especially, have a fine soil, and embrace many flourishing and pleasant towns. In no state in the Union have greater advances been made in agriculture, than in Massachusetts. The principal productions are grass, Indian corn, rye, wheat, oats, and potatoes. Apples are abundant, and large quantities of cider are made annually. Beef, pork, butter and cheese, are also abundant and of excellent quality. Among the minerals are iron ore, which is found in large quantities in Bristol and Plymouth counties; and marble, quarries of which have been opened in Stockbridge, and other towns of Berkshire county. At Chelmsford and Tyngsborough, near the banks of the Middlesex canal, great quantities of beautiful granite are found, which is much used for building in Boston and elsewhere.

The citizens of Massachusetts are highly distinguished for the liberality with which they support literary and benevolent institutions. The principal literary institutions are Harvard University at

Cambridge, the Theological Seminary in Andover, Williams' college in Williamstown, Amherst Collegiate Institution, and Phillips' Academy in Andover. There are numerous other academies, and common schools are universally established. The Congregationalists are much more numerous than any other religious denomination. In 1817, they had 366 congregations; the Baptists, 91; Friends, 32; Episcopalians, 14; Presbyterians, 8; there are also a few Methodists and Roman Catholics.

Massachusetts is the third state in the Union in amount of manufactures. The value in 1810, was \$21,895,528. The principal articles are cotton goods, articles of leather, ardent spirits, cordage, wrought and cast iron, nails, woollen goods, ships, straw bonnets, and hats. In amount of shipping, Massachusetts is the first State in the Union. In 1815, before Maine was separated, the number of tons was 452,273, which was about one third of the whole shipping of the United States. No State is so extensively engaged in the fisheries. In many populous towns on the sea-coast, a large proportion of the inhabitants derive their subsistence entirely from this employment. The principal exports are fish, beef, lumber, pork, ardent spirits, whale oil, and various manufactures. The value of the exports for the year ending Sept. 30th, 1820, was \$11,008,922, of which \$7,147,487 was foreign produce.

Mauritius, or *Isle of France*, isl. in the Indian sea, 150 miles in circumference, about 600 m. E. Madagascar. About the middle of the last century it was fortified, and rendered the chief naval station of the French in the Indian seas. It preserved its importance even after Britain had annihilated the French power on the continent of India, and became then a grand privateering station against the India shipping. It was calculated at Calcutta that, in ten years, prizes to the value of 2,500,000*l.* had been taken and carried into Mauritius. In 1810, it was taken by the English, and may now be considered as permanently attached to the British dominions. The orange, pine-apple, and other tropical fruits, grow in the highest perfection. It contains iron mines, the produce of which finds a market in India. Mauritius produces little grain, or any other useful vegetable except the potatoe. It depends for provisions almost entirely upon Bourbon. The exports consist of coffee, a great part of which is produced in Bourbon, to the average annual amount of 600,000 lbs.; cotton, 2,000 bales; indigo, 300,000 lbs.; raw sugar, 5,000,000 lbs.; cloves, 20,000 lbs. Pop. in 1790, estimated at 8,000 whites, and 12,000 blacks. In 1807, according to an official statement, the whole number was 70,000. The blacks have been imported as slaves from Madagascar. Mecca, a large city of Arabia, cap. of Hedsjas, and celebrated as the birth-place of Mahomet. It is situated in a dry, barren, and rocky country, about a day's journey inland from the Red sea. Its immediate position is in a narrow valley, inclosed between mountains. It is entirely supported by the concourse of pilgrims from every part of the Mahometan world, extending on one side to

the frontier of China, and on the other to the states on the Niger. This resort is now greatly diminished, partly in consequence of the decay of religious zeal, and the general decline of power and wealth among the Mahometan states; partly also from Mecca being continually exposed to the rude incursions of the Wahabees. The population is not now more than 16,000 or 18,000. The chief ornament of Mecca is the famous temple, in the interior of which is the Kaaba, or house of the prophet. The grand ceremony through which the pilgrims pass, is that of going seven times round the Kaaba. Lon. $40^{\circ} 15' E.$ Lat. $21^{\circ} 18' 9'' N.$

Medina, a city of Arabia; celebrated as containing the tomb of Mahomet. Although this tomb is held in high veneration, its visitation is not considered in any very high degree meritorious. It is performed by few, unless the pilgrims from Syria, in whose way it happens to lie. The tomb itself is not superior to those which the founders of mosques usually erect to perpetuate their own memory. It is placed between two others, containing the ashes of the first caliphs, Abubeker and Omar. The building which incloses it, is hung with silk, which is renewed every seven years. It is guarded by forty eunuchs. The mosque founded by the prophet is said to be very magnificent, being supported by four hundred columns, and containing three hundred lamps, always burning. Mediterranean, the great sea which forms the S. boundary of Europe. Its length from E. to W. is about 2,000 miles; its general breadth is from 400 to 500. From the Black sea on the N. E. a strong current sets regularly into the Mediterranean. In the straits of Gibraltar the middle current flows into it from the Atlantic, while along

the northern and southern shores, two weaker currents flow in a contrary direction. This sea differs greatly from the ocean in its tides, which are feeble and irregular. Though its winds are variable, its navigation is in general smooth and easy.

Mermentau, Mexitana, or *Mentou*, r. Louisiana, which, after a southerly course of 200 miles, falls into the gulf of Mexico, about 200 miles to the west of the Mississippi. In the lower part of its course, it expands into a spacious lake; and before its exit into the sea it again assumes the form and breadth of a small river.

Merom, p-t. and cap. Sullivan co. Indiana, on the E. side of the Wabash, 35 m. above Vincennes. Its situation is elevated, being on the highest land on the Wabash from its mouth to the E. line of the State. It commands a view of the prairie country for 30 miles, which is rapidly settling.

Merrimack, r. N. H. formed by the union of the Pemigewasset and the Winnipiseogee. The Pemigewasset rises in the White mountains, and running S. about 70 miles, receives the Winnipiseogee; after which, the united stream continues a southerly course, and passes into Massachusetts, where, turning to the N. E. it runs 50 miles, and falls into the ocean below Newburyport. It is navigable to Haverhill. Salmon, shad, and alewives are caught in considerable quantities. The Middlesex canal in Massachusetts connects this river with Boston harbor, and by means of various improvements around the rapids and falls of the river, the navigation is now extended as high up as Concord. The following are the principal improvements:—*Bow* canal, around the falls a few miles below Concord, was constructed in 1812, at an expense of \$20,000. Six miles further down is *Hooksett* canal, which cost \$15,000. The fall at this place is 17 feet. Eight miles below Hooksett is *Amoskeag* canal, the greatest work of the kind in New-England, except Middlesex. On leaving Amoskeag canal you enter upon a section of the river nine miles in extent, converted by law into the *Union* canal, comprehending in that space six district falls, all of which have been made passable. Decending five miles further, you come to *Cromwell's* falls, which are made passable by a canal. The cost of the Union canal, including Cromwell's, was about 50,000 dollars. Fifteen miles below Cromwell's falls, are *Wicasee* falls and canal in Middlesex co. Mass. The canal cost 14,000 dollars. Three miles below Wicasee canal is the entrance into the Middlesex canal.

Messina, a large city in the N. E. of Sicily, on a strait called from it the Faro di Messina. The strait runs from N. to S. and the town of Messina runs parallel with it forming an oblong of more than 2 miles in length. Nothing can be more beautiful than the view of Messina from on board a vessel at the distance of a mile. The finest part of the city is the Marina, a long line of buildings facing the harbor, and running parallel with it for more than a mile. The town, since the great convulsion in 1783, has been re-built with regularity and elegance. The harbor is the finest in the Mediterranean; it consists of a bay, which has the city along its W. shore, and on the E. a long tongue of land, the point of which turns inward, so as to form an inlet (a quarter of a mile across,) sufficiently wide for the ingress of fleets, and sufficiently narrow to protect the inclosed waters from the agitation of the sea. The circum-

ference of this harbor is from 4 to 5 miles: its depth in most places not less than 40 fathoms. It is defended by a strong citadel, situated on the projecting tongue of land. All the staple commodities of the island are shipped here. In particular, the Faro wine, of which not less than 10,000 pipes are said to be shipped annually. There are several extensive manufactories of silk in the city. Messina is remarkable for its misfortunes. Of these, the two most recent, as well as melancholy, were the plague of 1743, and the earthquake of 1783. Pop. 36,000. 50 m. N. N. E. Catania, 130 E. Palermo. Lon. 15° 48' E. Lat. 38° 11' N.

Mesurado, Cape, W. Africa, at the western extremity of the Gold coast. It is the site selected by the American Colonization Society, for the settlement of a colony of free people of color from the United States. The river Mesurado is the largest river between the Rio Grande and the Congo. Its head waters are near those of the Gambia and the Niger, and it empties into the Atlantic after a course of about 300 miles. The Cape extends 3 miles into the sea, forming on its southern side a fine bay or road where vessels may lie in 10 fathoms water near the shore. The country is fertile, capable of producing rice, indigo, coffee, cotton, sugar cane, and the tropical fruits. It is more elevated than the country to the northward, and the water is generally of a good quality. The tract belonging to the Society consists of about 40 miles square on the river, including the Cape, and several islands at the mouth. It was purchased in December, 1821, and the number of the first colonists was about 80, who have since been joined by 50 more. There is an increasing disposition in the blacks of the U. States to emigrate, and funds only are wanting to enable the Society to send out many hundreds who have made application to join the colony. 250 miles S. E. Sierra Leone. Lat. 6° 13' N.

Mexico, or *New Spain*, country or viceroyalty, N. America, bounded N. and N. E. by the United States; E. by the gulf of Mexico; S. E. by Guatemala; S. and W. by the Pacific ocean. It extends from 86° 56' to 124° 30' W. lon. and from 16° to 42° N. lat. Much of the northern part is inhabited by savage Indians. The remainder is divided into 16 provinces or intendancies, containing 957,541 square miles, and in 1820, about 8,500,000 inhabitants, one third of whom are civilized Indians. This population is settled principally in the southern provinces, below the parallel of 25° N. lat. The northern provinces contain more than two-thirds of the territory, but only about one-tenth of the population.

The land on both the coasts is low, but rises gradually as you approach the interior, till it has attained the height of 6 or 8,000 feet above the level of the sea; it then spreads out into broad plains, which are called *table lands*, presenting the strange spectacle, of a level country on the top of a lofty range of mountains. These plains or table lands extend along the range from lat. 18° to lat. 40° N. a distance of 1,700 miles.

A range of mountains passes through the whole length of this country from S. E. to N. W. called the Cordilleras of Mexico. It is a part of the great chain which runs through the American continent, from Cape Horn to the Frozen ocean. Its top, as we have already mentioned, consists of extensive plains or table land. From these elevated plains single mountains occasionally shoot up, whose summits are covered with everlasting snow. Several peaks near the city of Mexico are more than 15,000 feet high, and the loftiest are volcanoes.

In the low plains, on both coasts, the heat is very oppressive, and the climate unhealthy to Europeans; but when you advance into the interior, and begin to ascend the mountains, it becomes more temperate, and at the elevation of 4 or 5,000 feet there reigns perpetually a soft spring temperature, which is very healthy. As you advance still higher, the climate becomes cooler, and at length, on the tops of some of the loftiest mountains, you come to the region of perpetual snow. Thus, in the course of two or three days, the traveller may enjoy all the variety of summer, spring, and winter.

The productions of this country are as various as its climate. In the course of a few hundred miles, you may meet with almost all the fruits of the temperate and torrid zones. The soil of the table land is remarkably productive. Maize is far the most important object of agriculture, and in some places, from two to three harvests may be taken annually. Wheat, rye, and barley are extensively cultivated.

The religion is Roman Catholic. There is one archbishop and eight bishops, whose united revenues amount to 112,000*l.* and the number of inferior clergy is about 10,000. The country is governed by a viceroy, and each province is committed to an intendant.

The commerce of New Spain is carried on almost entirely through the port of Vera Cruz. In time of peace, Humboldt estimates the annual value of exports from that place, at 21 million dollars, and the imports at 14,600,000. The exports are gold and silver in coin, bullion and plate to the value of 17 million dollars; cochineal, 2,400,000; sugar, 1,300,000, &c. The imports are bale goods, including woollens, cottons, linens and silks to the value of \$9,200,000; paper, 1 million; brandy, 1 million; cacao, 1 million; quicksilver, 650,000. The works of the mines are said to have been much injured during the disturbances arising out of the attempted revolution in 1810, and their produce to have been seriously affected.

Mexico, city, cap. of the country of the same name, and the most populous city of the New World, is in lat. $19^{\circ} 26'$ N. lon. $99^{\circ} 5'$ W. It is situated midway between the Gulf of Mexico and the Pacific ocean, near Lake Tezcuco, in a delightful valley, which is 230 miles in circumference, and elevated more than 7,000 feet above the level of the ocean. It is regularly built, in the form of a square, of four miles on each side. The streets are broad, clean, generally paved and well lighted, and intersect each other at right angles. The public buildings are magnificent, and some of them of the most beautiful architecture. The convent of St. Francis has a revenue, from alms alone, of 20,000*l*. The hospital has a revenue of 10,000*l*. and supports 1,400 children and old people. The mint employs about 400 workmen, and is the most extensive establishment of the kind in the world. The principal manufacture is the working of gold and silver in all its branches. Large pieces of wrought plate, vases and church ornaments, are annually executed to a great amount. The city contains upwards of 100 churches and 137,000 inhabitants, of whom one half are whites, and the rest Indians, mulattoes, and mestizoes.

This beautiful city is supplied with water by two aqueducts, and its vegetables are raised on the elegant floating gardens of the lake of Tezcuco. There are three other small lakes in the valley of Mexico besides Tezcuco. The waters in these lakes used formerly to rise above their banks and inundate the city and the valley. In 1629 there was a great inundation, which lasted for five years; and during the whole of that time the streets of Mexico could be passed only in boats. To prevent the recurrence of this evil various means were employed without effect. At first, a huge dike or mound of stones and clay was erected, 70 miles long, and 65 feet broad; but the waters burst through it and tore it away. A subterranean passage was then dug through the mountains which surround the valley, to let off the waters; but the earth caved in and filled up the passage. At length a drain, 12 miles long, 300 feet broad, and in some places 200 feet deep, has been cut through a gap in the mountains, and this seems to answer the purpose. The whole expense laid out on these great works from the year 1607 to 1689, is calculated at 1,291,770*l*.

Michigan, Lake, a great lake lying wholly within the U. States, 260 miles long, 55 broad, and 800 in circumference, containing, according to Hutchins, 10,368,000 acres, or 16,200 sq. miles. On the N. E. it communicates with Lake Huron, through the straits of Michillimackinac, and on the N. W. it branches out into two bays, one called Noquet's and the other Green bay. The lake is navigable for ships of any burden. It has fish of various kinds, particularly trout, of a large size and excellent quality, and sturgeon are found in its bays and rivers. Lon. 84° 30' to 87° W. Lat. 41° 35' to 45° 50' N.

Michigan Territory, a territory of the U. States, bounded N. by Lake Superior, E. by Lakes Huron, St. Clair and Erie, S. by Ohio and Indiana, and W. by the Northwest Territory. On the N. and E. its boundary is the same with that of the United States; on the S. it is the same with the northern boundaries of Ohio and Indiana; on the W. the line begins at the southern extremity of Lake Michigan, and runs due N. to Lake Superior. The territory extends from 41° 31' 38" to 46° 39' N. lat. and from 82° to about 86° W. lon. It is 350 miles long from N. to S. and 212 broad on the southern boundary, containing about 40,000 square miles.

The territory is divided by Lake Michigan into two parts. The eastern and much the largest division is a peninsula, bounded on three sides by Lakes Michigan, Huron, St. Clair and Erie, and on the S. side by the states of Ohio and Indiana. The western division is also a peninsula, inclosed between Lake Superior, Lake Michigan, and the western boundary of the territory. The part of Michigan to which the Indian title has been extinguished, is a tract in the S. E. along the banks of Lake Erie, Lake St. Clair, and Lake Huron, ex-

tending as far north as Thunder bay river, and back to the westward about 80 miles; besides some small tracts at the head of Green bay, at the straits of St. Mary, and around Michillimackinac. In 1822, including the N. W. Territory, there were seven counties, viz. Wayne, Monroe, Macomb, and Oakland, in the S. E. Michillimackinac, in the N. Brown, on the W. side of Lake Michigan, and Crawford, on the Mississippi.

The country along the eastern shore of Lake Michigan, and extending into the interior as far as the dividing ridge, consists of sand hills, sometimes crowned with a few stunted trees, and a scanty vegetation, but generally bare, and thrown by the wind into a thousand fantastic shapes. The whole of this tract has been gained from the lake, and the land is still continually encroaching upon the water, every storm throwing up new quantities of alluvion. The eastern part of the territory, consisting of lands ceded by the Indians, has never till recently been brought into notice. It is now ascertained to be a fertile region, well fitted for wheat and fruits of all kinds, generally level, and watered by fine rivers, most of which present facilities for the transportation of produce from the interior. Since the lands were offered for sale by the U. S. government in 1818, emigrants have flocked hither in great numbers, and perhaps in no country north of the cotton and sugar climate, could the farmer find a better field for enterprise, or a surer prospect of reward. The lands on Saginaw river and bay, which were ceded by the Indians in 1819, are represented to be of an excellent quality and beautifully situated. The white settlements at present are chiefly in the S. E. on Lake Erie, the river Detroit, Lake St. Clair, and the rivers which fall into them, particularly the Maumee, Raisin, and Huron.

The climate is healthy, and much milder than in the Atlantic states in the same latitude. In the eastern part it resembles that of the western counties of New-York and Pennsylvania; towards the southern boundary it is much milder; but upon the coast of Lake Huron, and even that of St. Clair, it is more severe. No state in the Union is so bountifully supplied with fish, aquatic fowls, and wild game. The trout of Michillimackinac have a superior relish; they weigh from 10 to 70 pounds, and are taken at all seasons. White fish are caught in prodigious numbers in the rivers Detroit, and St. Mary's, and in Lake St. Clair. Sturgeon are common to Lakes Erie, St. Clair, Huron, and Michigan. The beaver frequent the rivers running into Lake Michigan; bears, wolves, elk, deer and foxes are also found in the forests.

The territory is finely situated for commerce, being almost surrounded by navigable waters, which will soon be connected by canals with the Hudson on the one hand, and the Mississippi on the other. The vessels which navigate the lakes are generally from 10 to 60 tons burden. The amount of shipping in 1819, owned in Michigan, was about 600 tons. The merchants supply themselves with European goods mostly from the city of New York. The goods are transported by land to Buffalo, and thence by water to Detroit; but the revenue is defrauded to a considerable amount by smuggling carried on from the neighboring province of Upper Canada. Detroit and Michillimackinac are ports of entry. Pop. 8,896. Engaged in agriculture 1,468, in commerce 392, in manufactures 196.

Michillimackinac, commonly called 'Mackinaw', isl. Michigan Territory, in the straits which connect Lake Michigan with Lake Huron, 184 m. N. E. Fort Howard, 313 N. Detroit. Lon. 84° 10' W. Lat. 45° 54' N. It is about 9 miles in circumference. The village of 'Mackinaw' is on the S. E. side of the island, on a small cove, which is surrounded with a steep cliff, 150 feet high; it is built on two streets, parallel with the lake, intersected by others at right angles, and contains a court-house and jail, and about 100 houses. On the top of the cliff stands the fort. Behind the fort, at the distance of half a mile, is another summit, 150 feet higher, and 300 feet above the level of the lake, on which Fort Holmes is erected: from this spot there is an extensive prospect both into Lake Huron and Lake Michigan. The figure of the island suggested to the Indians the appropriate name of Michi-Mackinaw, or Great Turtle. It exhibits a beautiful appearance, seen from the lake. During the summer, 'Mackinaw' is the resort of many fur traders, and of many thousand Indians, from the regions N. W. and S. W.

Middlebury, p-t. and cap. Addison co. Vt. 33 m. N. N. W. Rutland, 35 S. S. E. Burlington. It is pleasantly situated on Otter creek, at the falls, 20 miles from the mouth of the river, and 13 above Vergennes. At the falls there are 2 cotton manufactories, a nail manufactory, several grist mills and saw mills, and a manufactory for sawing marble. An extensive quarry of fine marble was discovered in 1804, on the bank of the creek, near the centre of the village. It is now wrought into tombstones, mantle-pieces, sideboards, &c. and transported to various parts of the country to the amount of 7 or 8,000 dollars annually. The town contains a court-house, jail, academy, 2 printing offices, 2 houses of public worship, 1 for Congregationalists and 1 for Methodists, and the college buildings, one of which is an elegant edifice of stone, 4 stories high, and containing 48 rooms for students. Pop. 2,535.

Middlebury college was incorporated in 1800, and has been supported entirely by private bounty. It has a president, 4 professors, and 2 tutors, a library of more than 1,200 volumes, a valuable philosophical apparatus. The medical school at Castleton is connected with the college. Number of students in 1822, 172, including 85 medical students.

Middlesex canal, Mass. is wholly within the county of Middlesex. It connects Boston harbor with Merrimack river. It is supplied with water by Concord river, which it crosses on its surface. From that river southward it descends 107 feet, by 13 locks, to the tide water of Boston harbor; and from that river northward, it descends 21 feet, by 3 locks, to the level of Merrimack river. The locks are all 90 feet by 12. The canal is 31 miles long, 24 feet wide, and 4 feet deep. It was commenced in 1793, and completed in 1804, at an expense of more than \$700,000, and is the greatest work of the kind, except the New-York canals, in the U. States. By this canal and Merrimack river, an easy communication is opened between Boston and the interior of New Hampshire.

Middletown, city, port of entry, and cap. of Middlesex co. Ct. is pleasantly situated on the W. bank of Connecticut river, 31 m. from its mouth, 15 S. Hartford, 25 N. E. New Haven, 35 N. W. New London. Pop. 2,618; and including the township, 6,479. It contains a courthouse; jail; almshouse; 2 banks, one of which is a branch of the U. S. bank; 2 insurance companies; 3 printing-offices; and 10 houses of public worship, 4 for Congregationalists, 3 for Baptists, 1 for Episcopalians, 1 for Methodists, and 1 for strict Congregationalists. There are several important manufactories in this town, most of them recently established. Among them are a sword factory, where about 5,000 swords are annually manufactured; a pistol factory, which employs 60 or 70 men, who make 8 or 10,000 pistols annually; a rifle factory, which employs from 25 to 30 hands, and produces 1,000 or 1,200 rifles in a year; an ivory comb factory, a pewter factory, and a factory of block-tin buttons. These have all been established since 1813, and most of the swords, pistols, and rifles have been sold to the government of the U. S. The other establishments are 2 woollen factories, 2 cotton factories, a paper mill, powder mill, and distillery. A lead mine was opened about the year 1770, on the Connecticut, 2 miles S. E. of the city, and a considerable quantity of metal was taken from it, but it was at last found unprofitable, and was abandoned.

Milan, formerly a dutchy in the north of Italy, between the Alps on the north, and the Appennines on the S. having Piedmont on the W. and the Venetian territory on the E. A portion of it belongs to the kingdom of Sardinia; the remainder now forms, along with the dutchy of Mantua, and the Valteline, the government of Milan, and most western of the two great divisions of Austrian Italy. The government contains 8,030 square miles, and 2,082,000 inhabitants. It is divided into eight delegations, viz. those of Milan, Pavia, Lodi, Como, Sondrio, Bergamo, Brescia and Mantua. Of these, the delegation of Milan contains 670 square miles, and 427,000 inhabitants. The Sardinian Milanese contains about 3,300 square miles, and 556,000 inhabitants.

Milan, or *Milano*, a large and fine city, the capital of the Lombardo-Venetian kingdom or Austrian Italy. It is on the river Olona, in a beautiful plain, between the Ticino and the Adda. The streets are, in general, narrow and winding, and the private houses have no great pretensions to elegance, but the public edifices display all the richness and magnificence of Italian architecture. The cathedral is the grandest and most imposing specimen of Gothic architecture extant, and, after St. Peter's of Rome, and St. Paul's of London, the finest church in Europe. It was begun in the 16th century, but on so large a scale, that it still remains unfinished. It is built of white marble, and is remarkable for the extreme lightness of its construction. It is 490 feet long, 298 broad, and 260 high. The hospitals and charitable institutions of Milan are numerous. The great hospital is an immense edifice, capable of containing 1,200 patients. The great foundling hospital receives about 4,000 children. Of the literary and scientific institutions, the first is the Ambrosian college. Its valuable library contains 60,000 volumes and about 15,000 manuscripts, together with a fine gallery of paintings, statues, antiques, medals, and curiosities. The university of Milan was

constituted by the empress Maria Theresa in 1766. The trade of Milan is not extensive. The exports consist of rich silk stuffs, ribbons, printed cottons, leather, and paper. The porcelain made at Milan may vie with almost any in Europe. The city was taken on the 15th May 1796, by the French under Bonaparte. In 1799, the French were driven from it by the Austrians and Russians under Suwarrow. After the unfortunate battle of Marengo, (June 1800,) Milan again fell into the hands of the French. It is now the residence of an Austrian viceroy, and the see of an archbishop. 75 m. E. N. E. Turin, 145 N. W. Florence, 289 N. W. by N. Rome. Lon. 9° 11' E. Lat. 45° 28' N. Miramichi, bay and river on the N. E. coast of New Brunswick. The bay sets up between Portage island on the N. and Escuminax point on the S. Vessels of the largest size ascend the river 40 miles and boats 80 miles further. The salmon fishery was formerly very extensive, but has declined. The principal article of export is square timber for the British market. Half of all exported from the province is shipped from Miramichi river. The annual value of the timber shipped from this river is £120,000. The first settlement was made in 1784. The number of settlers on the river and its branches in 1822 was 9,000 or 10,000, consisting of Scotch, Irish and English. The original settlers were Roman Catholics, but there are now Protestant clergymen of various denominations. Surveys have ascertained the practicability of a road from Halifax through New Brunswick by this river and Chaleur bay to the St. Lawrence. It would facilitate the settlement of this part of the province. 40 m. N. W. of Shediac bay, 35 S. E. of Chaleur bay.

Misitra, pronounced *Mistra*, t. Eu. Turkey, in the S. E. part of the Morea, 28 m. S. S. E. Tripelizza. It stands on the declivity of a hill, at the foot of Mount Taygetus, in a most beautiful and picturesque situation. Since the unfortunate invasion of the Morea by the Russians, in 1770, Misitra is falling into ruins. Among the ruinous buildings are several fragments of sculpture, the relics of the famous Sparta, which stood 2 miles distant from the modern Misitra. Pop. 4,000.

Mississaugaiegon, r. N. W. Territory, formed of two branches, one of which, the Akook Seeba rises only a few miles from the banks of St. Louis river, and the other near Lower Red-cedar Lake. These meet in Spirit lake about 10 miles long and 4 wide. From this lake the Mississaugaiegon issues and pursuing a southerly course joins the Mississippi 14 m. above St. Anthony's falls. From its mouth to Spirit lake is ten day's journey.

Missisque, r. Vt. which rises S. W. of Lake Memphramagog, and runs into Missisque bay, in the N. E. part of Lake Champlain.

Mississippi, r. U. States, rises in lat. 47° 47' N. and lon. 95° 6' W. amidst lakes and swamps dreary and desolate beyond description, and after a S. E. course of about 900 miles, reaches the falls of St. Anthony, in lat. 44° N. where it descends perpendicularly 40 feet. From these falls to the junction of the Missouri, in lat. 38° 27' N. the distance is 843 miles, and from the junction of the Missouri to its mouth, in the gulf of Mexico, is 1,395 miles making the whole length of the river more than 3,000 miles. It is navigable for boats of 40 tons to the falls of St. Anthony. Ships seldom ascend above Natchez. The navigation of the river is attended with danger on account of sawyers, pla-

ters, falling banks, and other difficulties. *Sawyers* are large trees, whose roots are fastened to the bottom of the river, while the top just appears at the level of the water. The tree is continually forced downward by the current, which is still not strong enough to tear it out, and suffers it occasionally to recoil, so that a regular vibratory motion is kept up, which is performed once in ten or fifteen minutes; and if a boat be passing over it at the time it is recoiling, the destruction of the boat is inevitable. When the top of the tree does not quite reach the surface of the water, it is called a *Sleeping Sawyer*, and this is the most dangerous, for it cannot be seen. *Planters*, are trees in a similar situation, but firmly fixed, having no motion. *Falling banks* are parts of the bank, so undermined by the current, that pieces of them, frequently more than an acre in extent are falling into the stream. Boats are often destroyed by them.

The current of the Mississippi is very rapid. The passage of ships ascending the river from the Balize to New-Orleans takes up from 5 to 30 days, while a light wind will carry them down in 12 hours. From New-Orleans to the mouth of the Illinois, the voyage formerly required 8 to 10 weeks. But the introduction of steam-boats has greatly facilitated the ascent of the river, and the voyage is now performed in less than one third of the time formerly demanded. The number of steam-boats has very rapidly increased within a few years, and is still increasing. The first steam-boat on the western waters was built at Pittsburg, in 1811. In 1819, there were 50, measuring together 7,306 tons. At the same time there were 13 new boats on the stocks.

The principal tributaries of the Mississippi from the west, are Red River, Arkansas, White river, Missouri, Des Moines, and St. Peters; and from the east, the Yazoo, Ohio, Illinois, and Wisconsin. The banks of the Mississippi are annually inundated for a considerable extent, particularly on the western bank, and in the lower part of its course. Just below the mouth of Red River, commences what is called the Delta of the Mississippi. The river here, instead of receiving the tribute of inferior streams, divides into numerous branches or bayous, which, diverging from each other, slowly wind their way to the sea. See *Louisiana*.

Mississippi, one of the U. States, bounded N. by Tennessee; E. by Alabama; S. by the gulf of Mexico and Louisiana; W. by Louisiana and Arkansas territory. The boundary runs as follows: Beginning on the Mississippi at 35° N. lat. it proceeds due east to Tennessee river, and up that river to the mouth of Bear creek; thence in a southerly course to the N. W. point of Washington co. in Alabama; thence due S. to the gulf of Mexico; thence westwardly, including all the islands within six leagues of the shore, to the mouth of Pearl river; up that river to 31° N. lat., thence due W. to the Mississippi, and up that river to the place of beginning. It extends from lat. 30° 10' to 35° N. and from lon. 88° 10' to 91° 35' W. and contains about 45,000 square miles, or 29,000,000 acres.

About one half the territory of this State, embracing the northern and north eastern parts, is in the possession of the Chickasaw and Choctaw Indians. In 1820, the Choctaws ceded to the U. States, a large tract, including all their lands on the Mississippi, below the mouth of the Arkansas. The part of the State belonging to the whites is in the S. and S. W. Pop. 75,448; slaves 32,814.

Engaged in agriculture 22,033, in commerce 294, in manufactures 650. Two thirds of this population is concentrated in the counties bordering on the Mississippi, below the mouth of the Yazoo.

The southern part of the State for about 100 miles from the gulf of Mexico, is mostly a flat country, with occasional hills of moderate elevation, and is covered with forests of the long leaved pine, interspersed with cypress swamps, open prairies, and inundated marshes. As you proceed farther north, the country becomes more elevated and agreeably diversified, and the soil is a deep rich mould. The Indian country is very fertile, and enjoys as fine and healthy a climate as any on the continent. On the Mississippi, between the mouth of the Yazoo and the southern boundary of the State, there are extensive bottom lands, occupying a surface of about 600 square miles, liable to annual inundation. The hilly country rises like a buttress from this plain, and for 10 or 15 miles towards the interior, presents a warm and waving soil, generally composed of rich loam, and admirably adapted to the cultivation of cotton. The price of land is very high in this part of the State, and immense profits have been realized by the cotton planters. The sugar cane is sometimes planted as high up as Natchez, but not with the same success as is experienced farther south. Tobacco and indigo were formerly extensively cultivated, but since the introduction of cotton, they have been almost abandoned. Most of the flour and grain used in the settlements on the Mississippi is brought from Kentucky.

Mississippi was admitted into the Union in 1817. By the act of admission, it is provided that the public lands shall be exempted from all taxes, while belonging to the U. States, and for 5 years from the day of sale; and that lands belonging to citizens of the U. States, residing without the State shall never be taxed higher than lands belonging to persons residing therein; and that the river Mississippi, and the navigable rivers and waters leading into the same, or into the gulf of Mexico, shall be common highways, and forever free of toll or duty to all the citizens of the U. States. In return for this concession, Congress have provided that after paying a debt of 1,250,000 dollars to Georgia, and indemnifying certain claimants, 5 per cent. of the net proceeds of the public lands lying within the State shall be devoted to making roads and canals for the benefit of the State.

The climate is temperate, and in the elevated parts, generally healthy. The bay of St. Louis in the southern part of the State, is esteemed one of the most salubrious places in that climate, and is the retreat of many of the citizens of New-Orleans during the sickly season. At Shieldsborough, on this bay, 50 m. N. E. New-Orleans, a college was established in 1818. Natchez is much the largest town in the State, but Monticello is the seat of government.

Missouri, the largest river of North America, is formed by three branches, called Jefferson's, Madison's and Gallatin's rivers, all of which rise in the Rocky Mountains, between 42° and 48° N. lat. and unite at one place, in lat. 45° 10' N. and lon. 110° W. From the confluence of these streams to the Great Falls, the course of the river is northerly; thence to the Mandan villages easterly; and from the Mandan villages to the junction with the Mis-

time to be held by the patentees, or their heirs, for the term of three years from the date of their patents. It is also provided, that the river Mississippi, and all the navigable waters leading into the same, shall be common highways, and for ever free of toll or duty to all the citizens of the U. States, and that in no case shall non-resident proprietors be taxed higher than residents.

St. Louis is by far the largest town. The other principal towns are St. Genevieve, St. Charles, and Franklin. Of a less size are Herculaneum, Potosi, St. Michael, New-Madrid, and Cape Girardeau. The seat of government is at present at Cote-sans-dessein.

Missouri Territory, a territory of the U. States, bounded N. by the British dominions; E. by the N. W. Territory and the States of Illinois and Missouri; S. by Arkansas Territory; S. W. by the Spanish dominions; and W. by the Rocky Mountains. It is a vast wilderness, inhabited, with the exception of a few military posts, exclusively by Indians. It is estimated to contain 800,000 sq. miles. Taking the whole country together, it may be pronounced an extensive region of open plains and meadows, interspersed with barren hills, and having some resemblance to the Steppes of Tartary, or the Saaras of Africa, but without the morasses and dull uniformity of the one, or the dreary sterility of the other. It is almost destitute of woods, except in the neighbourhood of streams, and can scarcely be said to admit of settlements. The tracts lying immediately on the great rivers, constitute the most valuable parts. The banks of the Mississippi afford suitable situations for settlements as high up as the falls of St. Anthony. Above the falls, the pine country commences. Buffaloes and other wild animals abound in almost every part of the territory. They go in immense herds. Lieut. Pike, who travelled on the Arkansas towards its sources, saw, as he judged, 3,000 in one drove. The face of the earth appeared to be covered with them. The banks of the Arkansas and Missouri rivers are the paradise of hunters. Of all countries visited by man, this produces game in the greatest abundance.

Mobile, co. Alabama, on both sides of the bay and river of the same name. Pop. 2,672. Slaves 836. Engaged in agriculture 145, in commerce 96, in manufactures 518. Chief town, Mobile.

Mobile, p-t. port of entry, and cap. of Mobile co. Alabama, is on the western channel of Mobile river, near its entrance into Mobile bay. It is built on a high bank, in a dry and commanding situation. Vessels drawing more than 8 feet water, pass up Spanish river, 6 miles long, into Mobile river, and then drop down to the town. While this town was under the dominion of the French and Spaniards, it was a mere military post. When it came into the possession of the United States, in 1813, it contained only 100 houses; but, since the rapid progress of the settlements on the Tombigbee and Alabama, Mobile has increased in size and importance. From Oct. 1821 to March 1822, there were exported 18,723 bales of cotton, 1,155,633 feet of lumber and 88,300 staves. A fire-proof warehouse has lately been erected capable of containing 8,000 bales of cotton and provided with presses for re-pressing cotton. A steam-boat plies regularly between Mobile and Tuscaloosa; and another ascends the Alabama to Montgomery, a distance by water of 500 miles. 33 m. N. Mobile point, 15 W. N. W. Blakely, 50 W. N. W. Mobile bay, a bay at the mouth of Mobile river, 30 miles long, and, on an average, 12 broad. It communicates with the Gulf of Mexico by two straits, one on each side of Dauphin island. The strait on the W. side will not admit the

passage of vessels drawing more than five feet of water; that on the E. side, between the island and Mobile point, has 18 feet of water, and the channel passes within a few yards of the point. There is a bar however across the bay, near its upper end, over which there is only 11 feet water.

Mobile, r. Alabama, is formed by the union of the Alabama and Tombigbee, 40 m. above Mobile. After a course of 3 miles it divides and enters Mobile bay in several channels. The main western channel is called the Mobile; the main eastern channel, is the deepest and widest, and is called the Tensaw. The eastern channel passes by Blakely.

Mocha, an extensive city of Yemen, in Arabia, the principal port on the Red sea, and the channel through which almost all the intercourse of Europe with this part of the world is carried on. The trade with Mocha was nearly monopolised by the English till 1803, when the Americans discovered that large profits might be made by exporting coffee, and they immediately commenced the business on a large scale. The competition soon raised the price from 36 to 40 or 50 dollars per bale. In the following year 8,000 bales were exported by the Americans, and 2,000 by the British. The former calculated to deliver it in America at 6l. 18s. 9d. per cwt. while the India company could not deliver it in England at less than 10l. 3s. 8d. The trade is carried on by about two hundred and fifty Banians or Gentoo merchants. The English pay a duty of 3 per cent. on all imports, but other foreigners of five. Lon. $43^{\circ} 20'$ E. Modena, a dutchy in the N. of Italy, situated between the Po on the N. and the Appennines on the S. and extending from $9^{\circ} 54'$ to $11^{\circ} 20'$ E. lon. and from $44^{\circ} 6'$ to $44^{\circ} 55'$ N. lat. It is bounded E. by the States of the Church, and W. by Parma. The territory of Modena, properly speaking, consists only of the six districts of Modena, Reggio, Mirandola, Correggio, Carpi, and Navellara; but as the principality of Massa and Carrara will revert, on the death of its present sovereign, to the

house of Modena, it is commonly included. The extent and population of Modena proper, is 1,740 sq. miles, with 332,000 inhabitants; of Massa and Carrara, 320 sq. miles, with 38,000 inhabitants. Total, 2,060 sq. miles, and 370,000 inhabitants. The climate is mild and pleasant, and the soil rich and fruitful. The products are corn, wine, fruit, olives, mulberry-trees, hemp, &c. This dutchy forms an independent state, possessed, in full sovereignty, by a lateral branch of the house of Austria, the Archduke Francis of Este. The revenue is computed at £140,000 sterling; the troops at 1,500 men.

Mohawk, r. N. Y. a large western branch of the Hudson, which rises 20 m. N. of Rome, and running S. of E. passes by Rome, Utica, and Schenectady, and, after a course, of about 135 miles, falls into the Hudson by several mouths between Troy and Waterford. The navigation of the river is interrupted by numerous rapids and falls, the principal of which is the Cahoes, or Cahoes, two miles from its mouth, which is much admired for its beauty and sublimity. The river, which is here between 300 and 400 yards broad, descends, at high water, in one sheet, to the depth of 70 feet. About three-fourths of a mile below, a bridge has been thrown across the Mohawk, from which the view of the falls is inexpressibly grand. At Rome there is a canal, 1½ miles long, connecting the Mohawk with Wood creek, and opening a communication through this creek, Oneida lake, and Oswego river into Lake Ontario. Mongolia, an extensive region of Central Asia, lying N. and N. W. of China. The country is traversed by the wandering hordes of that Nomadic race, which, under the name of Mongols, or Moguls, has been so celebrated and formidable in the annals of Asia. At present, the Mongols have lost all this widely extended dominion, and are split into a number of petty states, dependent on the emperor of China. The proper limits of Mongolia are, to the E. the country of the Mantchous; to the W. the country of the Tartars; on the S. it is bounded partly by China, and partly by Turkestan, and on the N. by Asiatic Russia. Nearly the whole of this immense territory consists of a level plain. The Mongols are only nominally subject to China; but the internal government is entirely carried on by their native princes. Tribute forms the extent of their allegiance. They profess Shamanism, or the religion of Fo. Be-

sides the Mongols proper, the Kalkas, the Eluths, and Buriats, are considered as of the same race.

Monte Video, t. S. America, in Buenos Ayres, on the N. side of the river Plata, in a small bay, 20 leagues W. of Cape Santa Maria, and entirely walled round. The harbor, although shallow, and quite open to the western winds, which blow with incredible fury over the vast plains of the interior, is the best in the Rio de la Plata. The town occupies the whole of a peninsular promontory, that forms the eastern point of the harbor. The fortifications are to the north; they are regular works, built of stone, inclosing the whole of the peninsula. The chief trade is in hides, tallow, and dried beef. In 1817, Monte Video was taken by the Portuguese, who claim the whole country E. of the Plata. 120 m. E. N. E. Buenos Ayres. Lon. 56° 14' 30' W. Lat. 34° 54' 48' S. Montpelier, a large and ancient t. in the south of France, cap. of Herault, between the rivers Masson and Lez. The squares are numerous, but none are spacious or elegant. The *Place du Peyron* is outside of the town, and is said to be the finest public walk in Europe. The view enjoyed from it extends to the S. W. as far as the Pyrenees. Water is conveyed to the town from a distance of three leagues by a magnificent Roman aqueduct, composed of three rows of arches. Montpelier has long been the seat of a celebrated university, particularly famous for its school of medicine. This still subsists under the name of an academy. The principal trade is in wine. A brisk trade is also carried on in verdigris, which is manufactured here in immense quantities. 32 m. W. S. W. Nismes, 100 W. N. W. Marseilles. Lon. 3° 52' E. Lat. 43° 36' N. Pop. 33,000.

Montreal, t. Lower Canada, on the S. side of the island of Montreal, in the river St. Lawrence, the second town of the province in size, but the first in commercial importance. The houses are, for the most part, built of a greyish stone, many of them large, handsome, and in a modern style. Sheet iron or tin is the universal covering of the roofs. Among the public institutions, are the Hotel Dieu, established in 1644, for the purpose of administering relief to the destitute sick, and conducted by a superior and 36 nuns, who attend and nurse the patients; the convent of Notre Dame, composed of a superior and 60 sisters, for the instruction of females in all the necessary branches of their education; the general hospital, or convent of the Grey Sisters, a refuge for invalids and the aged poor. The cathedral church in the Place d'Armes, is a large substantial stone building, in which no great taste is displayed, the height not being in due proportion.

The seminary of St. Sulpice is a very respectable institution, established by the French in 1657; it has several able professors, and a considerable number of students. A new college has been recently erected, as an appendage to the seminary, at an expense of more than 10,000*l*. There is no English college in Canada, but a foundation for one has been laid by the Hon. James M'Gill, who died in 1814, and bequeathed 10,000*l* besides a handsome real estate, for endowing a college, provided it should be erected in 10 years. The court-house in Notre Dame-street, is a plain handsome building. At the upper end of the new market place is a handsome monument erected in honour of lord Nelson.

Montreal is the grand depot of the N. W. company, whose fur trade is of vast extent and importance. It is also the channel through which is carried on the commerce between Canada and the United States. The harbor is not large but always secure for shipping. The general depth of the water is from 3 to 4½ fathoms, with very good anchorage every where between the Market-gate island and the shore. The greatest disadvantage

Mooltan, or **Moultan**, a province of Hind. between 28° and 31° N. lat. bounded N. by Lahore and Cabul, W. by Baloochistan, S. by Ajmeer and Sinde, and E. by Lahore and Ajmeer. The northern and eastern districts of this province are extremely fertile, being watered by the rivers of the Punjab. To the west of the Indus it is sterile. The nabob of Mooltan is obliged to pay tribute to the Afghans, Seiks, and rulers of Sinde. The population consists of Afghans, Jats, and other Hindoo tribes.

Mooltan, the capital of the above-mentioned province, is about 4 m. S. E. of the Chenab, or Acesinies river. It is surrounded by a fine wall, forty feet high, with towers at regular distances, and four miles in circumference. It is famous for its silks and carpets. Here are 2 tombs of Mahometan saints, which are visited annually by many thousands of pilgrims from all parts of India. Lon. 71° 19' E. Lat. 30° 35' N.

Moravia, a province of the Austrian empire, bounded E. by Hungary, S. by Austria proper, N. and W. by Bohemia. Including Austrian Silesia, which is now annexed to it, it contains 12,122 sq. miles, and 1,688,252 inhabitants. Of these, 1,840 sq. miles, and 347,000 inhabitants, belong to Silesia. The soil of Moravia is, in general, of great fertility, particularly in the south. Little corn, however, is raised for exportation. Flax is cultivated in considerable quantities. In certain favourable situations, the soil and climate are well adapted to the grape. The most productive mines are those of iron and lead. The inhabitants are of three races; Germans, Slavonians, and Jews. The latter amount to only 30,000. The Roman Catholic religion is the most prevalent. The Protestants were formerly numerous, but being persecuted, were compelled to emigrate, and, when Joseph II. proclaimed liberty of worship, the remaining Protestants were found to be only 12,000 Calvinists, and 11,000 Lutherans. Moravia has, like the other provinces of the Austrian empire, an assembly of states or representatives, but their influence is little more than nominal. This province has recently made a very considerable progress in manufactures. Woollen, linen, and cotton goods are all made here on a large scale. Machinery on the English plan has of late come into extensive use.

Morea, the ancient *Peloponnesus*, an extensive peninsula of Eu. Turkey, united to the rest of Greece by a narrow neck of land called the Isthmus of Corinth. Extent, 13,500 sq. miles. The coast abounds with fine bays and harbors. The interior still presents to the eye of the traveller the same picturesque beauty, the same fertility of soil and mildness of climate, for which it was remarkable in the days of ancient Greece. The general aspect of the country is mountainous; but its surface is intersected by a number of beautiful plains and extensive vallies. The trade is inconsiderable, the total exports not exceeding in value £300,000. They consist chiefly of corn, wine, oil, cheese, but particularly of currants, of which about 80,000 cwt. are said to be shipped annually. The population is about 400,000. Of these, four-fifths are Greeks, and the remainder Turks, Albanians, and foreigners.

Morocco, an empire in the N. W. of Africa, extending on the coast from Algiers to the Sahara or Great Desert; bounded N. by the Mediterranean, E. by Algiers and Biledulgerid, S. by the Great Desert, and W. by the Atlantic. It comprehends the former small kingdoms of Fez, Morocco, Tarudant, and Tafilet. It is traversed through its whole extent by the great chain of Atlas, which runs parallel to the coast, leaving between itself and the sea a plain of 400 or 500 miles long, and from 50 to 100 broad. This plain comprises all the fertile and populous part of Morocco. The country beyond the Atlas, though at first abounding in dates and affording good pasturage, becomes gradually more and more barren, till all vegetation is lost in the wide expanse of the Sahara.

The population has been variously estimated from 5 millions to nearly 15 millions. Mr. Jackson states it from the imperial register at 14,986,000, but this is believed to be extravagant. The inhabitants consist of Moors, Arabs, Brebers and Jews. The Moors are the ruling people, and constitute the mass of population in all the cities. The Arabs wander with their flocks and herds in the interior of the districts on the borders of the desert. The Brebers are the descendants of the ancient natives, and occupy the rocks and secluded vallies of the Atlas, where they are almost independent, and often break out in rebellion, rushing out upon the plain, and sometimes carrying their arms even to the gates of the capital. The Jews are the principal merchants, and are continually insulted and most cruelly oppressed by the Moors.

The government of Morocco is the most absolute despotism on the face of the earth. There is no check whatever upon the will of the sovereign. Life and property are disposed of according to the caprice of the moment. Some of the monarchs have even considered an adherence to their engagements as an unlawful check upon their power. "Takest thou me for an infidel," said one of them to a foreigner, "that I must be the slave of my word?" The army consists of about 36,000 men of whom 24,000 are negro mercenaries, and 12,000 Moorish cavalry.

The commerce of Morocco with Europe is almost wholly carried on from the port of Mogodor. The most celebrated manufacture is that of morocco leather. The inland trade consists chiefly

of that carried on across the Great Desert, to Soudan and Tombuctoo.

Morocco, called by the natives *Marakasch*, a city of the above empire, which, being the most usual residence of the sovereign, is considered the capital, though in magnitude and population it does not equal Fez. It was founded in 1052, and in the following century, under the reign of Ali Ben Yusuf, it was in its highest prosperity, and has been represented as containing a million inhabitants. It is now much depopulated, and covered with the accumulated ruins of houses and gardens: nor is the population estimated by the most intelligent travellers at more than 30,000. It still retains vestiges, however, of its former grandeur. The temples, sanctuaries and mosques are very numerous; and some of the latter are particularly lofty and splendid. The walls are in good repair, having been strengthened, previous to the siege, by Muley Yezid, in 1792. Lon. 7° W. Lat. 30° 57' N.

Mosambique, city and s-p. E. Africa, and cap. of all the Portuguese possessions in that quarter. These possessions were at one time truly extensive, at least as to the coast embraced by them, which might be estimated at two thousand miles, including the large and populous emporia of Sofala, Mosambique, Quiloa, Mombaca and Melinda. Most of these have been successively wrested from them, and their dominion is now bounded by Cape Delgado on the N. and Cape Corrientes on the S. and includes no places of importance except Mosambique and Sofala. Mosambique is built on an island of the same name. The settlement retains few traces of its former importance. The fort, however, is strongly built, of an octagonal form, furnished with six bastions, and defended by 80 pieces of cannon. The trade has much declined, and consists now chiefly in the export of gold, ivory and slaves. The last article has been greatly diminished by the laudable zeal with which the English have exerted themselves for the prevention of this traffic. The whole number now exported is not supposed to exceed 4,000. Lon. $40^{\circ} 40'$ E. Lat. $15^{\circ} 1'$ S. Pop. 2,800, of whom 500 are Portuguese, 800 Arabs, and 1,500 negroes.

Moscow, a government of Eu. Russia, lying between $35^{\circ} 10'$ and $38^{\circ} 40'$ E. lon. and $54^{\circ} 40'$ and $56^{\circ} 30'$ N. lat. Area, 10,000 square miles. Pop. 1,126,000.

Moscow, (in Russian, *Moskva*,) a great city of Eu. Russia, and formerly the capital of the empire. Including the suburbs, it is more than 20 miles in circumference. The great extent of space thus occupied is owing partly to the width of the streets, but more to the number of spacious courts, gardens, and other open spaces. The river Moskva traverses the city from W. to E.

Moscow consists of four circular or semi-circular divisions, each surrounding the other. 1. The central part, containing the Kremlin and the Kitaigorod, or mercantile quarter. 2. The Bielogorod, or White town, extending around the central part like a half moon, and formerly encompassed with white stone walls. 3. The Semliano-gorod, or Earthen town, much more extensive than either of the preceding, and surrounding them both in a circular form. It derived its name from the earthen ramparts by which it was formerly

defended. 4. The Slobodes, or suburbs, which, to the number of nearly 30, surround the whole, and occupy a great extent of ground. The Kremlin stands on a height, and commands a pleasant prospect over almost the whole city. Here is the ancient palace of the czars, which escaped the the great conflagration of 1812, but was much damaged by mines sprung by the last French detachment, on their leaving Moscow. It is now, however, rebuilt, with improvements. Here is also the church of St. Michael, containing the tombs of the ancient czars, and the church of the Assumption of the Virgin Mary, in which the emperors are crowned. The Bielo-gorod contains several of the widest streets in Moscow; but has no remarkable public building, except the arsenal and cannon foundry. A considerable part of this quarter escaped the great conflagration. The Semliano-gorod has also wide streets, and contains from its magnitude, a large proportion of the population of Moscow. The Slobodes, or suburbs, are mean, and look like so many detached villages, with the exception of the German suburb, which is inhabited by a number of foreign mechanics. Fires are of very frequent occurrence in this wooden built city; and a large establishment of firemen and fire engines is connected with the police.

In September 1812, at the time of the French invasion, the Russians set fire to the city, and three-fourths of it were consumed; the Kremlin and Bielo-gorod being almost the only quarters preserved. For some time the rebuilding went on slowly: the years of 1813, and part of 1814, were years of war and heavy expense; but no sooner was peace concluded, than the greatest exertions were made to this effect, both by the government and individuals; and by the beginning of 1818, a new city seemed to have risen from the ruins. The Kitai-gorod, or quarter for the exchange and mercantile ware-houses; the more extensive quarter of the Semliano-gorod; and even the Slobodes or suburbs, were all rebuilt before, or in the course of, that year; and the population of Moscow was carried to nearly its former magnitude. The deficiency is in the palaces of the nobility; many of these have not been rebuilt, having been on a scale by far too large for the income of their owners, who are now contented to live at a reduced expense on their estates in the country.

The new city has wider streets, and greater uniformity in its private buildings; but in its churches and public edifices, the Asiatic taste is still preserved. The university having been rebuilt in a magnificent form, by aid from the public treasury, was opened on the 11th November 1818, and the former course of study resumed. The Kremlin is the great depot of the antiquities and curiosities of Moscow. Here is the tower of Ivan, which formerly contained the largest bell in the known world, its weight being above 200 tons. It fell last century, in consequence of the tower being burned, and is now considerably sunk in the earth. Moscow is the seat of an archbishop: his palace is in the Kremlin, and contains the regalia of the empire. The churches and chapels, above 700 before the fire, are now less numerous. The population in summer does not much exceed 200,000, but in winter it is nearly 300,000, from the number of traders and the great resort of the Russian nobility. The manufactures consist chiefly of cotton, silk, linen, paper, leather, and

sugar. In regard to trade, Moscow, though at a great distance from any sea, is the great entrepot for the interior of the empire. Moscow is in a direct line, 397 m. S. E. St. Petersburg, 1,042 E. by N. Vienna. Lon. $37^{\circ} 33'$ E. Lat. $55^{\circ} 45'$ N.

Mosul, pachalic, A. Turkey, on both sides of the Tigris, and surrounded by the pachalic of

Bagdad. It is small but very fertile, producing cotton, wine, silk, fruits, &c. Pop. 200,000 Turks, Curds and Arabs.

Mosul, t. and cap. of the above pachalic, is on the W. bank of the Tigris. Its principal ornaments are a college, the tomb of sheik Abdul Cassin, and the remains of a beautiful mosque. The coffee-houses, baths, khans, and bazars are also handsome buildings. The city has a stone wall and seven gates, but is in a declining state; the wall is broken down in many places, and most of the good buildings are crumbling into ruins. The inhabitants are a mixture of Turks, Curds, Jews, Armenians, Nestorians, and Arabs. Pop. 35,000. To the north, on the opposite side of the river, is the village of Nunia, supposed to occupy the site of the ancient *Nineveh*. Lat. $36^{\circ} 21'$ N.

Nankang, a city of China, of the first rank, in Kiangsee, on a branch of the Poyang lake. Lon. 115° 39' E. Lat. 29° 33' N.

Nanking, a large city of China, not equalled perhaps by any in the world for the extent of ground inclosed within its walls. Nanking was at one time the imperial city and capital of Southern China; but since the seat of government, and the six great tribunals, were transferred to Pekin, it has lost its importance, and a considerable share of its population. About a third of its area is now supposed to be unoccupied. Its situation, however, is highly advantageous for commerce, being on the S. bank of the river Yang-tse-Kiang, the largest in the empire; and vessels of great burden were once accustomed to sail up to it; and it still enables Nanking to communicate by barks with all the interior of the empire, while the great canal affords a navigation to Pekin. This city is distinguished by its manufactures, above the rest of the empire. The staple one is silk, particularly that of plain and flowered satins. Its principal ornaments are the gateways, which are very lofty and splendid, and the porcelain tower. This celebrated pagoda is of an octagonal form, 9 stories high, and mounted by 884 steps. Nanterre, t. France, 5 m. W. Paris.

Nantes, a large commercial city in the W. of France, cap. of Loire Inferieure, on the right bank of the Loire, 27 m. from its mouth. It contains a number of manufactures. The principal are for the spinning, weaving, and printing of cotton; also for making woollens and linens of various qualities. Here are likewise manufactures of cordage, earthenware, of glass, of hardware, and of spirituous liquors. Ship-building, also, is carried on to a considerable extent. The foreign trade, though not great, extends to a number of different countries. The intercourse with America is active and increasing. From the West Indies the chief import is sugar, for which there are fifteen refineries in the town. By means of the Loire and its tributary streams, it sends its merchandise into the in-

terior of the kingdom. Nantes is the see of a bishop. It has been the seat of several ecclesiastical councils, and is noted in history for the celebrated edict issued there in 1598, by Henry IV. in favour of the Protestants, the recall of which, in 1685, by Louis XIV. is justly considered a fatal error in that memorable region. The environs of Nantes, are delightful, particularly on the banks of the Loire. Lon. $1^{\circ} 22' W.$ Lat. $47^{\circ} 13' N.$

Nantucket, island, Mass. about 10 m. E. Martha's Vineyard, and 24 S. of Cape Cod. It lies between $41^{\circ} 13'$ and $41^{\circ} 22'$ N. lat. and between $69^{\circ} 56'$ and $70^{\circ} 13'$ W. lon. It is 15 miles long, and contains about 50 sq. miles. The climate is mild compared with that of the adjacent continent. The soil is light and sandy, but in some parts is rich and productive, particularly in hay. It was formerly well wooded, but there is not now a single tree of native growth. The land is chiefly held in common by the inhabitants. All the cows amounting to about 500, feed together in one herd; all the sheep, 14,000, in one pasture. The inhabitants are principally robust, enterprising seamen, extensively engaged in the whale fishery, and they have the reputation of being the most skilful and adventurous seamen in the world. They suffered severely both in the revolutionary and late war, a large portion of their shipping being captured by the British. Since the peace, however, the whale fishery has revived, and they had in 1818, 45 ships, averaging more than three hundred tons, employed in this business. There are 30 spermaceti works on the island, employing a capital of \$600,000. In 1820, there were belonging to Nantucket 72 ships employed in the whale fishery, whose burthen together exceeded 21,600 tons. Pop. 7,266. Engaged in agriculture 64, in commerce 809, in manufactures 399.

Nantucket, p-t. and port of entry on the above island, 30 m. S. E. Falmouth. 60 S. E. New-Bedford, 123 S. S. E. Boston. It is on a harbor, included within a large bay, which stretches along the whole northern side of the island, from Sandy point on the N. E. to Eel point on the W. The bay makes a fine road for ships, except with the wind at N. W. when there is a heavy swell. The harbor is completely safe from all winds, being almost land-locked, the points at its entrance approaching within a mile of each other. There is a bar of sand at the mouth of the harbor on which there is only $7\frac{1}{2}$ feet water at low tide. Nantucket is the only town on the island, and contains 2 banks, 2 insurance companies, 5 houses of public worship, 2 for Friends, 2 for Congregationalists, 1 for Methodists.

Naples, country in the S. of Italy, forming the continental part of the kingdom of the two Sicilies, bounded N. W. by the States of the Church, N. E. by the Adriatic, and S. and W. by the Mediterranean. It extends from $13^{\circ} 16'$ to $18^{\circ} 50'$ E. lon. and from $37^{\circ} 46'$ to $42^{\circ} 55'$ N. lat. It is of an irregular shape, and in comparing the Italian peninsula to a boot, it forms the foot and lower part of the leg. Extent, 30,000 sq. miles. Pop. above 5,000,000 by the returns of 1818. It is divided into the 15 following provinces:

Napoli or Naples.
Terra di Lavoro.
Principato Citra.
Principato Ultra.
Abruzzo Ultra I.
Abruzzo Ultra II.
Abruzzo Citra.
Capitanata.

Molise.
Terra di Bari.
Terra d'Otranto.

Calabria Citra.
Calabria Ultra I.
Calabria Ultra II.

The surface of this kingdom is mountainous, but it contains also a number of beautiful plains and extensive vallies, which, under the influence of an invariably mild climate, present a luxuriance of vegetation, and a beauty of scenery, hardly to be met with in any other part of Europe. The kingdom is traversed by the great chain of the Appenines. The southern part of the kingdom of Naples is subject to volcanoes and earthquakes, which are sometimes so violent as to bury whole cities in their ruins. Marshes are found on various parts of the sea coast, and by their insalubrity, render some of the most fertile tracts almost uninhabitable. The soil is light, and in some parts volcanic, but in general fertile. The most common products are wheat, Indian corn, barley, and in the colder situations rye. Nothing can be ruder than the agricultural implements. In many parts the grain is still separated from the straw by the trampling of cattle; in other parts by two oxen dragging a rough and heavy stone, which breaks the sheaves, and shakes out the ears of the corn. The other products are rice in the marshy tracts, cotton, tobacco, olives, flax, and hemp.—Manufactures in this country are still in their infancy, which arises from injudicious taxa-

tion, and the insecurity of property. The capital has a great manufacture of porcelain, and another of fire-arms. The navigation and commerce of the kingdom are limited. The exports are confined to raw produce, such as oil, silk, wool, fruit; to which are added, in smaller quantities, corn, cotton, and wine. The imports are principally brought from Britain; or in British vessels. A commercial treaty concluded in February 1816, placed British subjects on a similar footing, as to privileges and taxation, with the natives. In January 1799, the city of Naples was entered by the French; but was evacuated in June following, and the country was governed by its own sovereign till the spring of 1806, when the city was again occupied by the French, and Joseph Bonaparte was soon after proclaimed king; and in 1808, on his removal to Spain, the crown was conferred on Murat. After the final defeat of the Neapolitan army by the Austrians in the spring of 1815, the city of Naples was surrendered early in May to a British squadron; and on the 17th June, king Ferdinand, after an absence of 9 years, made his entrance into his capital, where he was received with enthusiastic acclamations. In 1820 a revolution took place in imitation of that of Spain, and the people and army obtained from the king, a proclamation of the Spanish constitution. The emperor of Austria, however, fearing that his Italian subjects might catch the revolutionary spirit, in March 1821 sent a powerful army into the country which occupied the capital and other principal places, and terminated the revolution without much opposition.

Naples, a very large city in the S. W. of Italy, and cap. of the kingdom of Naples. The situation is one of the most delightful that can be imagined. Seated partly on the declivity of a hill, partly on the margin of a spacious bay, it spreads its population along the shore, and covers the shelving coasts and adjacent eminences, with its villas and gardens. The bay is extensive, and presents an almost unrivalled assemblage of picturesque and beautiful scenery. In point of size and population, Naples ranks after London, Paris, and Constantinople, being the fourth city of Europe. The circumference is commonly computed at 9 miles; but including all the suburbs, it is upwards of 18. The streets, though in general narrow, are straight, and tolerably regular: they are handsomely paved with large flags of lava; and, since the French occupied the city, and introduced improvements, most of them have been lighted with lamps, suspended, as in Paris, across the middle of the street. The Strada di Toledo is the finest street in Naples, and one of the best in Europe. It is broad, straight, well paved, and bordered in its whole length with elegant buildings. The houses are in general six or seven stories high, flat roofed, and covered with a kind of stucco.—The fortifications of Naples are not adapted to resist an army, though the city is surrounded with a wall, and defended by a number of towers, as well as by three large castles.—Of the public edifices of Naples, the churches are the most conspicuous; but their splendor consists less in elegance of architecture, than in the richness of their paintings, marbles, and other decorations. The university was founded in 1224. The building is divided into several compartments, and contains, 1st, the library, with 90,000 volumes; 2d the cabinet of manuscripts of Herculaneum, with the various machines for unfolding them; 3d, the museum

of paintings; 4th, that of sculpture; 5th, a collection of bronzes of Herculaneum and Pompeii; and 6th, a collection of Etruscan vases. The charitable establishments are numerous and well endowed. The total number is above sixty; of these, seven are hospitals; above thirty are schools for poor children of both sexes, who are boarded and educated.

The trade of Naples, though great for so inactive a country as the south of Italy, is small when compared to the crowded seaports of England and Holland. Its exports are confined to the products of the adjacent country, such as silk, wool, cotton, oil, wine, corn, and fruit. The imports are various, consisting both of articles of necessity and luxury, of colonial produce, and of manufactures.

The population amounts to 330,000, of whom, according to a recent estimate, 155,000 are males, and 175,000 females. The higher ranks are frequently ignorant, frivolous, and dissipated, while the lower orders are indolent and superstitious. The Lazzaroni are a part of the populace without either dwellings or regular occupation. They may be said to spend their life in the streets sauntering about during the day, and sleeping at night under a public portico, on the pavement, or on the steps of a church. Their number is said to have been formerly between 30,000 and 40,000, and is still considerable. Naples literally swarms with nobility without fortunes, priests without benefices, and beggars of all descriptions. The charge of want of cleanliness is unfortunately nearly as applicable here as at Rome, the rooms being infested with fleas and other vermin. Sea-bathing, though so easily within reach, is very little resorted to by the inhabitants. The environs of Naples are fertile, picturesque, and highly interesting to the antiquary and classical scholar. Vesuvius, the Solfatara, the curious cavern called the Grotta del Cane, the baths of Nero, the tomb of Virgil, the remains of the baths of Lucullus, ruins of Herculaneum and Pompeii, are all in its vicinity. In 1803, the city suffered severely from an earthquake. 110 m. S. E. Rome, 380 S. S. E. Milan, and nearly 1,000 S. E. Paris. Lon. 14° 15' E. Lat. 40° 50' N.

It is situated in the midst of a very fertile and populous country, and is the largest and most flourishing town in the State. In 1810, more than one third of the population of Tennessee was included within a circle of 30 miles around Nashville. The steam-boats ply between this place and New Orleans. The Cumberland is navigable for vessels of 30 or 40 tons during the greater part of the year, and in the highest floods, for vessels of 400 tons. In 1818, the town contained a court-house, jail, market-house, 2 banks, 2 printing-offices, several manufactories, and upwards of 3,000 inhabitants. Cumberland college, at this place, is under the direction of a president assisted by one tutor. The funds amount to \$50,000. Lat. $31^{\circ} 33' N$. Lon. $91^{\circ} 20' W$. Pop. 2,184. The greater part of the town stands on a bluff, upwards of 150 feet above the surface of the river. The houses have an air of neatness, though few are distinguished for size or elegance. There is a considerable inequality in the surface of the hill, which prevents handsome streets. Natchez is finely situated for a commercial depot, and its trade is rapidly increasing. The country in its rear consists of excellent cotton lands, and is laid out in extensive plantations. The income of the first planters is princely; from 5,000 to 40,000 dollars per annum. Labour is performed almost exclusively by slaves. The town contains a court-house, a bank, with a capital of 3,000,000, a hospital, and 3 houses of public worship, 1 for Roman Catholics, 1 for Presbyterians, and 1 for Baptists.

Nazareth, t. Netherlands, in East Flanders, near the Scheldt, 9 m. S.W. Ghent. Pop. 4,300.

Nazareth, village of Palestine, celebrated as the residence of our Saviour, during the first thirty years of his life. The reverence justly claimed by this circumstance, has been improved by superstition into the means of extorting large sums of money from the pilgrims to the Holy Land. A convent has been founded, containing about 14 friars of the Franciscan order. The church attached to it is erected over a cave, which is asserted to have been the residence of the Virgin Mary. In this cave are shewn her kitchen and fire-place. The monks shew also the workshop of Joseph, and the precipice where Christ saved himself from the fury of the multitude. Nazareth now forms part of the pachalic of Acre; and the oppression of Djeddar Pacha has reduced it to a wretched state of indigence and misery. It now contains about 3,000 souls, of whom 500 are Turks and the remainder Greeks, chiefly schismatics. 50 m. N. Jerusalem.

Nepaul, a long but narrow kingdom of Northern Hindostan, bounded N. by the great range of Himalah mountains, S. by the provinces of Bahar, Oude, and Delhi, and E. by Bootan. The valley of Nepaul proper, from whence the kingdom takes its name, is nearly of an oval figure; its greatest length from N. to S. being 12 miles, by 9 in the greatest breadth. On the N. and S. it is bounded by lofty mountains. This small tract is very populous, and, besides the capital, Catamandoo, is filled with villages. This valley, although between 27° and 28° N. lat. is so elevated that it enjoys an European climate. The soil is productive. The mountains contain mines of copper and iron; and, although commerce is not encouraged, it sends to Bengal, ivory, wax, honey, resin, timber, &c.; and takes in return, muslins and silks of Bengal, carpets, spices, tobacco, and European goods. The government is despotic, and the rajah is considered as the proprietor of the soil. The prevailing religion is the Hindoo. The Brahmins of Nepaul are very numerous, and deeply skilled in Sanscrit lore. One of the libraries is said to contain 15,000 volumes in that language.

In 1792, this country was invaded by the Chinese, and became tributary to the emperor. In Oct. 1801, a commercial treaty was concluded between the Nepaulese and the Bengal government. In 1814, this country was successfully invaded by the British, and a portion of it was ceded to the conquerors. In 1816, the war was renewed with still greater success. It was stipulated that a British resident should be established at Catamandoo, the capital. This resident has since formed a commercial treaty with the Nepaulese government, equally advantageous to the subjects of both states. The British territories now extend to the borders of Thibet, and it is expected that a vent will be opened for an extensive sale of woollen cloths and other manufactures. Pop. estimated at 2,000,000.

5,175,000

In the northern or Dutch provinces, there are neither mountains nor hills. The country is a vast marshy plain, intersected in all directions by an infinity of canals and ditches. The southern provinces exhibit a great variety consisting of woods, meadows, and corn fields, undulating plains, and gentle eminences. The soil of the Netherlands is in general fruitful, the Dutch part affording rich pasture, while the Belgic part, especially Flanders, abounds with excellent corn land.

The universities are six in number, the well known ones of Leyden, Utrecht, and Groningen; Louvain also, an old university, suspended for a time but re-established by a royal edict of 25th Sept. 1816, which also instituted two new universities, Ghent and Liege. There is a military school at Dort, and a naval school at Helvoetsluys.

The established religion of the northern provinces is the Calvinist; but as toleration has been so long prevalent, religious sects of every description are to be found there. In the Belgic provinces the inhabitants are principally Catholics, and taking the whole kingdom together, more than two thirds of the whole population are Catholics.

The constitution of the Netherlands dates only

from 1814, and bears a close resemblance to that of Great Britain. The possession of all executive power by the king, the inviolability of his person, the responsibility of his ministers, the appointment of a cabinet and privy council, but above all, a double house of parliament, are striking features of resemblance. The chief difference is in the existence of provincial states or assemblies charged with a variety of important local duties, such as the care of the roads and bridges, of religious worship, of charitable institutions, of the execution of the laws, of the expenditure of the local magistrates, and in particular with the election of the members of the commons house of parliament. This approximation to the federal government of the United States of America, is owing to the long existence of provincial powers and usages, particularly among the Dutch. The number of members of the lower house is 110, and the proportion returned by the Dutch and Belgians is equal, notwithstanding the difference in population. These representatives are renewed by a third, annually. The members of the upper house are named by the king for life: their titles are not hereditary. In the Netherlands, as in France, no bills can be brought into parliament by the opposition; all motions for the purpose of making laws require the sanction of the crown. This precaution is deemed necessary in a new and unsettled government. The liberty of the press exists nearly as in England; and there are no political disqualifications on account of religious tenets. The judges are appointed by the king, on the presentation either of parliament. or the provincial states. They hold their places for life. The royal power is vested in the family of Nassau-Orange. The title is, "king of the Netherlands, prince of Orange, and grand duke of Luxemburg;" in the last capacity, he is a member of the Germanic confederation.

The annual expenditure of the Netherlands is nearly 7,000,000*l.* sterling, and the revenue has, since 1819, been the same. The navy costs only 500,000*l.* a year; the army 2,500,000*l.*; the church establishments, Catholic, Protestant, and sectaries, about 270,000*l.*; but the great pressure arises as in Britain, from the interest of the national debt. That debt amounts to 140,000,000*l.*; but the interest does not much exceed 3,000,000*l.* sterling.

The army amounts in peace to about 50,000 regulars. The marine consists at present of only 12 sail of the line, and twice as many frigates.

The Dutch colonies are, 1st. in Asia, Java, with the lesser governments of Amboyna, Banda, Ternate, Malacca, and Macassar, as well as the factories in Coromandel and Persia. 2. In Africa, 13 small forts on the coast of Guinea. 3. In the West Indies, the colony of Surinam on the mainland, and the islands of Curacao, St. Eustatius, and St. Martin. The union of Belgium and Holland into one independent state took place in 1814. This union has not yet obtained the cordial acquiescence of the majority of the Belgians; but time can hardly fail to show them its advantages. See *Holland*.

New Brunswick, one of the four British provinces in N. America, bounded S. by the bay of Fundy, W. by the United States, N. by Canada and E. by the gulf of St. Lawrence. The principal rivers are the St. John, Miramichi and Ristigouche. The lands on the rivers, especially on the St. John, are very fertile, and the settlements lie principally on this river and on the Miramichi. Coal of a superior quality is found on the Grand lake near St. John river. The tract of country so prolific in gypsum, commences in this province

at Martin's head on the bay of Fundy, and extends E. into Nova Scotia. The chief articles of export are lumber, codfish, salmon, and herring. The principal ports are St. John, St. Andrews, Miramichi and the West Isles. During the year ending Jan. 5, 1822, the amount of shipping entered at these ports was 336,185 tons, and the amount of shipping cleared for the same period, 399,667 tons. The province is divided into 8 counties. From the militia returns the population in 1822 was estimated at 80,000. Fredericton is the capital. St. John is the largest town.

Newburgh, t. Scotland, in Fifeshire, on the S. bank of the Tay. The harbor is spacious, and the Tay is navigable for vessels of 600 tons to this place. Pop. 2,000.

Newburyport, p-t. and port of entry, Essex co. Mass. on the S. bank of Merrimack river, 3 miles from its mouth, 24 N. of Salem, 24 S. S.W. Portsmouth, 33 N. N. E. Boston. Lon. 70° 47' W. Lat. 42° 49' N. Pop. 6,852. It is one of the handsomest towns in the U. S. the site being a beautiful declivity, the houses handsomely built, and the streets wide, and intersecting each other nearly at right angles. It contains 2 banks, 2 insurance offices, and 7 houses of public worship, 3 for Congregationalists, 2 for Presbyterians, 1 for Episcopalians, and 1 for Baptists. It is the

third town in the State in population and commerce. The amount of shipping in 1815, was 24,922 tons, employed partly in the coasting trade and fisheries, and partly in the trade to the West Indies, Europe, and the East Indies. The town is well situated for ship building, having the advantage of receiving lumber from the interior by Merrimack river. The harbor is deep, safe, and spacious, but difficult to enter. The town suffered severely by the restrictions on commerce previous to the late war, and by fire in 1811. It has not yet fully recovered from these misfortunes.

New Caledonia, a country of N. America, lying W. of the Rocky mountains, bounded S. by Oregon territory, and N. by the Russian settlements. This country is so intersected by rivers and lakes that one-sixth of the surface is supposed to be water. The principal rivers are Peace river, which pierces the Rocky mountains and communicates through Slave lake and Mackenzie's river with the Frozen Ocean, and Tacoutche Tesse and Caledonia rivers which fall into the Pacific. Among the lakes are Great Bear, Stuart's, Frazer's and Macleod's. The mountains are covered to their summits with timber, consisting of spruce and other kinds of firs, poplar, cypress, aspen, &c. Wild animals are numerous, and in the waters are immense quantities of salmon, which afford the chief means of subsistence to the natives. The temperature is higher than on the eastern side of the mountains in the same latitude. The N. W. Fur Company have a post on Stuart's lake, and another on Frazer's lake.

Newcastle-upon-Tyne, t. Eng. in Northumberland co. on the N. bank of the Tyne, about 10 miles from its mouth. Ships of 300 or 400 tons burden may reach the town. The new parts of the town are laid out with skill and taste, and in a superior style of architecture; and the spirit of improvement, with the increasing prosperity of the place, bid fair to render it equal in convenience and elegance to the first town in the kingdom. The charitable and literary institutions are numerous, and in a style adequate to the opulent and liberal spirit of the place.

The situation of Newcastle, on the banks of a navigable river, and in the greatest coal district in the world, is the chief circumstances which has raised it to its present rank and importance. The principal collieries are situated along the Tyne, both above and below the town; from this magazine the vast consumption of the metropolis, the whole of the eastern and most of the southern coasts of the island, and the opposite coasts of France, Holland, and Germany, have for centuries been supplied. In eight years, from January 1802 to December 1809, 4,713,476 Newcastle chaldrons, or 12,490,700 tons of coals, were exported from the Tyne; that is nearly 600,000 chaldrons annually. In 1819, the quantity exported was—coastwise, 639,987 Newcastle chaldrons; over sea, 39,735.

From the coal pits, which are generally near the banks of the Tyne, the coals are conveyed to the river in rail or tram roads, which, having a gentle declivity all the way, the waggons, several of them joined together, descend of themselves, and having delivered their contents at the stations or staiths, are carried back by another road to the mine. From the staiths the coals are conveyed, for exportation, in keels or long boats, manned by the keelmen, to their respective vessels. The keelmen are a stout and hardy race; and the whole of the traffic in coals affords, indeed, an excellent nursery for seamen. Besides the coal trade, Newcastle enjoys a considerable and flourishing foreign trade, and is moreover rich with various and extensive manufactories. Several ships are also sent to the Greenland fishery; and the total amount of shipping that belongs to the port, is at present computed at 834 ships, which measure 184,149 tons, and employ 8,732 men. The number of vessels which cleared out in 1819, were—Coasters, 8,828; foreign, 995. Among the manufacturing establishments are, brick fields, potteries, glass-houses, and chemical works for making

white lead, minium, and vitriol; manufactories in iron, tin, and every kind of metal; machines for fabricating brass wire, plate metal, &c. Shipbuilding is carried on to a great extent. 270 m. N. by W. London. Lon. 1° 37' W. Lat. 54° 58' N. Pop. in 1811, 35,711.

Newcastle, or *Newcastle-under-Line*, t. Eng. in Staffordshire, on the E. bank of the Line, a branch of the Trent. The chief business consists in the clothing trade and the manufacture of hats. Around the town, the villages to a considerable distance are entirely occupied with the manufactures of porcelain, earthenware, stone ware, &c. forming one great system, which, for its extent, and the perfection to which the manufacture has been carried, is perhaps unequalled in the world. This district abounds with coal. Newcastle sends two members to parliament. 15 m. N. Stafford, 149 N. W. London. Lon. 2° 13' W. Lat. 53° 1' N. Pop. 6,175.

New Charleston, t. Penobscot co. Maine, 20 m. N. W. Bangor. Pop. 344. It is a fine township of land, and the population is rapidly increasing.

Newfoundland, isl. on the E. side of the gulf of
 St. Lawrence, separated from the coast of Labra-
 dor on the north by the straits of Belleisle, between
 lat. 46° 45' and 51° 46' N. and between lon. 52° 31'
 and 59° 40' W. being 381 miles long, and about
 900 in circumference. The coasts are subject to
 fogs, attended with almost continual storms of
 snow and sleet; the sky being usually overcast.
 The country is very unequal, and covered with
 hills and mountains, which appear more lofty in
 the interior parts than near the coast. The whole
 circuit of the island is full of fine bays and harbors.
 This island, after various disputes, was ceded to
 England by the treaty of Utrecht, in 1713. It
 owes all its importance to the fisheries which are
 carried on upon its shores, and upon the banks
 which lie to the S. E. of the island. The Great
 Bank of Newfoundland, which may properly be
 deemed a vast mountain under water, is not less
 than 330 miles long, and about 75 broad. The
 depth of water upon it varies from 15 to 60 fath-
 oms. In 1813, during the war in Spain, the ex-
 ports in fish and oil amounted to £1,000,000 ster-
 ling. The trade has since greatly declined.

New Granada, a country in the N. W. corner
 of S. America, bounded N. by the Caribbean sea;
 E. by Venezuela and Guiana; S. by Peru; W.
 by the Pacific; and N. W. by Guatemala. It ex-
 tends from 3° 30' S. lat. to 12° N. lat. about 1,000
 miles, and from 68° to 81° W. lon. The Andes
 come from Peru, and pass along the coast of the
 Pacific ocean, through the whole extent of the
 country. At Popayan the range divides into 3
 branches: the western is the proper Andes, and
 runs into North America across the isthmus of
 Darien; the eastern, called the chain of Venezue-
 la, runs along the coast of that province, and ter-
 minates opposite the island of Trinidad; the mid-
 dle branch runs north, between the rivers Magda-
 lena and Cauca, and terminates at the junction of
 those two streams. The country east of the An-
 des is an immense plain extending to the river Ori-
 noco. In the low country, the climate is hot and
 unhealthy, but in the mountains every variety is
 experienced, according to the elevation. On the
 highest summits you meet with everlasting snow,

while at Quito and some of the other principal cit-
 ies, which are elevated many thousand feet above
 the level of the ocean, the temperature is delight-
 ful throughout the year.

New Granada is celebrated for the richness and
 variety of its productions, in the vegetable, mine-
 ral, and animal kingdoms. Here are found all the
 fruits of tropical climates; the mountains are rich
 in gold and silver, emeralds, and platina. There
 are also animals of an enormous size. The condor,
 a large bird, has been known to fly away with
 lambs. The jacumama is an immense serpent found
 in the plains east of the Andes, 11 or 12 feet long,
 and a foot in diameter. The population was esti-
 mated by Humboldt in 1808, at 1,800,000. A very
 large proportion are Indians. The principal settle-
 ments are in the high land on the Andes. This
 country and Caraccas are now united and form
 together the Republic of Colombia.

 and between 70° 40' and 72° 48' W. lon. It is 160
 miles long from N. to S., 90 in its greatest breadth,
 and contains 9,491 sq. miles, or 6,074,240 acres.
 The State is divided into 6 counties, and 212
 towns. Pop. in 1790, 141,885; in 1800, 183,858;
 in 1810, 214,460; and in 1820, 244,161. Engaged
 in agriculture 52,384, in commerce 1,068, in man-
 ufactures 8,699. The great mass of the population
 is in the southern half of the state. North of Win-
 ipiseogee lake there are very few inhabitants, ex-
 cept on Connecticut river.

The whole extent of sea-coast is only 18 miles.
 The shore is generally a sandy beach, and border-
 ing upon it are salt marshes. For 20 or 30 miles
 from the coast, the country is either level or vari-
 egated with small hills and vallies. Beyond this,
 the hills increase in size, and in many parts of the
 State swell into lofty mountains, particularly in
 the north, and along the height of land between
 the Merrimack and the Connecticut. The high-
 est summits between the Merrimack and the Con-
 necticut are Grand Mounadnock, near the S. W.
 corner of the State, which is 3,254 feet above the
 level of the sea; Sunapee, mountain, near Suna-
 pee lake; and Moosehillock, still further north,
 the height of which is estimated at 4,636 feet. But
 the White Mountains are the most celebrated in
 the State, the highest peak being more than 6,000
 feet. The mountains, the lakes, the vallies, and
 cataracts of New Hampshire, abound with sublime
 and beautiful scenery, and have acquired for the
 State, the title of "Switzerland of America." The
 soil of New Hampshire is generally fertile. The
 intervals on the large rivers are the richest, and
 best fitted for tillage, but the uplands are account-

made in this manufactory, than can be found in those made in any other place.

New Holland, an island between the Indian and Pacific oceans, the largest in the world, and, according to some geographers, entitled, from its great extent, to the appellation of a continent. It is 2,600 miles long from E. to W. between Sandy cape and the entrance of Shark's bay; and 2,000 miles broad, between Cape York, on the north, and Wilson's promontory, in 39° 10' S. lat. The coasts of this extensive country were first discovered by the Dutch in 1606, and were visited by Dampier in 1688. In 1770, Capt. Cook explored the eastern coast; and by various expeditions, fitted out by the British government, between 1795 and the present time, a complete survey has been made of the whole coast, except 8 or 9 degrees of lat. in the N. W.; the position of every point has been ascertained; and every inlet and bay has been traced to its conclusion.—The coast is extremely diversified, and, seen from the distance of several miles, has the appearance, in some parts, of ranges of small and sterile islands; in other parts, the shores are steep and inaccessible, while on the northern coast they are very flat, and, to all appearance, sandy and barren. On the east coast, there is a singular barrier of coral reefs, which, according to captain Flinders, extends along the coast, at the distance of 20 or 30 leagues, in a N. W. direction, from about 23° S. lat. to Torres strait, in lat. 10° S. a distance of 840 miles.

Very little is known of the interior of New Holland. Several expeditions, however, have been sent out within a few years, from the British colony of New South Wales, on the eastern coast; particularly two, in 1817 and 1818, under Lieut. Oxley, who traced two large rivers for several hundred miles towards the interior. From the result of these expeditions, and from the fact that no river of any magnitude discharges its waters into the ocean, on any part of the coast, it appears highly probable that the surface of this vast country resembles that of a shallow basin, whose margin is the sea coast, from which the waters, descending towards the interior, form a succession of swamps and morasses, or perhaps a vast mediterranean sea. See *New South Wales*.

New Jersey, one of the U. States, bounded N. by New-York; E. by the Atlantic and by Hudson river, which separates it from New-York; S. by Delaware bay, and W. by Delaware river, which separates it from Pennsylvania. It extends from lon. 74° to 75° 29' W. and from lat. 39° to 41° 24' N. It is 160 miles long from N. to S. and contains 8,320 square miles, or 5,324,006 acres. Pop. in 1790, 184,139; in 1800, 211,149; in 1810, 245,562; and in 1820, 277,575. Engaged in agriculture 40,812, in commerce 1,830, in manufactures 15,941. The number of militia in 1810, was 33,710, and in 1821, 35,241.

The State is divided into thirteen counties and 120 towns. The three northern counties are mountainous; the next four are agreeably diversified with hills and vallies. The six southern counties, including all the coast from Sandy Hook to Cape May, are level and principally barren, producing little else but shrub-oaks and yellow pines. The mountainous and hilly parts of the State have generally a strong soil, and form a fine grazing country. The farmers there raise great numbers of cattle for the markets of New-York and Philadelphia. They also raise wheat, rye, maize, buckwheat, potatoes, &c. Near New-York and Philadelphia, great attention has been paid to the cultivation of fruit and vegetables; and the finest apples, pears, peaches, plums, cherries, and melons, are carried to these markets. Fine orchards abound in all the northern half of the state, and the cider of New-Jersey, particularly that of Newark, is of proverbial excellence.

The most important mineral production is iron, which is found in immense quantities among the mountains in the northern part of the State. In the county of Morris, there are 7 rich iron mines, 2 furnaces, 2 rolling and slitting mills, and about 30 forges. Great quantities of bog iron ore are also found in the southern counties, and the annual produce of the whole State is estimated at 2,500 tons, exclusive of hollow ware and various other castings, of which vast quantities are made.

Besides the manufacture of iron, there are, particularly in Trenton, Newark, and Elizabethtown, many valuable tanneries, where a large quantity of excellent leather is made. Shoes are made in great numbers at Newark. The estimated value of manufactures in 1810, was \$7,054,594. Almost all the foreign goods consumed in this State are imported at New-York and Philadelphia, and the produce of the State is principally carried to those cities for exportation. Hence, the exports from this State in 1820, amounted only to \$20,531, and the revenue in 1815, to \$13,612. The amount of shipping in 1816, was 33,211 tons.

The Presbyterians are the most numerous religious denomination. The number of their churches in 1818, was 74; of Dutch Reformed 31; of Baptists, 30; of Episcopalians, 24; of Congregationalists, 9. At the same time the Friends had 44 meeting houses, and the Methodists were numerous. There is a College at Princeton, and a Theological Seminary, under the direction of the General Assembly of the Presbyterian Church. There is also a Theological Institution at New

Brunswick, under the direction of the General Synod of the Reformed Dutch Churches.

The Legislature is composed of a legislative council and house of assembly. The council is chosen annually, and consists of 13 members, each county choosing one. The assembly consists of 35 members, and is chosen annually. The executive is composed of a governor, chosen by a joint ballot of the legislature; a vice-president, chosen by the council; and a privy council, consisting of three members of the legislative council. The annual elections are in October. Trenton is the seat of government.

It has long been in contemplation to open a navigable communication between Philadelphia and New-York, by means of a canal from New-Brunswick on the Raritan, to Trenton on the Delaware. A company was incorporated in New-Jersey many years ago for this purpose, and a survey of the intended route was made, from which the practicability of a canal for sea vessels was ascertained. The expense is estimated at \$800,000.

New Lancaster, p-t. and cap. Fairfield co. Ohio, on the N. side of the Hockhocking, which is here an inconsiderable stream. 36 m. S. W. Zanesville, 34 N. E. Chillicothe. It contains a bank, a printing office, at which a newspaper is published, an elegant court-house, and about 75 dwelling-houses. Coal is found in the vicinity. About a mile N. of the town is a rock of sand stone, which rises abruptly 400 or 500 feet, and affords a delightful prospect.

New Lebanon, p-t. in Canaan, Columbia co. N. Y. on the turnpike between Pittsfield, (Mass.) and Albany, 6 miles from the former and 24 from the latter. Here is a warm spring of considerable celebrity. The water, however, is perfectly tasteless and inodorous, is used for culinary purposes, and differs very little from pure mountain water, except in the temperature, which is 73° of Fahrenheit. It is found very useful in salt rheums, and various other cutaneous affections. In this place is a village of Shakers. They are said to possess nearly 3,000 acres of land. The utmost neatness is conspicuous in their houses, fields, gardens, court-yards, and every thing belonging to their establishment. The property is all in common. The scenery of New-Lebanon is remarkably beautiful.

New-London, city, port of entry, and half-shire town, in New-London co. Ct. is situated on a declivity on the W. bank of the Thames, 3 miles from its mouth, 14 m. S. Norwich, 42 S. E. Hartford, 53 E. New-Haven, 59 S. W. Providence, 60 W. Newport. Lon. 72° 12' W. Lat. 41° 25' N. Pop. 3,330. It contains a court-house, 2 banks, a marine insurance office, 2 newspaper establishments, and 5 houses of public worship. The inhabitants own considerable shipping, employed in the coasting trade, the trade with the West-India islands, and the fisheries. The amount of shipping in New-London district, in 1816, was 14,635 tons.

The harbor is the best in the State, having 5 fathoms water, and being safe, spacious, accessible at all seasons of the year, and at all times of tide, and unobstructed by ice; but it is easily blockaded, as was proved during the late war. It is defended by Fort Trumbull and Fort Griswold, the first on the New-London, the other on the Groton side of the river. On the W. side of the entrance to the harbor is a light-house, on a point of land which projects considerably into the sound.

New Orleans, city and port of entry, in Orleans parish, Louisiana, and capital of the State, is on the left bank of the Mississippi, 105 miles from its mouth, by the course of the river, and about 90 in a direct line. Lon. $90^{\circ} 8' W.$ Lat. $29^{\circ} 57' N.$ Pop. in 1802, estimated at 10 or 11,000; in 1810, it was 17,242, in 1820, 27,176, of whom 7,355 were slaves. An intelligent gentleman on the spot ventures to predict that in 10 years it will be 100,000.

The city is regularly laid out; the streets are generally 40 feet wide, and cross each other at right angles. On the streets near the river the houses are principally of brick, but in the back part of the town, of wood. The buildings have no cellars, except the vacancy formed between the ground and the lower floors; which are raised 5 or 6 feet from the earth. The tornadoes to which the country is subject, will not admit of the buildings being carried up many stories, as in other cities. Most of the houses in the suburbs have beautiful gardens, ornamented with orange groves.

Among the public buildings are an arsenal, a custom house, a hospital, a catholic college, a female orphan asylum, two theatres, 5 banks, and several churches for Catholics, Presbyterians, and Episcopalians. There are 5 newspapers published in the city, 3 of which are in English, and the other 2 in both French and English.

New-Orleans is admirably situated for trade, near the mouth of a noble river, whose branches extend for thousands of miles in different directions. The river in front of the city is crowded with boats from a thousand different places in the "upper country;" from Kentucky, Tennessee, and Missouri; from Ohio, and even from Pennsylvania and New-York. In the year ending Oct. 1st, 1817, 1,500 flat-bottomed boats, and 500 barges came down the Mississippi to this place loaded with produce. During the same period, the number of arrivals and clearances at the port was

1,030; and the value of the exports \$13,501,036, nearly two thirds as much as that of the whole United States in 1791. The amount of shipping belonging to the port in 1816, was 13,299 tons. In 1819, there were 50 steam-boats on the western waters connected with the commerce of this city, measuring together 7,306 tons. At the same time there were 13 new boats on the stocks. The following table presents a view of the principal articles of domestic produce which arrived at New-Orleans during the years ending Oct. 1st, 1815, 1816, and 1817:

<i>Productions.</i>	1815.	1816.	1817.

The island of Orleans is formed by the river Mississippi on one side, and the lakes Ponchartrain and Maurepas, together with an outlet of the river Mississippi, called the Iberville, on the other. It is about 160 miles long, and from 3 to 50 broad. There is a levee or artificial mound erected along the side towards the Mississippi, to prevent inundation.—In December 1814, the British made an attack on New-Orleans, but were repulsed by the Americans under General Jackson, with the loss of about 3,000 men, killed, wounded and prisoners. The loss of the American army is stated at only 7 men killed, and 6 wounded.

Newport, p-t. and cap. Newport co. R. Island, and semi-metropolis of the State, stand on the S. W. side of Rhode-Island, 5 miles from the sea, 14 S. Bristol, 30 S. by E. Providence, 72 S. S. W. Boston. Lon 71° 17' W. Lat. 41° 29' N. Pop. 7,319. The harbor, which is one of the finest in the world, spreads westward before the town. It is of a semicircular form, of safe and easy access, sufficiently capacious to contain a large fleet, and deep enough for vessels of the largest burden. It is defended by Fort Wolcott, erected on Goat island, and two other forts, called Fort Adams and Fort Green. On Goat island there is a military hospital belonging to the U. S.

The site of the town is a beautiful declivity, which rises gradually from the harbor, presenting a fine view as you approach it from the water. The beauty of its situation, and the salubrity of its climate, have made it a place of fashionable resort from the southern and middle States during the summer months. Newport contains a state-house, a market-house, a theatre, an alms-house, a public library, 5 banks, 2 insurance companies, and 11 houses of public worship, 4 for Baptists, 2 for Congregationalists, 1 for Episcopalians, 1 for Friends, 1 for Moravians, 1 for Methodists, and 1 for Jews.

Newport was formerly more flourishing than it is at present. Previously to the American revolution it was the fourth commercial town in the British colonies, and contained at one period more than 9,000 inhabitants. During the revolutionary contest it was for a long time occupied by the enemy, and suffered severely. At present it maintains some trade with the East Indies, Europe and Cuba, but the most important branch of its commerce is in the coasting trade with the middle and southern States. In 1819, the amount of shipping owned here, was 10,951 tons. The fisheries are very valuable. There is probably no fish market in the world which affords a greater variety. The manufacturing establishments are 5 rope-walks, 7 rum distilleries, 1 gin distillery, 4 tanneries, 5 grain mills, and 1 duck factory.

Newry, s-p. Ireland, in Down co. on the Newry water, which falls into Carlingford bay. It was formerly a pass and military post of considerable importance. It was ruined in the great rebellion of 1641, in which its inhabitants suffered incredible hardships. After the restoration, it was rebuilt, and began to make some figure; but in September 1689, it was again reduced to ashes by the duke of Berwick. In consequence of the succeeding settlement of Ireland, the place revived. Its increase has been chiefly owing to its canal, by which a communication has been formed between Lough Neagh and the bay of Carlingford, by means of which vessels of 50 or 60 tons are enabled to pass through the heart of Ulster. The linen manufacture was carried on very extensively, and large quantities of linen were exported, but this trade has been of late much injured. There is a very considerable export of butter, beef, pork, and grain. There are also some extensive manufactories. 50½ m. N. Dublin, 30 S. S. W. Belfast. Lon. 6° 15' W. Lat. 54° 10' N. Pop. 15,000.

New Shelland, or *New Iceland*, or *New South Britain*, newly discovered land off Cape Horn, visited by vessels engaged in the seal fishery. A range of islands extends in a direction from E. N. E. to W. S. W. about 200 miles in lat. 63° S. To the south of this range is a large body of land, the limits of which are not known. It has been traced from lon. 44° to 63° W. Capt. Palmer who visited it in 1821-22, discovered in lat. $61^{\circ} 41'$ S. lon. $45^{\circ} 27'$ W. a good harbour, about a mile up Washington Strait, which he named Palmer. The land contains marks of volcanoes. It presents lofty summits, and appears to be a dreary mass of snow and ice.

New South Wales, an extensive country on the E. coast of New Holland, discovered by Captain Cook in 1770, and fixed upon by the British government as the best spot for a colony, to which they might transport convicts. A small colony was sent out in 1788. In 1800, the number of inhabitants, including the settlers in Norfolk island, was 6,000. In 1809, the number was 9,356, and in 1822, including Van Dieman's land, 42,000.

Almost all the settlements are on the E. side of the Blue Mountains. The names are Sydney the capital, Paramatta, Windsor, Liverpool, and Newcastle.

No attempts were made to cross the Blue mountains for the purpose of exploring the interior of this country, until the year 1813. Since that time, several expeditions have been undertaken, particularly two under Lieut. Oxley, in 1817 and 1818, who explored the country for several hundred miles from the coast. He ascertained that several large rivers rise on the west side of the Blue mountains, and traced their course for many hundred miles into the interior. They appear to terminate, however, in immense swamps or inland lakes.

The climate of the colony, particularly in the inland districts, is highly salubrious. For the distance of five or six miles from the coast, the land is a strip of sand, thickly studded with rocks, and supporting only a few stunted gums. Beyond this the soil changes to a thin layer of vegetable mould, resting on a stratum of yellow clay, which is again supported by a deep bed of schistus. The trees of the forest are here of the most stately dimensions, and consist of full sized gums, iron barks, and the beefwood tree, or forest oak. This description of country forms a girdle of about 10 miles in breadth. Advancing about four miles further into the interior, you meet with an endless variety of hill and dale, clothed in the most luxuriant herbage, and covered with flocks and herds. A rich loam, resting on a substratum of fat red clay, several feet in depth, is found even on the tops of the highest hills, which in general do not yield in fertility to the vallies. The timber is here so thinly scattered that a person may gallop without difficulty in every direction. Arriving at the Nepean river, a

head branch of the Hawkesbury, you find fertile plains of considerable extent, consisting of rich vegetable mould, many feet in depth. These plains, at the junction of the two rivers, are from two to three miles in breadth. The banks of the Hawkesbury are of great fertility. This whole country hitherto described, with the exception of the barren waste in the vicinity of the coast, is, to use the colonial term, located; i. e. either granted away to individuals, or attached as commons to the cultivated districts.

Among the unappropriated lands, are, 1st. The Cow Pastures, about 30 miles from Sydney, lying between the river Nepean, and the Blue mountains. It contains about 100,000 acres of land, a considerable portion of which is equal to any on the banks of the Hawkesbury; 2d. The Five Islands, a tract which commences about 40 miles S. of Sydney, and extends to Shoal Haven river. It lies between the coast and a high range of hills which terminates at the north side abruptly in the sea, and renders intercourse with the capital difficult. The soil is of extraordinary fertility, and the lands near Shoal Haven river, are highly eligible for agricultural purposes; since this river is navigable for about 20 miles into the country for vessels of 70 or 80 tons burden. The banks of this river produce a great abundance of fine cedar, and other timber. 3d. The district of the Coal river, in which is the town of Newcastle, 60 m. N. of Port Jackson. It is inhabited by incorrigible offenders, who are transported thither from the settlements at Port Jackson. They are employed in burning lime and procuring coals and timber for the use of government. The coal mines are considerably elevated above the level of the sea, and are of the richest description. The lime is made from oyster shells, which are found in prodigious abundance. 4th. The country to the westward of the Blue Mountains, which is of amazing extent, and great diversity of climate. These mountains are supposed not to exceed 4,000 feet in height. The road over them is by no means difficult for wagons, until you arrive at the pass which forms the descent into the low country. There it is excessively steep and dangerous; yet carts and waggons go up and down it continually.

The whole of this western country is much more open and free from timber than the country to the eastward of the Blue mountains; but it suffers from not having a good communication with the capital, and also from the want of navigable rivers. In this country there is a small settlement at Bathurst plains, 180 m. from Sydney.

Wheat, maize, barley, oats, and rye, are all grown in this colony; but the two former are most cultivated. Peaches, apricots, nectarines, oranges, grapes, pears, plums, figs, pomegranates, raspberries, strawberries, and melons of all sorts, attain the highest degree of maturity.

The increase of horses and cattle throughout the colony has been very rapid. In the space of 18 years the stock of horses has increased from 163 to 3,675; the stock of horned cattle, from 1,044 to 55,450; and the stock of sheep from 6,124 to 201,240.

The progress of this colony in wealth and population is much retarded by injurious restrictions. The erection of distilleries in any part of the colony was for a long time prohibited, and the consequence was, there was no demand for agricultural produce, but the system has been changed, and the

manufacture of spirits is now allowed in the colony. Heavy export duties are imposed on all the staple produce of the country, particularly on the importation of whale oil, and on spermaceti oil, which is severely felt, as the coasts and shores to the southward abound with whales and seals; and the fishery could be prosecuted to great advantage. But the most serious restriction is that imposed by the last act, renewing the charter of the East India company, by which the vessels of New South Wales are in effect prohibited from navigating the seas within the company's charter; the act requiring that all vessels be of the size of 350 tons, in order to qualify them for the navigation of these seas. Were the colonists freed from this prohibition, they would be enabled to transport in their own vessels their coals, timber, spars, flour, meat, &c. to the Cape of Good Hope, the Isle of France, Calcutta, and other places in the Indian seas. They might carry to Canton the sandal wood, beche la mer, dried seal skins, and other productions of the surrounding seas and islands, and return freighted with cargoes of tea, silks, nankeens, &c. and also open the fur trade with the N.W. coast of America.

New York, one of the U. S. bounded N. by Lower Canada; E. by Vermont, Massachusetts, and Connecticut; S. by New Jersey and Pennsylvania; and W. and N. W. by Upper Canada, from which it is separated by lake Erie, Niagara river, lake Ontario, and the river St. Lawrence. It extends from lat. $40^{\circ} 35'$ to $45^{\circ} N.$ and from lon. 73° to $79^{\circ} 55' W.$ Length, on the parallel of 42° , 340 miles. Extent, 46,000 sq. miles, or 29,494,720 acres.

The south-eastern angle of the State is mountainous, being traversed by several ridges from New Jersey, one of which crosses the Hudson at the highlands. The country on lake Champlain is hilly, and becomes mountainous as you approach the highlands which divide the waters of this lake from those of the St. Lawrence. West of these highlands, a fine country, at first hilly, then level and fertile, extends to the St. Lawrence, and lake Ontario. The western part of the State is principally level, except near the Pennsylvania boundary, where it becomes hilly and mountainous. From Genesee river, near its mouth, to Lewiston, on the Niagara river, there is a remarkable ridge, running almost the whole distance, which

is 78 miles, and in a direction from east to west. Its general altitude above the neighboring land is 30 feet, and its width varies considerably; in some places it is not more than 40 yards. Its elevation above the level of Lake Ontario is, perhaps, 160 feet, to which it descends by a gradual slope, and its distance from that water is between 6 and 10 miles. There is every reason to believe that this remarkable ridge was once the margin of this great lake. About 20 miles S. of this ridge, and parallel with it, there is another which runs from Genesee river to Black Rock. The country between the ridges is called the Tonawanta valley, and there is some reason to believe that it was once covered by the waters of Lake Erie.

The eastern half of Long-Island is sandy and barren; the western part is fertile, and in a high state of cultivation. The country on the Hudson below the mouth of the Mohawk, has a good medium soil; the counties of Westchester and Dutchess are under very good cultivation. The alluvial flats of Columbia and some part of Rensselaer counties, are very extensive and rich. A considerable district west of Albany consists of sandy plains, interspersed with marshes. The alluvial flats on the Mohawk are extensive and very fertile. The soil of the vast elevated plain of the western region, occupied by the small lakes, is a rich mould, equally well adapted to grain and grass. The alluvial flats are here extensive; those on Genesee river include about 60,000 acres. Wheat is raised in this State, in greater abundance than all other grains. Indian corn, rye, oats, flax, hemp, &c. are also extensively cultivated.

The principal minerals are iron and lead, and there are indications of the abundant existence of coal. Lime, marble, marl, flint, gypsum, slate for building, clays for manufacturing, and ochres of various kinds have been discovered in great quantities. Salt springs exist in Onondaga, Cayuga, Seneca, Ontario, and Genesee counties, and yield more than 500,000 bushels of salt annually, and the quantity may be increased indefinitely. The principal salt works are at Salina on Onondaga lake. The mineral waters of Saratoga and Ballston are the most celebrated in America.

The legislature consists of a senate of 32 members, and of a house of representatives, who may not exceed 150. The State is divided into four great districts for the choice of senators. They hold their seats for 4 years, and one-fourth part is elected every year. The representatives are chosen annually by counties. The governor and lieutenant governor are elected for three years. There was formerly a Council of Appointment, consisting of the governor, and a Senator from each of the four great districts, chosen annually by the Legislature. The number of officers appointed by this council was enormous, embracing most of the subordinate officers of the State. But this body is abolished by the new constitution.

The population in 1756 was 110,317; in 1786, 238,897; in 1790, 340,120; in 1800, 586,050; in 1810, 959,049; in 1820, 1,379,989. Slaves 10,088. Engaged in agriculture 247,648, in commerce 9,113, in manufactures 60,038. Militia in 1821, 121,553. From the census taken 1821, under act of the State Legislature, it appears that the number of freeholders in the State was 259,387, of whom 100,490 owned freeholds of the value of \$250 and upwards. The number of acres of improved land was 5,717,494; neat cattle 1,215,049;

horses 262,623; sheep 2,147,351; grist mills 2,132, saw mills 4,304; oil mills 139; fulling mills 991; carding machines 1,233; cotton and woollen factories 184; iron works 107; trip hammers 172; distilleries 1,057; asheries 1,262. The quantity of cloth of domestic manufacture for the year 1820, was, fulled cloth 1,958,712 yds.; flannel and other wollens 2,451,107 yds.; linen, cotton and other thin cloths 5,635,985 yds.; total 10,045,804 yds.

The denominations of Christians in this State are Presbyterians, Episcopalians, Associate Reformed Presbyterians, Dutch Reformed Presbyterians, Baptists, Methodists, Friends, German Lutherans and Calvinists, Moravians, Catholics, and Shakers.

The fund appropriated by the State for the support of common schools, amounted in 1820, to \$1,215,526, and about 25,000 acres of land valued at \$150,000. To this fund has been added the proceeds of all lands belonging to the State, (not already otherwise appropriated,) consisting of about 970,000 acres and valued at \$1,100,000. Other lands to a vast amount will ultimately come to this fund. In 1820, the number of schools of which returns were made was 6,332, established according to law, and the proportion of children instructed to the whole number in the State was as 24 to 25. There are, beside, many Lancaster and free schools, private schools, charity and Sunday schools in the principal towns. Academies and colleges are also well endowed. The colleges are Columbia College, and the Medical College, in the city of New York; Union College in Schenectady; and Hamilton College at Clinton. There are about 75 incorporated academies, and several Theological seminaries.

The exports from New York exceed those of any other State in the Union, and in 1815, it paid more than one third of the revenue of the U. S. and more than twice as much as any other State. In the amount of shipping it is surpassed only by Massachusetts, and in the value of manufactures only by Pennsylvania. The value of the manufactures in 1810, was \$25,370,289; the amount of shipping, in 1815, 309,290 tons; and the revenue paid in 1815, \$14,491,739. The exports consist of wheat, Indian corn, rye, beef, pork, lumber, &c. and their value in 1816, was \$19,690,031; in 1817, \$18,707,433; in 1820, \$13,163,244, about one-third of which was foreign produce.

For several years past, the State has been engaged in improvements of its inland navigation, on a scale never before witnessed in this country, and with an energy and liberality which excite universal admiration. A grand canal is now in progress, which will open a water communication from Hudson river to Lake Erie, and another is already completed, uniting the same river with Lake Champlain.

The Erie canal, when completed, will be about 365 miles long. The route is as follows: Beginning at Albany, on the Hudson, it passes up the west bank of that river nearly to the mouth of the Mohawk; then along the south bank of the Mohawk, through the counties of Albany, Schenectady, Montgomery, Herkimer, and Oneida, to Rome. From Rome it proceeds in a S. W. direction, and crosses Oneida creek into Madison county, where it turns to the W. and passes through Onondaga county, approaching within a mile and a half of Salina, at the S. end of Onondaga lake. It crosses Seneca river at Montezuma, and passing by Lyons and Palmyra, strikes the

Genesee river at Rochester. West of the Genesee river, it runs on the S. side of the Ridge road, and parallel with it for 60 miles, and then turning to the south, joins Tonnewanta creek 11 miles from its mouth in Niagara river. The channel of the Tonnewanta will be made use of for these 11 miles, and the canal will then proceed in a southerly direction from the mouth of the Tonnewanta along the east bank of Niagara river to Buffalo on Lake Erie.

This route is divided into three sections. The western section extends from Buffalo to Montezuma on Seneca river, 160 miles; through this distance the level of the canal uniformly descends from the lake, and the whole descent is 194 feet by 25 locks. The middle section extends from Montezuma to Rome, 77 miles; through this distance the level of the canal uniformly ascends, and the whole ascent is 49 feet. The eastern section extends from Rome to Albany, 113 mile: through this distance the level of the canal uniformly descends; and the whole descent is 419 feet by 46 locks. The aggregate of rise and fall is therefore 662 feet, and the difference of levels between Lake Erie and the Hudson, 564 feet.

The canal is 44 feet wide (in the middle section 40) on the surface, 28 at the bottom, and 4 feet deep. It was estimated by the commissioners in 1817, that the whole expense would be \$4,881,733: viz. the western section, \$1,756,862; the middle section, \$853,186; the eastern section, \$2,196,690; and general expenses \$75,000. The average expense per mile, according to this estimate, was \$13,800. These estimates are now found to have been too large, and it is supposed that the whole expense will not much exceed \$4,500,000. The canal was commenced on the 4th of July 1817. It is now navigated from Rochester to Schenectady, a distance of 238 miles. In their report of March 1821, the commissioners anticipate the entire completion of the canal before the close of the year 1823.

Among the benefits of this grand enterprise, it is expected, that beside furnishing an outlet for the agricultural produce of vast and fertile regions, salt may be supplied to the Atlantic States from the great salt works at Salina, cheaper than from abroad. In the progress of the canal also, gypsum of the best quality has been discovered, and in sufficient quantities for the supply of the whole United States. A minute survey is to be made of the country on each side of the canal throughout its whole length. The survey includes a breadth of ten miles. The expense is generously defrayed by the Hon. Stephen Van Rensselaer of Albany.

The Champlain canal was commenced 10th June 1818, and completed 28th November 1822. Its length from Whitehall at the mouth of Wood creek through Fort Edward to the waters of the Hudson at Waterford is 61½ miles, of which 46 miles is artificial navigation, and 15½ improved natural navigation. The part of the canal between Whitehall and Fort Edward is 23 miles long. Its summit level is supplied with water by means of a dam constructed across the Hudson, 2 m. below Glenn's Falls, 30 feet in height and 900 feet long. Another feeder is to pass from the Hudson above Glenn's Falls into the canal. The canal is 40 feet wide at the surface, 28 at the bottom, and 4 feet deep. The locks are 90 feet long, and 14 feet wide in the clear. The descent from the summit level to Lake Champlain is 54 feet, and

from the summit level of the Hudson, 30 feet. The whole number of locks is 21. At Fort Edward the canal communicates with the Hudson through a tier of 3 locks constructed of white marble. At Waterford it is connected with the Erie canal. The expense of the canal from Lake Champlain to Fort Edward was about \$260,000; from Fort Edward to Waterford the estimated expense is \$400,000.

Plans have been recently submitted to the legislature of the State, for improving the navigation of the Hudson below the head of tide waters, so as to admit of the ascent of ships to Albany, and of sloops to Lansingburgh and Waterford.

New York, the first commercial city in America, is on the island of the same name, at the confluence of Hudson and East rivers, in lat. 40° 42' 40" N. and lon. 74° 0' 45" W., 90 m. N. E. Philadelphia, 210 S. W. Boston, 140 S. Albany, 390 S. Montreal. The city, county, and island of New York are of the same extent. The island is 15 miles long, and on an average 1½ broad, and is separated from New Jersey by the Hudson; from the continental part of New York by Harlem creek; from Long Island by East river; and from Staten Island by New York bay or harbor.

The compact part of the city is at the S. end of the island, and extends along the Hudson about 2 miles; and from the Battery, in the S. W. corner, along East river, about 2½ miles. Its circuit is about 8 miles. All the northern part of the city has been recently laid out and is handsomely built; the streets of the southern and ancient part are frequently narrow and crooked, but are every year becoming more convenient. The principal street is Broadway, which is 80 feet wide, and extends from the Battery, in a N. E. direction, through the centre of the city, for three miles. It is generally well built, and a part of it is splendid. The houses in the city, generally, were formerly built of wood, but these are fast disappearing, and substantial brick houses, with slated roofs, rising in their place. The city is divided into 10 wards. The public revenue derived by the municipal government may be estimated of late years at upwards of \$500,000 per annum, and the expenditures at nearly the same sum. Much of this revenue is raised by assessments for the various and extensive improvements of the city. The other revenue is derived from the rents, wharfage licences, ferries, the markets, auction sales, direct taxation, &c. &c. The unredeemed debt is about \$1,000,000. The monied operations of this city exceed those of any State in the Union excepting New York, and in ordinary years nearly equal those of the rest of that State.

Among the public buildings, the most prominent and important is the City Hall, which is the most beautiful edifice in the U. S. It is 216 feet long, 105 broad, and, including the attic story, 65 feet high. The front, and both ends above the basement story, are built of white marble. The expense was \$500,000. It is occupied by the City Council in their meetings, and by the different courts of law.—The New York Hospital comprises the Hospital for the reception of the sick and disabled, and the lying-in hospital. The annual expenditure is about \$40,000. During the year 1819, 1,725 patients were admitted, of whom 1,320 were cured. A valuable medical library of about 3,000 volumes, is attached to the institution.

The Lunatic Asylum, completed 1821, stands on a fine eminence on the Hudson, about 7 miles N. of the city. The building is of freestone, 211 feet by 60, and is calculated for the accommodation of 200 patients. The number for the last year was from 90 to 100. The Alms House is a plain stone structure, on East river, 2 miles from the City Hall. It is 3 stories high, 320 feet long, and 50 wide, recently erected. The expense, including the work house, penitentiary, and other buildings connected with it, was \$418,791. In 1816, the number of poor in this institution was 1,487, and the expense of the establishment \$90,886. Both the number of the poor and the expense of the establishment continue about the same to the present time. Attached to the Alms House is now an extensive Pin manufactory, in which the young and the feeble are kept at labor. The tread mill has also been introduced, and promises to be of much use in the reformation of convicts. The able-bodied male convicts are put in chains and employed at work upon the various avenues leading from the city. The State prison is on the Hudson, at Greenwich, about 1½ miles from the City Hall. It is constructed of free stone. The number of prisoners in 1814, was 494, in 1819, 604, since which time it has not much increased. The original cost of the establishment was \$208,846, and large sums have been voted by the legislature to defray the annual expenses.—The New York Institution is near the City Hall, and its apartments are occupied by the literary and philosophical society; the American Academy of Fine Arts, to which \$20,000 has been granted with the privilege of holding real estate, and which has a valuable collection of paintings and statues; the Lyceum of natural history; the American Museum; and the Asylum for the Deaf and Dumb.

Columbia College, formerly called King's College, was established in 1754. It has a president, 5 professors, 140 students, a library of 3,000 or 4,000 volumes, a valuable philosophical apparatus, and an annual revenue of more than \$4,000. A Faculty of Medicine was formerly attached to the institution, but in 1814 it was separated from it. The Regents of the University of New York, have within a few years granted for the benefit of this college and Union College, lands, the annual revenue from which is about \$5,000. The whole value of grants made to Columbia College is about \$281,000, besides the Botanic Garden, (estimated at \$84,000, but not available to a third of that sum.)

A college of Physicians and Surgeons was established in 1807, and in 1814, the Faculty of Medicine was united with it, which was formerly attached to Columbia College. Thus united, the college of Physicians has 7 professors, and is one of the most respectable and flourishing medical institutions in the country. The grants from the State to this institution amount to \$35,000.

The New York Eye Infirmary was founded in August 1820, by Doctors Edward Delafield and J. Kearny Rodgers who had attended the practice of a similar institution in London, and from the number of cases there presented of persons laboring under diseases of the eye, judged that a proportionate number existed in this country. They opened the institution at their own expense, and in the course of 7 months had 430 patients. The Infirmary was then placed under a Board of Directors and received an act of Incorporation. By the first annual report of Jan. 1822, it appears that

during the period of 16 months, from the commencement of the Institution, the number of patients was upwards of 1,100. The patients are from almost every State in the Union, and several are from the adjacent British provinces, and from the West Indies. The funds are yet small and a suitable building is much needed, where patients requiring important operations may be received to board, and have the constant attendance of the surgeon.

The Theological Seminary of the Associate Reformed Church is now transferred to Princeton N. J. The Theological Seminary of the Protestant Episcopal Church was established in 1820, in New Haven, Ct. but the year following was transferred to this city. It is under the superintendence and control of the General Convention of the Episcopal church. The management of the institution is vested in a board of trustees which consists of the bishops and of clergymen and laymen chosen from the several dioceses in the U. States. In 1822 the number of students was 22. A Baptist Theological Institution has recently been established in this city.

There are 71 houses of public worship, 13 for Episcopalians, 17 for Presbyterians, (including 3 for Associate Reformed Presbyterians,) 2 for Scotch Presbyterians, 8 for Dutch Reformed Presbyterians, 10 for Methodists, 7 for Baptists, 3 for Friends, 2 for Roman Catholics, 2 for German Lutherans, 1 for German Calvinists, 1 for Moravians, 1 for Universalists, 1 for Jews, 1 for Seamen, 1 for Swedenborgians, and 1 for Unitarians.

The building comprising the ware-house, bindery, and printing-office of the National Bible Society was erected in 1822, at an expense of \$21,000. The New York Historical Society has a library of 10,000 volumes, embracing many rare and valuable works, files of English, French and American news-papers, a vast collection of pamphlets, and many paintings. Among the other institutions are the Lyceum of Natural History; the Literary and Philosophical Society; the American Academy of Language and Belles Lettres; the Orphan Asylum Society; the Park and City Theatres; a large circus; Vauxhall, Chatham, Richmond-Hill, and other public gardens; 10 market-houses, one of which, the Fulton market, has a basement and pillars of freestone, and for size, convenience and beauty is said to be superior to any market in Europe: expense, when completed, \$260,000; 11 banks, exclusive of the savings bank; 21 insurance companies, of which 7 are marine, and 14 fire, including one for lives and annuities; numerous charitable and benevolent institutions for the relief of the poor, the sick, the aged, the widow, the orphan and the stranger; several public libraries, the principal of which is the New York Society Library, containing about 16,000 volumes; the Mechanics' Association, before which lectures are delivered on science, the mechanic arts and trade; the Apprentices' Library, containing upwards of 5,000 volumes; also several academies and numerous common schools, a Free School Society, and a Wesleyan Seminary for the instruction of both sexes.

There are published 8 daily, 1 tri-weekly, 6 semi-weekly, and 1 weekly news-papers, several weekly literary papers, a Quarterly Review, and a religious magazine.

The number of fire engines is 46; 4 hook and ladder companies; 1 hose company, with 10,245 feet of hose; 17 ladders; 23 hooks, and 1 machine

for throwing down chimneys. The whole number of men in the fire department is 1,269. This body is incorporated for charitable purposes, and expended during the past year, in support of indigent members, &c. \$3,216.

The Battery is a beautiful open space, containing several acres, at the S. W. point of the city. It commands a fine view of the harbor, with its shipping, islands, and fortifications, and is much frequented by the citizens. The Park is a handsome common, and includes the City Hall, New York Institution, Debtors' Prison, and Bridewell. The Bowling Green, is a beautiful spot of about $\frac{1}{2}$ an acre near the lower part of Broadway. The Elgin Botanic Garden is $3\frac{1}{2}$ miles from the City Hall, and contains about 20 acres. It was founded in 1801, by Dr. David Hosack, and was purchased by the State in 1810, for \$74,268, and presented to the Medical College. The other principal places belonging to the city are Harlaem, Bloomingdale, Manhattanville, Ingleberg, Petersfield, Rose Hill, Bellevue, Mount Vernon, Harlaem heights, Forts Washington, Prince, Tryon, and George, several small islands in the harbor, as Governor's Island, Bedlow's Island, and Ellis' Island, on each of which are fortifications; Castle Clinton on the battery, Bussing's point, King's bridge, Hell gate, Corlaer's hook, Kip's bay, and Greenwich, which last is now nearly merged in the compact part of the city.

New York harbor is a large and beautiful bay, 9 miles long, and 4 broad, which spreads before the city on the S. side, having Long Island on the E. and Staten Island and New Jersey on the W. On the N. it receives the Hudson; on the N. E. it communicates with Long Island Sound through East river; on the W. with Newark bay, through the Kills; on the S. with the Atlantic ocean, through the Narrows. The harbor is deep enough for the largest vessels, well secured from winds and storms, sufficiently spacious for the most numerous fleet, and the currents so rapid, that it is seldom obstructed by ice.

New York is admirably situated for commerce, on an excellent harbor, at the mouth of a noble river, with an extensive, fertile and populous back country. It imports most of the goods consumed in the State of New York, the northern half of New Jersey, the western parts of New England, and to a great extent the goods consumed in the southern and many of the western States, and when the Erie canal is completed, will supply the country on the Ohio and the great lakes. Four lines of regular packets are established between this city and Europe, viz: 2 to Liverpool, 1 to London and 1 to Havre. A ship leaves New York for Liverpool every week; the packets for the other ports sail monthly. A packet sails every week to Charleston, S. C. This city owns more shipping than any other in the Union, and more than half as much as the city of London. The amount of shipping in 1816, 299,617 tons. The revenue from the customs, collected at this port, is about one-fourth of the whole revenue of the U. States; in 1815, it was \$14,409,790.—The city is governed by a common council, composed of the Mayor, the Recorder, and one Alderman and an assistant Alderman from each of the 10 wards. The Recorder and 2 Aldermen form the criminal court of the county; a first judge with the Mayor and Aldermen form the Mayor's Court, or Court of Common Pleas. There is also a Police Court of three Magistrates, one of whom is constantly

holding the Court, a Marine Court, two Justices' Courts, and a number of minor Justices' Courts.

Few cities in the world have increased so regularly and rapidly as New-York. In 1697, the population was 4,302; in 1756, 13,040; in 1790, 33,131; in 1800, 60,489; in 1805, 75,770; in 1810, 96,373; in 1820, 123,706; and may now (1823) be computed at 133,000. The inhabitants are from many different nations. More than one-third are of New England origin. After these, the most numerous are the Dutch and Scotch, and then the English, Irish, and French.

New Zealand, two large islands in the Pacific ocean, lying E. of New South Wales, divided from each other by a strait 12 or 15 miles broad. Lon. 181° to 194° W. Lat. 34° to 48° S. The northern island is 600 miles long, and on an average 150 broad, and the southern nearly as large. The New Zealand pines grow to a greater height than the tallest Norway pines. The most valuable production is flax. Wheat, barley, and all the common European grains and vegetables, flourish here. The inhabitants are a high-minded and noble race of men. They have virtues which place them in the highest rank of uncivilized nations. But the Missionaries confirm the report that they are cannibals, as they have been frequently known to roast and devour the prisoners taken in war. Their principal faults result from the fierceness of an untamed spirit, and not from the low vices of the sensual. War is the New Zealander's glory. Fighting is the principal topic of his conversation. He believes that the soul, as soon as it is parted from the body, is engaged in war.

At Parramatta, in the British colony of New South Wales, a seminary has been established for the instruction of New Zealanders in the simple arts of life. They are here taught to spin, weave, and reap. They manifest a strong desire for improvement. In February 1820, the seminary contained 25 pupils. Two establishments have also been made in New Zealand by the Church Missionary Society, and with very promising success. In 1814, the first missionary settlers were established at the Bay of Islands by Rev. Samuel Marsden. He visited the settlements in 1819, and purchased from one of the chiefs a tract of land consisting of 13,000 acres, and settled the missionaries upon it. In a journey which he took at this time across the island, he discovered a large river making its way to the sea on the opposite shore and named it the Gambier. The Missionaries cultivate the ground and have already an ample store of excellent wheat; they have directed their attention to the breeding of cattle and employ several of the natives in sawing timber for exportation to New South Wales. They have reduced the language of the country to writing and constructed a New Zealand grammar. The warlike character of the natives creates great obstacles to the progress of civilization, which would be removed should the Missionaries be joined by a band of resolute colonists who would protect their own rights, and at the same time not infringe those of the natives. The progress already made under the discouragements that have existed is astonishing. Pop. variously estimated from 100,000 to 150,000.

Niagara, r. N. America, through which Lake Erie discharges itself into Lake Ontario, is celebrated for its falls, one of the grandest natural curiosities on the globe. The river flows from S. to N. and is 35 miles long. At its efflux from Lake Erie it is $\frac{1}{2}$ of a mile wide, from 40 to 60 feet deep, and flows with a current of 7 miles an hour. As it proceeds, the river spreads to the width of 6 or 7 miles, embosoming several islands, particularly Grand and Navy islands, which terminate in beautiful points $1\frac{1}{2}$ miles above the falls. A little below the termination of these islands, commence the rapids, which extend a mile to the precipice, in which space the river descends 57 feet. At the precipice it is $\frac{1}{2}$ of a mile wide. Here Goat island divides the river into 2 channels; the channel between Goat island and the Eastern or United States' shore, is also divided by a small island. Over the precipice the river falls perpendicularly about 160 feet. Much the greater part of the water passes in the channel between Goat island and the Canada shore. This fall is called from its shape the Horse-shoe fall. Between Goat island and the small island in the eastern channel, the stream is only 8 or 10 yards wide, forming a beautiful cascade. Between this small island and the United States shore, the sheet of water is broad, and the descent is greater by a few feet than at the Horse-shoe fall, but the stream is comparatively shallow.

The falls are seen to advantage from different positions. The best single view is that from the Table rock on the Canada side; and the best view of the rapids is from Goat island, which is ingeniously connected by a bridge with the eastern shore. The view from the river below is the most entire. Below the falls, the river runs between perpendicular banks 300 feet high to Queenston, 7 miles; thence to Lake Ontario the country is open. About 5 miles below the falls, is a semicircular basin on the E. side of the river 300 yards in circuit, inclosed by rocky cliffs. The current confined here forms a tremendous whirlpool, called the Devil's Hole, after which it assumes a tranquil course. From Lewiston to its mouth, 8 miles, it affords a good harbour for vessels. From the landing at Lewiston there is a portage of 9 miles to Fort Schlosser, 2 miles above the falls.

The Venetians, on obtaining possession of it, reduced it to a smaller compass but surrounded it with very strong fortifications. Since 1570, it has been under the dominion of the Turks. Its fortifications, even in their present ruined state, are conceived by Dr. Clarke to exceed in magnificence those of almost every other city. The city contains 2,000 Mahometans, and 1,000 Greek families, with a few Armenian and Maronite Christians. It carries on manufactures of Turkey leather, of small carpets, and of printed cottons. Niger, r. Eng. in Norfolk, which falls into the German ocean at Clay.

Niger, a great river of Central Africa, which rises in the western part of the continent, near the sources of the Senegal, and has excited an extraordinary degree of interest in modern geographers, by the various and contradictory rumours relative to its course and termination. The opinion which, after the discoveries of Park, became generally established, was that of Major Rennell, coinciding in some measure with the previous one of D'Anville, by which the Niger, after issuing from the lake Dibbie, was supposed to flow eastward through the countries of Houssa and Cassina, till it was lost in the lakes and marshes of Wangara. A very different hypothesis has been started by travellers into Northern Africa. Jackson and Hornemann both state the universal conviction there to be, that the Niger flows eastward, and joins the Nile, being in fact the Nile itself. The Moors express their astonishment when they hear Europeans doubting the identity of the two streams. Hornemann also states that in Fezzan he never met with any one who entertained a different opinion. Notwithstanding these concurrent testimonies, this opinion has been decidedly rejected by the ablest geographers. A more recent hypothesis, the fame of which has nearly absorbed every other, is that by which the Niger is supposed, after a long course through Central and Southern Africa, to pour itself into the Atlantic by the estuary of the Congo. This was originally suggested to Mr. Park by captain Maxwell, who, in the character of a slave-trader, had been accustomed to frequent the last mentioned river. His opinion was founded on the vast quantity of water which it poured into the ocean, and on a rise taking place at a period when no rains had fallen on the southern side of the line. These arguments made so strong an impression on the public mind, that the British government, with a liberality and public spirit which is highly laudable, determined to fit out an expedition on a great scale, to ascertain this grand question in modern geography. It was divided into two parts, one of which, of a military character, was commanded by major Peddie, and was destined to penetrate across Western Africa to the Niger, and to descend its stream; the other, of a naval description, under captain Tuckey was to ascend the Congo in boats. The hopes which were raised of the success of this expedition, have been sadly disappointed. The party of captain Tuckey, overcome by fatigue and the heat of the climate, were seized

with a pestilential disorder, which proved fatal to most of them. All the leaders of that of major Peddie fell also a sacrifice to the climate, before they had even approached the Niger.

Nile, a great and celebrated river of Africa, which traverses Egypt through its whole extent, and, by its inundation, produces all the fertility for which that country is distinguished. The Portuguese missionaries in Abyssinia represented the Blue river, or Bahr el Azrek, as the principal head of the Nile; but it is now ascertained that the Bahr el Abiad is the largest branch, and has the longest course. The most authentic account of the origin of this river, is that collected by Browne in Darfur. The Bahr el Abiad was there described as formed by the conflux of numerous small streams; descending from a very lofty range called the mountains of Donga, which appear to be the same called by the ancients the Mountains of the Moon. For some time it flows eastward along their base; then turns to the N.; and among other countries, waters Cordofan and Sennaar. In traversing this last, it receives its main tributary, the Bahr el Azrek, or river of Abyssinia. Having flowed a considerable space further, it receives the Tacazze, after which during a course of about a thousand miles, through Nubia, it is not fed by any river, scarcely even by the smallest rivulet. This vast region for about a mile from the river is capable of culture; beyond which it stretches on each side into an immeasur-

able expanse of desert. Before reaching Egypt, the Nile forms two cataracts, the lowest of which is at Syene. In passing through Upper Egypt, the river is confined between two mountain ranges, which leave only a narrow strip upon each side. Near Cairo the valley widens, and the Nile soon separates into branches, and spreads itself over the wide and level plain of the Delta. The rise of the river begins about the 17th of June, and continues till August, when the river is at its height, and all the level parts of the country are overflowed. In Upper Egypt, however, the stream being confined, as in Nubia, within high banks, artificial means of irrigation must be employed. The length of the river is about 2,000 miles.

Nootka Sound, bay of the Pacific ocean, on the N. W. coast of America, discovered by captain Cook, in 1778. The entrance is in the E. corner of Hope Bay, in lat. 49° 33' N. lon. 233° 12' E. between two rocky points, that lie E. S. E. and W. N. W. from each other, distant between 3 and 4 miles. Within these points, the sound widens considerably, and extends in, to the northward, 4 leagues. The harbors and anchoring places within its circuit are numerous. The climate, according to captain Cook, is milder than that on the east coast of America, under the same parallel of latitude. The chief employment of the natives seems to be that of fishing, and killing land or sea animals. In the year 1786, an association of British merchants formed a small settlement here, for the purpose of obtaining furs; but the settlement was seized by the Spaniards in 1789.

Norfolk, co. Eng. on the E. coast, bounded N. and N. E. by the German ocean, S. and S. E. by Suffolk, and W. by Cambridgeshire, by part of Lincoln, and by the Washes. It contains 2,013 sq. miles, or 1,288,000 acres, with about 150 inhabitants to each mile. Pop. in 1811, 292,000. Norfolk has been long famed for its agriculture, which forms the chief business of the inhabitants. The greater part of the lands, at least two-thirds of the whole county, are arable, and kept in a state of tillage. The raising of grain for exportation forms by far the principal object with the farmer.

Norfolk, borough, and port of entry, Norfolk co. Virginia, on the E. side of Elizabeth river, just below the confluence of its two branches, and 8 miles above its entrance into Hampton roads, 114 m. E. S. E. Richmond, 229 S. S. E. Washington city. Lon. 76° 23' W. Lat. 36° 55' N. Pop. 8,478. It contains a theatre, 3 banks, including a branch of the U. S. bank, an academy, a marine hospital, orphan asylum, Lancasterian school, athenæum, and 6 houses of public worship, 2 for Baptists, and 1 each for Episcopalians, Presbyterians, Roman Catholics, and Methodists. The situation is low, and in some places marshy. The principal streets are paved and well lighted; but the houses are not remarkable for elegance.

The harbour of Norfolk is safe and commodious, and sufficiently spacious to contain 300 ships, and deep enough for the largest vessels. It is defended by several forts; one of which is on Craney island, 5 miles below the town, near the mouth of Elizabeth river. The commissioners who were appointed by the U. S. to survey the lower part of

Chesapeake bay in 1818, reported that Hampton roads could be so fortified as to prevent the entrance of any hostile fleet.

Norfolk has more foreign commerce than any town in Virginia, and in 1815, owned more shipping than any place in the U. States south of Baltimore, except Charleston. The amount of shipping, in 1815, was 34,705 tons. A canal proceeds from the S. branch of Elizabeth river, 9 miles above Norfolk, through Dismal Swamp, to Albemarle Sound. By means of this canal, the produce of a large section of North Carolina is brought to the Norfolk market.

Northumberland, an extensive county, Eng. on the borders of Scotland, bounded by the German ocean on the E. by Scotland on the N. and N. W.; by Cumberland on the W. and Durham on the S. It contains about 1,850 square miles, or 1,184 000 acres. Pop. 172,161. Along the sea coast the face of the country is nearly level. The western part is an open mountainous district. Northumberland is distinguished for its agriculture; but its mineral riches have chiefly raised it to its present rank and importance. Here is situated the greatest coal district in the world, which has continued for centuries to supply the vast consumption of the metropolis, of the whole eastern and southern coasts of the island, and of a great part of the continent. It yields also lead in such abundance as almost to equal the supply from all the rest of Europe. The lead district is partly in Northumberland, partly in Durham, and partly in Cumberland. Between 1803 and 1810, the greatest quantity of lead shipped in any one year at the port of Newcastle, was 10,352 tons, the least 3,911, the average being about 7,000.

North West Territory, a territory of the U. S. bounded N. by the boundary line between the U. States and the British possessions; E. by Michigan Territory; S. by the State of Illinois, and W. by the Mississippi. It extends from lat. $42^{\circ} 20'$ to 49° N. and contains about 140,000 square miles. The N.W. Territory does not exist in law, but is incorporated with the government of Michigan, and constitutes the county of Crawford. There is a settlement at the junction of the Wisconsin with the Mississippi, called Prairie du Chien. Above the settlement stands Fort Crawford, which is strong and well garrisoned. The American S.W. Fur Company have a post on the S. shore of Sandy Lake; another on St. Croix river, and another on St. Louis river. The rest of the country is possessed exclusively by the Indians, chiefly of the Chippeway, Winnebago and Menominee tribes. The whole number in the Territory is estimated at 18,000.

This Territory has been very imperfectly explored; but the alluvial bottoms on its rivers, wherever they have been examined, are said to be as rich as those of Ohio and Michigan. The most remarkable vegetable production is the wild rice, a productive and highly valuable aquatic plant, with which the lakes, rivers, and bays generally abound. It grows in water of from 4 to 7 feet deep. When it is ripe the Indians pass through it in their canoes, lined with blankets, and bending the stalks over the sides, beat off the grain with sticks; and such is the abundance of the harvest, that an expert Indian will soon fill a canoe.

But the most valuable productions of this Territory are its mineral treasures. The southern coast of Lake Superior yields iron, lead, and various other metals, but particularly copper. On the banks of the river Ontonagon large masses of this metal are found in a pure state, and from the appearance of the surrounding country there is little doubt that extensive copper mines exist in the

vicinity. The largest mass examined by Mr. Schoolcraft weighed, according to his estimate, 2,200 lbs. and is said to be the largest piece of pure native copper in the world.

The shores of Lake Superior are elevated and rocky; the lake is of dangerous navigation, being subject to fogs, mists and storms. The principal bays are Fond du Lac, Keweenaw and Chegoimegon. Among the lakes are Sandy lake, Spirit, Cassina and Little Winnipeg.

This territory affords one of the best routes of communication between the Great Lakes and the Mississippi, by means of the Fox and Wisconsin rivers.

Norway, an extensive kingdom of the north of Europe, united in 1815 to Sweden. It extends from the Naze, in N. lat. $57^{\circ} 58'$ to the North Cape, in lat. $71^{\circ} 11' 30''$ N. It is bounded E. by Sweden and Swedish Lapland; W. by the German and Northern oceans; and S. by the narrow sea, forming the entrance to the Sound and Baltic. It is divided into four governments or dioceses, viz. Aggerhuus, Christiansand, Bergen, and Drontheim. The last is succeeded by Norrland, also a long narrow province; and the whole is terminated by Finmark or Norwegian Lapland, a dreary and inhospitable region, forming the northern extremity of Europe. The extent and population of these provinces are as follows:

Divisions.	Extent in English sq. miles.	Population.	Pop. on a sq. mile.
Aggerhuus	37,327	390,000	10
Christiansand	14,877	140,000	10
Bergen	14,356	15,000	10
Drontheim	22,858	170,000	8
Norland and Finmark	71,582	80,000	1
Total	161,000	930,000	6

The surface of Norway is very uneven, presenting a succession of mountains and vallies; the former in general barren and uninhabited. Flax and hemp are raised in many parts of the country; in others barley and oats. Still it is computed that not more than one-hundredth part of the kingdom is under tillage; and about 200,000 quarters of grain are annually imported. The main article of the export trade of Norway for many ages has been its timber. Its mountains are covered with forests of pine, ash, but in particular of fir, which grows over almost all the country. Minerals form another part of the wealth of this rugged region. The annual produce of the forges of Norway has been computed at about 8,000 tons of iron. The copper is of very superior quality; and the chief mines of it are at Roras. The shipping belonging to Norway amounts to nearly 100,000 tons; the number of seamen is 10,000. The fisheries are extensive, and may be considered, after timber and iron, the chief support of the export trade. The revenue of Norway is about 400,000*l.* sterling, and the expenditure about the same. The army contains 10 or 12,000 men, and the navy is very small. Norway formerly belonged to Denmark, but in 1812, the threatening expedition of Bonaparte against Russia induced that power and Great Britain to exert themselves to secure the neutrality or alliance of Sweden. They accordingly stipulated for Sweden the conquest and possession of Norway, and in conformity with this agreement, the Danish court was compelled to sign on the 14th January 1814, the treaty of Kiel, stipulating the sacrifice of Norway for the very inadequate return of Swedish Pomerania and the island of Rugen. The Norwegians, indignant at this transfer, took up arms; but after a spirited resistance, an assembly convened at Christiana, agreed that Norway should be permanently governed by the same king as Sweden, but as an integral state, and with the preservation of its constitution and laws. It was declared a free, independent, and inalienable kingdom, the succession to be in the male line, and the reigning prince a Lutheran.

Norwich, city, Eng. in Norfolk co. the principal town in the county, the chief city in the eastern part of the kingdom, and a place long noted for its trade and extensive manufactures. It stands on the Wensom, which is navigable up to the town. The chief public buildings are the castle and the cathedral; but there are, besides, no fewer than 36 churches, various dissenting chapels, and numerous institutions for charitable and benevolent purposes. The principal manufactures are bombazines, worsted damasks, flowered satins, and fine camblets. To these have been recently added cottons, shawls, and other fancy goods, both for furniture and dress. The manufacture of cotton thread lace has also been introduced; and the trade in linen is in a flourishing state. The imports and exports of Norwich are chiefly managed through the medium of its port, Yarmouth. 22 m. W. Yarmouth, 108 N. E. London. Lon. 1° 17' E. Lat. 52° 38' N. Pop. in 1811, 37,256.

The Thames forms a safe and commodious harbour. In the Yantic, a branch of the Thames, is a cataract a mile from its mouth, remarkable for its romantic scenery, and affording fine sites for mills and manufacturing establishments. There are within the town a court-house, jail, bank, 2 insurance companies, and 6 houses for public worship, 2 for Congregationalists, 2 for Methodists, 1 for Episcopalians, and 1 for Baptists. Among the manufacturing establishments are 1 woollen factory, 1 cotton factory, 2 manufactories of morocco leather, 2 paper mills, 5 tanneries, 1 carding-machine, 6 grain mills, and 6 saw mills.

Norwich city consists of three distinct and compact settlements, called Chelsea landing, the Town, and Bean hill. Chelsea landing is very romantically situated at the point of land formed by the union of Shetucket and Yantic rivers, and is the seat of most of the commercial business of the place. The Town is about 2 miles N. W. of Chelsea, and contains the court-house and some other public buildings. Bean hill is a pleasant settlement in the western part of Norwich.

Pop. in 1811, 162,900; families, 33,324, of whom 12,293 were employed in agriculture, 18,923 in trade and manufactures, and 2,298 otherwise. It is one of the most fertile, healthful, and agreeable counties in all England; and is noted for the number of mansions and country seats of the nobility which it contains.—Nottinghamshire is also noted for its manufactures, of which that of stockings is the staple.

Nottingham, t. Eng. and cap. of Nottingham co. on the Trent. It is one of the most beautiful towns in England, from its picturesque situation, and the striking appearance of its buildings. The trade and manufactures of Nottingham are very extensive, owing to its situation near the centre of the kingdom, in the line of the great Trent and Mersey navigation, which affords it an easy access both to the eastern and western seas, and having its communication equally open towards the south, with the Severn on the one hand, and the Thames on the other. The staple manufacture is that of stockings, chiefly the finer kinds, as those of silk and cotton. These are all wrought on the stocking frame. For the last 20 years also, a great number of hands have been employed in the manufacture of lace for veils, shawls, &c. which has greatly added to the wealth and business of the town. It sends two members to parliament. Pop. in 1779, 17,700; in 1811, 34,363. 125 m. N. by W. London. Lon. 1° 10' W. Lat. 52° 59' N.

Nova Scotia, a province of British America, between lat. 43° 30' and 46° 30' N. It is a narrow peninsula, more than 300 miles long, stretching from S. W. to N. E. It is bounded on the N. by the gulf of St. Lawrence; W. by the bay of Fundy; N. W. by the province of New Brunswick; and on all other sides by the Atlantic ocean. The N. E. shores present a gloomy and barren aspect; but the counties to the S. W. of Halifax, and along the bay of Fundy, have a rich soil, and produce good crops of grain.—The population is estimated at more than 100,000. The great body of the people are of English origin; principally emigrants from New England. After these, the Scotch and Irish settlers are the most numerous. The Mickmack Indians were the aborigines of the province, and still inhabit the shore E. of Halifax. They are diminishing in numbers.—The established religion is that of the Church of England. There is one bishop, whose diocese includes Nova Scotia, New Brunswick, and the islands of Cape Breton and Prince Edward.—There is a college at Windsor, which has a valuable library, and several scholarships. Schools are established in all the villages.—The commerce and wealth of Nova Scotia have increased, of late, with great rapidity. Fish and lumber are the staple commodities, and are exported in great quantities to Great Britain, and the West Indies.

Nova Zembla, a very large island in the Arctic ocean, belonging to the Russian government of Archangel, from which it is separated by the straits of Waigatz. It extends from 69° to 76° N. lat. and is about 500 miles long, and 240 broad. The east coast has not yet been explored, being seldom accessible, on account of the ice by which it is surrounded. Indeed, no part of this dreary and inhospitable region has any permanent inhabitants; but the south and west coasts are visited by fishermen and hunters, sent out by the merchants of Archangel and Mezen. The island of Nova Zembla is divided into two parts, nearly equal, by a narrow and winding strait, which traverses it from east to west.

Nubia, an extensive country of Africa, inclosed between Egypt, Sennaar and the Red Sea. It extends on both sides of the Nile, from lat. 17° to 24° N. It is covered by numberless tribes of independent Arabs, some carrying on trade in towns, others cultivating the ground, and a still greater number roaming over the extensive wastes which cover this part of Africa. With the exception of the immediate banks of the Nile, which are rendered fertile by laborious irrigation, Nubia consists almost entirely of sandy and rocky deserts. The country on the Nile is split into a series of little independent kingdoms, each governed by its own Melek or chief. The governors of these little districts are described as very violent and arbitrary in their proceedings, and rude in their treatment of strangers; yet, under the protection of the pacha of Egypt, Europeans may now travel in perfect safety as far as Derri, and even Ibrim.

The eastern bank of the Nile is much better adapted for cultivation than the western, being more easily and abundantly watered. This is rather remarkable, since all the splendid ruins for which this region is distinguished are on the opposite bank. Hence we may suspect this last to have been formerly more fertile and populous, but reduced to its present state by the continual encroachment of those immense moving sands which extend to the westward. The climate of Nubia, though in summer intensely hot, is remarkably healthy, in consequence probably of the extreme dryness of the atmosphere.

Among its antiquities the most remarkable is the temple of Ipsambul. The chief trade of Nubia consists in slaves imported from the interior of Africa, and either conveyed northwards into Egypt, or across the Red sea by Souakin and Jidda. The annual import is estimated at 5,000, of whom 2,500 are for Arabia, 1,500 for Egypt, and 1,000 for Dongola and the Bedouins of the mountains. Few of the slaves are above the age of 15.

Odessa, a flourishing seaport, Eu. Russia, in Cherson, on a small bay of the Black sea, between the mouths of the Dniester and the Dnieper. This place is entirely of modern erection, having been founded in 1792 by Catherine II. The emperor Alexander followed up the views of Catherine, and appointed as governor the duke of Richelieu, at that time a French emigrant nobleman, afterwards (in 1816) prime minister of France. Under his superintendence it prospered, and a number of public establishments were set on foot under the patronage of the government. The population in 1804, had risen to 15,000; and in 1820, to more than 40,000.

It has a fine bay, seldom frozen over, with sufficient depth of water almost to the very edge for the largest vessels of war. It is surrounded by extensive plains, which, when cultivated, will be very productive. It is fortified in the modern style, and has on the E. side a citadel which commands the port. The port is artificial, and adapted for the reception of about 300 vessels. It is formed by two large moles, one of which is in the form of a quadrant of a circle, and has regular parapets and embrasures for cannon; the interior is divided by smaller moles and quays. A lighthouse has been erected on a projecting point on the S. side of the bay. The roadstead is very extensive, and the anchorage safe in summer, being sheltered from every wind but the S. E. The town is neatly built, the streets being wide, straight, and crossing each other at right angles. The chief disadvantages of the place are the scarcity of wood and water, and, at particular seasons, a degree of unhealthiness in the climate. The transit of goods from the interior is free of any government charge; and since the erection of a circular wall, and other precautions for preventing smuggling into the interior, Odessa has been declared a free port. The great article of export is corn from the Ukraine and neighboring provinces. It is brought down chiefly in carts and wagons drawn by oxen, which travel in companies, and stop at intervals to let the oxen feed in the *steppes*, or vast natural pastures, by the way, so that the expense of carriage is trifling. In summer, the season when this conveyance chiefly takes place, several hundred wagons arrive in town in a single day. The other articles are tallow, hides, and flax; also timber; but hitherto the export of these has been small. The chief imports are sugar and other colonial produce. The number of vessels that arrive in a year is about 800, of which the half are Russian, and nearly one-third are British. Brewing and distilling are carried on upon a large scale; and there are some manufactures of woollens, silk, gunpowder, and soap. The great disadvantage hitherto has been the want of mechanics for the town, and of farmers for the surrounding district. The government has spared no expense to procure both; and those who fix on the country round Odessa, are allowed a house, a pair of oxen, a plough, a little money, and an exemption from all taxes and military services during 25 years. 98 m. Ohio, one of the U. S. bounded N. by Michigan Territory and Lake Erie; E. by Pennsylvania; S. E. by Virginia; S. by Kentucky; and W. by Indiana. It extends from 38° 30' to 42° N. lat. and from 80° 32' to 84° 50' W. lon. Extent, 40,000 square miles, or 25,600,000 acres. Pop. in 1791, 3,000; in 1800, 42,156; in 1810, 230,760; in 1820, 581,434. Engaged in agriculture 110,991, in commerce 1,451, in manufactures 18,956.

The interior parts of the State, and the country bordering on Lake Erie, are generally level, and in some places marshy. About one third, or one quarter of the State, comprehending the eastern and southeastern part, bordering on the Ohio river, is generally hilly and broken, but not mountainous. Immediately on the banks of the Ohio and several of its tributaries, are numerous tracts of interval land, of most exuberant fertility. On both sides of the Scioto, and of the Great and Little Miami, are perhaps the most extensive bodies of rich and level land. In many places are extensive prairies, particularly on the head waters of the Muskingum and Scioto, and between the Scioto and the sources of the two Miami rivers. Some of these prairies are low and marshy, and yield spontaneously a large quantity of coarse grass from two to five feet in height; others are elevated, and are frequently called barrens, not however on account of their sterility, for they are often fertile. The height of land which divides the waters of Ohio river from those of Lake Erie is the most marshy of any in the State, while the driest land lies along the margins of the rivers.

Wheat is the principal production. From 70 to 100 bushels of corn are said to be frequently produced on an acre. Other kinds of grain, and various sorts of fruits are also cultivated. Coal is found in abundance along the Ohio in the eastern part of the State. Salt springs have been discovered and wrought on the Muskingum, a few miles below Zanesville, and in various other places. Gypsum of a superior quality is found on the N. side of Sandusky bay. The value of the manufactures of Ohio in 1810, was \$2,894,290.

The climate of Ohio has been commonly considered warmer in the same parallels than that of the Atlantic States. The difference was considered by Mr. Jefferson, as equal to what would result from three degrees of latitude. Observations, however, which have been made at Cincinnati, for a series of years, seem to prove that there is no foundation for this opinion: or at least if there be a difference, it cannot equal one third of what has been mentioned. The opinion that the climate on the Ohio is more liable to sudden and extreme changes, and more moist than that of the eastern States, is equally erroneous. The diseases to which immigrants are most liable, are bilious and typhus fevers. This is especially the case with the natives of New-England and New-York, who in coming here undergo a change of climate greater than they seem generally to anticipate. They should, therefore, endeavor to arrive in the country late in the autumn; and before the ensuing

summer place themselves in the most healthy situations which can be found. If they are careful in this respect, and in the heat of summer shun the evening air, and the noon-day sun, and avoid what is denominated a bilious habit, very few will suffer an attack; but without such attention, a *seasoning*, as it is termed, will probably be experienced the first summer after an arrival from the North. In the second, whether the first be sickly or not, there is but little danger.

The population of Ohio is made up of emigrants from every State in the Union, and almost from every country in Europe. They have not resided together long enough to form a fixed and uniform character. The mass of the emigrants have been farmers from the northern and middle States, who are in general industrious, temperate and frugal, possessing much intelligence and enterprise. The population will probably continue to increase rapidly for some time to come; though not with the same rapidity as heretofore. The recent extinction of the Indian title to the northwestern quarter of the State, called the Indian Reservation, will have an immediate effect on the progress of population in that quarter.

In 1817, the number of ministers of the several religious denominations was stated as follows:—Presbyterians, 48; Methodists, 34; Baptists, 13; New-Lights of the Christian church, 9; Seceders, 6; Episcopalians, 3; Congregationalists, 3; meetings of Friends in this State and Indiana, 59. There is a university at Athens, called the Ohio University, another at Oxford, called the Miami University and a medical college at Cincinnati. One section, or thirty-sixth part of every township has been granted by the government of the U. States for the support of schools, besides three townships for the support of the Universities. There are many incorporated academies in different parts of the State, and a College at Cincinnati.

It has been proposed to connect Lake Erie with Ohio river by means of a canal between the Cuyahoga, which empties into Lake Erie, and the Tuscarawa, an E. branch of the Muskingum. Between these rivers there is now only a short portage, and so certain is it that the two waters may be connected by a canal, that in the law of Congress, appropriating a portion of the public lands to the improvement of inland navigation, 100,000 acres were assigned for defraying the expense of carrying into effect this project. Of all the canals proposed for connecting the waters of the lakes with those of the Mississippi, this probably will be first opened, and will be a great benefit to the country through which it passes. It is supposed that Lake Erie may also be connected with the Ohio by canals, uniting the branches of the Maumee, with a branch of the Great Miami.—Three per cent. of the nett proceeds of the U. S. lands within the limits of Ohio, have been given by Congress to the legislature for the purpose of opening and improving its roads. The produce of this fund has hitherto been divided among so many roads that very little of the good which was anticipated, has been derived from it.

The legislature is composed of a Senate and house of representatives. The number of representatives must not exceed 72, nor be less than 36.

The number of Senators must never be less than one third, nor more than one half of the number of representatives. The representatives are chosen annually, and the senators biennially, one half of the senators being chosen each year. The gov-

ernor is chosen biennially, and is eligible only 6 years in any term of 8 years. The judges of the supreme court, the presidents, and the associate judges of the courts of common pleas are appointed by a joint ballot of both houses of the general assembly, and hold their offices for the term of 7 years.

Ohio, r. U. States, formed by the confluence of the Alleghany and Monongahela rivers at Pittsburgh, in the western part of Pennsylvania. It flows in a southwesterly direction for 945 miles, separating Ohio and Indiana, from Virginia and Kentucky, and falls into the Mississippi 193 miles below the Missouri, in N. lat. 37° and W. lon. 89°. The distance from Pittsburgh in a direct line to the mouth of the Ohio is only 614 miles. The river varies in breadth from 400 to 1,400 yards. At Cincinnati, it is about 800 yards, which may be regarded as the mean breadth. Its current is very gentle, and no where broken by any considerable falls, excepting at Louisville. The water there descends 22½ feet in 2 miles, producing a very rapid current; yet boats have notwithstanding frequently ascended. A canal around these rapids has been in contemplation for a long time.

The difference between high and low water on the Ohio is usually about 50 feet, and sometimes 60 feet. When lowest, it may be forded in several places above Louisville. The greatest depression is generally in August, September, and October; the greatest rise in December, March, May and June. Near Pittsburgh, it is frozen over almost every winter for several weeks. Generally the navigation is suspended by floating ice during 8 or 10 weeks of the winter. Steam-boats are found by actual experiment to be well adapted for the navigation of the river.

Oldenburg, a grand dutchy in the N. W. of Germany, consisting of several scattered portions of territory. The principal part is Oldenburg proper, a tract of country bounded N. by the German ocean; E. W. and even S. by the kingdom of Hanover. The grand duke possesses also the principality of Eutin, (formerly the bishopric of Lubeck,) situated in Holstein, and the lordship of Birkenfeld, ceded to him by Prussia out of the territory on the Rhine. The extent and population of his States are as follows: Grand dutchy of Oldenburg proper, including the county of Delmenhorst, and the lordships of Varel, Jever, and Kniphausen, 2,250 sq. miles, with 178,000 inhabitants; principality of Eutin or Lubeck, 200 sq. miles, with 20,000 inhabitants; lordship of Birkenfeld, 170 sq. miles, with 20,000 inhabitants; total 2,620 square miles, and 218,000 inhabitants. The revenue is computed at £150,000 sterling. The grand dutchy proper consists almost entirely of level ground, and in some places on the coast, is so low, that it requires large dikes, as in Holland, to prevent inundations. The prevailing religion is the Lutheran; but there are also Calvinists and Catholics. The grand duke is a member of the German body. In the administration of his territories, he is as yet (1820) uncontrolled, having delayed to convoke a representative assembly, though bound to do so by the articles of the Germanic confederation in 1815. In 1810, he was expelled from all his possessions, by Bonaparte; but after the battle of Leipsic in 1813, he returned, and at the congress of Vienna received the title of grand duke.

Ontanagon, often called *Tenaugon*, r. North-West Territory, which rises in the mountainous country between Lakes Superior and Michigan, and after a course of 120 miles flows into Lake Superior 320 m. W. of the St. Mary's river, 50 W. of Keweenaw point, in lat. 46° 52' 2" N. It is the largest river which flows into the Lake between Point Iroquois and the Fond du Lac. There is only a short portage between its head waters and the Menominee, which falls into Green bay. The *Ontanagon* has long been noted for the large masses of copper on its banks. A strip of alluvial land extends 3 or 4 miles up the river, and is then succeeded by a wild and hilly country, in which are the noted copper mines, 32 miles from the Lake. The large mass of native copper is on the W. bank of the river, at the water's edge, imbed-

ded in a rock of about 5 tons weight, and the quantity of metallic copper in it is estimated by Mr. Schoolcraft at 2,200 lbs. being probably the largest piece of pure native copper in the world.

Ontario, Lake, one of the greatest lakes of N. America, lying between New-York and Upper Canada. It is 171 miles in length, 59½ in its greatest breadth, and 467 in circumference. The depth of water varies very much, but is seldom less than 3 or more than 50 fathoms. It receives the waters of Lake Erie through Niagara river near its S. W. extremity, and discharges itself into the ocean, through the river St. Lawrence, which issues from it at its N. E. extremity. The shores towards the N. E. are low, with many marshy places; to the N. and N. W. they assume a lofty character, but subside again to a very moderate height on the south. All the rivers which flow into the lake have a sandy bar across the entrance, but there are some fine bays and inlets. •*Burlington bay* is both spacious and secure, but the entrance is so shallow as to admit nothing but boats. *York* and *Kingston* harbors, belonging to the English, and *Sackett's harbor* to the Americans, are unquestionably the best upon the lake. At the two latter ships of war of the first rate were constructed during the late war. Very heavy squalls of wind frequently occur on the lake, but unattended with danger where the usual precautions are used.

Oporto, city, Portugal, in Entre-Duero-e-Minho, on both sides of the Duero, about 2 miles from its mouth, 150 N. Lisbon, 49 N. Coimbra. Lon. 8° 19' W. Lat. 41° 9' N. Pop. in 1789, 74,000. The river forms a barred harbour, the entrance of which is difficult and dangerous, and requires a pilot and great care to avoid the rocks and sandbanks; and on this account it is so secure, that the Portuguese government have but partially fortified it. The road is spacious, and will contain a large fleet.

The town is on an uneven ground, but the streets are clean and well paved. Next to Lisbon it is the most populous, wealthy, and commercial town in Portugal. The principal trade is in wine, of which upwards of 80,000 pipes are exported annually. Its commerce increased after the earthquake at Lisbon, before that time the population being estimated at only 20,000. Here are numerous churches, hospitals, and convents, and a naval arsenal.

Oregon territory, comprises the part of the U. States, lying W. of the Rocky mountains. It has New Caledonia on the N. and the Spanish possessions on the S. But the particular boundaries between these countries are not yet settled. Oregon is watered by Columbia river and its branches. Our knowledge of the territory is principally confined to this river. As you ascend it the country for the first 160 miles is covered with heavy timber, mostly of the pine species; thence the woods diminish gradually for 60 miles, till nothing is found but stunted trees and shrub oaks. The banks of the Columbia are inhabited by various Indian tribes, who subsist chiefly on the salmon, which the river yields in immense quantities. The American Fur company have a settlement at Astoria. A bill is now before Congress for the establishment of a colony at the mouth of Columbia river. The bill provides for the extinction of the Indian title to 30 miles square on the river; the erection of a fort, appointment of officers and opening of a port of entry; and allows a bounty in lands to settlers. Among the benefits of the proposed colony are the security afforded to our frontier, the protection of our fisheries and other trade in the Pacific, and the facilities opened for intercourse with China.

Orinoco, or *Oronoco*, r. S. America, which rises in the mountains N. W. of lake Parima, in lat. 5° N. and lon. 65° W. Its course, for the first 300 miles, is from N. to S. It then turns to the west, and, after a course of 150 miles, receives the Casiquiari from the south. From the Casiquiari it continues its course westward to St. Fernando, where it receives from the S. W. the Guaviari, a very considerable river. Here it turns northward, and, after receiving the Vichada from the west, pours its waters down the cataract of Atures. These cataracts completely obstruct the navigation of the river. They lie, according to Depons, 740 miles from the mouth of the Orinoco, and 760 from its source, in lat. 5° 40' N. and lon. 68° W. Below the cataracts, 90 miles, it is enlarged by the waters of the Meta, one of its principal tributaries, which is 500 miles long, and navigable 370 miles. Below the mouth of the Meta, 140 miles, the Orinoco receives from the west the Apura, a large and deep river, 520 miles long, having numerous and wide spreading branches, and more rapid than the Orinoco, into which it empties its waters by many mouths. After receiving the Apura, the Orinoco turns to the east, and, after a further course of about 400 miles, divides itself, like the Nile, and discharges its waters into the ocean by 50 mouths, the two most distant of which are 180 miles apart. Only 7, however, are navigable, and but one of these, the southern, called the Ship's Mouth, for vessels of more than 200 tons. The Delta of the Orinoco consists of low boggy lands, in most places liable to inundation.

The principal inhabited islands are Pomona or Mainland, Hoy, North Ronaldshay, South Ronaldshay, Sanday, Stronsay, Eday, Westray, Shapinshay, &c. All the islands may contain about 384,000 acres, divided perhaps in the following proportions: viz. heath and moss, occupied as common, 294,000 acres; green pasture, occupied as common, 30,000; in field pasture and meadow, 30,000; arable, including gardens, 24,000; total productive land, 84,000; houses, roads, walls, ditches, 2,000; fresh water, 4,000. Except some stunted birch and hazel bushes, and a few willows and juniper bushes, there is scarce a tree or shrub to be seen. The animals are small horses, black cattle, sheep, swine, and rabbits. There are large flocks of sheep in fine condition. The principal exports are beef, pork, butter, tallow, hides, salt fish, oil, feathers, linen yarn, kelp, with small quantities of grain in years of plenty. The imports are wood, iron, flax, coal, sugar, spirits, wine, snuff and tobacco; flour, soap, leather, hardware, broadcloth, printed linens and cottons. The annual exports have sometimes been estimated at £40,000, and the imports at £36,000. Pop. in 1801, 24,445; in 1811, 23,238.

Ormuz, isl. in the strait of the same name, which connects the Persian gulf with the Indian ocean, on which was built a city, once the most splendid and celebrated of all Asia. It was the emporium of the trade of India with Persia, and even with Europe, its commodities being carried up the Euphrates, and across the Syrian desert. Ormuz did not owe its greatness to any natural advantage. It is a mere rock of salt, and produces neither a single article of provision, nor a drop of water. Its greatness and splendour were due entirely to commerce. When the Portuguese fleets had found their way round the Cape into the Indian seas, their cupidity was soon excited by Ormuz. They made several attempts to obtain possession of it, which proved abortive; but in 1514, the great Albuquerque sailed thither with a force so overwhelming, that resistance was scarcely attempted. It continued one of the main seats of Portuguese power, till the reign of Shah Abbas, when that ambitious monarch, with the assistance of an English fleet, succeeded in wresting it from them. The Persian monarch made it then his object to transfer the trade of Ormuz to Gombroon, situated on the coast opposite to it; and at length all the inhabitants were ordered to evacuate the place, leaving only a Persian garrison. About the end of the last century, Ormuz was taken possession of by the Imam of Maskat. The fort has been put into a tolerable state of repair, but it contains only about 500 inhabitants. The whole of the ancient city is one mass of ruins. Lon. 56° 40' E. Lat. 27° 8' N.

Otahe, one of the Society Islands, in the Pacific ocean, situated N. of Ulitea. Lon. 151° 20' W. Lat. 16° 53' S.

Otaheite, or *King George the Third's Island*, isl. in the Pacific ocean, consisting of two peninsulas connected by a low isthmus about three miles across. The larger, *Otaheite Nooe*, is about 90 miles in circumference, and nearly circular; the lesser, or *Tiaraboo*, is about 30 miles. The island has a border of low land, reaching from the beach to the rising of the hills, in some places near a mile, in others hardly a furlong wide; while in several points the mountains abruptly terminate in high cliffs, against which the sea beats, and form difficult passages from one district to another. The soil of the low lands, and of the vallies, which run up from the sea between the mountains, is remarkably fertile, consisting of a rich blackish mould. In the higher regions is found the precious sandal-wood, whence the natives chiefly draw the perfume for the cocoa-nut oil, with which they anoint themselves. The bay of *Matavai* affords safe anchorage during eight months of the year, but is dangerous from December to March. The inhabitants of this island are above the common size, and the chiefs are a larger race, few of them being under six feet. The men are tall, strong, well limbed, and finely shaped.

The government is monarchical, and hereditary in one family. There is also an aristocracy, consisting of the chiefs of the several districts, some of whom are supreme in one district, and exercise in their own territories all regal power, yet still subject to the monarch as their sovereign paramount. The produce of this island is bread-fruit, cocoa-nuts, bananas of thirteen sorts; plantains, a fruit not unlike an apple, which, when ripe, is very pleasant; sweet potatoes, yams, cocoas, a kind of arum; a fruit known here by the name of jambu, and reckoned most delicious; and sugar-cane, which the inhabitants eat raw. All these, and many others, the earth produces spontaneously, or with little culture.

During the last eight or ten years, a great change has taken place in this, as well as in the neighboring island *Eimeo*; and also in several other of the Georgian and Society Islands. In the year 1796. the London Missionary Society sent out to *Otaheite*, and other islands of the South seas, a number of missionaries, to communicate the Christian religion to the natives, who gladly received them, as well as several others that were

afterwards sent out in the year 1800. In consequence of disturbances in *Otaheite* in 1799, several of the missionaries were obliged to take refuge in New South Wales, some of whom afterwards returned to the islands. For a period of fifteen years, they labored with very little success, to draw the attention of the natives from their cruel rites and superstitions, to the superior claims of the Christian faith. At length, in the year 1814, the number in *Otaheite*, and the neighboring island of *Eimeo* amounted to about fifty, who had voluntarily renounced idolatry, and embraced Christianity. From this time accessions were gradually made to the numbers of the native Christians, until at length the whole of the inhabitants of *Otaheite*, and seven or eight of the neighboring islands, with very few exceptions, voluntarily renounced idolatry and embraced Christianity. They have in consequence relinquished their former cruel and degrading superstitions, and now assemble in congregations of 400 or 500, and occasionally 700 or 800 persons, in general decently attired, for the purpose of Christian worship. About 6,000 in the several islands have learned to read in the *Taheitan* language, which the missionaries have given them in a written form. In the schools, reading, writing and arithmetic are taught. The natives also, with singular industry, teach each other. Thus knowledge is propagated in all directions. Some of the missionaries who are best acquainted with the language, are employed in the translation of the holy scriptures. The increase of the population of *Otaheite*, in consequence of these, and other co-operating causes, is already visible. A general reformation of manners has followed the introduction of Christianity. The *Areoy* societies are suppressed, the practice of infanticide no longer exists, and human sacrifices are abolished. Many other degrading practices and superstitions have been relinquished; and the despotic authority of the sovereign, who is himself a baptised convert of the missionaries, is superseded by a code of laws. The useful arts have been introduced. The dwellings of the chiefs and people have been improved, villages have been formed, and families induced to live separately, in distinct houses, instead of being huddled together in one. Land also has been inclosed, and the cultivation of sugar commenced on a small scale.

Ural Mountains, a very lofty and extensive range, which, during the greater part of its course, forms the boundary between Northern Asia and Russia in Europe. This great chain appears to take its commencement in the territory of the Kirghises, between the Caspian and the Aral; thence it stretches almost due N. along the sources of the Ural, the Tobol, the Emba, the Petchora, and the Sosva. From the last point its line is very imperfectly known, but it is supposed to stretch nearly parallel with the Obi, till it reaches the shore of the Frozen ocean, then to cross the river, and extend through the whole length of Nova Zembla. It is divided into three parts, the Ural of the Kirghises, the Ural rich in mines, and the desert Ural. The first and last are very imperfectly known. The second contains extensive mines of iron and copper, with some of gold, for the working of which considerable establishments have been formed.

Owhyhee, isl. in the North Pacific ocean, the most easterly, and by much the largest of the Sandwich islands. It is of a triangular shape, 97 miles long, 78 broad, containing 4,000 square miles. The northern extremity is in lon. 204° 2' E. lat. 20° 17' N. The whole island is divided into six large districts. Amakooa and Aheadoo, which lie on the N. E. side; Apooa and Kaoo, on the S. E.; Akona and Koaarta, on the W. The districts of Amakooa and Aheadoo are separated by a mountain, called Mouna Kaah, or The Mountain Kaah, which rises in three peaks, perpetually covered with snow, and may be clearly seen at 120 miles distance. The height is estimated at 18,400 feet. To the north of this mountain the coast consists of high and abrupt cliffs. The coast of Aheadoo is of a moderate height, and the interior parts appear more even than the country to the N. W. and less broken by ravines. The coast to the N. E. of Apooa, which forms the eastern extremity of the island, is low and flat; and the whole country covered with cocoa-nut and bread-fruit trees. The coast of Kaoo presents a prospect of the most horrid and dreary kind; the whole country appearing to have undergone a total change from the effects of some dreadful convulsion. The ground here is every where covered with cinders, and intersected in many places with black streaks, which seem to mark the course of a lava that has flowed not many ages back, from the mountains to the shore. The southern promontory looks like the mere dregs of a volcano. Notwithstanding the dismal aspect of this part of the island, there are many villages scattered over it. The S. W. parts of Akona are in the same state with Kaoo; but farther to the N. the country has been cultivated with great pains, and is extremely populous. In this part of the island is situated Karakakooa bay. Koaarta extends from the western-most point to the N. extremity of the island; the whole coast between them forming an extensive bay, called Toe-yah-yah. The country is fruitful and well inhabited. On the 25th of February, 1794, Tamaahmaah, king of Owhyhee, in council with the principal chiefs of the island, assembled on board his Britannic majesty's sloop *Discovery*, in Karakakooa bay, unanimously ceded the island to his Britannic majesty, and acknowledged themselves to be subjects of Great Britain. It was on this island that the celebrated captain Cook was killed on the 14th of February 1779. See *Sandwich Islands*.

Oxford, city, Eng. in Oxford co. the chief town of the county, and greatly celebrated as a seat of learning; its university, from the extent and number of its buildings and institutions, and the wealth of its endowments, being by far the greatest in the world, and only approached in these respects by Cambridge. It is delightfully situated on a gentle eminence in a valley, at the confluence of the rivers Isis and Cherwell. The air is pure, and the situation remarkably healthy and agreeable. The High street is the most beautiful in the world for its length and breadth, for the number and elegance of its public buildings, and for its remarkable curvature, which continually presenting new combinations of magnificent objects to the spectator as he advances, produces an uncommonly striking effect.

The university of Oxford consists of 20 colleges and 4 halls, each of which forms an establishment within itself, having its own students and teachers, and its own revenues and regulations, while they are all united under the government of the university, of which they form the members. The students live all in their respective colleges, either wholly at their own expense, or partly at that of the university; they wear a peculiar dress, and on their entrance become members of the university. The university acts as a corporate body, under a charter which received the royal assent in the reign of Charles I. The officers by which the university is immediately governed, are the chancellor, the high steward, the vice chancellor, and two proctors. In addition to private officers in each college and hall, who see that due order and discipline are preserved, and all the liberal sciences read and taught, there are public lecturers and professors of the following descriptions: Divinity, Hebrew, Greek, civil law, medicine, modern history, botany, natural philosophy, astronomy, geometry, ancient history, anatomy, music, Arabic, poetry, Anglo-Saxon, common law, and chemistry. There are 4 terms in the year at the university, and degrees are taken in divinity, law, physic, music, and the arts. The total number of members in the university books is about 3,000, 1,000 of whom are maintained on the revenues of the university, and the rest live at their own expense. The names of the 20 colleges are, All Souls, Balliol, Brazen Nose, Christ Church, Corpus Christi, Exeter, Jesus, Hertford, Lincoln, Magdalen, Merton, New College, Oriel, Pembroke, Queen's, St. John Baptist's, Trinity, University, Wadham, and Worcester. Of the other public buildings connected with the university, the public schools form, together with the

Bodleian library, and the picture gallery, a splendid quadrangle. The Bodleian or public library comprises three extensive rooms, disposed in the form of the Roman H. It was founded by Humphrey, duke of Gloucester, restored and greatly augmented by the exertions and munificence of sir Thomas Bodley, and now probably contains one of the most valuable collections in Europe. The Clarendon printing-house is a large and massy edifice, built in 1711, with the profits of the sale of lord Clarendon's history of the rebellion. Here is the Clarendon or university press. The Radcliffe library, one of the most splendid ornaments of the university, was founded by Dr. Radcliffe, and completed in 1749. The Ashmolean museum was founded in 1682. Oxford contains 14 churches, and several places of worship for dissenters. It sends 4 members to parliament, 2 for the city, and 2 for the university. Pacific, a name given to the sea which lies between Asia and America, by the Spaniards, who first navigated it, and who experiencing in their first voyages calm and gentle weather, persuaded themselves that it was the same all over. Subsequent experience, however, shewed them the contrary; for although the part between the tropics may justify that appellation, no sea is subject, in higher latitudes, to more violent tempests. It is remarkable for the fury of the storms in winter, and for the dreadful agitation of its waters.

Paisley, a large and opulent manufacturing t. Scotland, on the banks of the White Cart, in Renfrew co. It contains 16 churches, of which 6 belong to the established church. The chief architectural ornament of the town, is the Abbey church, which has survived the revolutions of many centuries. Paisley is celebrated for its manufactures, particularly for all kinds of fancy goods in silk and cotton, goods which, for elegance and beauty, are altogether unrivalled. It is the chief seat of the fancy muslin manufacture. About 5,000 looms are employed in it. Cotton spinning and the weaving of coarse cottons for printing, and of cotton sheeting, are also extensively carried on. In 1805, the various manufactures employed 29,030 persons, and the value produced was about 1,500,000*l.* For the trade of Paisley, considerable facilities are afforded by the river navigation, and by the Ardrossan canal. The navigation of the White Cart has been improved so, that vessels of from 40 to 50 tons can now easily come up and unload at the quays. Pop. in 1782, 17,700; in 1792, 24,592; in 1801, 31,179; 1811, 36,722; and in 1820, about 46,000. 7 m. S. by W.

Palembang, a district of Sumatra, on the N. E. coast, extending along the river Palembang. The articles of commerce supplied by this country are, pepper, rattans, silk, cotton, damor, ivory, sulphur, salt, wux, rice, tobacco, areca, buffaloes, and gold. The pepper trade at Palembang was formerly exclusively in the hands of the Dutch; but the most considerable article of commerce was the tin of Banca. The power of the monarch is unlimited. He has no revenue except what is derived from his monopolies. The Mahometan religion prevails throughout all the dominions of the sultan. In 1812, the kingdom of Palembang was conquered by a handful of British troops under the orders of colonel Gillespie. The sultan, who had made himself universally odious by his atrocious cruelties, and particularly obnoxious to the British by his unprovoked massacre of the Europeans resident in his capital, was dethroned, and his brother raised to the throne in his stead.

Palembang, the capital of the above district, and the emporium of the inland commerce of Sumatra, is on the left bank, and above the Delta of the river Palembang, about 60 miles from the sea. Lon. $104^{\circ} 54' E.$ Lat. $2^{\circ} 58' 51'' S.$ Pop. between 20 and 30,000.

Palermo, a large and beautiful city of Sicily, the capital of the island, situated on the N. coast. It stands on the W. shore of a bay, in an extensive and beautiful plain. The principal streets are spacious and handsome; the houses have in general something striking in their architecture. As to fortifications, Palermo on the sea side is not strong, while on the land side it is altogether open. The number of religious establishments is surprising, there being above 40 monasteries, and 50 convents; and in the magnificence of its churches,

Palermo is second only to Rome. The university has an observatory, along with cabinets of medals and natural curiosities. The trade of Palermo is not very extensive. Its port is capable of containing 30 sail of the line, and several hundred merchantment. It is well fortified, but open to the north-east winds, which are sometimes violent and dangerous. Palermo was the residence of the court of Naples during their exclusion from their capital from 1806 to 1815. At present it is the seat of the viceroy of the Sicilian parliament, and of the chief boards of the island administration. It is likewise the see of an archbishop, who has the title of primate of Sicily. It has suffered repeatedly from earthquakes. 130 m. W. Messina, 200 S. by W. of Naples. Lon. of the observatory, $13^{\circ} 20' E.$ Lat. $38^{\circ} 6' N.$ Pop. about 130,000.

Palestine, a country of Asia, within the limits of the Turkish empire, bounded N. by Syria, and lying on both sides of the Jordan, between the desert of Arabia and the Mediterranean on the W. On the return of the children of Israel from Egypt, it was divided by Joshua among the twelve tribes; Judah, Benjamin, Simeon, Dan, Ephraim, Zebulon, Naphtali, and part of Manasseh, had their portion allotted on the western, commonly called this side of Jordan; while Reuben, Gad, and the remaining part of Manasseh, were placed on the E. side, commonly called beyond Jordan. The Romans, on obtaining possession of this country, divided the part of it on this side of Jordan into three tetrarchies, Judea proper in the S., Samaria in the middle, and Galilee in the north. The former consisted of the tribes of Judah, Benjamin, Dan, and Simeon. Samaria comprehended the tribes of Ephraim, Issachar and part of Manasseh. Galilee formed the fine inland territory on the lake of Tiberias, the former possession of the tribes of Zebulon, Asser, and Naphtali. The region to the east of Jordan was divided into the smaller districts of Peræa, Decapolis, Golan, Gaba-ditis, Batanea, and Auranitis.

Few countries are distinguished by greater variety of surface than Palestine. Some have represented it as barren; but this character can apply only to some of the mountainous districts around and to the east of Jerusalem. According to the best informed travellers, the greater part of Palestine displays a truly luxuriant fertility, and corresponds entirely to the description of the promised land. Judea proper, comprising the territory between the Dead sea and the Mediterranean, is composed of a range of limestone hills, rising as it were by stages from the level of the Mediterranean. The plain extending along the sea, though now neglected, appears to be excessively rich. As the tract ascends, it becomes rugged and rocky, so that the road from Jaffa to Jerusalem, is very steep and difficult. The sides of the mountains, however, are fitted for the vine, the olive, the sycamore, and are crowned with natural groves of oak and cypress. Between these mountains are interposed vallies, which are covered with plentiful crops of tobacco, wheat, barley, and millet. These mountains are tenanted by the wildest Arabs, who find lurking places in the numerous caves which are cut out of the mountains. On reaching the summit of these successive ranges, the traveller discovers the country round Jerusalem, which wears a dry, rugged, and

stony aspect. There is reason to believe, however, that ancient industry, under a protecting government, had rendered even these tracts highly productive. Traces may still be found of walls by which the earth was formerly supported, of cisterns where the rain water was collected, and of canals, by which it was distributed through the fields. In proceeding eastward to the shores of the Dead sea, the scene becomes more decidedly barren. Gloomy and naked rocks, stones, sand, and ashes, are the only objects which there present themselves.

Samaria is mountainous, but flourishing, well cultivated, and carries on a considerable trade. Corn, silk, and olives, are produced abundantly in its plains.

To the north of Samaria, is Galilee, celebrated in scripture history, as the scene of our Saviour's first preaching and miracles. Perhaps there are few spots on the world more distinguished by natural beauty and fertility. The plain of Esdraelon, two days journey in length, and twenty miles in breadth, is described by Dr. Clarke as one vast meadow, covered with the richest pasture. The lake of Tiberias, or Gennesareth, is surrounded by lofty and picturesque hills, the sides of which were once highly cultivated, and its banks covered with flourishing towns, now almost deserted. The regions beyond Jordan include many tracts once fertile and flourishing.

Few countries are more unfortunately situated as to political relations, than modern Palestine. It suffers equally from the tyranny and weakness of the Turkish government, and from the hordes of Arabs who fill every part of the surrounding deserts. The Turks occupy all the civil and military posts, and the Greeks form a very numerous part of the population; but the country districts are filled to a great extent with Nomadic Arabs. A considerable number of Christian monks still reside in the Holy Land; and there is no considerable town which does not contain at least one convent. Their cheats, however, are often so palpable, that travellers, unable to discriminate, have considered the whole mass of topographical evidence concerning the Holy Land, as one tissue of imposture.

In 1819, the American Board of Foreign Missions established the Palestine mission, the seat of which is ultimately to be fixed in this country. They have now four missionaries in their employ, one of whom is stationed at Malta and one at Smyrna; the other two have just embarked from the U. States. The extensive trade of the Levant furnishes opportunities of personal intercourse with men of influence from various countries, and also affords facilities for the circulation of the Bible and religious tracts, of which the missionaries have already availed themselves. The Board have a printing press at Malta in connexion with this mission.

Paraguay, a province within the limits of the old Viceroyalty of Buenos Ayres, lying between the great rivers Paraguay and Parana, and bounded N. by Brazil. Extent, 43,000 sq. miles. Pop. 110,000. The forests abound with fine timber, mahogany, and several other kinds of beautiful wood, suited to cabinet work. The sugar cane grows well, and all European fruit trees flourish and produce abundantly. But the most peculiar production is the herb called matte, which is used as a substitute for tea all over S. America, and forms one of the principal articles of export from this province. The present inhabitants of Paraguay are said to be a mixture of the European Spaniards, and natives, with perhaps more than half Indian. They are remarkably peaceful and silent, strongly attached to their country, and averse to strangers. It is rare to meet with a native of Paraguay who cannot read and write, and who does not understand the rudiments of arithmetic.

Paraguay, r. S. America, which rises in Brazil, in lat. 12° S. runs south into Buenos Ayres, passes by the city of Assumption, and after receiving the Pilcomayo and Vermejo from the west, falls into the Parana 750 miles from its mouth. It is navigable for large vessels as far as Assumption. Its length from its source to its junction with the Parana is about 1,000 miles.

Parana, r. S. America, which rises in the eastern part of Brazil, in the province of Minas Geraes, and running S. W. about 1,200 miles, receives the Paraguay from the N. after which it pursues a southerly course for several hundred miles and joins the Uruguay to form the La Plata. In lat. 24° is the fall or rapid of Itu, formed by a collection of rocks, that rise in separate masses, and leave channels for the passage of the water. Boats pass down without difficulty and are drawn up by ropes.

proportion of the literary or scientific characters of the country. The Bureau des Longitudes is composed of eminent astronomers and geometers. The university comprises a number of classes for each of the five faculties, viz. theology, law, medicine, classics, sciences, meaning by the last, chemistry, botany, mathematics, and astronomy. The admission to the lectures is gratuitous. Paris contains also four lycees or great public schools, viz. the College Louis le Grand, the College of Henry IV. the College of Bourbon, the College of Charlemagne. There is, moreover, the College Royal de France. At the Jardin des Plantes are no less than 13 classes for botany, zoology, geology, mineralogy, chemistry, &c. To these are to be added the Ecole Royale des Beaux-Arts, or school for painting, sculpture, and architecture. The Military School is for the education of 500 youths, generally the sons of officers who have fallen in the service of their country. The Ecole Polytechnique is for the education of engineers.

Paris is very rich in libraries, which are accessible to all persons without introduction. The library of the king, the largest library in Europe, contains upwards of 360,000 printed volumes, 72,000 manuscripts, 5,000 volumes of engravings, and a rare and curious collection of antiquities and medals. Amidst the collections of interest to artists, those of Louvre hold the first rank. Of the ground floor of that spacious building, a great part is appropriated to statues and other specimens of sculpture, ancient and modern, distributed in spacious halls, and arranged with much taste. From these a magnificent staircase leads to the gallery of paintings. It is of such length, that the extremity is almost lost in the distance, and is lined on both sides with the finest productions of modern painters. They are divided into the French, the Italian, and the Flemish schools.—The number of pieces is upwards of 1,100, and annually on the increase. The Jardin des Plantes is a garden of an oblong form, nearly half a mile in length, laid out with great taste, and exhibiting in miniature, groups of plants of almost every region on the globe; also a collection of animals of the most different latitudes, as lions, elephants, bears, &c.

Of the public gardens and walks, the finest and most frequented are those of the Tuileries, which extend, in a beautiful oblong, to the westward of the palace. They are laid out most elegantly with gravelled walks, terraces, plots of flowers and shrubs, groves of lofty trees, basins of water, and *jets d'eau*, interspersed with beautiful statues of bronze and marble. This delightful spot forms the favourite walk of the Parisians, and is crowded on Sundays during the day, and in the rest of the week in the evenings, with well dressed persons. The gardens of the Luxembourg; the Jardin des Plantes, and the Champs Elysees, also afford very pleasant walks; and the Boulevards in the summer evenings present an animated scene.

The manufactures of Paris, as of London, consist chiefly of articles of taste or nice workmanship, such as jewellery, watches, clocks, porcelain, cabinet ware, mathematical instruments, silks, artificial flowers, plate glass, ornamental articles in bronze, cottons, carpets, &c. The commerce of the city is carried on principally by land carriage, the Seine, the Oise, the Marne, and the Canal de Briare, being used only for the transport of wood and other bulky articles. The colonial and other foreign produce consumed in Paris, is im-

ported chiefly at Havre de Grace. Coal is very little used; the common, or almost universal fuel, is wood, though considerably more expensive than coal. The expense of living is about 30 per cent. less than in London. Pop. in 1792, computed at 550,000; in 1817, according to actual survey, 715,000. 260 m. S. by E. London, 270 S. by W. Parma, dutchy, Italy, bounded N. by Lombardy, E. by Modena, and S. and W. by Tuscany. The dutchy is divided into four districts, viz. Parma, Placenza, Borgo San Domino, and Guastalla. Extent, 2,280 sq. miles. Pop. 377,000. The inhabitants are almost all Catholics. Revenue, £160,000. By the treaty of Paris in 1814, the dutchy was given to the ex-empress Maria Louisa, devolving, on her death, to Austria and Sardinia, a provision modified by subsequent arrangements, the latest of which, in 1818, stipulated, that in return for certain equivalents, this territory should eventually devolve to Spain.

Parma, city, Italy, capital of the dutchy of the same name, in a fertile plain, on the river Parma. It is still surrounded by a ditch and mound. Its outworks are neglected and ruinous. The buildings of the university are large and elegant. The average number of students is about 400. The

manufactures consist chiefly of silk, and in a small degree, of hats; also of fustian. Its printing establishment is well known for its elegant editions of the classics. 30 m. W. by N. Modena, 70 S. E. Milan. Lon. 10° 20' E. Lat. 44° 48' N. Pop. 30,000.

Passamaquoddy Bay, that part of the bay of Fundy which sets up between West 'Quoddy head in Lubec, and the western coast of New Brunswick. It is about 12 miles long from E. to W. and 6 from N. to S. and has two entrances, the eastern and western, between which lies Campobello island. It branches out into small bays, and contains many large and fertile islands, the largest of which are Moose, Deer, and Campobello. Among the rivers which fall into the bay are Orange, Dennys, Penimaquan, Schoodic, Magaugaudavic, and Digdigwash. The tides here, as in every part of the Bay of Fundy, have an extraordinary rise. Their height at Lubec and Eastport varies from 25 to 33 feet. The bay has every where sufficient depth of water for the largest vessels. Its navigation is safe and never closed by ice. Its waters abound with herring, cod, mackerel, and pollock, and are much resorted to by fishermen. The shores present an agreeable variety of surface, and together with the numerous islands and the beautiful expanse of the water form a most delightful landscape.

Patagonia, or *Land of Magellan*, country, S. America, bounded N. by Buenos Ayres, E. by the Atlantic, S. by the straits of Magellan, and W. by the South Pacific ocean; extending from 63° to 75° W. lon. and from 38° to 54° S. lat. The people are reported to be of a gigantic stature, and notwithstanding the rigour of the climate, to go naked. That they are barbarous, is evinced by the treatment of the few unfortunate Europeans who have fallen into their hands. They differ in-

deed in manners, as they are divided into a great variety of nations. Towards the straits they are said to be perfectly savage; on the frontiers of the Spanish and Portuguese they greatly resemble the Chilians. Some of the inhabitants seen by Com. Byron, in the year 1764, he supposed to be about seven feet in height. Capt. Wallis, in the year 1766, measured one of the tallest, and found his height to be six feet seven inches; but he says the greatest part of them was from five feet ten to six feet. Their complexion is a dark copper colour, like that of the Indians in North America.

Pegu, formerly a kingdom of Asia, but now a province of the Birman empire. It is bounded N. by Arracan and Ava, E. by Siam, S. by Siam and the sea, and W. by the bay of Bengal. It contains several ranges of mountains, but, generally speaking, is level and fertile. Its chief produce is rice. The principal ports are Siriam, Negrais, and Rangoon; but since the conquest of the country by the Birmans, the latter is the only one open to Europeans. The Peguers are, generally speaking, idolaters of the sect of Boodh.

Pegu, a very ancient city, and formerly capital of the above kingdom. It was a fortified town, and was supposed to contain 150,000 inhabitants. The destruction of this city was caused by its capture in 1757, by the Birman emperor Alompra, who caused part of the walls to be levelled, destroyed the houses, and dispersed, or led into captivity all the inhabitants. The magnificent temple of Shoemadoo, however, still exists as a monument of the greatness and devotion of its ancient monarchs. Pekiangho, r. China, in Quangtung, which rises on the S. side of the great range of mountains which divides it from the province of Kingsee. It forms part of the great navigable communication between Peking and Canton.

Peking, or *Pekin*, a great city of Asia, capital of the empire of China. It is divided into the Chinese and Tartar cities. The Tartar city forms properly the main body of Peking, being surrounded by the principal wall, which incloses an area of fourteen square miles. The Chinese city has a wall of its own, which incloses an area of about nine square miles. The suburbs are also very large. According to the best official information which lord Macartney could procure, Peking contains a population of three millions.

Peking, like most other Chinese cities, is laid out by the square and line. A street four miles long and 120 feet broad, reaches from one gate to the other, and is crossed by another of similar length and breadth. The other streets are narrow, and many of them can only be considered as lanes. They are all unpaved, and covered with sand and dust; but they are kept very clean, and frequently watered. The principal streets consist almost entirely of rows of shops, which are painted, gilded, and adorned with much magnificence. Sky blue and green mixed with gold, are the prevailing colours upon the walls. The regular form of the streets, the flat roofs, and the various ensigns with which they are decorated, give Peking very much the appearance of a large encampment. The streets are peculiarly crowded, in consequence of the number of trades that are carried on in the open air. The numerous moveable workshops of tinkers and barbers, cobblers and blacksmiths; the tents and booths where tea, fruit, rice, and other eatables, are exposed to sale; the wares and merchandize arrayed before the doors; the troops of dromedaries, laden with coals from Tartary; the wheel-barrows and hand-carts stuffed with vegetables, leave only a very narrow space unoccupied.

Peking, according to Chinese ideas, is strongly fortified. It is surrounded with walls about 30 feet high, and 25 feet thick at their base; but the breadth on the top, within the parapets, does not exceed 12 feet; so that it has a considerable slope, especially on the inside, and rises by stages like the pyramids. It is surrounded with a ditch, and defended by square towers, placed at the interval of 70 yards, which is reckoned a bowshot. Each tower projects about 40 feet from the line of the

wall, and has a small guard-house on its summit. The body of the wall is composed of the earth dug up from the ditch; but it is faced, on each side with a mixture of brick and stone.

The imperial palace is an inclosure within the city, formed by what is called the Yellow Wall. The space contained within it about a mile in length, and three-fourths of a mile in breadth, is artificially formed into an imitation of rude and romantic nature. The edifices destined for the accommodation of the emperor, are placed on hills of different height; while the loftiest summits are crowned with pavilions, kiosks, and other buildings, destined for pleasure and refreshment. The imperial palace of Yuen-mien, situated without the city, presents the same scene on a much more extended scale. The grounds here are at least 10 miles in diameter, and comprise an extent of about 60,000 English acres. Lon. 116° 28' E. Lat. 39° 55' N.

Pelew Islands, or *Palao*, a cluster of islands in the W. part of the Pacific ocean, between the Philippine and Caroline islands. In 1783, captain Wilson, commander of the Antelope packet, in the service of the East India company, was wrecked on this coast. The inhabitants had been represented as inhuman and savage, but captain Wilson found them hospitable, friendly, and humane. The islands are circled on the W. side by a reef of coral, which, in some places, extends five or six leagues from the shore. None of the islands which the English visited had any kind of grain, nor any quadruped whatever, except some brownish grey rats, which ran wild in the woods, and three or four meagre cats. Yams and cocoa-nuts are the chief articles of sustenance. The islands, when viewed from the sea, exhibit high rugged land, well covered with wood; the interior parts are in many places mountainous, but the vallies are extensive and beautiful. The soil is in general rich. Lon. between 134° 5' and 134° 40' E. Lat. between 5° 54' and 8° 12' N.

Pennsylvania, one of the U. States, bounded N. by New York, E. by New-Jersey, S: E. by Delaware, S. by Maryland and Virginia, and W. by

part of Virginia, and Ohio. It extends from 39° 42' to 47° 17' N. lat. and from 74° 32' to 80° 27' W. lon. Its greatest length from E. to W. is 307 miles, and its average breadth, 160. Extent, 46,000 sq. miles, or 29,440,000 acres. Pop. in 1749, about 220,000; in 1790, 434,373; in 1800, 602,545; in 1810, 810,091; in 1820, 1,049,398. Engaged in agriculture 140,801, in commerce 7,083, in manufactures 60,215. Militia, in 1821, 115,231.

The Alleghany mountains run across the State, from S. W. to N. E. and there are many smaller ranges on each side of the principal ridge, and parallel with it. These mountainous tracts cover all the central parts of the State. In the S. E. and N. W. the country is either level or moderately hilly. A great portion of the State is good land, and much of it excellent. The richest tract is in the S. E. on both sides of the Susquehannah. This part of the State has long been settled, and is finely cultivated. The tract between Lake Erie and Alleghany river has also a very superior soil, but is yet very thinly inhabited. Wheat is by far the most important agricultural product and grows here to great perfection. The next in value is Indian corn. Rye, barley, buck-wheat, oats, hemp, and flax, are also extensively cultivated.

The most important mineral is coal which is found in abundance in the western part of the State. The country around Pittsburg is one great bed of coal, and the hills within sight of the town are full of that mineral. Iron ore also abounds in the same vicinity, and in other places.

The inhabitants are of several different nations. About one half are of English origin; one fourth, German; and an eighth, Irish. The remainder are Scotch, Welsh, Swedes, and Dutch. The language commonly spoken is the English. But the Germans, Dutch, and Irish, retain their own language, and many of them cannot speak English. Out of 84 newspapers published in this State, 15 are in the German language. There are many different denominations of Christians in Pennsylvania. A few years since, the Presbyterians, German Calvinists, German Lutherans, Friends, and Baptists, had each nearly 100 congregations. Besides these, there are Methodists, Episcopalians, Scotch Presbyterians, Moravians, &c.

The great mass of the population is in the south, particularly in the S. E. near the banks of the Susquehannah and Delaware rivers. The northern half of the State, in 1810, did not contain one-eighth part of the population. The population increases with considerable rapidity, though not so fast as in the western States.

The legislative power is vested in a senate and house of representatives. The number of senators cannot be less than one-fourth, nor greater than one third of the number of representatives. They hold their office 4 years, and one-fourth of them are elected each year. The number of representatives cannot be less than 60, nor more than 100, and they are chosen annually. The governor is elected for 3 years; but is not eligible more than 9 out of any 12 years. The elections are made on the 2d Tuesday in October, and the legislature meets in December.

The principal literary institutions are the University of Pennsylvania, in Philadelphia; Jefferson college at Canonsburg; Washington college, at Washington; and Alleghany college, at Meadville; Dickinson college, recently revived, at

Carlisle. Franklin college, at Lancaster, is not now in operation. The Moravians have flourishing schools at Bethlehem and Nazareth in the eastern part of the State. Provision has been made by the legislature for establishing an academy in every county.

There are good turnpike roads leading from Philadelphia, in various directions. The principal is from Philadelphia, through Lancaster to Pittsburg. A diagonal road across the State, from Philadelphia to the town of Erie on lake Erie, is considerably advanced, and a road from Philadelphia through the eastern counties toward Sacket's harbor on lake Ontario, is executed to the line of New York. These are in fact, military roads, the importance of which may be felt in future wars.—The legislature have recently appropriated a large sum to the improvement of inland navigation.

In value and variety of manufactures, this is the first State in the Union. The value in 1810, was \$33,691,111. Pennsylvania has many advantages for a manufacturing State. Her numerous rivers abound with fine mill-seats, and the western parts of the State furnish inexhaustible stores of fuel for steam engines. In 1816, there were more than 5,000 improved mill-seats in this State.

Most of the foreign goods consumed in this State, Delaware, and the western part of New Jersey, are imported at Philadelphia. Goods to a large amount are also transported in wagons, from Philadelphia to Pittsburg, and thence distributed through the western country. It is computed that 10 wagons, on an average, leave Philadelphia every day for Pittsburg, loaded with merchandize, and the annual value of the merchandize thus transported, is estimated at \$18,000,000. In 1815, the amount of revenue paid by this State into the National Treasury, was \$7,142,333, an amount greater than that of any State, except New York. In amount of shipping, Pennsylvania is the fifth State in the Union; the number of tons in 1816, was 102,474. The value of exports from this State in 1820, was \$5,743,549, of which \$2,794,670 was foreign produce.

Penobscot, co. Maine, on both sides of Penobscot river, bounded E. by Washington co. S. by Hancock co. and W. by Kennebeck and Somerset counties. Pop. 13,870. Engaged in agriculture 2,858, in commerce 140, in manufactures 251. Chief town, Bangor.

Penobscot, s-p. and p-t. Hancock co. Maine, on the E. side of Penobscot bay, 10 m. N. Castine, 240 N. E. Boston. It is a place of considerable trade, and possessed in 1816, above 24,044 tons of shipping. Lat. 44° 27' N. Pop. 1,009.

Penobscot, the largest river in Maine, has two principal branches. The western and longest branch rises west of Moosehead lake, in the highlands which separate Maine from Canada, and flowing east through Chesuncook lake, unites with the eastern branch, about 60 miles north of Bangor. After the junction, the river flows south, and falls into the head of Penobscot bay. It is navigable for sea vessels to Bangor, 50 miles from Owl's head, at the entrance of the bay.

Pensa, a government of Eu. Russia, between Niznei-Novgorod and Saratov. Area, 16,500 sq. miles. Pop. nearly 800,000. It lies between 53° and 54° N. lat.; its climate is mild, and the soil tolerably fertile.

Pensa, the capital of the above government, is at the confluence of the Pensa and Sura, 360 m. S. E. Moscow. Lon. 45° 38' E. Lat. 53° 30' N. Pop. 10,000.

Pensacola, p-t. and seaport Florida, on the N. side of Pensacola bay, 10 miles above the fort at its entrance. It stands on a dry, sandy plain, elevated 18 or 20 feet above the level of the water. The land beyond the plain rises to the height of 40 or 50 feet, and affords a fine site for the erection of dwelling houses. The town is well supplied with water from 2 copious springs which rise in the interior and discharge themselves into the bay in large streams forming the upper and lower boundaries of the town. The streets are broad and regular and many of the houses and public structures are spacious and elegant, but wear the appearance of decay. Directly opposite the town is the careening ground, the site of the proposed navy yard. It has 18 feet water close to the shore; the shore here is a high bluff cut off in the rear from the mainland by a lagoon. Since the cession of Florida to the U. States, emigrants from various parts of the Union have resorted to Pensacola in great numbers, with the expectation that its fine bay, and other natural advantages, will render it a place of great trade. Pensacola is connected by roads with Blakely, 45 m. distant, and with Claiborne. It is 50 m. E. S. E. Mobile. Pop. estimated in 1821 at 2,500. Lat. 30° 25' N. Lon. 87° W.

Pensacola bay is 30 miles long, and from 3 to 6 broad, with a sufficient depth of water for vessels of the largest class. It is completely landlocked, so that vessels are perfectly safe from every wind. The bar at the mouth has four fathoms of water over it. A fortification on Rose island, and another on the main, opposite to it, would effectually defend the entrance. On the banks of the two rivers, which run into the bay, there are said to be large quantities of live oak. This bay is of more importance, as it is the only commodious and safe harbor for large ships, belonging to the U. States, in the gulf of Mexico.

Pernambuco, or *St. Antonio do Recife*, t. Brazil, and cap. of the province of the same name, is situated at the mouth of the river Bibiribe and Capivaribe, and consists of three divisions, Recife, St. Antonio, and Boa Vista, connected together by bridges. The divisions of Recife is nearest the sea, on a long narrow neck of land. The harbor is formed by a reef of rocks which run parallel with the town, at a very small distance. The lower harbor, for vessels of 400 tons and upwards, is very dangerous, as it is open to

the sea; and the beach opposite to it is very steep. The port has two entrances, defended by two stone forts. Pernambuco is a thriving place; and since the ports of Brazil were thrown open to foreign commerce, it is daily increasing in opulence and importance. Pop. 32,000.

Persia, an extensive empire of Asia, whose limits have been very variously defined. The region which seems to be most properly considered as Persia, is bounded W. by the Euphrates and Tigris, with the mountains of Armenia and Koordistan; N. by the Caspian and the mountains of Caucasus; S. by the Persian gulf; E. by a vast sandy and saline desert, which partly extends as far as the Indus, partly rises into the lofty mountain regions of Hindoo Coosh and Parapomismus. It has been usual to extend Persia as far as the Indus; but the mountainous countries of Cabul and Candahar have been long entirely independent. The southern sandy desert of Mekran and Beloochistan are still more universally included in our maps of Persia; a division, however, which seems to be made with little propriety.

The loftiest mountains of Persia are on its borders. The most remarkable is the immense chain of Caucasus, which fills the interval between the Black Sea and the Caspian. Southwards from this branch spread the mountains of Armenia and Koordistan. These mountains, which are very lofty, form the frontier between the Persian and Turkish empires. From the highest part of them, a great chain, under the name of El-wand, or Elbruz, makes a circuit round the southern shore of the Caspian, leaving between itself and the sea a very fertile plain. It is continued along the southern frontier of Khorassan, and is supposed to unite with the mountains of Parapomismus, and through them, with the Hindoo Coosh and Himmaleh. Chains of inferior height traverse the southern provinces of Khusistan and Farsistan. The interior of Persia consists of an immense, dry, salt plain. It is traversed, however, by many mountains, either independent, or connected with the great frontier chains, the streams descending from which are usually lost in the sands, or formed into lakes. These streams produce, however, all the fertility which the empire can boast; and when they are abundant, render the plains through which they flow, beautiful and luxuriant in an extraordinary degree. That of Schiras is considered the boast of Persia. The provinces of the Caspian, watered from the great chains of Caucasus and Elbruz, are of very remarkable fertility. The principal cultivated productions are the vine, the mulberry, and fruits of various kinds. A vast extent of the empire, however, is abandoned to pasture, and tenanted by wandering shepherds, like those of Tartary and Arabia. The government of Persia is in its principle entirely absolute. The reigning king has always been judged the vicegerent of the prophet, and entitled to the most implicit obedience. No monarch has ever ruled with more arbitrary sway than he who now fills the throne. He is absolute master of the lives and properties of his subjects. The wandering tribes, however, are ruled by their own khans, who carry on all the internal administration, and merely pay military service when required. They can, it is said, by great effort, furnish 150,000, or 200,000 men. It consists entirely of cavalry, and receives no regular pay. The Persians are the most polite nation in the east. They are also the most learned; poetry and the sciences may even be considered as their ruling passion. The whole Persian nation are now Mahometans, of the sect of Shiites, or of the followers of Ali, who, on that ground, are viewed by the Turks

with still greater abhorrence than even Christians. The Persians themselves are not an intolerant people; they listen without anger to the professions or arguments of those who hold a different belief, and do not allow this circumstance to cause any interruption of social intercourse. The Persians, to a considerable extent, are a manufacturing people. Those unrivalled carpets, to which we give the name of Turkey, are wrought in Persia. Silk is also a great staple, either by itself or mixed with cotton and wool; and they excel particularly in brocade and embroidery. All estimates of the population of Persia are founded on the most vague conjecture.

Perth, co. Scotland, bounded E. by Forfar, S. E. by the Frith of Tay and the counties of Kinross and Fife, S. by the Forth, and the counties of Clackmannan and Stirling, S. W. by Dumbartonshire, W. by Argyle, N. W. by Inverness, and N. by Aberdeen. Extent, 5,000 square miles, or 4,068,640 acres. It contains 80 parishes, 26,404 inhabited houses, and, in 1801, 136,366 inhabitants.

Perth, the capital of the above county, is on the W. bank of the Tay. It has been the scene of many important transactions recorded in Scottish history. The salmon fishery on the Tay, near this place, is very extensive. The staple manufacture at Perth is linen; but, of late, the cotton manufacture has almost superseded it. Besides these, here are extensive manufactures of leather, boots, shoes, and gloves. The grammar school of Perth has long been accounted one of the best in Scotland. 39 m. N. Edinburg, 22 W. Peru, one of the viceroyalties of Spanish America. It extends from the Rio Tumbez, in 3° 30' S. lat. to the chain of Vilcanota, in 15° S. lat. It is bounded N. by New Granada, E. by Brazil, S. E. by Buenos Ayres, S. by the desert of Atacama, which separates it from Chili, and W. by the Pacific ocean. The Andes pass through the whole length of the country parallel with the Pacific ocean. There are two principal ridges, called the eastern and western Cordillera. The country between them is an elevated plain, or table land, generally from 8,000 to 10,000 feet above the level of the sea. The narrow tract between the western Cordillera and the Pacific is a plain, principally sandy and barren. The tops of the

Andes are covered with eternal snow, and the low country on the coast is hot and unhealthy, while the intermediate table land enjoys a uniform and delightful climate. Earthquakes are common: Lima has been repeatedly almost ruined by them. There are 70 gold mines, 700 silver mines, and 4 of quicksilver, besides several of copper and lead. The annual produce of the gold and silver mines is more than \$4,000,000. The population, according to the last census, is 1,079,122, of which number 619,000 are civilized Indians, and the rest are whites, negroes, mulattoes, and mestizoes. The Spanish settlements are on the high table land between the mountains, and on the coast, but do not extend E. of the Andes.

Peru trades with Europe, the East Indies, coast-wise with Mexico, Guatemala, and Chili, and over land with the provinces of the Rio de la Plata. Its exports are chiefly gold and silver, wine, brandy, sugar, pimento, Jesuit's bark, salt, vicuna wool, and coarse woollens; and it receives in return European goods, live stock, provisions, tallow, cacao, Paraguay tea, cocoa leaf, indigo, timber, cordage, pitch, and copper. Amid the recent commotions in South America, Peru has remained unshaken in its allegiance to the king of Spain. Armaments have been fitted out by the Patriots of Buenos Ayres and Chili, for the invasion of this country, and on the 10th July 1821, Lima the key of the whole country, fell into their hands.

Petersburg, St. a government in the N. W. of Eu. Russia, at the E. extremity of the gulf of Finland. Area, 18,000 sq. miles. Pop. 700,000. The surface is in general level. The cold climate is unfavourable to the culture of corn. Timber forms the chief source of wealth, deals and masts being the great articles of export.

Petersburg, St. the capital of the Russian empire, is at the E. extremity of the gulf of Finland, at the mouth of the river Neva. It is entirely a modern city, having been commenced by Peter the Great, in the beginning of the last century, and has since been progressively extended and embellished, particularly by the empress Catharine II. who first made it the permanent abode of the court. The form of Petersburg is nearly circular: its diameter about four miles. The Neva, flowing from east to west, divides it into two parts, of which the larger and more populous is on the south side of the river. On the land side, St. Petersburg is almost entirely open; but the approach by sea is guarded by the fort of Cronstadt, and in the middle of the city is a citadel. The site of this capital is level, and low, and was formerly liable to inundations.

The Neva, soon after entering St. Petersburg, sends off a branch, and from the middle of the city another branch, both to the northward. These fall soon after into the sea, and form the insulated tracts on which the northern part of the city is built. The main stream flows through the middle of the city, and has along its south side a quay 3 miles in length, and embanked in all its extent with a wall, parapet, and pavement of granite. The southern part of the town is divided by canals. No city in Europe can stand a comparison with St. Petersburg in the width and regularity of its streets. The squares are less numerous and spacious than might have been expected in a city of such recent erection. The streets are for the most part paved with stone. The houses, origin-

ally of wood, are now of brick. One of the chief difficulties in this city is to make a cellar, as in all situations water is found at the depths of five or six feet. Among the most conspicuous public buildings, is the winter palace of the czar, a building of great extent, being 450 feet long, 350 broad, and 70 in height. The number of booksellers' shops in Petersburg is between 30 and 40; of printing-houses about half as many. The publications are generally translations from the French, English, or German. The Petersburg university was established in 1819. There are inferior institutions in considerable number, such as schools for medicine, surgery, navigation, mining; also several military colleges and charity schools. Here are also several academies, one of sciences, another of the fine arts, and a third for promoting a knowledge of the Russian history and language. But most of the members of these associations are foreigners, particularly Germans. Petersburg contains several scientific collections, in particular those of natural history and the arts, and several public libraries, the largest of which are the Imperial library at the hermitage, Zuluski's and the Grand Duke of Constantine's, each of which contains 300,000 volumes. The manufacturing establishments are very various. Among those undertaken by the government, are the grand tapestry work, a large manufactory of aqua fortis, a mint, and assay office in the citadel, a bronze work, a foundry of metal, a foundry of cannon, and powder-mills. Of those belonging to individuals, are the manufactures of silk, cotton, woollen, paper and cards, wax-cloth, snuff, tobacco, leather, watches, glass and printing types. The commercial intercourse of St. Petersburg is important, from its extensive communication with the interior, and its being the only great maritime outlet in the gulf of Finland. The canal of Vischni-Volotchok, unites the Neva with the Wolga, thus opening a slow but complete communication between the Baltic and the Caspian, a distance of 1,400 miles. The foreign trade of St. Petersburg is almost wholly in the hands of foreigners. The principal exports are hemp and flax, leather and tallow, iron from the mines, and the skins of hares and foxes from the forests. To these are added canvas, and other coarse linen. The value of the annual imports into St. Petersburg is between five and six millions sterling; and that of the exports between four and five millions. The number of ships that enter the Neva annually varies from 1,000 to 1,700, of which about half are British. 435 m. E. by N. Stockholm, 1,400 E. N. E. London. Lon. 30° 18' 45" E. Lat. 59° 56' 23" N. Petersburg, borough and port of entry, Dinwiddie co. Virginia, on the S. E. bank of Appomattox river, just below the falls, 12 miles from its mouth, at the head of sloop navigation, 25 m. S. Richmond. It carries on a large commerce in tobacco and flour, and is the emporium of trade for a considerable district in North Carolina, as well as for the southern part of Virginia. The falls of the river at

this place afford fine situations for mills; and there is a canal around them, which opens the navigation for 80 miles above the town. The amount of shipping in this district, in 1815, was 5,912 tons. Petersburg contains a court-house, jail, Free Mason's hall, several tobacco warehouses and flour mills, 2 banks, an insurance office, and 5 houses of public worship, 2 for Baptists, and 1 each for Presbyterians, Episcopalians, and Methodists. The borough comprehends, besides the town of Petersburg, the village of Blandford, in Prince George's co. and Powhatan, in Chesterfield co. Pop. in 1810, 5,668; in 1820, 6,328, of whom 3,117 were whites, 1,113 free blacks, and 2,098 slaves. Lon. 77° 31' W. Lat. 37° 15' N.

Philadelphia, co. Pa. bounded N. by Bucks co. E. and S. E. by Delaware river, S. W. by Delaware co. and W. by Montgomery co. Pop. 136,273.

Philadelphia, the largest town in Pennsylvania, is on the W. bank of Delaware river, which is here seven-eighths of a mile wide, 126 miles from the Atlantic ocean by the course of the bay and river, and about 55 or 60, in a S. E. direction, over land; 300 S. W. Boston; 90 S. W. New York; 100 N. E. Baltimore; 138 N. E. Washington. The form of the ground plot of the proper city is an oblong, about one mile from N. to S. and two from E. to W. lying in the narrowest part of the isthmus, between the Delaware and Schuylkill rivers, about 5 miles in a right line above their confluence. The buildings now extend beyond these limits, and occupy a space exceeding 3 miles in length from N. to S. and on High or Market street extend from the Delaware to the Schuylkill. All the houses built beyond the boundary line of the oblong city are said to be in the "liberties," as the jurisdiction of the corporation does not extend to that part of the town. Some of the streets in the liberties are irregular, but the city is regularly laid out in streets, which cross each other at right angles. Of these, there were originally 9 which extended from the Delaware to the Schuylkill, and which were crossed by 23, running N. and S. The number of squares is 304; several of which are intersected by lanes and alleys. Broad street is 113 feet wide; High street, 100; Mulberry street, 60; and the other streets, in the original plan, 50 feet wide. The streets are well paved, and are, in general kept very clean. The houses are generally constructed of brick, three stories high, plain and neat, without much ornament.

Philadelphia contained, in 1817, 57 places of public worship, viz. 9 for General Assembly Presbyterians, 2 for Associate Reformed Presbyterians, 1 for Associate Presbyterians, 1 for Reformed Presbyterians, 6 for Episcopalians, 6 for Quakers or Friends, 5 for Baptists, 4 for Roman Catholics, 1 for Swedes, 2 for German Lutherans, 1 for Eng-

lish Lutherans, 1 for German Presbyterians, 2 for Dutch Reformed Presbyterians, 11 for Methodists, 1 for Moravians, 1 for Universalists, 1 for Unitarians, 1 for Jews, and 1 for Swedenborgians. The other public buildings are the state-house, and offices, 2 city court-houses, a county court-house, an university, the Philosophical Society's hall, a public library, an hospital, 3 dispensaries, an almshouse, a jail, 10 incorporated banks, 2 dramatic theatres, a medical theatre, the Washington hall, a laboratory, an amphitheatre, 11 brick market-houses, a fish-market, a house of correction, and 3 powder magazines. The state-house was erected about the year 1753, and its architecture is admired. It now contains Peale's museum, the largest collection of natural curiosities in America. Adjoining it is an inclosed square, ornamented with several rows of trees, so as to form a pleasant promenade. The new bank of Pennsylvania, erected under the superintendence of Mr. Latrobe, is a large and remarkably elegant edifice of marble, of the Ionic order, constructed after the model of the ancient temple of Minerva, in Greece. The following public buildings have been recently finished, or are now (1822) in a state of forwardness: viz. a theatre 100 feet in front and 150 in depth; the State-prison, an oblong square 600 feet by 800; the First Presbyterian church, a beautiful edifice with a portico supported by six Ionic columns and having a cupola; St. Stephen's church, a Gothic building of freestone with 2 spires, each 125 feet high; St. Andrew's church, with an elegant steeple 236 feet in height; the Presbyterian church in Arch street; the Orphan Asylum 100 feet in front. The city is supplied with water from the Schuylkill. Until lately the water was raised into a reservoir by steam engines at great cost, but a water power is now obtained by the erection of a dam across the river. The new works are capable of throwing into the reservoir from eight to ten million of gallons of water for every 24 hours.

Among the literary and benevolent institutions are the Philadelphia library, which originated with Dr. Franklin, and was incorporated in 1742. It has more than 12,000 volumes, besides a museum and a valuable philosophical apparatus, and is open to the public; the Philadelphia Athenæum; the academy of natural sciences; the American Philosophical Society; the African Seminary. The Pennsylvania Hospital, established in 1751, is the most respectable institution of the kind in the United States. It has a valuable anatomical museum, a library of nearly 5,000 volumes, and usually about 200 patients, of whom nearly one half are lunatics. In 1816, a handsome building was erected in the neighborhood of the hospital, to accommodate Mr. West's celebrated painting, representing Christ healing the sick. The profits resulting from the exhibition of the picture have afforded a handsome income to the hospital.

The University of Pennsylvania was formed out of two institutions; one designated by the above name, the other by that of the College, Academy and Charitable Schools of Philadelphia. They now constitute a very respectable seminary, incorporated in 1791, and embracing at present, the four departments of arts, medicine, natural science, and law, in each of which lectures are given. There are four professors in the department of arts. 5 in that of natural science, 1 in the law department, and 7 in the medical department.

The medical department is one of the most flourishing institutions of the kind in the world. It has about 500 students from various parts of the U. States, who expend annually at least 150,000 dollars in the city.

Philadelphia is the first city in the United States in the variety, extent, and excellence of its manufactures. In 1810, the city and county contained 8 cotton manufactories, 23 carding machines, 102 hat manufactories, 20 nail manufactories, 10 gun manufactories, 59 tanneries, 18 distilleries, 17 breweries, 7 paper mills, 27 snuff and tobacco manufactories, 15 ropewalks, 24 brush manufactories, 3 glass works, 14 marble yards, 7 umbrella manufactories, 54 printing-offices, and numerous other manufacturing establishments. The porter brewery rivals that of London. The whole value of the manufactures for the city and county in 1810, was \$16,103,869. In this city is the mint of the United States, in which the national money is coined. Printing is carried on here more extensively than in any other place in America.

The commerce of Philadelphia is very extensive. In amount of shipping, it is the fourth city in the Union. The number of tons in 1816, was 101,830. It imports foreign goods for the greatest part of Pennsylvania, for Delaware, and half of New Jersey; and is contending with New York, New Orleans and Montreal for the supply of the western states. It is computed that 10 wagons, on an average, leave Philadelphia for Pittsburg, every day, loaded with merchandize, and the annual value of the goods thus transported has been estimated at \$18,000,000. The Delaware is navigable as far as this city for a 74 gun ship, and for sloops to Trenton, 35 miles further.

The environs of Philadelphia are pleasant and well cultivated. Towards the north are Kensington on the Delaware, well known for ship building; Germantown, a long and populous village, and Frankford, another village, both within 4 or 5 miles. The country seats are numerous. To the south is Darby, a small pleasant town, above 7 miles distant; and on the Schuylkill, a town called Hamilton, near which is the botanical garden of Messrs. Bartrams. In the west, on the same river, 18 acres of ground have been destined for a public botanical garden. The bridge over Schuylkill, opposite to Market street, is a superb structure. Pop. of the city and liberties, in 1790, 43,525; in 1810, 92,247; in 1820, 108,116. Lon. 75° 18' W. Lat. 39° 57' N.

Piscasick, r. N. H. which joins the Lamprey, in Durham.

Piscataqua, r. N. H. which rises in the town of Wakefield, and running S. S. E. about 40 miles, falls into the Atlantic below Portsmouth, forming during its whole course the boundary between Maine and New Hampshire. From its source to the lower falls at Berwick, it is called Salmon fall river; thence to the junction of the Cocheco, a western tributary, it assumes the name of Newichawannoc, and thence to the ocean it is called the Piscataqua. The principal western branch is formed by Swamscot river, which comes from Exeter, Winnicot river, which comes through Greenland, and Lamprey river, which divides Newmarket from Durham; all of which meet in Great bay, 4 miles wide. The water, in its further progress, is contracted into a less bay where it receives Oyster river from the north, and at length falls into the Piscataqua at Hilton's point. The tide rises into all these bays and branches as far as the lower falls in each river, where convenient trading places have been established which have communication with Portsmouth by every tide. From Hilton's point to the ocean, a distance of 7 miles, the river is so rapid that it never freezes.

Pittsburg, t. Frontenac co. Up. Canada, on the river St. Lawrence.

Pittsburg, city, and cap. Alleghany co. Pa. is advantageously situated in a plain, between the Alleghany and Monongahela rivers, at the point where they unite to form the Ohio. By means of Alleghany rivers and its branches, Pittsburg has a water communication with the western part of New York, and boats can approach within a few miles of Lake Erie. By the Monongahela and a good turnpike road, it is connected with Baltimore, and by the Ohio it has an easy intercourse with the western states. It is also connected with Philadelphia by an excellent turnpike road. These advantages have made Pittsburg the centre of a great commerce. At the same time all the country around the city, including eight or nine counties, is one great bed of fossil coal, and the hills and banks of the rivers within sight of the town, are full of that mineral. Hence the city and its suburbs are admirably situated for such manufacturing establishment as require the use of large quantities of fuel. A great many such establishments have accordingly been erected. Here are 8 steam mills; 5 glass-houses, in which every kind of glass, from a porter bottle or window pane, to the most elegant cut crystal glass is manufactured, to the amount of 200,000 dollars annually; 4 air furnaces; 3 breweries; numerous flour mills, potteries, forges, blast furnaces, rolling mills, slitting mills, distilleries, and other mills and manufactories, too numerous to be particularized. The amount of merchandize which passes through the city, in the course of the year, is estimated at \$20,000,000.

Pittsburg contains a court-house, jail, national armory, 4 banks, 4 printing offices, and 8 houses

of public worship. The ground plan of the city is nearly in the form of a triangle, at the confluence of the two rivers, and is now nearly filled with houses. A suburb has been laid out on the Alleghany, called the northern liberties, and another on the Monongahela. There are 4 other villages, which are virtually suburbs of Pittsburg: Alleghany, upon a fine second bottom of Alleghany river, opposite the city; Lawrenceville, 2 miles above, and upon the same side of the Alleghany with the city; Birmingham, on the left bank of the Monongahela; and a street running along the left bank of the Monongahela, opposite Pittsburg. Two bridges connect the city with the opposite banks of the Alleghany and Monongahela. Travellers are almost always disappointed on entering this town; and it is by no means a pleasant place to a stranger. The constant volumes of smoke from the consumption of so much coal in the various manufactories, fill the air with a continual cloud of coal dust. Pop. 7,248. 230 m. W. N. W. Baltimore, 297 W. by N. Philadelphia, and about 2,000 by the course of the Ohio and Mississippi above New Orleans. Lat. $40^{\circ} 31' 44''$ N. Lon. $80^{\circ} 8'$ W.

It is a very broad river, being 150 miles from Cape St. Maria, on one side of the entrance, to Cape St. Anthony on the other. It continues of this width as you ascend the stream, till you come to Montevideo, when it suddenly diminishes to 80 miles, and at Buenos Ayres, which is 200 miles from its mouth, it is about 30 miles broad. This wide and noble expanse is, notwithstanding its extent, deformed by rocks and sand-banks, and rendered of dangerous navigation not only by its shoals and shallows, but likewise by the impetuous torrents of wind which sweep, at intervals, over the vast plains of the Pampas, to the S. W. of Buenos Ayres. See *Paraguay*, and *Parana*, and *Uruguay*.

Platte, La, r. Vt. which runs into Lake Champlain at Shelburn.

Platte, or *Shoal river*, Indian *Nebreska*, a large river which enters the Missouri from the west. In the summer of 1820, the expedition under Major Long traversed the country along its banks to the Rocky mountains. The river is formed by the confluence of 2 branches of nearly equal size, called the North and South Forks, both of which rise considerably within the Rocky mountains, and unite after an easterly course of about 400 miles; the united stream pursues still an easterly course of 400 miles, till it falls into the Missouri in lat. 41° 3' 13" N. 700 miles from the Mississippi. The volume of water discharged by it during floods occasions a reflux for many miles in the current of the Missouri, and changes the character of that river, which below the mouth of the Platte is more rapid, more difficult of navigation, and its water more turbid than above. The principal tributaries of the Platte are the Elkhorn, entering near its mouth, and the Loup fork 90 miles above. As its name implies, the Platte is a broad river, varying from one to three miles in width, and so shallow, that except in floods, it may be forded in almost any place. It is full of islands which are covered with a growth of cotton wood, willows and shrubs; and the shifting sands in its bed, together with the rapidity of the current, effectually

obstruct the navigation even in canoes. The valley through which it passes is from 3 to 10 miles wide, and is bordered by a range of hills 25 or 30 feet high; beyond which the country is a vast undulating plain of a barren and dreary aspect. The only growth of timber is that which occurs on the islands in the river, and even this disappears as you advance towards the Rocky mountains, so that from the confluence of the North and South forks for a distance of nearly 200 miles westward, scarce a tree, bush, or even shrub, is to be seen. The country abounds with wild animals, particularly the bison, which are seen grazing in immense numbers. The party under Major Long saw, as they judged, not less than 10,000 in a single drove.

Plymouth, t. Eng. in Devonshire, at the head of Plymouth sound, which is formed by the rivers Plym and Tamar, at their confluence with the sea. The harbour is very secure, sufficiently capacious to contain about 2,000 sail of shipping, and is altogether one of the finest in the world. It consists of several divisions: Sutton Pool immediately adjoins the town; Catwater harbour is formed by the estuary of the Plym; the Hamoaze is a magnificent basin at the mouth of the Tamar, fitted with moorings of large iron chains, for 100 sail of the line. At the mouth of these harbours, the great bay of Plymouth sound forms an excellent roadstead, which is now rendered secure by the construction of the breakwater across its entrance. This work, which has been going on for years, and is not yet finished, is the greatest of the kind ever undertaken in the kingdom. It consists of a mole, or vast heap of stones, in the

middle of the sound, stretching across its entrance, occupying nearly the half of its width, and leaving a free passage for vessels both on the E. and W. shores. The whole expense is estimated at 1,171,100l. ; and it was calculated that 2,000,000 tons of stone would be required to finish it. The result has fully answered the expectations of its projectors. In its present unfinished state, 200 sail of vessels of every description have here found shelter, and 25 or 30 sail of the line may now ride here at all times, in security. The dock yard of Plymouth, and the various establishments connected with it, are perhaps the finest in the world. 43 m. S. W. Exeter, 216 W. by S. London. Lon. 4° 7' W. Lat. 50° 23' N. Plymouth, s-p. and cap. Plymouth co. Mass. and the oldest town in New England, is 36 m. S. S. E. Boston. It is an extensive township, being about 16 miles long, and 5 broad, and containing more than 80 square miles. The principal settlement is in the N. E. part of the township, and contains more than two-thirds of the inhabitants. The soil near the coast is generally good, but the residue of the township is barren, and, notwithstanding its antiquity, is yet a forest. The harbor is spacious but shallow, and is formed by a long and narrow neck of land called Salthouse Beach, extending southerly from Marshfield, and terminating at the Gurnet Head, and by a smaller beach within, running in an opposite direction. There is a breach in the inner beach which exposes the shipping, even at the wharves, during an easterly storm. The amount of shipping in Plymouth district, in 1815, was 21,263 tons, of which several thousand were employed in the codfishery. Here are extensive iron works.

Plymouth contains a court-house, jail, bank, and 4 houses of public worship, 3 for Congregationalists, and 1 for Baptists. The first settlers of New England landed at this place on the 22d of December 1620, and the present inhabitants of the town are principally descendants of the ancient stock. The rock on which their forefathers first landed was conveyed, in 1774, from the shore to a square in the centre of the town, and the anniversary of their landing is still celebrated. Pop. 4,348. Poland, formerly a large country of Europe, bounded W. by Germany. E. by Russia, and S. by Hungary, Walachia, and Moldavia. Including Lithuania, it contains 284,000 square miles, and 15,000,000 inhabitants.—The partition of Poland between Russia, Austria, and Prussia, took place at three distinct epochs, 1772, 1793, and 1795; and the result of the whole was nearly as follows:—

	Sq. miles.	Population.
To Austria,	- - 64,000	4,800,000
To Prussia,	- - 62,000	3,500,000
To Russia,	- - 168,000	6,700,000
	<hr/> 284,000	<hr/> 15,000,000

At the peace of Tilsit (July 1807,) Bonaparte stripped Prussia of the greatest part of her Polish possessions. Of these he gave a small portion to Russia, and erected the rest into a new State, called the grand dutchy of Warsaw, which he assigned to the king of Saxony. In 1809, after vanquishing Austria in the field, he compelled her to cede part of Galicia to Russia, and another part to his new grand dutchy. But all the arrangements of Bonaparte were overturned by the disastrous campaign of 1812: the Russians re-occupied Poland; and the congress of Vienna, while it decreed to Austria and Prussia a partial restitution of their late cessions, confirmed to Russia all the Polish and Lithuanian provinces acquired before 1795, conferring on her, in addition, the sovereignty of the central provinces, which constitute the present kingdom of Poland. See *next article*. Each of the three powers was enjoined by the congress to give to its respective portion of Poland as free a constitution as circumstances should permit.

The following table shows how the territory and population are at present divided between the three powers:—

	Sq. miles.	Population.
To Prussia,	- - 29,000	1,800,000

Poland, Kingdom of, the only portion of the preceding country, that still retains officially its ancient name, comprises the chief part of that which, from 1807 to 1813, formed the dutchy of Warsaw. It consists of the central provinces of Poland, bounded all along its frontier by the respective acquisitions of Russia, Austria, and Prussia. Area 47,000 sq. miles. Pop. 2,800,000. It is divided into the eight palatinates of Cracow, Sendomir, Kalisch, Lublin, Plock, Masovia, Pod-

lachia, and Augustow. The exports consist of corn, hemp, flax, cattle, timber, wax, and honey. —This country, though subject to the same sovereign as Russia, is governed in every respect as a separate monarchy. The regal dignity is vested in the czar, represented by a viceroy, in whom, and in a cabinet of ministers, the executive government resides. All ministers are accountable to the senate. The senate consists of 30 members. The chamber of representatives consists of 77 deputies from the provincial nobility and gentry, and of the members of the cabinet. The revenue amounts to £900,000 sterling. The military force is considerable, particularly in cavalry. The religion of the majority is the Catholic. The Protestants of different sects are also numerous; and there are many members of the Greek church. The Jews are computed to form a seventh of the whole population.

Polar Regions. The regions within the arctic circle have been rendered interesting from the recent discoveries effected by the expeditions sent out by the British government in search of a north-west passage. The most successful of these expeditions was that under command of Captain Parry, who left England in the spring of 1819, and passing through Davis' strait into Baffin's bay, reached the western shore of that bay in lat. 74° at a place which had been named by former voyagers, Lancaster Sound. But instead of a Sound, Capt. Parry ascertained that it was a strait, leading directly into the long-sought-for Polar Sea. It extends about 150 miles in a direction due east and west, the shores bounding it to the north and south being nearly parallel, at an average distance of 40 or 50 miles. To the now-ascertained strait the name of Barrow's Strait was given. In this the water was deep, and clear from ice; but, on entering the Polar Sea, the barrier of ice preventing further progress westward, Capt. Parry bent his course in a southerly direction, and entered a large Sound or inlet, 25 miles in breadth. Having sailed 120 miles down this inlet, the ships were obstructed by ice, and returned to the western extremity of Barrow's Strait, where the ice was found broken up to such an extent that they were enabled to proceed westward, and the ships pursued their course between the parallels of 74° and 75°, passing a number of islands, one of which, in about 104° W. lon. they named *Byam Martin Island*. Proceeding still westward, a very large island was discovered, extending from lon. 106° to 114° W. and from lat. 74° 30' to nearly 76° N. This island was called, in honor of the first lord of the Admiralty, Melville island. The polar winter now commenced, and the ships anchored in a harbour on the south side of this island, where they were imprisoned by the ice during a period of 310 days. Having sailed again on the 6th of August 1820, they reached the west extremity of Melville's island, in lon. 114° W. where, owing to the immense and impermeable barriers of ice, fur-

ther progress became impossible, and the ships returned to England. Under the same enterprising commander a new expedition has sailed to explore these regions.

Port Royal, or *Porto Escondedo*, small isl. and harbour in the bay of Campeachy, near the coast of Yucatan. Lon. $92^{\circ} 36' W.$ Lat. $18^{\circ} 22' N.$

Port Royal, s-p. Jamaica, on the S. side of the island, in which a thousand sail of ships could anchor with the greatest convenience and safety. It once contained 2,000 houses; but, in June 1692, a dreadful earthquake buried nine-tenths of it eight fathoms under water. They, however, rebuilt the town; but, about ten years after, it was laid in ashes by a terrible fire, and in 1722, one of the most dreadful hurricanes ever known reduced it a third time to a heap of rubbish. Though once a place of the greatest wealth and importance in the West Indies, it is now reduced to three streets, a few lanes, and about 200 houses. It still contains, however, the royal navy-yard, the navy

hospital, and barracks for a regiment of soldiers. The fortifications are kept in excellent order, and are remarkably strong. Lon. $77^{\circ} W.$ Lat. $17^{\circ} 50' N.$ 10 m. S. W. Kingston.

Portland, t. Frontenac co. Up. Canada.

Portland, p-t. and port of entry, Cumberland co. Maine, and capital of the State, is on a peninsula projecting into Casco Bay in the shape of a sad-

dle, the principal part of the houses being erected on the seat; on the pommel of the saddle stands the Observatory, and on the cantle some elegant dwelling houses. The harbor is safe, easy of access, seldom frozen over, and so near the sea that a vessel is clear of every obstacle and may stow away her anchors three miles after leaving the wharf. A light-house was erected in 1790, on a point of land called Portland Head, at the entrance of the harbor. It is a stone edifice, 72 feet high. The town is defended by Forts Preble and Scammel, on opposite sides of the ship channel, and by Fort Burrows at the east end of the town. Portland is by far the most considerable town of the state in population, wealth, and commerce. It is connected with an extensive and growing back country, and exports lumber, beef, and fish in large quantities. A canal is in progress, connecting Sebago lake with Portland harbor. In 1815, it was the eighth town in the U. States in amount of shipping, the number of tons being 30,411.

Portland contains a state-house for the temporary accommodation of the legislature; an elegant court-house, a jail, an alms-house, 2 banks, an insurance office, containing the custom-house and other offices; an academy, athenaeum, observatory, and ten churches, viz. 3 for Congregationalists, 2 for Baptists, 1 for Episcopalians, 2 for Methodists, 1 for Universalists, and 1 for Friends. The observatory was erected by a number of the citizens for the purpose of descrying vessels at sea. Besides the water prospect, it affords an extensive view of the interior terminated in the N. W. by the White Mountains. Portland was formerly included in Falmouth, and 1775 the principal part of it was burnt by the British. 54 m. N. N. E. Portsmouth, 118 N. N. E. Boston, 258 S. Quebec. Portsburgh, (*Easter* and *Wester*,) two suburbs of Edinburgh, in Scotland.

Portsmouth, t. Eng. in Hants, and noted seaport in the English channel, being the principal rendezvous of the British navy. It is situated on the W. side of the island of Portsea, at the mouth of the bay termed Portsmouth harbour, and consists of the old town of Portsmouth included within its fortified walls, and the town of Portsea. Portsmouth is still the seat of the civil and military establishments, but Portsea contains the vast establishments of the dock-yards. Portsmouth harbour excels decidedly every other in Great Britain for its capaciousness, depth, and security. The largest ships may ride in it with safety in the most violent storms, and without touching the ground even at the lowest ebb. It is also capable, from its extent, of containing almost the whole navy of England. Another capital advantage of this harbour, is the neighbourhood of the famous roadstead of Spithead, between Portsmouth and the Isle of Wight, which is so spacious, that it can

contain 1000 sail of vessels in the greatest security. The fortifications of the town are deemed impregnable, and form, on the whole, the most regular and complete fortress in Great Britain. Portsmouth dock-yard being the grand naval arsenal of England, and the general rendezvous of the British fleet, is by far the largest in the kingdom, and every attention has been paid to its extension and improvement. During the war, upwards of 4,000 working men were employed in it, of whom 1,500 were ship-wrights and caulkers. Pop. of Portsmouth in 1811, 7,103; of Portsea, 31,365. Total of the town and suburbs, 40,567. 72 m. S. W. London. Lon. 1° 6' W. Lat. 50° 47' N.

Portsmouth, the largest town in New-Hampshire, and its only seaport, stands on the S. side of Piscataqua river, about two miles from the sea. A new bridge 2371 feet in length, connects it with Kittery, Me. The town contains a court-house, jail, alms-house, female asylum, athenæum, academy, two market-houses, 5 banks, including a branch of the U. S. bank, several insurance offices, and 8 religious societies, 3 of Congregationalists, 1 of Episcopalians, 1 of Baptists, 1 of Methodists, 1 of Universalists, and 1 of Sandemanians. This town has suffered severely from fire. In Dec. 1802, 120 buildings were destroyed; in Dec. 1806, 20, including St. John's church; and in Dec. 1813, the fire swept over 15 acres, and destroyed 173 buildings. The parts destroyed have since been rebuilt, and the appearance of the town has been much improved.

The harbour of Portsmouth is one of the best in the United States. It is landlocked on every side, and perfectly safe, of sufficient depth for the largest vessels at all times of the tide, and, owing to the rapidity of the current, is never frozen. The main entrance between the N. side of Great Island and the Kittery shore, is about a mile wide, and 9 or 10 fathoms deep, and is well defended by fort Constitution and fort M'Clary. The other entrance, on the S. side of Great Island is called Little Harbor, and the water here is shallow. The harbour consists of two parts: the outer harbour is easy of access at all seasons of the year; but, owing to a very rapid tide in the narrows, a large vessel cannot get to the inner harbour, except with a fair wind; and, for the same reason, but few vessels can be safely moored there. There is an island in the inner harbour, opposite the town, on which is a United States' navy yard, containing good timber docks, and all the conveniences for building ships of the largest class. Several ships of the line have been built here. Portsmouth is well situated for trade. The amount of shipping owned here in 1815, was 30,411 tons. Pop. 7,327. 24 m. N. N. E. Newburyport; 56 N. by E. Boston; 45 E. S. E. Concord; 54 S. S. W. Portland. Lat. 43° 5' N. Lon. 70° 45' W.

Several of the great mountain chains of Spain penetrate into this country, intersect it from east to west, and terminate in large promontories in the Atlantic. The climate in Portugal is in general more mild and pleasant than in Spain. The products of the soil of Portugal are very varied, from the great variety of elevation. Wheat, barley, oats, flax, hemp, are raised in the high grounds; vines and maize in those of warmer temperature; and rice in the low grounds. The chief fruits are olives, oranges, and lemons. Silk is made of very good quality. For a long time past, the import and export trade has been managed chiefly by foreign merchants, particularly British, settled at Lisbon and Oporto. The exports consist almost entirely of raw produce, viz. wine, salt, and wool. Of wine, the average value exported is nearly £2,000,000; of salt, fully £300,000; of wool, below £100,000. The imports are very various, viz. corn, flour, fish, woollens, linen, cotton, lace, hardware, hats, shoes, stockings, and manufactures of almost every kind. The religion of Portugal is Roman Catholic. There are two universities, one at Coimbra, and the other at Evora. The revenue in Portugal and Brazil, is between £3,000,000 and £4,000,000 sterling; the public debt, £12,000,000. The naval force does not exceed 15 or 18 frigates. Portugal has, like Spain, its Cortez or representative body, but they were not assembled for more than 100 years previous to the late revolution. On the removal of the royal family to Rio Janeiro, the two councils of state attended them, and the king was represented at Lisbon by a regency, the councils by committees.

Potomac, r. U. States, which rises in the Alleghany mountains, and during its whole course is the boundary between Maryland and Virginia. It falls into Chesapeake bay between Point Lookout and Smith's point, by a mouth 7½ miles wide. It is navigable for ships of the greatest burden, 300 miles to the city of Washington, 3 m. below the head of the tide. The obstructions to the navigation above the city of Washington are, 1. Little falls, 3 miles above the city, which descend 37 feet, and have been surmounted by a canal 2½ miles long, with three locks. 2. Great falls, 8½ miles further up, around which is a canal, one mile long, descending 76 feet by 5 locks. 3. Seneca falls, 6 miles above, which descend 10 feet. 4. Shenandoah falls, 60 miles further up, where the Potomac breaks through the Blue Ridge. 5. Hore's falls, 5 miles above the Shenandoah falls. Canals have been dug around all these falls. The whole descent of the Potomac, from the mouth of Savage river to Cumberland, a distance of 31 miles, is 445 feet; from Cumberland to the Shenandoah falls, 130 miles, it is 490 feet; at the Shenandoah, 43 feet in 5½ miles; from the Shenandoah to Great falls, 39 feet in 40 miles; and between the Great falls and tide water, 143 feet in 12 miles; making the whole descent, from the mouth of Savage river to tide water, 1,160 feet in a distance of 219 miles.

Potosi, formerly *Mine-au-Burton*, p-t. and cap. Washington co. Missouri. It contains a courthouse, jail, academy, and about 60 houses. It is situated in the centre of the mining district. The number of mines within a circuit of 20 miles is about 40; hitherto little skill has been used in working them, yet the annual produce is estimated at 3,000,000 lbs of lead. 60 m. W. S. W. St. Louis, 45 W. St. Genevieve.

Potosi, city, and cap. of a government of the same name, in Buenos Ayres, celebrated for the richest silver mines in the world. It has a mint, six convents, two nunneries, a college, and an hospital; and its inhabitants are still chiefly concerned in the working of the mines, and consist of whites, mestizoes, and Indians. The celebrated mines of Potosi are in the the same mountain on which the city is built. This mountain is about 18 miles in circumference; it is of a sharp conical figure, rising to the height of 4,360 feet above the plain. Above 300 mines or pits are worked, but all of them irregularly. Nothing can equal the ignorance with which the mining is carried on.

The mint of Potosi coined in 1790, 299,246 piastres of gold, and 3,293,173 of silver, or £886,620 sterling. From the discovery of the mines in 1545, till 1803, they have supplied 1,095,500,000 piasters, or £237,358,334 sterling, which has paid the royal duties, and this only includes silver. 1,617 m. N. W. Lon. $74^{\circ} 35' W$. It is a pleasant town, and contains a College, a Theological Seminary, a brick Presbyterian church, and about 100 dwelling houses.

The college of New-Jersey in this place was founded in 1738, and has always been one of the most respectable and flourishing literary institutions in the country. In 1822, it had a president, who also instructs in the Holy Scriptures, the Evidences of Divine Revelation, Moral Philosophy, and Logic; a vice-president, who is also professor of languages and belles lettres; a professor of mathematics and mechanical philosophy; 3 tutors, and 148 students, including 20 resident graduates. The college library contains about 8,000 volumes; the philosophical apparatus is complete, and includes an elegant orrery, constructed by Mr. Rittenhouse; the cabinet of mineralogy and natural history is valuable. The college edifice is styled Nassau Hall, in honour of the Prince of Orange. It is of stone, is 180 feet long, 52 broad, and 4 stories high, and contains a chapel and 60 rooms for students. Besides the principal building, there are 2 wings, each 60 feet by 30, containing the library, recitation rooms, &c. The whole number of alumni of the college in 1815, was 1,425, of whom 1,023 were then living. The necessary annual expenses of each student, exclusive of clothes, books, and pocket-money, amount to \$225. The requisites for admission into the freshman class, are a knowledge of Cæsar's commentaries, Sallust, select parts of Ovid's Metamorphoses, Virgil, Cicero's Orations, the Greek Testament, Græca Minora, Clarke's or Mair's Introduction to the making of Latin, Arithmetic, English Grammar, and Geography. The annual commencement is on the last Wednesday of September. The fall vacation begins the day after commencement, and expires in 6 weeks. The spring vacation begins on the first Thursday after the second Tuesday in April, and expires in 4 weeks.

A Theological Seminary was established in this place in 1812, by the General Assembly of the Presbyterian church. It has 2 professors, one of didactic and polemic Theology, the other of Ecclesiastical history; a partial provision has also been made for instruction in Oriental and Biblical Literature. The edifice for the accommodation of the institution is an elegant stone building 150 feet by 50, four stories high, and containing rooms

for 100 students. The term of study is 3 years. Tuition is afforded gratis to all the students, and there are funds for the support of the indigent. The number of students in 1822 was 95, 4 of whom were resident licentiates. In 1821 a union was effected of the Presbyterian and the Associate Reformed churches, and also of their respective Theological Seminaries. The library of the Associate Reformed Church's Theological Seminary originally established in New-York, and consisting of 4,000 valuable volumes, (which cost \$17,000,) was transferred to Princeton, and the funds of the two institutions were united.

Providence, p-t. and port of entry, Providence co. R. Island, the largest town in the State, and the third in New-England in point of population, stands on Providence river, just above the mouth of the Seekhonk, 35 m. from the ocean, 30 N. by W. Newport, 59 N. E. New-London, 74 E. Hartford, 40 S. S. W. Boston. Lon. 71° 10' W. Lat. 41° 51' N. Pop. 11,767. The town is built on both sides of the river, and the two parts are con-

nected by an elegant bridge. Merchant ships of the largest class ascend to this place.

Providence is one of the wealthiest and most flourishing towns of its size in the United States. The principal source of its prosperity is the cotton manufacture, which was introduced about fifteen years ago, and has increased with astonishing rapidity. There are now more than 100 cotton factories in Rhode-Island and the adjacent parts of Connecticut and Massachusetts, the business which is transacted principally in Providence. Among the manufacturing establishments within the town, are 5 cotton factories, 2 woollen factories, 3 dye-houses, 5 distilleries, 3 rope-walks, 1 spermaceti works, and 10 jeweller's shops, where jewelry is manufactured principally for exportation. The commerce of the town has increased with its manufactures. The amount of shipping in 1819, was 19,000 tons, of which about 5,000 were employed in the East-India trade, and 5 or 6,000 in the coasting trade with the southern States, connected principally with the cotton business. About 10 vessels are constantly employed in the exportation of cotton goods. Packets ply regularly between Providence and Newport, Bristol, and Warren.

The town contains a court-house, market-house, town-house, theatre, jail, hospital, 7 banks, including a branch of the U. S. Bank; 6 insurance companies, 4 printing-offices, from 3 of which newspapers are issued; the college edifices, a public library, 3 academies, including the Friends' boarding school, and 8 religious societies, 3 of Congregationalists, 2 of Baptists, 1 of Episcopalians, 1 of Friends, and 1 of Methodists. Several of the churches are elegant edifices. Many of the private houses are handsome. In September 1815, the town suffered severely from a tremendous flood which forced the water in the river many feet above the highest tides, and deluged the town, destroying houses and shipping to an amount estimated at \$1,500,000.

Brown University in this place is one of the most flourishing and respectable literary institutions in the United States. It was originally established at Warren in 1764, and was removed to Providence in 1770. In 1822, it had a president, 9 professors, viz. 1 of mathematics and natural philosophy, 1 of law, 1 of moral philosophy and metaphysics, 1 of oratory and belles lettres, 2 of anatomy and surgery, 1 of materia medica and botany, 1 of the theory and practice of physic, and 1 of chemistry; 2 tutors and 157 students. The library contains more than 5,000 volumes, and the philosophical apparatus is extensive and complete. There are 2 collegiate edifices of brick, one is 150 feet by 46, four stories high, containing 48 rooms for students, and 8 large rooms for public uses; the other, recently erected by Hon. Nicholas Brown, at his own expense, contains 48 rooms for students. The site is elevated and commands a fine prospect. The president and a majority of the Trustees are required to be of the Baptist denomination. There is a grammar school connected with the University, containing usually about 30 students.

Providence, North, p-t. Providence co. R. Island, 4 m. N. of Providence. It contains 10 cotton factories, 2 furnaces, 1 slitting-mill, 2 anchor shops, and several other manufactories. The village of Pawtucket is in this town. See *Pawtucket*.

Pruntytown, p-t. Harrison co. Va.

Prussia, or the *Prussian States*, kingdom, Europe, consisting principally of two territories, entirely distinct and separate from each other, one lying in the east, the other in the west of Germany. The *eastern division* is much the largest, comprehending five-sixths of the whole, and is bounded N. by the Baltic; E. by Russia; S. by the Austrian dominions and Saxony; W. by several small German States. The *western division* lies on both sides of the river Rhine, and is bounded W. by the Netherlands, and on all other sides by small German States.

The extent, population, and revenue of the provinces, was in 1817, nearly as follows:

	Sq. miles.	Population.	Revenue.
East Prussia,	15,115	870,000	} £ 1,150,000
West Prussia,	10,000	580,000	
Brandenburg,	14,939	1,200,000	} 1,700,000
Pomerania,	12,363	680,000	
Silesia,	14,861	2,100,000	1,400,000
Posen,	11,251	790,000	360,000
Saxony,	8,492	1,180,000	760,000
Westphalia,	7,565	1,000,000	580,000
Cleves & Berg,	3,638	930,000	} 1,050,000
Lower Rhine,	6,432	1,000,000	
Total,	104,656	10,330,000	£7,000,000

The Swiss canton of Neuchâtel (population

about 50,000) acknowledges also the sovereignty of the house of Brandenburg.

Wheat, oats, barley, and potatoes are generally cultivated. Flax is an object of general culture in Westphalia and Silesia. Silesia and Westphalia have long been noted for the manufacture of linens. Woollens are also made, more or less, in almost every town or large village. Cotton works are of recent introduction, and have been established near the Rhine, at Berlin, at Erfurt, at Elberfeld, and in particular quarters of Silesia. The exports consist of linen, and, in a much less degree, of woollens and hardware, with corn, wool, timber, pitch, tar, potash, lintseed, tobacco, and wax. The chief trade takes place with Great Britain, whither Prussia sends her corn, and takes in return both manufactures and colonial goods.

The religion of the royal family of Prussia, and of a majority of the population, is the Calvinist; but Christians of all denominations are tolerated. The relative number of different creeds is as follows:—Calvinists and Lutherans, 6,600,000—Catholics, 3,600,000—Jews, 75,000—Anabaptists, 14,000—Moravian brethren, 7,000—Unitarians, Pietists, and members of the Greek Church, 4,000.

The universities are four in number, viz. Berlin, Halle, Breslau, Königsberg.

The revenue amounts to about £7,000,000; the public debt to about £40,000,000 sterling.

The army exceeds 150,000 men, a number far too great for the resources of the country.

Prussia had formerly, like all governments founded by the northern nations, a representative body, under the name of States. For many years, however, the government has been absolute, the sovereign having found means to conduct the public business without the intervention of States. The people are now anxiously waiting for the re-establishment of a representative body or parliament, and it is hard to describe the degree of disappointment experienced by the better classes of society in Prussia, at the successive delays and evasions of their court, which as yet (1820) has done little more than new model the departments of the executive branch.

Prussia, Proper, a great division of the Prussian dominion, composed of the provinces of East and West Prussia. East Prussia, or Ducal Prussia, as it has frequently been called, lies between 19° 20' and 24° 15' E. lon. and 52° 32' and 56° 3' N. lat. It is divided into the two governments of Königsberg and Gumbinnen. Two thirds of the population are descendants of Swiss, French, or German protestants. Corn of all kinds, as well as flax and hemp, are largely cultivated. West Prussia is divided into the governments of Dantzic and Marienwerder.

Pyramids, a range of ancient and stupendous Egyptian monuments, which commences immediately S. of Cairo, but on the opposite side of the Nile, and extends for many miles S. The base of the largest is 693 feet square, covering an area of a little more than 11 acres; the perpendicular height is 499 feet. The external part is chiefly built of great square stones, compacted together solely by their own weight, without lime, lead or cramps of any metal; presenting the appearance of a solid mass. The second pyramid, is 656 feet square at the base and 398 feet high. In 1818, Mr. Belzoni discovered the opening into the interior and proceeding along a narrow passage, upwards of 100 feet in length, he reached the great chamber, 48 feet long, 16 wide, and 23 high. The most conspicuous object was a large sarcophagus of granite, containing a small quantity of bones, among which was a thigh bone of a cow, whence it has been inferred that these extraordinary structures were reared in honor of that favorite object of Egyptian worship.

About 300 paces to the E. of the second pyramid appears the celebrated Sphynx, or statue of a huge monster, cut in the solid rock. Formerly nothing but the head, neck and top of the back were visible, the rest being sunk in the sand. Mr. Belzoni, however, has lately cleared away the sand from this huge mass, and discovered a temple of considerable dimensions between the legs of the Sphynx, and another in one of its paws. The length of the statue from the fore part of the neck to the tail is 125 feet.

Pyrenees, a range of lofty mountains which divide France from Spain. The mountains are highest towards Mont Perdu, about 100 miles from the bay of Biscay. They attain there an elevation of between 10, and 12,000 feet, and contain glaciers, as in the Alps. The number of passes, including paths for pedestrians, exceeds 50, but the carriage roads hardly exceed 5; and of these, the most frequented are from Jonquera to Perpignan, from St. Sebastian to St. Jean de Luz, and from Pampeluna to St. Jean de Pied de Port.

Pyrenees, Eastern, department, France, bounded by Spain on the S. and the Mediterranean on the E. Extent, 1,650 sq. miles. Pop. 127,000. Perpignan is the capital.

Quebec, city, N. America, and cap. of Lower Canada, situated on a promontory on the N. W. side of the St. Lawrence, formed by that river and the St. Charles. The ridge of land which termin-

ates in this promontory runs from E. to W. and separates the rivers St. Lawrence and St. Charles. Its general breadth is from one to two miles. It has cape Diamond, a bold promontory which rises 345 feet above the level of the water, on the N.; and across it, at the N. E. or lower end, the town of Quebec is built. The fortifications extending across the breadth of the peninsula, shut in the ground on which the city stands, the circuit of which is about 2½ miles. From Cape Diamond, the ridge slopes towards the north, till it reaches the valley through which the St. Charles runs. The town is divided into two parts, namely, the Upper and Lower. The Upper town is separated from the Lower by a line of steep rocks, which runs from the cape towards the river St. Charles. The Lower town is situated immediately under cape Diamond. The communication from the Lower to the Upper town is by a winding street, at the top of which is a fortified gate. The greater proportion of the houses are built of stone, with high sloping roofs. The principal public buildings are the castle of St. Louis, the Hotel Dieu, the convent of the Ursulines, the monastery of the Jesuits, now turned into barracks, the general hospital for maniacs, the sick and aged, which is situated on Charles river ½ a mile from the city; the Protestant and Catholic cathedrals, the Scots church, the Lower town church, the court-house, the seminary, the new jail, and the artillery barracks. The castle of St. Louis, situated on the summit of the rock, is a handsome stone building, seated near the edge of a precipice, something more than 200 feet high, and surmounted by a spacious gallery, whence there is a most commanding prospect.

In its present state, Quebec may rank as a fortress of the first consequence: the citadel, on the highest part of Cape Diamond, presents a formidable combination of powerful works, from whence a strong wall, supported by small batteries in different places, runs to the edge of the precipice, along which it is continued to the gateway leading to the Lower town, which is defended by heavy cannon, and the approach to it up Mountain-street, both enfiladed and flanked by many guns of large calibre; thence a line of defence connects with the grand battery, a work of great strength, armed with a formidable train of 24-pounders, and commanding the basin and passage of the river St. Lawrence, which is here only a mile wide.—The basin of Quebec is very spacious, being sufficient to contain 100 sail of the line. The depth of water is 28 fathoms. In 1759, Quebec was taken by the English, under the command of the brave general Wolfe, who fell in the engagement; and by the peace in 1663, it was ceded, with the rest of Canada, to the conquerors. In 1776, the Americans made an unsuccessful attempt against this city, with the loss of their commander, general Montgomery. 180 m. N. E. Montreal, 400 from the sea. Lon. 71° 10' W. Lat.

Red River, r. N. America, formed by two branches, which rise near the sources of the Mississippi. The eastern branch issues from Red lake, and running west about 150 miles, receives the other branch from the south. The united stream then flows north more than 100 miles, and receives the Assiniboin from the west, after which it runs N. E. about 70 miles, and falls into Lake Winnipeg at its southern extremity. At the point of land formed by the junction of the Assiniboin and Red river, in lat. 49° 40' N. and lon. 98° W. is a trading establishment formed by Lord Selkirk, in 1812. It consists of about 300 families, Scotch and Germans, who can furnish 600 men capable of bearing arms. A fort has been erected and furnished with 20 cannon. There is another settlement of about 50 families, mostly of mixed blood, with two French Catholic priests on Red river, at the mouth of the Pemberton, within the limits of the U. States, about 15 miles south of the line.

Red River, r. N. America, which enters the Mississippi from the W. in lon. 91° 45' W. lat. 31° 5' N. From its mouth 30 miles to the entrance of Black or Wachita river, it is from 300 to 350 yards in width, and its banks are inundated during the wet season. Above Black river, its bed contracts, and the average width is 150 yards, to the rapid 72 miles. Thirty miles above the rapid, it divides into two channels, which meet again above Natchitoches, forming an island 60 miles long. It is navigable to the great raft about 500 miles. The settlements are upon the immediate banks of the river, the land capable of cultivation extending but a little distance towards the interior, terminating in pools and cypress swamps.

Of the sources of Red river we are still ignorant. The Rio Rajio, a stream originating 30 or 40 miles E. of Santa Fe, was commonly supposed to be its principal branch, but the recent expedition to the Rocky mountains under Major Long, has proved this opinion to be erroneous. A detachment of this expedition was to have descended Red river, and finding a considerable stream in that region they followed it down, relying on the commonly received opinion, and also on the positive assertion of Indians whom they met, that it was the river of which they were in quest. It led them however to the Arkansas, and proved to be Canadian river. By this mistake they ascertained that the Rajio of Humboldt is no other than a branch of the Canadian, and the sources of Red river, it is now supposed, must be looked for in the high plains considerably to the south.

Regent's town, a town of liberated negroes in W. Africa, in the colony of Sierra Leone. It was set apart in 1813 for the reception of negroes, delivered from slave ships by the English cruisers. In 1819, the number amounted to 1,177 from more than 20 different tribes, some of them barbarous to an astonishing degree. Under the instructions however of a missionary from the Church Missionary Society, they have become civilized, industrious, and orderly in their behaviour. A large stone church has been built, a congregation of 1,000 or 1,200 negroes from the town and neighborhood, is usually collected on the Sabbath, of which 250 are regular communicants. The schools contain upwards of 500 scholars, and the christianized negroes have formed a missionary society, and contributed to its funds in one year \$133 from their scanty earnings.

Rhine, the greatest river in Europe, after the Danube and the Wolga, rises in Switzerland, on the N. E. side of Mount St. Gothard. Flowing to the east, it passes the Grison town of Coire or Chur, when it becomes navigable, and then holds a northern course to the lake of Constance. Issuing from the lake with a copious current, the Rhine flows to the west, and receives the Aar, the Reuss, and the Limmat, whose united stream brings the tributary waters of the west and centre of Switzerland. At Bale, it takes a northern direction, and receives several rivers, of which the chief are the Neckar and Maine on the side of Germany, and the Moselle on that of France. Continuing its course to the N. it enters the kingdom of the Netherlands, and turning to the W. divides into two great branches, of which the southern takes the name of Waal, receives the Maese, becomes like an arm of the sea, and flows into the German ocean by Dort, Rotterdam, and Williamstadt. The northern, or less considerable branch, is farther divided, first above, and afterwards below Arnheim; and the name of Rhine is finally retained by a small slow flowing water, which passes Utrecht and Leyden in its way to the sea, or rather to the sands near Catwyk. From its source to Mentz, this great river is called the Upper Rhine, and from Mentz to Holland, the Lower Rhine. Its length is about 700 miles, and it is nav-

igable with a few interruptions, from Coire in the Grisons, to the German ocean. Of late, (1820,) steam boats have been employed in the navigation of the river.

Rhine, Circle of, a province subject to Bavaria, at a considerable distance from the rest of that monarchy, being situated W. of the Rhine, between Weisemberg on the S. and Worms on the N. Its form is compact. Area, 1,800 square miles. Pop. 308,000, of whom the majority are Catholics. It contains mines of iron, quicksilver, coal, and extensive pastures. The chief towns are Landau, and Deux Ponts.

Rhine, a province of the grand dutchy of Hesse, situated N. of the Bavarian circle of the Rhine. Area, 1,000 square miles. Pop. 155,000.

Rhine, Confederation of, a short lived association, entered into by several German princes, in 1806, by which they separated themselves from the empire, and formed a new political compact, under the protection of France. The original parties to this league were—Bavaria, Wirtemberg, Baden, Berg, Hesse-Darmstadt, Nassau and some smaller states. To these were afterwards added Saxony, Westphalia, Mecklenburg, and all the lesser princes of the west and north of Germany.

Rhine, Lower, province of the Prussian States, composed of territories taken in 1814, from France and the grand dutchy of Berg, and assigned to Prussia by the congress of Vienna. It is bounded N. by the Prussian province of Cleves and Berg, E. by Nassau and Hesse Darmstadt, S. by France, and W. by Netherlands. It lies on both sides of the Rhine, between 49° 20' and 51° 8' N. lat. having an area of 5,700 sq. miles, and 950,000 inhabitants.

Rhine, Circle of the Lower, formerly one of the ten circles of the German empire, now divided among the states of Baden, Bavaria, Hesse-Darmstadt, Nassau, Prussia, and Hanover.

Rhine, Circle of the Upper, formerly a circle of the German empire, now divided among Bavaria, Hesse-Cassel, Hesse-Darmstadt, and other states.

Rhode Island, one of the U. States, bounded N. and E. by Massachusetts: S. by the Atlantic, and W. by Connecticut. It is 49 miles long from N. to S. and on its northern boundary, 29 broad, and contains 1,580 square miles. Lon. 71° 6' to 71° 52' W. Lat. 41° 17' to 42° N. Pop. in 1790, 68,825; in 1800, 69,122; in 1810, 76,931; in 1820, 83,059, or 52 for each square mile. Engaged in agriculture 12,559, in commerce 1,162, in manufactures 6,091.

The northern part of the State is hilly, and has a thin and barren soil; the rest of the state is chiefly level. The islands and the country bor-

dering on Narraganset bay are very fertile, and celebrated for their fine cattle, and numerous flocks of sheep.

Common schools are not supported by law in Rhode-Island, as in the other New-England States. Academies, however, are established in all the principal towns, and private schools are maintained during the winter months in almost every part of the State. The Baptists are much the most numerous religious denomination. The number of Baptist congregations is 57; of Friends, 18; Congregationalists, 11; Episcopalians, 5; Moravians, 1; Jews, 1.

The Legislature consists of a senate of 10 members, and a house of representatives of 72 members. The governor, lieutenant-governor, and senators are chosen annually; the representatives, twice a year, in April and August.

In no State in the Union is so large a proportion of the population and capital employed in manufacturing as in Rhode-Island. The principal article is cotton goods, which are manufactured in large quantities in Providence and the vicinity. There are now more than 90 cotton mills in the State, many of which are extensive establishments. The other manufactures are of woollen goods, iron, ardent spirits, &c. The value of the manufactures in 1810, was \$4,106,074. The exports in 1820, amounted to \$1,072,762, of which nearly one half was foreign produce. The amount of shipping in 1819, was 39,044 tons. The amount of duties on foreign merchandize in 1815, was \$233,024. There were in 1819, 33 banks in this State; 7 at Providence, 5 at Newport, 5 at Bristol, 3 at Smithfield, 2 at Westerly, and 1 each at Warren, Pawtucket, Pawtuxet, Cranston, Gloucester, Burrilville, Scituate, Coventry, Greenwich, Wickford, and South-Kingston.

Rhode Island, isl. from which the above State takes its name, is in Narraganset bay. It is 15 miles long, and on an average 3½ broad, containing about 50 square miles. Its climate is delightful. The summers are remarkably pleasant, and the winters milder than on the continent. It is a noted resort for invalids from southern climates. Travellers have called it the Eden of America.

Rhode River, r. N. Carolina, which runs into the N. W. branch of Cape Fear river.

Rhodes, an extensive island of the Mediterranean, near the coast of Asia Minor. In ancient times, it was one of the most celebrated of the states of Greece, and distinguished above all others by its wealth, commerce, and naval power. After the death of Alexander, it appeared in its full glory, and not only dazzled the world by its magnificence, but became illustrious by its warlike exploits. This celebrated island is now reduced by the oppression of the Porte, and the arbitrary exactions of its governors, to a state of the most wretched poverty. The climate is delightful, and the soil fertile and well watered, but the oppression of the pacha, and the insecurity of property, have rendered these gifts of nature of no avail, and though it might become the granary of the neighbouring islands, it is now obliged to import a considerable proportion of the grain which it consumes. The population is estimated by Savary at 7,300 families, of whom 4,700 are Turks, 2,500 Greeks, and 100 Jews, in all about 36,500 souls; but Turner, a more recent traveller reduces the number to 20,000.

Rhodes, a city, and capital of the island of the same name. presents few vestiges of its ancient

grandeur. Statues, colossi, and paintings, have all been destroyed or removed. There are no remains of its magnificent temples and spacious porticos. The inhabitants consist of 5,000 Turks, and 1,000 Jews, no Greeks being allowed to settle in the city. One half of the houses in the city are in ruins, and one half of those in the suburbs uninhabited. Rhodes has two good harbours, separated only by a mole. The two extremities are defended by towers, distant 800 feet from each other; while in the centre of the mole there is a square tower, 120 feet high. Lon. $28^{\circ} 12' 15''$ E. Lat. $36^{\circ} 26'$ N.

Rhodes, or **Rodes**, t. France, cap. of Aveyron, 32 m. N. N. E. Alby, 70 N. E. Toulouse. Lon. $2^{\circ} 34'$ E. Lat. $44^{\circ} 21'$ N. Pop. 6,500.

Rhone, a great river which rises in the centre of Switzerland, only 5 miles from the source of the Rhine, and flowing west, rolls its turbid waters into the transparent lake of Geneva. Issuing from that lake, the Rhone flows S. forming the boundary between France and Savoy, after which it turns to the west and north, until reaching Lyons; where it is joined by the Saone. It then turns to the south, and discharges itself, by three mouths, into the part of the Mediterranean called the gulf of Lyons, after an entire course of 500 miles. The navigation down its stream takes place with great ease; but the upward navigation can be performed only by draught or steam.

Richmond, the metropolis of Virginia, is in Henrico co. on the N. side of James river, immediately below the falls, and directly opposite Manchester, with which it is connected by two bridges. The situation is healthy, as well as highly picturesque and beautiful. A part of the city is built on the margin of the river; the rest upon Shockoe hill, which overlooks the lower part of the city, and commands an extensive and delightful prospect of the river and adjacent country.

Richmond is finely situated for a commercial and manufacturing city, being at the head of tide water, and having an extensive back country, abounding with tobacco, wheat, and coal. The James river company have rendered the river navigable for batteaux for 220 miles above the city. The canal around the Great Falls commences 4 miles above the city, and the whole descent to the basin on Shockoe hill is 43 feet. The basin is within the city, covering a space of several acres, and around it are coal yards, lumber houses, and landing places for the produce brought down the river. The descent from the basin to tide water is about 80 feet, and is effected by 13 locks. The cost and expenses of the canal to the end of the year 1815, have been estimated at \$374,290; the tolls received, up to the same period, \$390,060; and the dividends, \$150,000. On the canal are numerous mill-seats. In 1816, there were brought down the canal 14,562 hogsheads of tobacco, 178,846 bushels of wheat, 85,655 barrels of flour, and 800,000 bushels of coal. The value of the produce exported from Richmond and Manchester is about \$8,000,000 annually. The amount of shipping belonging to this port in 1816, was 9,943 tons. James river is navigable for vessels of 250 tons to Warwick, and for those of 125 to Rockets, a mile below Richmond.

Richmond contains a state-house or capitol, a house for the governor, a spacious and elegant court-house, a jail, alms-house, state-prison, armory, 2 market-houses, a museum and academy of fine arts, Lancasterian school, female orphan asylum, 3 banks, including a branch of the U. S. bank, 2 insurance companies, 4 tobacco warehouses, 8 houses of public worship, 2 for Episcopalians, 2 for Methodists, and 1 each for Presbyterians, Baptists, Friends, and Jews; and 1,400 private houses, 800 of brick, many of them elegant, and 600 of wood. Among the manufacturing establishments are a glass house, sugar refinery, iron foundery, rolling and slitting mill, nail manufactory, and cotton mill.

The state-house or capitol is built in a commanding situation on Shockoe hill. The design was taken from La Maison Quarée at Nimes, but the execution falls greatly short of the original. In the centre of a spacious hall, in the middle of the building, stands a marble statue of Washington, executed in Paris. The Virginia Armory is erected on the south side of the canal, about a

Roanoke Inlet, channel on the coast of N. Carolina, which leads into Albermarle sound. Lon. 76° W. Lat. 35° 56' N.

Roanoke, r. formed by the Staunton and Dan, the former of which rises in the Alleghany mountains in Virginia, on the west side of the Blue Ridge, and the latter on the borders of N. Carolina and Virginia. After their union near the southern boundary of Virginia, the river assumes the name of Roanoke, and flowing S. E. falls into the head of Albermarle sound. Its navigation is unobstructed to Halifax, near the foot of the Great Falls, 75 m. by land from the mouth of the river, for vessels of 45 tons burden. At the Great Falls the river descends 100 feet in a distance of 12 m.; but a canal is now completed around these falls to Rock landing, which opens the navigation for batteaux as far as the junction of the Dan and the Staunton. The Dan has been made navigable to Danville, and the Staunton is navigable for some distance for boats of 5 tons. The lands on the Roanoke are among the most productive in the United States. Its products annually for exportation may be estimated at \$2,500,000, and when the full effect of the improvements in its navigation is realized, will probably exceed \$5,000,000. At present a great portion of the produce is carried to Norfolk through the Dismal Swamp canal, but efforts are now making by the North Carolinians to secure this trade to some port within the limits of their own state.

Rome, a large and famous city of Italy, formerly the seat of the Roman empire, and the capital of the world, is built chiefly on the left or eastern bank of the Tiber, 15 m. from its mouth, 100 N. W. Naples. The space inclosed by walls, approaches to the form of a square, and is about 13 miles in circuit, but a considerable portion of it is covered with vineyards, corn fields, or villas, the close population occupying little more than a third of the space included within the walls.—The streets of Rome have seldom any foot pavements: a number of them are long and straight and not unfrequently terminated by an obelisk, a fountain, and a church, but they are generally narrower than those of London. The houses are partly of stone, partly of brick, and frequently covered with stucco. The squares are small, but numerous, and in general adorned with obelisks, fountains, or other monuments.—The wall that surrounded Rome in the time of the emperors, is in many places in good preservation. Among the ancient edifices is the Pantheon or Rotunda, a structure distinguished equally for solidity and elegance. Its beauty consists in its proportions. A still more imposing object is the amphitheatre of Vespasian, a structure of an oval form, 581 feet long, 481 broad, and 1,616 in circumference, being the largest amphitheatre ever known. It has been much dilapidated, but there remains enough of the great circular wall to form a most striking and sublime object. Of the triumphal arches of ancient Rome, the only one remaining entire is the arch of Constantine, with its pillars, statues, and bas reliefs, all of the finest marble. Trajan's pillar still stands on the spot where it was erected by that emperor, and is still covered with admirable bas reliefs, representing his expedition against the Dacians. The pillar is of marble; its diameter at the base is 11 feet, at the top 10; its total height 133.—Of the ancient Roman roads, several, such as the Via Latina, the Via Vitellia, the Via

Aurelia, still serve to approach the Capitol.—Of the ancient aqueducts, there remain only three; yet their supply of water is extremely copious. The sewers are now much obstructed by stones and earth. As to public baths, those great objects of Roman luxury, there remain of those of Caracalla little but the walls; but the baths of Titus are in better preservation.—Of the various theatres and circuses of ancient Rome, hardly a vestige remains.

No city in Europe is superior to modern Rome in the number and magnificence of its churches. The principal is that of St. Peter's, in which the arts of architecture, sculpture, and painting, are all displayed in the highest perfection. It was commenced in 1566, and no less than 18 successive Popes were employed in its construction. The most celebrated architects of modern times, Bramante, Raphael, Michael Angelo, Vignola, Maderno, and Bernini, have displayed their talents on this vast undertaking, the total expense of which must have amounted to at least £12,000,000 sterling. Entering a circular court formed by a vast colonnade, the spectator is struck by the majestic front of the building, extending 400 feet in length, and rising to the height of 180. The eye is at the same time gratified with the majestic dome, rising from the central part of the roof of the church, to a height which, reckoning from the ground, is 424 feet. The interior of the church corresponds perfectly with its outward grandeur. Five lofty portals open into the portico, a gallery extending across the width of the edifice, and resembling in size a cathedral. This magnificent entrance is paved with marble, covered by a gilded vault, and closed at either end by statues. Opposite to the five portals are five doors, each leading into the church. On entering any of these, the spectator beholds the most spacious hall ever constructed by human art, expanding in magnificent perspective, its length being above 600 English feet.

There are three palaces belonging to the Pope, viz. the Lateran, the Quirini, and the Vatican. The Vatican was erected by different architects at different eras, and forms not one, but an assemblage of edifices. Its extent is immense, and the number of its rooms, great and small, is estimated at 10,000. The palaces belonging to private families are numerous, and remarkable for their size and internal decorations.

Rome is the seat of several seminaries, a university, a Greek, a German, and a Jesuit college. The Propaganda, or college for the diffusion of the Christian faith, is on an extensive scale, containing a number of youths of different nations, and a press for printing books in more than thirty languages; but the fame of modern Rome lies not in literature, but in the fine arts. It has long been a resort for painters, sculptors, and architects, from various countries. The private collections of pictures, statues, and antiquities, are numerous and extensive.—Of the libraries, by far the largest is that of the Vatican: an immense collection, but deficient in late publications.—Pop. in 1817, 131,000, of whom 9,000 were Jews. The number of Catholic inhabitants connected with the church, as priests, monks, or nuns, is computed at 7,000 or 8,000.

3,569. The courts of the county are held alternately here and at Whitesboro.' Rome stands on the site of the celebrated Fort Stanwix. It is at the head of boat navigation on the river, which is here connected with Wood creek by a canal $1\frac{1}{2}$ miles in length, navigable for boats of 15 tons. The village contains about 200 houses and stores, a brick court-house and jail, a Presbyterian meeting-house, a brick arsenal belonging to the State, and an elegant stone arsenal belonging to the U. States. The Erie canal passes about 80 rods west of the village. Rome is situated at the meeting of a number of important roads, and is a place of considerable business.

Rotterdam, a large commercial city in South Holland, on the N. bank of the Maese, which here resembles an arm of the sea, although nearly 20 miles from its mouth. Though not fortified, it is surrounded by a moat, and entered by six gates towards the land, and four towards the water. It is traversed by the Rotte, a river, or rather broad canal, which here joins the Maese. Rotterdam is intersected, even more than other towns in Holland, by canals, almost all of which are bordered with trees. The houses are rather convenient than elegant. Their height is four, five, or six stories. The principal public buildings are the exchange, the great church of St. Lawrence.

the town-house, the admiralty, the academy, the theatre, and the extensive buildings of the East India company. Erasmus was born here in 1467. As a commercial city, Rotterdam has various advantages. Its broad and deep canals bring vessels of large burden close to the doors of the merchants' warehouses. It has in several respects greater accommodation than Amsterdam, the Maese being open, and the passage free from ice earlier than the Zuyder Zee, and a single tide sufficing to carry vessels to the German ocean. During the late wars in Europe, its commerce was greatly depressed, but since the overthrow of Bonaparte it has rapidly revived. 14 m. S. E. Hague, 36 S. by W. Amsterdam. Lon. 4° 29' E. Rouen, city, France, cap. of the Lower Seine, on the right bank of the Seine, 70 miles from its mouth, in a fertile and pleasant country. Among the public buildings are the cathedral built by William the Conqueror, and said to be one of the finest specimens of Gothic architecture in France; the church of St. Ouen, and that of St. Maclou. Of the curiosities the most interesting is the bridge of boats over the Seine. Instead of piers, it rests on 19 large barges, which fall and rise with the ebb and flow of the tide. It is about to be replaced by an elegant stone bridge, which is already (1820) in a state of progress. Rouen is one of the principal manufacturing towns in France, especially in the article of cotton goods. It has likewise manufactures of woollens, linens, and in a smaller degree, of iron ware, paper, hats, and pottery. The annual value of all the manufacture is estimated at 2,000,000*l.* sterling, and the number of persons employed, at 50,000. The Seine at Rouen is from 500 to 800 feet in width, and with the aid of the tide brings up vessels of 150 or 200 tons. 45 m. E. Havre, 80 W. N. W. Paris. Lon. 1° 6' E. Lat. 49° 26' N. Pop. 87,000.

Russia, the most extensive empire in the world, reaches from lon. 18° E. to 160° W. and from 43° to 78° N. lat. It includes one half of Europe, one third of Asia, and a portion of America; and it is bounded N. by the Frozen ocean; S. E. by the Pacific; S. by the Chinese empire, Persia, and Turkey; W. by the Austrian, Prussian, and Swedish dominions. The boundaries of Russia have recently been much extended in every part of the west and south, encroaching upon Lapland, Sweden, Poland, Turkey, and Persia. On the side of Sweden, the river Tornea, which falls into the head of the gulf of Bothnia, is now the boundary; on the side of European Turkey, the Pruth and the Danube. Between the Black sea and the Caspian, the Russian empire now extends to the rivers Bathus and Kur, the former of which, dividing Russia from Armenia, falls into the Black sea, in about lat. 42° N.; the latter, rising near the Bathus in the mountains of Armenia, falls into the Caspian below lat. 40°. Russia, therefore, now embraces the provinces of Georgia, Daghestan, and Shirvan, taken from Persia, and Mingrelia and Imiretta, taken from Asiatic Turkey. The whole empire, including the late acquisitions, contains about 8,000,000 sq. miles, and 48,000,000 inhabitants. It is divided into 53 governments. Geographers are not agreed on the boundary between European and Asiatic Russia, but it is common to assign 38,000,000 inhabitants, and 2,000,000 square miles, to European Russia.

European Russia consists chiefly of immense plains, covered in many parts with forests. Owing to the flatness of the country, the rivers have few falls, and many of them are navigable for an immense distance, opening very extensive inland communications. A short canal connecting the

Neva with the head waters of the Volga opens an inland water communication between the Baltic and the Caspian, and it is supposed that 4,000 vessels pass on this route annually between St. Petersburg and Astracan.

The chief seaports of Russia are Cronstadt and Riga on the Baltic, Archangel on the White sea, and Odessa on the Black sea. The chief exports are hemp, flax, leather, tallow, potash, wax, soap, timber, pitch, tar, train oil, peltry, and iron in bars. The imports are sugar, coffee, cotton, and other colonial goods. The annual value of the imports varies from 10 to 15 millions sterling, and that of the exports is nearly the same.

The established religion is that of the Greek church, with a free toleration, however, of all sects, even Mahometans. The number of Catholics is estimated at 5,500,000; of Lutherans, 2,500,000; Mahometans, 3,000,000. The number of churches throughout the empire is nearly 20,000; that of priests about 68,000.

Russian literature is as yet in its infancy. The professors, and higher teachers in the towns, are foreigners, generally Germans.

The Russian government was till lately an absolute monarchy. The title of the sovereign is emperor and autocrat of all the Russias. The present emperor has declared the Russian government to be a constitutional monarchy, and has given the senate the right of remonstrating against any ukase or edict contrary to law.

The national debt is about £35,000,000 sterling; the interest at 7½ per cent is £2,250,000. The total revenue of Russia is loosely estimated at £15,000,000 sterling.

The army, according to the return of 1819, consisted of 778,000 men, exclusive of militia and irregular troops of various descriptions; viz. infantry, 565 battalions, 613,000 men; cavalry, 563 squadrons, 118,000 men; artillery, 47,000 men. The naval force of Russia consisted, in 1820, of 30 ships of the line, 20 frigates, 15 sloops, and 200 galleys. The men fit for the duty of the navy, who can be called forth in time of war, are between 30,000 and 40,000.

Russia, Black, formerly the name of a subdivision of Lithuania, which now forms a part of the government of Minsk, in European Russia.

Russia, Great, the former name of a large province of European Russia, extending from the Frozen ocean to about the middle of the course of the Don. It is now divided into 19 governments.

Russia, Little, was that part of the empire that lay to the south of Great Russia, and now forms the governments of Czernigov, Cherson, Kiev, Ekaterinoslav, and Poltava.

Russia, Red, formerly an independent dutchy, which formed the palatinates of Chelm, Belca, and Lemberg in Poland, and now belongs partly to Russia, but more to Austria.

Russia, White, was a part of Lithuania, which now forms the governments of Smolensk, Mohilev, Vitepsk, and a small part of that of Minsk.

Saganaw Bay, a large bay of Michigan Territory, which sets up from Lake Huron between Point aux Barques on the S. in N. lat. 44° 42' 46", and Point au Sable on the North. The course of the bay is nearly south; it extends in length about 60 miles, and is 30 miles wide at its mouth. It is navigable for vessels of any burden, and its numerous coves and islands afford good harbors. At its southern extremity it receives Saganaw river.

Saganaw river, r. Michigan, which rises in the interior under the name of Flint river, and pursuing a course S. of E. for more than 100 m. is joined by the Sciawassa Titabawassa and Cass rivers, thence the united stream takes the name of Saganaw, and flowing about 32 miles, empties itself into Saganaw bay. It may be easily rendered navigable for boats of considerable burden for 60 miles. The lands on this river are among the best in Michigan. They were recently sold to the U. States by the Chippeway and Ottawa Indians, and will probably be rapidly settled. Here is a fort with a garrison. The Northern Missionary Society contemplate establishing a mission family at the principal village of the Chippeways, 14 miles up the river.

Sahara, or the *Great Desert*, an immense territory in Northern and Central Africa, lying between the states of Barbary on the N. and Soudan, or the countries watered by the Niger on the S. and stretching from the Atlantic on the W. with few interruptions to the Nile on the E. being by far the most extensive desert in the world. It presents, almost throughout, the spectacle of a naked burning plain of sand, destitute alike of water or vegetation, and unfit for the support of human life. It is only occasionally diversified by oases or islands, where the supply of water admits of a certain degree of verdure and cultivation. With the aid of the camel, caravans of merchants regularly cross these dreary wilds, in various directions. Water is conveyed in goat skins covered with tar to prevent evaporation. At each of the

oases, or spots affording water, the caravan stops for a few days to take in a supply. The greatest evil which they have to fear is when, in consequence of a peculiarly dry season, one of these springs happens to fail. Thus, in 1798, a caravan from Morocco, consisting of 2,000 men, with 1,800 camels, entirely perished.

St. Anthony's Falls, falls in Mississippi river, in lat. 44° N. The river here descends perpendicularly 40 feet, with a formidable rapid above and below, making the whole descent in three-fourths of a mile, 65 feet. The appearance is beautiful and picturesque. In 1805, the government of the U. States purchased of the Indians a tract of land, around these falls, 9 miles square; and in 1819, 300 soldiers were sent to occupy it as a military position. A fort has been erected on a high bluff at the junction of the river St. Peter's with the Mississippi, a spot which commands the navigation of both rivers, and appears capable of being rendered impregnable with little expense. The climate is delightful, and the rich bottom and prairie lands which skirt the river yield corn, potatoes, and all the common garden vegetables in rich abundance. As a military position, this place is of great importance, being in the neighborhood of many powerful Indian tribes, who have heretofore been under the exclusive influence of the British Fur companies. The garrison at the falls will have a ready access into the heart of the countries occupied by these tribes, by three distinct channels of communication; by the Mississippi, which is navigable towards the north, 600 miles above the falls; by the St. Croix on the N. E. which joins the Mississippi just below the falls, and communicates with Lake Superior by a portage of half a mile; and by the St. Peter's on the N. W. which runs through the territory of the Sioux, the most powerful of the Indian tribes, and is navigable for several hundred miles.

St. Augustin, mountain on the W. coast of N. America, at the entrance of Cook's river.

St. Augustine, sea-port and cap. of Florida, is on the Eastern coast, opposite the inlet at the north point of St. Anastasia island. It is regularly laid out in the form of a parallelogram, the streets intersecting each other at right angles. The houses are generally two stories high, and built of a species of stone peculiar to the country. The situation is pleasant; the supply of fresh water abundant; the atmosphere dry and healthful, and well adapted to northern constitutions. Invalids frequently resort hither for the benefit of the climate. The soil in the neighborhood is generally sandy, yet produces corn, garden vegetables, oranges and lemons in great perfection.

The harbour is good, but there is a bar at its mouth which at the lowest tides will not admit vessels drawing more than 6 feet of water; there is however a roadstead outside of the bar which affords anchorage for larger vessels. The town and the entrance to the harbor are well defended by a strong fort, built entirely of hewn stone, and mounting 60 cannon. In the rear of the city, and nearly encircling it, but at too great a distance to affect the climate, is an impenetrable morass, on the margin of which are erected six redoubts. Lat. 29° 45' N. Lon. 81° 30' W. Pop. estimated at 5,000.

St. Croix, r. Maine, called also *Passamaquoddy*

and *Schoodic*, runs into Passamaquoddy bay. It is the boundary between the United States and New Brunswick, from its mouth to its source. It is navigable for sea vessels 12 miles to the falls where there are extensive saw mills. Above the falls it receives the waters of a chain of lakes reaching almost to Penobscot river, and might also be easily connected with the St. John and through the latter with the St. Lawrence.

St. Croix, small isl. in the river to which it gives name a few miles from its mouth. It was settled by the French in 1604, but afterwards abandoned; and the commissioners appointed in 1797 for settling the boundary between the U. S. and the British possessions were at a loss for the true St. Croix, till it was ascertained by the discovery of the ruins of the French settlement on this spot.

St. Croix, r. N. W. Territory, which enters the Mississippi between St. Peter's and Lake Pepin. It is 100 yards wide at its mouth, and is connected, by a short portage, with Boisbrule a river of lake Superior. It is said to afford the most practicable communication between lake Superior and the Mississippi. The S. W. Fur Company have a fort on this river 100 m. from its mouth.

St. Helena, isl. in the Atlantic ocean, detached from any group, 600 m. from Ascension island, the nearest land; 1,200 from the coast of Africa, and 1,800 from S. America. St. Helena attracts attention as having been the prison of Napoleon Bonaparte from the year 1815 till his death, May 5th, 1821. The island is $10\frac{1}{2}$ miles long, by $6\frac{1}{4}$ broad, and about 28 in circumference. It presents to the sea, throughout its whole circuit, nothing but an immense wall of perpendicular rock, from 600 to 1,200 feet high, like a castle in the midst of the ocean. Its aspect is still more bleak and dreary than that of Ascension. In the interior, however, are a number of fertile and beautiful vallies. The loftiest eminence, called Diana's peak, situated nearly in the centre of the island, is 2,700 feet above the level of the sea. There are only four openings in the great wall of rock which surrounds the island, by which it can be approached with facility. These are strongly fortified. The advantage of St. Helena as a place of refreshment is confined exclusively to the returning East India ships. Ships going out to India cannot make St. Helena. Lon. $5^{\circ} 49'$ W. St. John, r. which rises in Maine, a little N. of Chesuncook lake and passing into New Brunswick, empties itself into the bay of Fundy just below the city of St. John. The tide flows up 80 or 90 miles. The river is navigable for sloops of 50 tons 80 miles, and with the exception of two short portages, may be ascended by boats quite to its source, near the waters of the St. Lawrence, a distance of 350 miles. About a mile above the city of St. John are singular falls. The river, at low water, is about 12 feet higher than the waters of the bay, while at high water the waters of the bay are about 5 feet higher than those of the river, so that in every tide there are two falls, one outwards and one inwards. The only time of going through the falls is when the waters of the river are on a level with those of the bay, which is twice in a tide and continues 10 or 15 minutes each time. Owing to freshets the St. John is impassable during the greater part of the month of May, when the river is higher by several feet than the highest tides.

St. John, city, St. John co. New Brunswick, is situated on high ground, on the river St. John, 3 miles above its entrance into the bay of Fundy. It is built principally on the E. side of the river, but comprises a district on the W. side called Carleton, which is inhabited by persons engaged in the salmon, shad, and herring fisheries. The harbor is spacious, and in consequence of the great rise of the tides is never closed by ice. Most of the shipping lies at the upper cove, which is in front of the city, and is well sheltered. At the lower cove a break water is erected, which, however, is ineffectual to keep out the swell of the sea rolling in from the S. W. Below this is the King's reserve, on which stand the barracks and 4 forts for the defence of the harbor. For the same purpose a bomb proof tower is erected in Carleton. There is a lighthouse on Partridge island at the entrance of the harbor. The city is handsomely laid out; the public buildings are a city hall, a bank, pest house, marine hospital, 2 spacious Madras schools, one for males and one for females, and 6 churches, 2 for Episcopalians, and 1 each for Scotch Presbyterians, Methodists, Baptists and Roman Catholics. Probably no place in British America increases so rapidly as the city of St. John. Upwards of 200 square-rigged vessels annually leave the port, loaded with the products of the province, viz. ton-tim-

ber, lumber, fish, &c. Here is also a large steam saw mill. Distant 80 m. from Fredericton, with which it has communication by steamboat; 67 m. N. E. St. Andrews, 60 N. E. Eastport. Lon. 66° 3' W. Lat. 45° 20' N. Pop. in 1822, estimated at 8,000.

St. John's, the capital of Newfoundland, is on the S. E. coast of the island. In 1815 it contained about 12,000 inhabitants. In February 1816, a dreadful fire destroyed 117 houses. In November 1817, two still more dreadful conflagrations laid waste nearly the whole of the town. Not less than half a million sterling of property was destroyed in a few hours. Lat. 47° 35' N.

St. John's, r. the principal river of East Florida. Its sources have not been exactly ascertained, but it is supposed to issue from Lake Mayaco, between lat. 26° and 27' N. It runs north parallel with the Atlantic coast, expanding into several lakes, particularly Lake George, which is 20 miles long and 15 wide, and embosoms several islands. Within 20 miles of its mouth the river turns to the east, and falls into the Atlantic, near lat. 30° N. 36 m. S. St. Mary's. Its whole length is about 300 miles, and it is navigable for vessels which can pass the bar at its mouth, for 150 miles, to Lake George. The bar has 10 feet of water at low tide, and 13 feet at high water, and there is good anchorage outside of the bar for large vessels.—The lands on this river are very fertile, and numerous settlements extend along its banks.

St. Louis, formerly *Pain Court*, p-t. and cap. St. Louis co. Missouri, stands on the W. side of the Mississippi, 18 miles below the mouth of the Missouri, 35 below the mouth of the Illinois, 200 above the mouth of the Ohio, 1,200 above New-Orleans, 50 N. N. W. Kaskaskia, 18 S. W. Edwardsville, 60 from Vincennes. The bank of the river ascends gradually from the landing to the rear of the town, where it terminates in a plain which extends for 15 miles around, and consists of a stratum of rich alluvial soil, bottomed on limestone. The houses are principally built on 3 parallel streets, which extend more than 2 miles along the river, and rise each above the other.

No inland town in the world is more advantageously situated for commerce than St. Louis. It is near the point where several of the largest rivers in America unite their waters. It is the natural depot for the vast and fertile regions watered by the Missouri, the Upper Mississippi, the Illinois, and their numerous tributaries: rivers which traverse the continent for thousands of miles in various directions, and along whose banks the tide of population is now rolling with unexampled rapidity. Measures have already been taken by the government of the U. States to divert the fur trade of the north-west regions and the Upper Missouri, which has been heretofore engrossed by British traders, and carried on through the lakes and Montreal, into its natural channels, the Mississippi and Missouri, and whenever it is accomplished, St. Louis will be the centre of this profitable commerce. Intercourse by steam-boats is now constantly maintained with the towns on the Ohio and Mississippi, particularly with New Orleans.

St. Louis contains a museum, land-office, 2 banks, 3 printing offices, each issuing a weekly newspaper, 3 houses of public worship, one of which, the cathedral, is a large and elegant brick building 40 feet in front and 135 in depth; a seminary called the St. Louis college under the direction of the Bishop, containing in 1822, 65 students; 1 brewery, 2 distilleries, and several mills

and manufacturing establishments. The town is now in a state of very rapid improvement. Pop. in 1816, 2,000; in 1820, 4,123. Lat. 38° 36' N. Lon. 89° 58' W.

St. Louis, r. N. W. Territory, which receives the Savannah from the W. and breaking through the Cabotian mountains, empties itself into the Fond du Lac, the W. end of Lake Superior. At its mouth it is 150 yards wide. By means of this river there is a communication between Lake Superior and the Mississippi. Boats ascend 23 miles to the Grand portage, where is a post belonging to the S. W. Fur company. At this place is the passage through the mountains, during which the river falls 230 feet. The portage is 9 miles long. Above this, boats ascend with some interruptions from portages, about 70 miles to the mouth of the Savannah, and up this river 24 miles, and then cross a portage of 6 miles into Sandy lake river. To this portage the whole ascent from Lake Superior, a distance of about 120 miles, is estimated at 550 feet.

St. Mary's, r. which rises in Ohio in the same tract of country where the Miami of the Ohio and the branches of the Wabash take their rise, and after a northerly course of about 70 miles, joins the St. Joseph's, at Fort Wayne in Indiana to form Maumee river. It is navigable for boats, at the times of high water, in its whole extent, 170 miles. There is a short portage from its head to Lora-mie's creek, a branch of the Miami.

St. Mary's, r. or straits, about 80 or 90 miles long, which connect lake Superior with lake Hu-ron. The fall or Sault de St. Marie is near the head of the strait, in N. lat. 46° 31', 15 m. from lake Superior, and 90 N. W. of the island of Mack-inac. The river here descends 22 feet 10 inches in 900 yards, and cannot be ascended at any sea-son with large vessels, but canoes and barges are towed up along the bank without much difficulty or danger. On the Canada side, at the foot of the rapids, is an establishment of the North-west com-pany. On the American shore there is a village containing 15 or 20 buildings, and occupied by 5 or 6 French and English families, and there was formerly a French fort within half a mile of the rapids. The Indians are drawn hither in great numbers by the advantages for taking the white-fish, which are so abundant at the foot of the rap-ids, that a skilful fisherman will take 500 in two hours.—As a military and trading-post, the posi-tion of the Sault de St. Marie is of the first impor-tance, being at the head of ship navigation on the great lakes, and the grand thoroughfare of Indian communication for the upper countries, as far as the Arctic circle, all the fur trade of the north-west being compelled to pass through it. The government of the U. States in 1820, obtained from the Chippeway Indians, the cession of a tract of land 4 miles square commencing at the Sault and extending 2 miles up, and the same distance down the river, but reserving to the Indians the right of fishing at the falls. Here is a U. S. mili-tary post. The lands on the banks of the river St. Mary are very fertile.

St. Salvador, or *Cidade de Bahia*, city, Brazil, at the entrance of All Saints' bay: the see of an archbishop. It contains many religious houses, and a large and magnificent college. It is large, rich, and well built; but the principal part of the city standing on an eminence 400 feet in height, makes it necessary to have recourse to cranes and other machines for conveying the goods from the city to the port. The town is well defended, and with a small expense might be rendered impregnable, the east side being almost inaccessible, and the rest well fortified both by nature and art. The upper town is adorned with several splendid structures, particularly the cathedral, the palace of the governor, and that of the archbishop, and the courts of justice, hospitals, and other public edifices. The commerce of the town is very extensive. The population is estimated at 120,000, and is composed of whites, Indians, mulattoes, and negroes. Lon. $39^{\circ} 30'$ W. Lat. $12^{\circ} 45'$ S.

St. Simons, isl. off the coast of Georgia, at the mouth of the Alatamaha, 15 miles long, and from 2 to 4 broad. The northern part is separated by a small creek from the main island, and called Little St. Simons. Between Little St. Simons and Egg island, the southern branch of the Alatamaha communicates with the ocean. The island is separated from the main land by a navigable river, which communicates with the Alatamaha, and flows into St. Simon's sound. Frederica stands on this river on the west side of the island. Its harbour is safe and deep, and being surrounded with forests of timber, is well adapted for ship-building. Frederica was built by Gen. Oglethorpe, in 1734. The fortress is constructed of tabby, and is of such durable materials that it still remains. Lon. 80° W. Lat. $31^{\circ} 15'$ N.

Salem, port of entry and cap. Essex co. Mass. the second town in New-England in commerce, wealth, and population, is built on a low peninsula, formed by two small inlets of the sea, called North and South rivers; over the former of which is a bridge 1,500 feet long, connecting the town with Beverly; the other separates it from Marblehead, and forms the principal harbour. The harbour is so shallow that vessels drawing more

than 12 feet water must load and unload at a distance from the wharves, yet it is accessible to ships of war into safe anchorage, as the frigate Constitution found in the late war when pursued by a superior force. There are two forts for the defence of the harbour.

The town contains a court-house, alms-house, market-house, 3 banks, a museum belonging to the East India Marine Society, an athenæum containing more than 5,000 volumes, an orphan asylum, and 11 houses of public worship, 6 for Congregationalists, 2 for Baptists, 1 for Episcopalians, 1 for Friends, and 1 for Universalists. The streets are crooked, and the houses generally built of wood, but many of those recently erected are handsome brick edifices.

The commerce of Salem is extensive. In 1810, it was the sixth town in the U. States, in amount of shipping, the number of tons being 34,454, of which nearly one half was employed in the India trade. The trade has been prosecuted with great spirit and success for many years, and has been a source of much wealth to the town. A society composed of masters and supercargoes of vessels who have sailed round the Cape of Good Hope, or Cape Horn, was incorporated in 1801, and now consists of about 160 members. A museum belongs to the Society, composed of curiosities from all parts of the world, and is visited by strangers without expense. The inhabitants of Salem are celebrated for enterprise, industry, and true republican economy. Perhaps no city in the U. States contains so much wealth in proportion to the population. It is the oldest town in Massachusetts except Plymouth, having been settled in 1626. Its Indian name was Naumkeag. 4 m. N. W. Marblehead, 24 S. Newburyport, 14 N. N. E. Boston. Lat. $42^{\circ} 30' N.$ Lon. $70^{\circ} 50' W.$ Pop. 12,731.

Sandwich Islands, group of Islands in the N. Pacific ocean, discovered by captains Cook and King, in the year 1778. They consist of 11 islands, lying between lat. 18° 54' and 22° 15' N. and between lon. 199° 36' and 205° 6' E. They extend in a direction W. N. W. and E. S. E.; Owhyhee being the southeastern island, and Oneehow the northwestern. The length, breadth, sq. miles, and estimated population of each is given in the following table :

	length.	breadth	sq. miles	population.
Owhyhee	97	78	4,000	150,000
Mowee	48	29	600	65,000
Tahoorowa	11	8	60	
Ranai	17	9	110	20,000
Morotoi	40	9	170	36,000
Woahoo	46	23	520	60,000
Atooi	33	28	520	54,000
Oneehow	20	7	80	10,500
Tahoora	1	½		uninhab.
Morotinnee				uninhab.
Reehoua				
Total			6,000	400,000

The following distances of the different islands from each other are estimated from the nearest parts of one island to the nearest parts of the other. Mowee is N. W. of Owhyhee, 30 miles: Morotoi W. N. W. of Mowee 10; from Owhyhee 75: Tahoorowa, S. W. of the southern part of Mowee, 7; from Owhyhee 38: Ranai, W. of Mowee, 9; and the same distance S. of Morotoi: Woahoo, W. N. W. of Morotoi, 27; from Owhyhee, 130: Atooi, W. N. W. of Woahoo, 75; from Owhyhee, 250: Oneehow, W. S. W. of Atooi, 17; from Owhyhee, 290: Tahoora, little more than a rock, S. W. of Oneehow, 23. The distance from the eastern point of Owhyhee to the N. W. side of Oneehow is about 390 miles.

These islands since their discovery, were for a long time involved in a series of most destructive wars, in consequence of the struggle of rival chiefs, for

the sovereignty. The result of the contest threw the chief dominion into the hands of the late Tamaahama, a vigorous and sagacious prince. With the assistance of Young and Davies, two Englishmen who were settled in the island. Tamaahama encouraged his subjects to prosecute with industry and perseverance, the most useful European trades, and also procured American and European artificers about him, who instructed his subjects in the knowledge of many mechanical arts. In 1802, he had upwards of 20 vessels of different sizes, from 25 to 70 tons; some of them copper-bottomed. He had also a palace built after the European style, of brick, with glazed windows, and defended by a battery of 10 guns. So bent was this Indian chief on the pursuit of political greatness, that, though he was at one time strongly addicted to drunkenness, he gave up all excess, and practised ever after the greatest moderation in the use of intoxicating liquors. The Sandwich islanders now frequently make voyages to the N. W. coast of America, and are anxious to open a communication with China.

In 1819, the American Board of Foreign Missions sent out a Mission Family to these islands, consisting of 22 persons, viz. 2 ordained missionaries, 2 catechists and schoolmasters, a farmer, a printer, and their wives and families, together with 3 natives of the Sandwich islands, who had been educated at the Foreign Mission School in Cornwall, Connecticut. Accompanying the Mission also was George Tamoree, son of the king of Atooi, who received his education at the Foreign Mission School. They embarked at Boston, Oct. 23d. At this time the news had not reached America, of the wonderful revolution that was then going on in these islands, by which the way was prepared for the favorable reception of the Gospel. Upon the death of Tamaahama in 1819, the government and people of the Sandwich islands determined almost unanimously to abandon their idols, and to commit them with all the monuments of idolatry to the flames. This was done at Owhyhee, then at Woahoo, and then at Atooi, without the least opposition. Tamoree, king of Atooi, even expressed a strong desire that missionaries would come and teach the people to read and write. The principal means which providence used to bring about this surprising revolution, was the continually repeated rumor of what had been done in the Society Islands, and the continually repeated assurance of our sea-captains and sailors, that the whole system of idolatry was foolish and stupid. On their arrival the Missionaries were well received, and entered immediately on the business of instruction. They have now 2 stations, one at Wymai on the island of Atooi; the other at Hanaroora on Woahoo, where a church is erected. Funds of more than \$800 have been collected for an orphan school; other schools have also been established. A reinforcement of this mission embarked at New Haven, Ct. Nov. 19th 1822, consisting of 18 persons, viz. 3 ordained clergymen, 1 physician, and 2 licensed preachers, all married men; a catechist, a colored woman, 3 natives of the Sandwich islands and 1 Otaheitan.

It is memorable for the surrender of Burgoyne with his whole army consisting of 5,791 effective men, to General Gates, Oct. 17th 1777. In 1818, the old town of Saratoga was divided. The east part containing the celebrated battle ground retains the original name of *Saratoga*. The west part, containing the mineral waters, is called *Saratoga Springs*. There is a post office in each town.

Saratoga Springs, p-t. Saratoga co. N. Y. 12 m. W. of the Hudson, 7 N. N. E. Ballston, 32 N. Albany. Pop. 1,909. It contains a printing office, a reading room and a library. The celebrated mineral springs of Saratoga are spread over a tract of about 12 miles in extent, in Saratoga co. and are called by a variety of local names. The most noted are those of Ballston and Saratoga, which are superior to any others in America. The names of the principal springs in Saratoga are Rock Spring, Congress Spring, and Columbia Spring. Rock Spring contains carbonic acid, carbonate of soda, muriate of soda, super-carbonated lime, and a carbonate of iron. These springs, during the summer months, are the resort of the gay and fashionable, as well as of invalids, from all parts of the United States. Large houses for entertainment, with neat bathing houses, are erected for the convenience of visitors. The waters afford relief in many obstinate diseases. They bear

bottling very well and immense quantities are in this way transported to various parts of the world.

Sardinia, a kingdom of Europe, composed of the island of Sardinia, and of Piedmont, Savoy, and the territory of Genoa. The extent and population of its component parts are as follow:

Divisions.	Sq. miles.	Population.	Pop. on a sq. mile.
The island of Sardinia,	9,250	520,000	56
Piedmont, including the county of Nice,	7,900	1,750,000	244
Savoy,	3,780	450,000	118
Genoese territory,	2,360	534,000	231
Sardinian part of Milanese territory,	3,310	560,000	168
Duchy of Montserrat,	900	186,000	206
Total of Sardinian dominions,	27,500	4,000,000	146

The standing army amounts to nearly 60,000, and is larger in proportion to the population and resources, than that of almost any state in Europe. The religion is the Roman Catholic. The government is a monarchy; some privileges however were guaranteed to particular states, on their incorporation with the rest of the kingdom. The principal towns are Genoa, Turin, the residence of the court, Alessandria, and Nice.

Sardinia, a large island of the Mediterranean, S. of Corsica, between lon. $7^{\circ} 57'$ and $9^{\circ} 51'$ E. and lat. $38^{\circ} 55'$ and $41^{\circ} 17'$ N. It is divided into two nearly equal parts, Capo di Cagliari and Capo di Sassari. Length from N. to S. 162 miles; breadth between 60 and 70. Extent, 9,250 sq. miles. Pop. 520,000. The surface presents a pleasant variety of hill and dale; and a chain of mountains runs through the island from N. to S. The climate is healthy except in the vallies and low grounds, where disease is produced by the marsh vapours. The soil, is in general fertile, affording wheat, vines, olives, &c. The interior exhibits a degree of barbarism which can with difficulty be believed to exist in Europe. The shepherds wear goat or

sheep skins, and go constantly armed to protect themselves from the banditti in the mountains. The capital is Cagliari.

Saroy, dutchy in the S. of Europe, forming the N. W. part of the continental states of the kingdom of Sardinia, and extending from lat. 45° 8' to 46° 28' N. It is bounded W. by France, E. by Piedmont. Its length from N. to S. is 94 miles, its breadth between 60 and 70. Extent, 3,800 sq. miles. Pop. 450,000. The surface of Savoy is in the highest degree bleak and rugged: all the materials of the sublime, are its characteristic features. Among the mountains are Mount Blanc, Mount St. Bernard, Mount Cenis, Mount Iseran, Mount Valais, and Mount Tournet, all connected together, and forming a stupendous barrier between Savoy and Piedmont. Savoy is naturally one of the poorest countries of Europe, but by dint of skill and industry the inhabitants raise enough to supply their wants. The Savoyards have a brown complexion, from their frequent exposure to the open air. They live chiefly in the country; and are marked by simplicity of manners, frugality and sobriety. Their language is a mixture of French and Italian. Chambery is the capital.

Saxons, *Province of*, in Transylvania, one of the 3 great divisions of that principality, forming the S. part, adjacent to the frontier of Turkey. Extent between 3,000 and 4,000 square miles. Pop. 360,000, mostly Lutherans.

Saxony, *Kingdom of*, in the N. E. of Germany, bounded S by Bohemia, and N. by the Prussian states. Previous to 1814, it contained above 2,600,000 of inhabitants (exclusive of the part of Poland subject to this crown); but it was greatly reduced by the congress of Vienna. At present its divisions, extent, and population, are as follow:—

	Square miles.	Population.
Circle of Meissen	1,600	300,000
Leipsic	1,460	207,000
Erzgebirge	2,175	460,000
Vogtland	700	90,000
Part of Merseburg	73	10,000
Upper Lusatia	1,180	170,000
Total	7,188	1,237,000

The length of Saxony is 140 miles, its greatest breadth about 75. The Erzgebirge mountains run along the southern frontier, separating the kingdom from Bohemia. The descent from these mountains, though steep on the side of Bohemia, is gentle and undulating on that of Saxony, and it is only in the northern half of the kingdom that it subsides into plains. The soil in the southern and mountainous parts of Saxony is well cultivated only in the vallies; but in the level districts of the north, particularly in the circles of Meissen and Leipsic, tillage is general. The products are wheat, barley, oats and other grain, also some tobacco and hops. Of the domestic animals, the chief care has been bestowed on the sheep, Merino rams having been imported about 50 years ago, and the Saxon wool rendered by continued good management, the best in Germany. Few countries equal Saxony in mineral riches, the Erzgebirge mountains abounding in mines of iron, copper, lead, silver, cobalt, zinc and coal, all of which are extensively and skilfully wrought. Porcelain clay also is found in the neighborhood of Meissen. This country is more thickly settled

than any other state in Germany except Wirtemberg and Baden. The great majority of the inhabitants are of the Lutheran religion, but the reigning family are Catholics. The institutions for education are numerous and well conducted. The Saxons also cultivate literature and the elegant arts with great success, and in no country of equal extent is the number of printing and book-selling establishments so great. Saxony is a kingdom, and the power of the sovereign is limited by the states, without whose consent no law can be made, and no tax imposed. The revenue amounts to £850,000, and the public debt is stated at £3,700,000. The army on the present peace establishment amounts to 12,000 men. The principal article of manufacture is linen. Woollens are likewise manufactured in a number of towns. Cotton spinning and weaving acquired a rapid extension towards the close of the last century, and have of late years been benefitted by the introduction of improved machinery. The manufactures connected with the mines are of considerable extent, particularly at Freyberg.

Saxony, a large province of the Prussian States, situated to the W. of Brandenburg, and N. of the kingdom of Saxony. It comprises almost the whole of the cessions made by the latter power at the congress of Vienna, and with these have been incorporated by the Prussian government, the principalities lying to the N. of the duchy of Anhalt, and to the W. of the rivers Elbe and Havel; so that the whole now forms an area of 9,830 sq. miles. Pop. 1,000,000. It is divided into the governments of Magdeburg, Merseburg, and Erfurt. It forms a distinct military division; and the chief town is Magdeburg.

Scio, or *Chios*, isl. in the Grecian Archipelago, separated from the continent of Asia by a channel 18 miles wide. The island is 30 miles long, and from 10 to 18 wide. Sq. miles, 500. It is mountainous and bare of wood. The productions are wheat, barley, wine, and oil. Oranges, lemons, and bergamot-citrons are important articles of trade; but the most considerable merchandize is their silk, of which they make, one year with another, 30,000 lbs. It is estimated that 500 looms are employed in the manufacture of silk stuffs, and the trade of the various stuffs manufactured

at Scio is estimated at upwards of 6,000,000 livres. The other wares of the island are wool, cheeses, fig, and mastic. The turpentine has been long in great estimation. In no island of the Archipelago, nor in any country of Turkey, are the lands better cultivated, commerce more active, or industry greater than in Scio. The inhabitants are remarkably intelligent. Pop. estimated at 110,000, principally Greeks; not more than 4,000 are Turks. In 1822, this island was ravaged with unprecedented cruelty by the Turks, who massacred great numbers of the principal inhabitants, and sold many more as slaves. Lon. 25° 54' E. Lat. 38° 30' N.

Sclavonia, province of the Austrian empire, between the Danube, on the N. separating from Hungary, and the Save on the S. dividing it from Turkey. Area, 6,600 sq. miles. Pop. 530,000. It lies between 45° and 46° N. lat.; and being a frontier province, its inhabitants are exempt from taxes, but subject to military duty. Sclavonia is divided throughout almost its whole length by a chain of lofty mountains, extending from E. to W. and covered with forests. The rest of the country consists of fine plains, with a fertile soil, and a climate almost as mild as that of Italy. The productions are wheat, barley, maize, flax, hemp, and madder; vines, figs, almonds, and other fruits of a warm climate. The forests contain the finest oak. The domestic animals, horses, cattle, and sheep, are numerous, but reared with little care. The majority of the inhabitants are of the Greek church; there are also many Catholics. The Sclavonians form only a small part of the descendants of the Slavi, a nation whose lan-

guage and habits are to be traced, not only throughout the Illyrian provinces, but in Hungary, Poland, the western part of Russia, and the east of Germany. During the age of Charlemagne, being often carried into captivity by the Franks, the name Slave or Esclave became synonymous with captive.

Scotland, a country of Europe, which, united with England and Wales, forms the northern division of Great Britain. It is divided into 33 counties, which are subdivided into 377 parishes. The Grampian mountains divide the country into two parts, called the Highlands and Lowlands of Scotland. The Highlands or northern division except a small district on the eastern coast, consist of an assemblage of vast and dreary mountains, interspersed with innumerable small lakes, and sometimes with fertile vallies. In the Lowlands the country bears a great resemblance to England. Of 18,943,600 English acres, which Scotland is supposed to contain, only 5,043,050 are under cultivation. Of the cultivated soil about one half is devoted to grass, one quarter to oats, and the remaining quarter to turnips, barley, wheat, &c. The principal minerals are coal, lead, and iron. Presbyterianism is the established religion; and those attached to this denomination constitute more than nine tenths of the people. There are in Scotland 899 parishes, and 938 clergymen belonging to the established church. There are universities at St. Andrews, Aberdeen, Edinburgh and Glasgow. Scotland is celebrated for its excellent system of education. In no country in Europe are the lower classes so universally taught to read and write. Scotland is represented in the British parliament by 16 peers, and 45 commoners. The revenue in 1814 was £4,483,014. The whole value of the articles annually manufactured is estimated at £14,182,136, of which cotton goods constitute £6,964,486; linen goods, £1,775,000; woollen goods, £450,000; and all other articles, £5,000,000. In 1810 the imports were £3,671,158, and the exports £4,470,239. The amount of shipping in 1800 was 171,728 tons, manned by 14,820 men. Since 1800 it has greatly increased. Pop. in 1811, 1,804,864; in 1821, 2,093,456.

Senegal, the principal r. which falls into the sea on the W. coast of Africa, in lat. $16^{\circ} 5' N$. It rises in the mountains of Manding and Jallonkadoo, within 40 miles of the Niger, in $7^{\circ} 0' W$. lon. and $11^{\circ} 50' N$. lat. under the name of Ba Fing, and is joined by the Faleme, and the Ba Lee, or Kokoro. The first part of its course is interrupted by falls, but afterwards it flows through a level country, separating into branches, which form several large islands. The bar across its mouth prevents the entrance of vessels of 500 tons. The whole length of the river is more than 1,000 miles.

Senegal, or *Senegambia*, country, W. Africa, which extends from the Sahara or northern limit of West Africa, to the parallel of $10^{\circ} N$. lat. including within these boundaries the country watered by the Senegal and Gambia, from which rivers it derives its name. It is fertile, well watered, and capable of yielding the sugar cane, cotton, maize, rice, tobacco, and all the tropical fruits in abundance. On the banks of the Senegal grows the Baobab, which frequently attains the circumference of 60 and 70 feet, and is the largest tree of the forest. But the principal articles which attract Europeans to this coast are its gum, gold, ivory, and slaves. The gum, which is known in commerce by the name of gum Senegal, is much superior even to that of Arabia, and in some of the arts no other gum can be used as a substitute. The forests of acacia, from which this substance exudes, grow in a desert tract lying north of the Senegal, and forming part of the Sahara. There are three great forests, in the possession of three tribes of Moors, who collect about 500,000 pounds of gum annually, and bring it for sale to the banks of the Senegal, at the time and place appointed by the French. St. Louis is the capital.

The mountains are covered with forests, which abound with wild animals, particularly the elephant, rhinoceros, and tiger. Pop. estimated at 4,000. In their religion, literature, government, cruelty of punishments, and general character, the Siamese bear a strong resemblance to the Birmans.

Siam, more properly called *Juthia* or *Odia*, the capital of the kingdom of Siam, is on the river Menam, 50 or 60 m. from its mouth. The city is surrounded with a brick wall, and is intersected by several large canals. The streets run along the canals, so that ships from the river may enter the town, and land their cargoes near the principal houses. Lon. $100^{\circ} 23'$ E. Lat. $14^{\circ} 5'$ N. Pop. 119,000.

Siam, *Gulf of*, a great bay of the Eastern ocean, having on the W. part of the peninsula of Malacca, and on the E. the kingdom of Cambodia. Siberia, a vast territory of Asia, including the whole of Asiatic Russia, excepting 8 or 10 provinces around the Caspian. It is bounded N. by

the Frozen ocean; W. by the chain of the Ourals, which separate it from Russia in Europe, and the provinces of Orenbourg and Astracan; S. by the Altai and the chains of Sayansk and Yablonoy which separate it from Independent Tartary, and the tribes nominally subject to the Chinese empire; E. by the Eastern ocean; between 50° and 75° N. lat. and between 60° and 190° E. lon. Length from E. to W. about 4,500 miles; breadth from 1,200 to 2,000. The most striking feature of this country is the steppes or vast level plains, which cover a very great portion of its surface, and are marshy, covered with long rank grass and aquatic shrubs, and filled with almost numberless saline lakes. Siberia is very rich in minerals. The Ural mountains contain extensive mines of iron and copper with some of gold, for the working of which considerable establishments have been formed. The great scene of mining operations in the Altay chain is the Schlangenberg or Serpent mountain, situated about 60 miles from the Irtysh and 100 from the Oby. It may be considered as an enormous mineral mass; wherever its covering of slate rock is taken off, all the substances beneath are found to yield gold, silver, copper and plumbago. Zinc, arsenic and sulphur are also abundant. Between 1749 and 1771 it produced 12,348 pounds of gold, and more than 324,000 pounds of silver. It still yields annually 36,000,000 pounds of mineral of every description; and the veins already discovered will supply the same quantity for 20 years. The mass of the population in Siberia consists of the native tribes, who pay to the Russian government a certain tribute annually. The European inhabitants consist of troops occupying a series of fortified posts, scattered at wide intervals over this vast dominion, and of the descendants of exiles. The religion is that of Boodh, or of the Lamas, here called Shamanism. Christianity has hitherto made very little progress among the natives; though considerable efforts have recently been made, and with some success, both by the Russian government and the British missionary societies. The commerce of Siberia consists chiefly in the exportation of its metals and furs; and in the overland intercourse of Russia with the Chinese empire. The former is in a great measure in the hands of the government, who have monopolized the most valuable mines, and to whom the tribute of all the wandering tribes is paid in furs. Pop. estimated at 2,700,000. Siberia is divided into two governments, Tobolsk and Irkoutsk.

Sicilies, Two, Kingdom of the. See *Naples, Kingdom of.*

Sicily, the largest island of the Mediterranean, situated between Italy and the coast of Africa, and extending from Lon. $12^{\circ} 42'$ to $16^{\circ} 10'$ E. Lat. $36^{\circ} 30'$ to $38^{\circ} 12'$ N. Length from E. to W. 180 miles; greatest breadth, 130. Extent, including the small islands along its coast, about 12,500 square miles. It has long been divided into three parts, the Val di Mazzara, Val di Demona, and Val di Noto, but in 1815, was again divided into 7 intendancies, viz. Palermo, Messina, Catania, Girgenti, Syracuse, Trapani, and Calatanissetta. Pop. 1,660,000.

Sicily is separated from the Italian continent by a strait called the Faro di Messina, from 2 to 15 miles broad. A chain of mountains, extends through the island from E. to W. throwing off branches to the S. Between the ridges are beautiful vallies, and along the coasts are extensive plains. The soil has always been noted for its fertility, Sicily having been anciently styled the granary of the Roman Empire. But the lands at present are almost entirely in the hands of the barons and clergy, and tracts of many miles in extent, are left uncultivated. The products are corn, flax, hemp, vines, olives, saffron, cotton, silk and fruits. The religion is the Catholic.

The revenue of Sicily is computed at £1,000,000 sterling. The army in time of peace does not exceed 10,000 men. This island forms with Naples the kingdom of the Two Sicilies.

Sierra, the eastern part of New Castile, so called from its mountains. The word *Sierra* is a general name for mountain in Spain.

Sierra Leone, a country on the west coast of Africa, lying between 7° and 10° N. lat. A river of the same name passes through it nearly in the centre. The lands on this river, for a considerable distance, are very fertile, producing cotton, rice, sugar, and most of the tropical fruits. A colony was planted here by the British in 1791, for the purpose of cultivating the productions suited to the climate, and opening a trade with the interior. The first settlers were about 500 in number, principally blacks, who were increased in 1792, by 1,200 free negroes from Nova Scotia. The first colonists suffered from sickness, and in 1794, the settlement was destroyed by the French, but it was afterwards re-established, and in 1809, contained 1,500 persons; since which it has been very flourishing, and is now the most important English colony in Africa, except the Cape of Good Hope. The population in 1820, was 12,509; it consists principally of Africans, rescued from the holds of slave ships, and who, when they were introduced into the colony were at the lowest point of mental and moral depression. They now exhibit a very gratifying proof of the susceptibility of the African character for improvement and civilization. From savages and gross idolaters, many of them have been converted into enter-

prising traders, skilful mechanics, and industrious farmers, supporting themselves and their families in comfort, and performing respectably all the duties of citizens. They discharge the duties of jurors, constables, and other offices with much propriety, and are a fine example of a community of black-men living as freemen, enjoying the benefits of the British constitution, regularly attending public worship; and gradually improving by means of schools and other institutions in knowledge and civilization. This happy change has been effected by the blessing of God on the labours of English missionaries. The number of missionaries in the colony in 1819, was 17, and the number of children in the schools at the various settlements in 1821, was 1,959. The value of goods imported at the port of Freetown in 1821, was £105,060 sterling. The amount of the exports for the same year was 6,805 tons. The principal articles of export are timber, elephants' teeth and scrivelloes, palm oil, camwood, gum copal, hides, bees' wax, gold, rice, chillies, coffee and grains.

Sorel, *Richelieu*, or *Chambly*, r. Lower Canada, forming the outlet of Lake Champlain. It flows north, and joins the St. Lawrence at Sorel, 40 miles below Montreal. It is remarkable for being narrower at its mouth than at its source. At its mouth it is 250 yards wide, which it preserves up to the basin of Chambly; from Chambly to the isle du Portage it is 500 yards wide; beyond this it spreads to double that width, and continues to widen still more up to St. John's, whence there is a ship navigation to the towns on lake Champlain. From Lake Champlain to the basin the current is strong, and in some places broken by rapids, and the ascent is laborious. From the basin to the St. Lawrence, the current is regular and gentle. Numerous boats and rafts, loaded with pot and pearl ashes, and flour, are continually descending this river in summer.

Spain, country of Europe, bounded by the Atlantic, the Mediterranean, Portugal, and France. It extends from Lon. 9° 13' W. to 3° 15' E. and from lat. 36° to 43° 46' N. Its length from E. to W. is 650 miles; its breadth 550. Area, 176,627 sq. miles. Pop. 10,352,200. Spain possesses several islands in the Mediterranean; on the coast of Africa the small islands called Presidios; in Asia the Philippines; in America Cuba, and Porto Rico; but her vast continental possessions may now be considered as finally separated from her empire.

Chains of mountains intersect the country in all directions. The tracts included between the different ranges consist generally of plains, some of which are elevated, particularly in the two Castiles where they form an extensive table land several thousand feet above the level of the ocean. The soil is generally light, and where well watered very fertile, but when water fails it is dry and barren. The most fertile districts are Asturia, Estremadura, and the Mediterranean provinces, especially Andalusia and Valencia. The productions are grain, coffee, cotton, sugar, and cocoa; also vines, olives, oranges, lemons, almonds, and in the warmest provinces the pomegranate and the palm. Silk is a staple production of Spain. The mineral productions are iron, copper, lead, tin and quicksilver, all in abundance; also coal and salt. Great care is bestowed on sheep, and the Spanish wool has in consequence long been famous as the finest in the world. The number of sheep in Spain is estimated at 13,000,000, of which 5,000,000 are Merinos or wandering sheep. The government of Spain was long a limited monarchy, the people being represented by their Cortes; but after the union in the 15th century of the different provinces into one kingdom, the concentration of the power in the executive branch enabled the latter to dispense with the Cortes, and to encroach on the privileges of the provinces; so that, on the accession of the house of Bourbon in 1700, there remained hardly any vestige of independence, except in Biscay. The dissatisfaction of the people excited by the conduct of the present king, led, in 1820, to open insubordination in the army, and has produced a revolution of great importance, by which the constitution of the Cortes, on an improved plan, is restored, and such salutary restraints have been imposed on the power of the crown as seem best calculated for securing the rights of the people. Ecclesiastical abuses have also been reformed, and the privilege of entailing estates abolished. The Catholic was, till 1820, the only religion tolerated in Spain. The inquisition, which was abolished by Bonaparte, was restored by the present king in 1814; but in 1820 was again abolished, it is hoped forever. The clergy are excessively numerous, consisting of 8 archbishops, 61 bishops, and 40,000 minor clergy; besides 50,000 monks. Part of the monasteries however are now abol-

ished. The army consists of about 50,000 men. The revenue in 1817 was about £6,000,000; the expenditure has for several years exceeded it by more than a million pounds. The exports are wool, wine, brandy, fruit, olive oil, silk, and salt. The imports are woollen cloth, hardware and cottons from England, linen from Germany and Ireland, woollens, jewellery, and paper from France, naval stores from the Baltic, corn from the Black sea and the Baltic, and salt from Newfoundland. The most important branch of Spanish commerce, the trade with the colonies, is now fast going into the hands of the English.

State of the Church, or *Ecclesiastical State*, country of Italy, forming the temporal dominion of the pope. It is 240 miles long from N. to S. and from 20 or 30 to 100 broad, bounded N. by the Po, which separates it from the Austrian dominions; W. by the grand duchy of Tuscany, E. by the Adriatic, and S. by the kingdom of Naples. Extent 17,000 sq. miles. Pop. 2,425,223. The Apennines divide it into two unequal parts, and serve to moderate the violent heats of summer, and give rise to a number of streams, the only one of which possessed of any interest is the Tiber. On the S. W. coast are the Pontine marshes, which corrupt the atmosphere for many miles round. Several canals have been dug for draining off these noxious waters, but hitherto without complete success. The soil here is naturally rich though not a twentieth part of it is in any tolerable state of cultivation. The rest of the territory is generally fertile, producing corn, wine, fruit, &c. The pope is invested with absolute power, both spiritual and temporal. The candidates for the papacy are necessarily members of the college of cardinals, and to them belongs the election of the pope. Their number is nominally 70, but is seldom complete. All the cities are governed by prelates appointed by the pope. The revenue is about £600,000 a year. The army does not exceed 6,000 or 7,000 men. His present holiness, Pius VII. was elected to the Papal chair in 1800.

Stockholm, city, and capital of Sweden, at the junction of the lake Malar with an inlet of the Baltic. The form of the town is an irregular oblong, extending from north to south, while the waters cross it in two channels from east to west. The situation is extremely picturesque. Stockholm is generally described as standing on seven islands, but several of them are very small and only contain forts or buildings for naval purposes. The harbour is perfectly safe and sufficiently capacious to receive a thousand ships, and the largest of them may come close to the quays. It has, however, some disadvantages arising from the number of small islands and rocks at the mouth of the inlet from the Baltic, and from the delay occasionally experienced in coming up a winding channel from the sea, a distance of more than 20 miles. Stockholm is the commercial emporium of the central part of Sweden. Its connection with the interior is very extensive by means of lake Malar and various rivers and canals united with it. The town is well built, and contains 13 bridges, 22 churches, and numerous other public buildings, some of which are in a fine style of architecture. Among the literary societies are the academy of sciences, the Swedish academy, the academy of fine arts, history, and antiquities; a military academy, a patriotic and an agricultural society, an academy for painting and sculpture, an academy of music and a medical college. The royal library contains about 40,000 volumes. The manufactures comprise iron foundries, glass works, sugar refineries; also leather, cotton, hats, stockings, silk, watches, clocks, mathematical instruments, articles of gold and silver. Pop. of the city and suburbs 80,000. 320 m. N. E. Copenhagen, 420 W. St. Petersburg, 350 N. E. London. Lon. 18° 3' 33" E. Lat. 59° 20' 31" N.

Sumatra, a large isl. in the E. Indian sea, and most westerly of those called the *Islands of Sunda*, about 700 miles long from N. W. to S. E. and 180 broad. Sq. miles, 180,000. The equinoxial line

passes nearly through the centre. It is separated from the continent of Asia by the straits of Malacca; and by the straits of Sunda, from the island of Java on the S. A ridge of mountains extends through its whole length. Mount Ophir, the highest summit, is 13,482 feet above the level of the sea. Between these mountains are extensive plains, considerably elevated above the level of the ocean, which are the best cultivated and most populous parts of the island. The heat of the climate is not so great as might be expected; the thermometer at the most sultry hour generally fluctuating between 82° and 83°; at sun-rise it is usually as low as 70°. The soil of the land is generally a stiff reddish clay, covered with a stratum or layer of black mould of no great depth. On this is naturally a strong and perpetual verdure. For many ages Sumatra has been famous for its gold, which seems at present, however, nearly exhausted. There are also mines of copper, iron and tin, saltpetre, sulphur, coal, ivory, coffee, cotton, betel-nuts, tobacco, rice, cotton, and especially pepper, are also among the productions of the island. The religion is paganism, and the inhabitants are cannibals. In 1818, a Baptist missionary established himself in this island, with a printing press. Pop. 4,500,000. Lon. 95° 48' to 106° 14' E. er Town. The citadel stands within the Inner, on the shore of the Taptee, and is divided by trenches from the town. The squares are large, and the streets spacious. Ships cannot enter the harbor, because the Taptee is full of sand-banks. A large portion of the inhabitants are Moors, that is, Arabs, Persians, Monguls, and Turks, professing Mahomedanism, but retaining some Pagan rites. All people of distinction speak and write the Persian language. Surat is celebrated as the port whence the Mahomedans of India embark on their pilgrimage to Mecca. The great trade carried on at Surat renders it the store-house of the most precious production of Hindoostan. Hither is brought from the interior an immense quantity of goods, which the merchants carry in their ships to the Arabic gulf, the Persian gulf, the coast of Malabar, the coast of Coromandel, and even to China. The provinces near this city are full of manufactures of all sorts. There are 3 English missionaries here, with a printing establishment, and the printing of the New Testament in the Guzeratte language has commenced. 112 m. S. Amedabad, 200 W. N. W. Aurungabad. Surinam, country, S. America, and part of Guiana, bounded N. by the Atlantic, E. by the river Maroni, S. by a country of Indians, and W. by the river Corentyn; about 150 m. from E. to W. and 60 from N. to S. The principal rivers are the Surinam, from which the colony takes its name, the Corentyn, the Copename, the Seramica, and the Marawina. The first only is navigable. The banks of all the rivers are inhabited by Europeans, and planted with sugar, cocoa, cotton, and indigo. Though situated, like Guinea, under the torrid zone, the heats are much more supportable than those on that part of the African coast. The scorching rays of the sun are daily tempered by cooling breezes from the sea. In general, the soil is abundantly fruitful; the earth during the whole of the year is adorned with continual verdure, the trees loaded at the same time with blossoms and ripe fruit, and the whole presenting to the view the delightful union of spring and summer. The principal animals of prey are tigers; apes are abundant, as likewise parrots, scorpions, a great variety of insects and serpents of amazing size. The rivers abound with alligators, and in the Surinam, is found that wonderful fish, the electrical eel. This colony is the only part of South America at present belonging to the Dutch. Susquehannah, river, one of the largest rivers in the United States, is formed by the union of two principal branches, the eastern and western. The

Susquehanna, a river, Chesapeake lake, (N. Y.) and (Md.) to the S. W. receives the Hoga near the Pennsylvania boundary. It then flows first S. E. and then S. W. till it reaches the Western branch at South Mountain, after which the course of the river is first S. and then S. E. till it falls into the inlet of Chesapeake bay near the N. E. corner of Maryland. During the last part of its course the navigation of the river is obstructed by an almost continual series of rapids, but further up, to the junction of the two branches, there is no obstruction of which cannot be surmounted at a moderate expense. The navigation of the river is good for export trade, and immense quantities of lumber in the form of boards, sawtong, shingles, &c. are continually descended it to Baltimore.

Sweden, country, Europe, bounded N. by Norwegian Lapland, E. by Russia, the gulf of Bothnia and the Baltic, S. by the Baltic, and W. by the Scaggerac and Norway. It extends from 55° 20' to 69° 30' N. lat. Area 188,433 sq. miles. Pop. in 1813, 2,407,206. In 1814, Norway, with 161,000 square miles and 930,000 inhabitants, was added, making the whole extent of the Swedish dominions at present including Norway, about 350,000 sq. miles, and the population 3,300,000. The soil of many parts of the northern districts is barren. The southern provinces are the most fertile, and agriculture is here conducted with much skill and industry. The quantity of corn raised in the country is not sufficient for the consumption of its inhabitants; about 6,400,000 tons are annually produced, and 400,000 tons imported. The quantity of flax and hemp also is not enough for the supply of the country, but of hops there is a superabundance. The immense forests which spread over the mountains yield excellent timber for masts and other purposes, and an abundance of tar and turpentine. The established religion is the Lutheran. The government is a limited hereditary monarchy. The army consists, according to Hassel, of 41,507 men, without including that of Norway. The navy contains 12 ships of the line, and 8 frigates, together with 200 smaller vessels for the protection of the coast, and the number of sailors is 15,000. The revenue in 1816 amounted to 5,768,681 rix dollars, and the public debt to 15,781,221 rix dollars. The principal exports are iron and iron ware, and next to these copper and other metals, herring and other fish, timber, tar and pitch. The imports are salt, corn, wine, colonial produce, and manufactured goods. The trade extends to all parts of Europe, the East and West Indies and America. The amount of merchant shipping belonging to Sweden in 1818 was 128,580 tons, and the number of seamen 9,417. The value of the exports is estimated on an average at \$6,000,000, and of the imports at \$5,500,000.

Switzerland, or *Helvetia*, country, Europe, bounded N. by Baden and Wurtemberg, E. by Austria, S. by Austrian Italy, S. W. by Savoy, and N. W. by France. It lies between 45° 45' and 47° 48' N. lat. and between 6° 6' and 10° 36' E. lon. Extent 19,000 sq. miles. Pop. 1,750,000. It formerly consisted of 13 cantons, viz. Berne, Zurich, Bale, Schaffhausen, Lucerne, Underwalden, Uri, Schweitz, Friburg, Zug, Soleure, Glaris and Appenzel. In 1803, the constitution underwent a considerable change, and the country was formed into 19 cantons. The new cantons were Aargau, formed from a part of the canton of Berne, Grisons, St. Gall, Tesin, Thurgau and Vaud. In 1815 three more new cantons were added, viz. Valais, Geneva and Neufchatel, making the present number 22.

Switzerland, especially in the south, is composed of high mountains and deep vallies, interspersed with beautiful lakes, and abounds with the wildest and most picturesque scenery. The Alps run along the whole southern boundary, and their summits and ridges are covered with glaciers or fields of ice of vast extent and magnificence. These immense masses often reach down the sides of the mountains, even to the borders of the cultivated vallies, and resting in an inclined position sometimes slide down the declivity, and in a moment overwhelm the villages below.

The Swiss are a people of simple manners, industrious, brave, well educated, fond of liberty, and strongly attached to their country. The cantons are independent republics, but for the common security united in a confederacy, governed by

a general diet. The military force in 1809, was 15,023 men, and there were then from 20 to 30,000 Swiss soldiers in foreign countries. In 1815, the cantons raised an army of 30,000 men. The inhabitants are either Calvinists or Catholics. The cantons of Berne, Aargau, Bale, Schaffhausen, Zurich, Vaud, Grisons, and three fourths of Glarus, two-thirds of Appenzel, and Thurgau are Calvinistic; the remainder are Catholic.

Syene, or *Assuan*, city, Egypt, on the E. side of the Nile. In this town, situated under the tropic, according to the report of Strabo, a well was sunk, which marked the summer solstice, and the day was known when the stile of the sun-dial cast no shade at noon: at that instant the vertical sun darted his rays to the bottom of the well, and his image was reflected on the water. Syene is at present a miserable place, with a small fort. The remains of the ancient town are on an eminence to the S. Columns and pillars of granite scattered here and there denote its situation. Syracuse, s-p. Sicily, in the valley of Noto, and formerly a superb city, and flourishing republic; but war, tyranny, and earthquakes have nearly destroyed it. Of four grand quarters of which the city was composed, only one, Ortygia, which was the smallest, now remains; the other parts are covered with ruins, intermixed with vineyards, fields, and gardens. It is however the seat of a bishop, and has a good harbour. When Syracuse was besieged by the Romans, under Marcellus, it was defended by the ingenuity of the celebrated Archimedes, who framed such engines of war as quite disconcerted the measures of the Romans; and to his genius alone it was owing, that the city held out nearly three years against the utmost efforts of a consular army. 71 m. Teneriffe, one of the Canary islands. The form is triangular; the nearest point is about eighty leagues from the coast of Africa. The celebrated peak of Teneriffe is 12,176 feet above the level of the sea. Although the top appears sharp, yet it is flat for the extent of an acre of ground, in the centre of which is a dreadful volcano, which frequently breaks out into flames, so violent as to shake the whole island. Smoke constantly issues from the mountain, near its summit, but no eruption has occurred since 1704, when the port of Garra-chico was destroyed, and the harbor filled by the lava. The island is divided in the middle by a ridge of mountains, which have been compared to the roof of a church, the peak forming the spire or steeple in the centre. A large part of the island is rocky, but the remainder produces wheat, rye, barley and the vine. The quantity of wine yielded annually is from 20,000 to 24,000 pipes. See *Canaries*. It lies between 35° and 36° 30' N. lat. and between 81° 30' and 90° 10' W. lon. It is 430 miles long, 104 broad, and contains 40,000 square miles, or 25,600,000 acres. Pop. in 1790, 35,691; in 1800, 105,602; in 1810, 261,727; and in 1820, 422,505. Slaves 80,097. Engaged in agriculture 101,919, in commerce 882, in manufactures 7,860. Number of militia in 1821, 36,146.

The Cumberland mountains run from S. W. to N. E. through the centre of the state, and divide

it into East and West Tennessee. East Tennessee is intersected by mountains, but the vallies between the ridges are fertile. West Tennessee is partly level and partly hilly, and contains much fertile soil, particularly on the banks of the rivers. The principal productions are cotton, tobacco, wheat, hemp, and Indian corn. The three first are exported in large quantities. The usual route to a market is down the Tennessee and Cumberland rivers to the Ohio, and thence down the Ohio and Mississippi to New Orleans. This course is very circuitous, and it is expected that a road or canal will soon be formed, connecting Tennessee river with some of the branches of the Tombigbee, which will shorten the distance to the Gulf of Mexico more than one half. Cattle are raised in large numbers in East Tennessee, and sent to the seaports on the Atlantic. Foreign goods imported into the state have hitherto been brought from Philadelphia and Baltimore to East Tennessee in waggons; and to West Tennessee, principally in waggons as far as Pittsburg, and thence by water down the Ohio and up the Cumberland.

The climate of Tennessee is generally healthy. The season of vegetation commences 6 or 7 weeks sooner than in New-Hampshire, and continues as much later. Snow falls seldom, and does not lie long. Ten inches is a deep snow, and 10 days an extraordinary term for its duration. Cumberland river has been frozen but 3 or 4 times since the settlement of the country. The western part of the state, included between Tennessee and Mississippi rivers, was recently in possession of the Chickasaws, but has been ceded by them to the United States. The Cherokees own that part of the State which lies S. of the Hiwassee and Tennessee rivers.

The legislature consists of a senate and house of representatives, the members of which, together with the governor, are chosen biennially in August. The principal denominations of Christians are Methodists, Baptists, and Presbyterians. There are nominally 4 colleges in the state: 1 at Greenville, 1 at Knoxville, 1 at Nashville, and 1 in Washington county.

Tennessee, r. U. States, formed by several branches which rise in the western parts of Virginia and the Carolinas, and unite a little west of Knoxville. It runs S. W. through the state of Tennessee into Alabama; it then turns and runs N. W. through Tennessee into Kentucky, and empties itself into the Ohio near its mouth. Its course resembles the letter V. It is navigable to the Muscle Shoals, 259 miles, at all seasons of the year. Here it spreads out, and becomes so shallow, that it is difficult for boats to pass, when the water is low. Above the shoals there is no obstruction for 250 miles, till you come to the Suck or Whirl, where the river breaks through the Cumberland mountains. The river is here compressed to a width of about 70 yards. Just as it enters the mountain, a large rock projects from the northern shore, which causes a sudden bend in the river; the water is thrown with great violence and rapidity against the southern shore, whence it rebounds around the point of the rock, and produces the whirl. Boats ascend and descend the whirl without much danger or difficulty.

Tennessee ridge, separates the waters of the Tennessee and Cumberland rivers.

Texas, (pronounced *Ta-as*.) country, North America, bounded E. by Louisiana; S. E. by the gulf of Mexico; W. and S. W. by the Rio del Norte; N. and N. E. by Red River. Its greatest length is 800 miles, its greatest breadth 500, and

its area 240,000 square miles. According to the late treaty, it is wholly included in the Spanish dominions. The air is pure, serene and healthful. Though taken as a whole it cannot be considered a fertile country, yet there are many fine tracts. Red River and several other streams will probably admit of settlements through their whole extent. Several large masses of native iron have been found near the head waters of Rio Brassos. In 1810, a party of adventurers succeeded in bringing off the largest mass several hundred miles to Red River, whence it was conveyed by water and is now in New-York, in the possession of Col. George Gibbs. The other masses have never been removed.

Thibet, country, Asia, including Bootan, extends from the source of the Indus to the borders of China, and from Hindoostan to the deserts of Cobi, 1,500 miles long from E. to W. It lies between lon. 70° and 100° E. and between lat. 26° and 28° N. Sq. miles, 400,000. Pop. estimated by Hassel at 12 or 16,000,000. Little Thibet, which is situated between Thibet and Cashgar, is not connected with this country. Thibet is gov-

erned by the grand lama, who is sovereign pontiff of the greater part of Chinese and Independent Tartary. The great lama resides near the city of Lassa, and receives the adoration of the natives, as well as of numberless foreigners, who undertake long and painful journeys to pay him homage. Besides the great lama, who is the head of religion, and sovereign of Thibet, there are other princes, who have cities, and many subjects under them. Thibet is now ranked among the tributary dominions of the emperor of China. The most valuable productions are the goat, from the wool or hair of which the fine shawls of Cashmere are made; the yak, or ox of Tibet and Tartary, distinguished by the profusion of soft hair, in some parts resembling wool, and by the large tails of glossy hair, which under the name of chowries, are in universal demand over India; gold, silver, quicksilver, copper, iron and many other minerals. Bootan produces rice, wine and a great variety of fruits. Lassa is the capital.

Tombuctou, city, Africa, and capital of a rich and populous kingdom, supposed to have been built in the 13th century. The caravans of Tripoli, Fez, and other parts of Africa, trade to this city. The houses are said to have been formerly magnificent, but at present only built of wood, and covered with straw or turf, except a magnificent mosque of stone, and the royal palace. The population has been estimated at 60,000. The country abounds in millet, wheat, and barley, and

is well watered by a number of wells and springs: cattle are numerous, and milk and butter in great plenty. The dearest article is salt, which is purchased from Tegaza. Cloth and other European manufactures and produce are sent to Tombuctou by the Caravans, and exchanged for ivory, slaves, sena, gold dust, dates, ostrich feathers, &c. brought from the interior of Africa. The king of Tombuctou is despotic; his general guard consists of 3,000 horsemen, well armed with bows and poisoned arrows, besides a number of foot. Transylvania, (*Principality of*) country, Europe, bounded N. by Hungary, Poland, and Moldavia; E. by Moldavia; S. by Walachia and the banat of Temeswar, and W. by Hungary. The form is nearly oval, about 400 miles in circumference. It is surrounded on all sides by lofty mountains, and is itself mountainous and woody. The air is generally warm, but more wholesome than that of Hungary; the soil is fertile, abounding in corn, wine, cattle, and rich pastures; among the minerals are gold, silver, copper, iron, quicksilver, cinnabar, antimony, sulphur, vitriol, rock-salt, salt-petre, ochre, &c. The inhabitants are composed of different nations: Hungarians, Sikli or Scythian Huns, Saxons, Walachians, Armenians, Rascians, Bulgarians, and Greeks. The government is aristocratical, and, since the year 1722, rendered hereditary to the princes and princesses of the house of Austria. The inhabitants, with respect to religion, are Catholics, Calvinists, and Lutherans. Pop. 1,600,000.

Travancore, country, Hind. extending along the southern part of the coast of Malabar. It is inhabited by various religious denominations, but is rendered peculiarly interesting as the residence of the Syrian Christians, who, though wholly unconnected with the rest of the Christian world, have stood for ages a bright monument of the truth of Christianity, in the midst of the darkest scenes of idolatry and wickedness. The Syrian churches extend from north to south more than 150 miles, and from east to west, at least thirty. They were visited by the late Dr. Buchanan, who manifested a strong interest in their welfare, and commenced a translation of the New Testament into the Syrian language, which since his death has been completed and published, and copies of it have been distributed to each of the churches. Several missionaries have been sent to this station by the English Church Missionary Society, and a College has been established near Cotym, more particularly for the education of priests for the Syrian churches. The college is under the direction of the missionaries, and has been very liberally endowed, both with money and land, by the Rannee, or princess of the country, and promises to be of great benefit to the people. The number of students in 1820, was 25.

Sq. miles, including Barca, 210,000. Pop. 2,000,000. The inhabitants on the coast generally live by commerce and piracy, and those in the interior by plunder and robbery. The army in time of war amounts to 10,000 cavalry and 40,000 infantry. Revenue of the Pacha, \$200,000 per annum. Exports: olive oil, saffron, wax, honey, wool, salt and dates, together with gums, ostrich feathers, and other articles from the interior. See *Barbary States*.

Tripoli, city, and seaport, Africa, and capital of the country so called, on the coast of the Mediterranean. It was formerly divided into two parts, the Old and New; the former is now almost gone to ruins; the latter, which stands at a small distance from it, though of no great extent, is populous and in a flourishing condition. It stands on sandy ground, by the sea-side, surrounded with high walls and stout ramparts, flanked with pyramidal towers, but not kept in good repair. It was once a place of vast trade, but it now retains few traces of its ancient splendor. The houses are low and mean, the streets narrow, dirty, and irregular: there are in it, nevertheless, some monuments still standing, which evince its former magnificence. The country around has a dry sandy soil, and is adorned with a multiplicity of handsome villas. 300 m. S. E. Tunis. Lon. 13° 26' E. Lat. 32° 55' N. Pop. 15,000.

Troy, p-t. Bristol co. Mass. 16 m. S. Taunton. 48 S. Boston. Pop. 1,594.

Troy, city and cap. Rensselaer co. N. Y. on the E. bank of the Hudson, 6 m. above Albany. It is a beautiful city, handsomely built, and regularly laid out on a plain, and its appearance is very neat. It contains a court-house, prison, market-house, 2 banks, and 5 houses of public worship, 1 each for Presbyterians, Episcopalians, Baptists, Methodists, and Friends. Troy is finely situated for a commercial and manufacturing town, being at the head of sloop navigation on a large river, and the creeks which here fall into the Hudson, affording numerous excellent situations for water-works. There are already erected 8 flour mills, an extensive cotton and woollen factory, a paper-mill, a manufactory of fire-arms, a shovel manufactory, a rolling and slitting mill, besides several nail-works, saw-mills, and other manufacturing establishments. About 30 sloops and 20 smaller vessels are employed in the trade of the town. The growth of Troy has been very rapid. In 1794 it was a mere hamlet; in 1810 the population was 3,895; and in 1820, 5,261. In commerce and wealth it is considered the fourth town in the State.

Turkey in Europe, is bounded N. by the Austrian dominions and Russia; E. by the Black sea, the sea of Marmora and the Archipelago; S. by the Mediterranean; and W. by the Ionian sea, the Adriatic sea and Dalmatia. It extends from 34° 30' to 48° N. lat. and from 16° to 29° E. lon. and is divided into the following provinces:

Provinces.	Sq. miles.	Population.
Moldavia,	17,000	400,000
Wallachia,	24,658	950,000
Servia,	20,165	960,000

Candin or Crete,	4,218	281,000
Total,	206,000	9,600,000

This country has a mild and delicious climate, with a fertile soil, yielding corn, wine and oil in abundance, but the indolent Turks suffer extensive tracts to lie uncultivated. The northern provinces are principally level; but the southern, embracing all ancient Greece, are diversified with hills, vallies, and lofty mountains.

Turkey in Asia, is bounded N. by the sea of Marmora, the Black sea and Russia; E. by Persia; S. by Arabia, and W. by the Mediterranean and the Archipelago. It extends from 30° to 42° N. lat. and from 26° to 49° E. lon. The area is estimated at about 500,000 square miles, without including the Syrian desert. It is divided into 17 pachalics, which with the ancient divisions are given in the following table.

	Pachalics.	Sq. miles.	Pop.
Asia Minor, also Anatolia,	Anatolia, Siwas, Trebisond, Konieh, Merasche, Adana,	280,000	6,000,000

Irak Arabia,	Bagdad,		
Total,		507,000	12,000,000

Besides the pachalics mentioned above, there is a province composed of the island of Cyprus and of a small district on the continent adjacent. Asiatic Turkey is nominally included within the dominions of the Grand Seigneur, yet in many districts the inhabitants refuse to acknowledge his authority.

The established religion of the Turkish empire is Mahometan, but at least two thirds of the inhabitants are Greek Christians. The government is an unlimited despotism. The Emperor, also styled Grand Sultan and Grand Seigneur, has absolute power of life and death, and sometimes exercises it with brutal cruelty. The Grand Vizier is his first officer, and unites in his person the authority of prime minister, chief justice, and commander in chief of the army. The Captain Pacha is the first admiral and minister of marine. The provinces are governed by pachas, who frequently rebel against the sovereign. The Turkish army consists of about 300,000 men, of whom 40,000 are Janissaries or regular infantry, 20,000 artillery, and 20,000 regular cavalry. The navy in 1806 consisted of 20 ships of the line, 15 frigates, and 32 smaller vessels, but it is now greatly reduced. The public revenue is estimated at about \$16,000,000. The public debt in 1807 was between 50 and \$60,000,000. The private revenue of the Sultan is also very great. The chief manufactures are Turkey carpets, printed muslins, crapes and gauzes, cannon, sword blades, and morocco leather. The commerce is considerable, but is carried on principally by the Greeks, Armenians, and Jews. The exports, besides the above mentioned manufactures, are corn, wine, oil, figs, currants, &c.

Tyre, or *Sour*, seaport of Syria, which derives its only importance from its occupying the site of the most celebrated commercial city of antiquity. It was first built on the continent; but being taken, and in a great measure destroyed, by the kings of Assyria, a new city was founded on an island $\frac{1}{2}$ a mile distant. New Tyre was taken by Alexander, who for this purpose erected an immense mole across to the island. In the time of the Romans, Tyre continued still a mighty city, and the old and new, including suburbs, were stated to have a circumference of 19 miles. During the first centuries, Tyre was distinguished for its zeal in the cause of Christianity, and was made the first archbishopric under the patriarchate of

Jerusalem. During the Crusades, it became the subject of contest between the Saracens and Christians. In 1289, it fell finally into the hands of the former, since which time this once magnificent city has presented to the traveller only the aspect of a ruined and miserable village. It appears however, to be beginning somewhat to revive. It now contains about 200 inhabited houses, two-thirds of which are occupied by the Mutualis, and the rest by Greek Catholics. The chief staple is tobacco, which is sent to Cairo and Damietta; also charcoal, dried figs, and large faggots of wood. The harbour will now admit only boats. Relics of ancient Tyre are every where to be seen. Numerous and beautiful columns lie along the beach, or half buried in the sand, and the broken aqueduct and other ruins appear in its vicinity. 18 m. S. W. Saida, 80 N. Jerusalem. Lon. 35° 20' E. Lat. 33° 10' N.

Valparaiso, s-p. Chili, and port of St. Jago, is on a bay of the Pacific Ocean. The harbor is capacious and deep, and ships of the largest size can lie close to the shore. The port is the most frequented in Chili, although open to the N. E. and N. W. winds, which blow with great violence in winter, accompanied with a heavy sea. The country near the sea is very barren, and all the supplies are drawn from Quillota. The population does not exceed 6,500 souls. Until the late revolution, the only commerce of this port was with Lima. From the opening of the ports by the patriots in February 1817, to July 1818, the imports into Chili in British vessels amounted to \$1,800,000, and in vessels belonging to citizens of the U. States to about \$1,300,000. The articles were principally British manufactured goods. 225 m. N. Conception, 75 N. W. St. Jago. Lon. 72° 16' W. Lat. 33° 3' S.

Van Diemen's land, isl. in the Southern Ocean, separated from the south coast of New Holland by Bass' straits. It is about 170 miles long and 150 broad, and lies between 40° 41' and 43° 38' S. lat. There is much fertile land in the island, and the British planted a colony here in 1803, which is now very flourishing. The principal town is Hobart Town, on the Derwent, a fine navigable river which falls into the ocean on the S. E. side of the island. The other settlements are confined to the banks of the Derwent, and of the Tamar, which falls into Bass' straits on the N. side of the island. The climate is healthy, and nearly all the fruits of Europe have been successfully introduced. The colony is peopled by free settlers and convicts from England as well as from New South Wales. According to the returns of 1818, the whole population was 3,557, of whom about one half were convicts. At the same period, the number of acres under cultivation was 5,681; the number of horses 264; of horned cattle 15,356; of sheep 127,883. The trade of the island is principally with India, and the Isle of France. The exports are wheat, seal skins, oil, sheep, potatoes, and lumber. Coal, and a valuable species of timber have been discovered on the island. The natives are few in number, but hostile to the colonists. They are said to be as ugly as the New Hollanders, and as degraded.

Venice, city, Italy, for a long time the capital of a republic, now belonging to Austria. This city makes a very grand appearance at a distance, being built on a multitude of islands, and seeming to float on the sea. The Laguna or marshy lake which lies between the city and the continent, is 5 miles broad, and too shallow for large ships.—The great canal, which winds through the city, and divides it into two parts, is 1,300 paces long. Over the several canals are laid 450, some say upwards of 500 bridges: the highest and longest is the Rialto, which crosses the great canal at its narrowest part. Venice contains 70 parish churches, besides others, 54 convents of monks, 26 nunneries, 17 rich hospitals, 18 oratories, and 53 squares. The buildings are of stone, but the greater part mean. St. Marks square is very fine, and is the pride of the city. In the churches and convents are the paintings for which Venice is so highly renowned. The trade of Venice in cloth, especially scarlet, silk goods, and looking-glasses, is still very considerable. Here also gold and silver stuffs are manufactured. 216 m. N. Rome. Lon. 12° 18' E. Vermont, one of the United States, bounded N. by Lower Canada; E. by New Hampshire; S. by Massachusetts; and W. by New York, from which it is separated in part by lake Champlain. It lies between 42° 44' and 45° N. lat. and between 71° 38' and 73° 26' W. lon. It is 157 miles long from N. to S. 90 broad on the northern boundary, 40 on the southern, and contains 10,212 square miles. It is divided into 13 counties, and 347 towns. Pop. in 1790, 85,589; in 1800, 154,465; in 1810, 217,895; and in 1820, 235,579. Engaged in agriculture 50,951, in commerce 776, in manufactures 8,484. Militia in 1821, 20,871.

The Green mountains, from which the State derives its name, come from Massachusetts, and run along the E. side of Bennington, Rutland, and Addison counties. In Addison county they divide; the western and principal chain continuing a northerly course, and terminating near the northern boundary of the State; while the *height of land*, as it is called, strikes off to the N. E. dividing the waters which flow into the Connecticut from those which fall into lake Memphremagog and lake Champlain. The western range presents much the loftiest summits, but has inequalities which afford a passage for Onion and Lamoi rivers. The soil is for the most part fertile, being generally deep, and of a dark color, moist, loamy, and well watered. The interval lands are esteemed the best; bordering on these is usually a strip 1 or 2 miles wide, which is comparatively poor, but beyond this the land recovers a fertility nearly equal to that on the rivers. The principal productions are wheat, barley, rye, Indian corn, oats, &c. The principal exports are pot and pearl ashes, beef, pork, butter, cheese, &c. The market for the northern part of the State is Montreal; for the eastern, Hartford and Boston; for the western, New York.

The principal religious denominations are Congregationalists, and Baptists, who have each more than 100 congregations. There are two colleges, one at Burlington, and the other at Middlebury, connected with which is a Medical school at Castleton. The legislative power is vested in a house of representatives chosen annually, on the 1st Tuesday in September. The executive power is vested in a governor, lieutenant-governor, and 12 counsellors, chosen at the same time.

Vienna, city and capital of Austria, the see of an archbishop, on the right side of the Danube, where it receives a small river, called *Vien*, which passes through the city and suburbs, near the site of the ancient Vindebona. The situation is pleasant, for to the east and north the country around is entirely level, but to the west and south are seen a range of mountains, which are thickly planted with trees and vines; and the Danube, which is here very wide, divides itself into several arms, forming many islands, which are stocked with wood. The circumference of that which is properly the fortified city of Vienna, is not large, but the suburbs are extensive. In the city there are numerous and beautiful palaces: but the streets are narrow and crooked. Vienna contains 50 churches or chapels, and 21 convents. The university of Vienna was instituted in the year 1365, and is divided into four faculties and 4 nations, Austrian, Saxon, Hungarian, and Rhenish. The library contains 90,000 volumes. The imperial library contains at least 300,000 volumes, and a very extensive and valuable collection of prints, and is well furnished with useful modern books. It is open three or four hours every morning to the public. The imperial cabinet is rich in medals, and still more so in natural history. There are numerous charitable institutions, and in one of the hospitals there are annually received 16,000 patients. The medical academy has a fine apparatus, and is a celebrated institution. The manufactures of Vienna are numerous, and the trade extensive. The mortality of this city is thought to be greater than that of any other place in Europe; and it is commonly said that 1 in 20 dies annually. 175 m. S. Prague. Lon. 16° 23' E. Lat. 48° 13' N. Vincennes, p-t. and cap. Knox co. Indiana, and the largest town in the State, is on the E. bank of the Wabash, 100 miles from its junction with the Ohio in a direct line, but nearly 200 by the course of the river, 120 W. N. W. Louisville, 150 N. E. Kaskaskia, 140 E. St. Louis. Vincennes was settled about a century ago by the French from Lower Canada, many of whom intermarried with the Indians, and gradually approximated to the savage state. Within a few years American emigrants have flocked hither in great numbers, and the society is rapidly improving. In 1810 the population was 883, and in 1818 the town contained 250 dwelling-houses and stores, a handsome brick court house, a land-office, a bank with a capital of \$1,500,000, a library of 700 volumes, a Roman Catholic chapel, 2 market houses, 2 printing offices, and a large brick building for the accommodation of the State College. The college however, is about to be removed to Bloomington.

rection of a Board of Public Works, which amounted in Nov. 1818, to \$1,537,561, and which has already promoted the construction of various canals. The Board have recently reported in favor of the practicability of a canal connecting James river with the Ohio.

In respect to character, the Blue Ridge divides the Virginians into two classes. Those east of the ridge, embracing about three-fourths of the whole population, are chiefly of English descent; those west of the Ridge are descendants of the *Scotch Irish*, that is, of emigrants from the north of Ireland. The former were originally Episcopalians, the latter, Presbyterians. Among the former, slaves are as numerous as whites; among the latter, there are seven whites to one slave. In 1817, the Baptists had 314 congregations in the State; the Presbyterians 41 ordained ministers; and the Episcopalians 34 ministers. There were besides many Methodists and Friends, and some Lutherans and Roman Catholics.—The legislature is composed of a senate and house of representatives. The senate consists of 24 members, who are chosen for 4 years, one-fourth being chosen yearly. The representatives are chosen annually two from each county, and one from several cities and boroughs. The governor is chosen annually by joint ballot of both houses, and can hold the office but 3 years in 7.

The staple productions of Virginia are tobacco and wheat. The value of the exports for the year ending Sept. 30th, 1820, was \$4,557,957, of which all except \$8,829 was domestic produce. The value of the manufactures in 1810 was estimated at \$15,263,473. The amount of shipping in 1816, was 70,361 tons.

United States, country, N. America, bounded N. by the British dominions; E. by the Atlantic ocean; S. by the gulf of Mexico; S. W. by the Spanish dominions; and W. by the Pacific ocean. The boundary on the side of the Spanish dominions, according to the treaty with Spain, ratified in 1821, begins on the gulf of Mexico, at the mouth of the river Sabine, and proceeds along the west bank of that river to the 32d degree of N. lat.; thence, by a line due north, to Red river; thence up that river to the meridian of 100° W. lon. thence due N. along that meridian to the river Arkansas; thence along the south bank of the Arkansas to its source, in lat. 42°, and thence along that parallel to the Pacific ocean. On the side of the British dominions, the boundary begins in the Atlantic ocean, at the mouth of the river St. Croix, and proceeds up that river to its source; thence due north to the highlands which separate the waters falling into the St. Lawrence from those which fall into the Atlantic; thence, along those highlands, in a S. W. direction, to the parallel of 45° N. lat.; thence, along that parallel to the river St. Lawrence, and thence, up that river, and the great lakes Ontario, Erie, Huron, and Supe-

rior, to the most north-western point of the Lake of the Woods. By the treaty with Great Britain in 1819, the boundary line proceeds from the last mentioned point, due north or south, as the case may be, to the parallel of 49° N. lat. and thence due west along that parallel to the Rocky mountains. The boundary between the Rocky mountains and the Pacific ocean remains unsettled.—Including Florida, which has been ceded by Spain, the territory of the United States extends from 25° to 49° N. lat. and from 66° 49' to 125° W. lon. embracing upwards of 2,000,000 square miles.

This vast country is intersected by two principal ranges of mountains; the Rocky mountains in the west, which run across the territory in a direction nearly parallel with the coast of the Pacific ocean, at the distance of several hundred miles; and the Alleghany mountains in the east, which run nearly parallel with the Atlantic coast from Georgia, through Tennessee, Virginia, and Pennsylvania, to New York. The immense valley included between these two ranges of mountains, is intersected by the Mississippi river which runs from north to south, through the whole length of the United States. The country west of the Mississippi, with few exceptions, is a wilderness inhabited by savage Indians, and beyond the meridian of 94°, the whites have scarcely a solitary settlement; but the country on the east of the Mississippi is, to a considerable extent, cultivated and populous.

The confederacy originally consisted of 13 members, but by the formation of new States, the number is now increased to 24; the names, extent, and population of which, and of the territories, are given in the following table:

The States are usually classed under four divisions, *Eastern, Middle, Southern* and *Western*. The Eastern States are those which lie wholly east of the Hudson, viz. Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut; the Middle States are those between the Hudson and the Potomac, viz. New York, New Jersey, Pennsylvania, Delaware, and Maryland. The Southern States are those south of the Potomac, including the three on the Gulf of Mexico, viz. Virginia, North Carolina, South Carolina, Georgia, Alabama, Mississippi and Louisiana. The Western States are those which lie wholly west of the Alleghany mountains, viz. Tennessee, Kentucky, Ohio, Indiana, Illinois, and Missouri. The territories are under governors appointed by Congress. The District of Columbia is a tract 10 miles square around the city of Washington, under the immediate government of Congress.

In that part of the United States which lies east of the Mississippi, the most remarkable feature in the face of the country is the low plain, from 50 to 100 miles wide, which extends along the Atlantic coast, from the Hudson to the Mississippi, a distance of 1,500 miles. Beyond this plain the country rises towards the interior till it terminates in the Alleghany or Appalachian mountains. The rest of the U States is agreeably diversified with hills and vallies, plains and mountains. The soil of the low country, except on the banks of creeks and rivers, is sandy and barren; but the remainder of the country has generally a strong fertile soil, capable of supporting a dense population. The principal production of the states south of Kentucky and Virginia, is cotton. Tobacco is raised in large quantities in Maryland and Virginia. Wheat is the staple production of the Middle and Western States. Rice is cultivated to a considerable extent in the swamps of Georgia and the Carolinas, and the sugar cane flourishes in Louisiana.

The commerce of the U. States consists principally in the exchange of agricultural produce for the manufactures of other parts of the world, and the productions of tropical climates. The whole value of exports in 1821, was \$64,974,382, of which \$43,671,894 was domestic produce. The principal article is cotton; the quantity of which has been continually and rapidly increasing for more than 30 years. In 1790, the amount exported was only 100,000 pounds; in 1795, 1,300,000; in 1800, 17,789,803; in 1804, 35,034,175; and in 1821, 124,893,405 pounds, the value of which was \$20,157,484. Next in importance to cotton, is wheat and flour, of which the amount exported in 1817, was 1,479,198, barrels, and the value \$18,432,000. Tobacco, lumber, rice, pot and pearl ashes, Indian corn, fish, beef and pork, are also exported in large quantities.—The principal articles imported may be arranged in the following order: manufactured goods, principally from Great Britain; sugar, rum, wine, molasses, brandy, coffee and teas. The whole value of imports in 1821, was \$62,585,724. The shipping belonging to the U. States in 1820 was 1,280,165 tons. It is owned principally in New-England and New-York. The States south of the Potomac own only one eighth part.—The annual value of the manufactures was estimated in 1810, at \$172,762,876.

The revenue of the United States in 1819, was \$21,435,700. More than nine-tenths of the revenue has been usually derived from duties on im-

ports. The sale of public lands for several years past has also yielded a considerable sum, and the amount from this source is rapidly increasing. The internal revenue and direct taxes on houses and lands, yield very little, being only resorted to in cases of emergency. The public debt contracted in support of the war of Independence, amounted in 1791, to \$75,463,467. During the long peace between 1783 and 1812, the country was prosperous, and the debt was gradually reduced to \$36,656,932. The war of 1812, '13 and '14, increased it again more than three-fold, and in 1816, it was \$123,016,375. It has since been greatly reduced, and on Oct. 1st, 1821, was \$93,686,205.—The army in 1820 consisted of 10,000 men, distributed among the numerous posts along the maritime and inland frontier. The navy, in 1822, consisted of 7 ships of the line, 8 frigates, and 22 smaller vessels; besides these there are on the lakes 4 ships of the line and 37 smaller vessels. The officers are 31 post captains, 31 masters commandant, 196 lieutenants, and 336 midshipmen.

The population of the United States in 1790, was 3,929,326; in 1800, 5,305,666; in 1810, 7,239,903; and in 1820, 9,625,734, of whom 1,531,436 were slaves, and 233,398 free blacks. Engaged in agriculture 2,065,499, in commerce 72,397, in manufactures 349,247. The population increases very regularly at the rate of about 3 per cent. per annum, doubling in less than 25 years. The inhabitants consist of whites, negroes, and Indians. The negroes are generally slaves, and are principally confined to Maryland and the States south of the Potomac and Ohio rivers. All the whites are of European origin; principally English. The New Englanders, Virginians, and Carolinians, are almost purely English. Next to the English are the Germans, who are very numerous in the Middle States, particularly in Pennsylvania. Next to the Germans are the Dutch, who are most numerous in New York. The French constitute nearly half the population of Louisiana. The Irish and Scotch are found in the middle States, in the back parts of Virginia, and in all the principal cities of the Union. Very little is known about the Indians west of the Mississippi. The 4 principal tribes on the east of the Mississippi are the Creeks, Choctaws, Cherokees, and Chickasaws. These tribes live within the chartered limits of Georgia, Alabama, Mississippi, and Tennessee.

The principal religious denominations are Presbyterians and Congregationalists, who have together more than 2,500 congregations; the Baptists, who have more than 2,700 congregations; the Friends have more than 500 societies; and the Episcopalians about 600. The Methodists are also very numerous. The Baptists and Methodists are found in all parts of the United States; the Congregationalists are almost wholly in New England; the Presbyterians are scattered over the Middle and Southern States; the Friends are most numerous in Pennsylvania and the adjoining States, and the Episcopalians in New York, Connecticut, Maryland, and Virginia. German Lutherans, German Calvinists, and Moravians, are also numerous in the Middle States.

The United States are a Federal republic. Each of the States is independent, and has the exclusive control of all concerns merely local; but the defence of the country, the regulation of commerce, and all the general interests of the confederacy.

are committed, by the constitution of the United States, to a general government. The legislative power is vested in a Congress, consisting of a Senate and House of Representatives. The Senate is composed of 2 members from each State, chosen by their legislatures for 6 years. The Representatives are chosen by the people biennially, each State being entitled to a number proportioned to its free population, and in the slave-holding States every five slaves are allowed to count the same as three freemen. The President and Vice President are chosen for 4 years, by electors appointed for the purpose, and each State appoints as many electors, as the whole number of its Senators and Representatives. The salary of the President is \$25,000 per annum, of the Vice President \$5,000. The principal officers in the executive department are the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Attorney General, and the Postmaster General.

Since the establishment of the present government in 1789, the growth of the United States in population, commerce, and wealth has been without a parallel in the history of the world. In 1790, the value of the exports was \$16,000,000: it is now about \$70,000,000. The revenue in 1790, was \$2,410,320; it is now more than \$20,000,000. In 1790, the number of post offices was 75, and the extent of post-roads 1,875 miles; in 1821, the number of post-offices was 4,976, and the extent of post-roads 79,808 miles. The amount of shipping in 1790, was 486,090 tons; in 1820, 1,280,165 tons. For tables illustrating the state of the commerce, population, and resources of the United States, see *Appendix*.

Washington City, in the District of Columbia, the metropolis of the United States of America, is pleasantly situated on the N. E. bank of the river Potomac, at the point of land formed by the junction of the Eastern branch, 300 miles from the mouth of the river, and 3 below the head of the tide. It is separated from Georgetown on the N. W. by Rock creek, and Tyber creek passes through the middle of the city. Washington is regularly laid out in streets running due north and south, intersected by others at right angles. Besides these streets, which are from 80 to 110 feet wide, there are avenues from 130 to 160 feet broad which diverge from centres in various parts of the city, crossing the other streets transversely. The

avenues are named after the different States in the Union, the streets which run east and west after the letters of the alphabet, and those which run north and south are numbered 1, 2, 3, &c. At the points from which the avenues diverge are spacious squares. The ground embraced in the plan of the city is very extensive, but only a small portion of it is yet occupied with buildings.

The principal public buildings and establishments are—1. The Capitol, which is finely situated on an eminence, commanding a view of every part of the city, and a considerable portion of the adjacent country. According to the original plan, it is to be composed of a central edifice and two wings. The two wings were in a considerable state of forwardness in 1814, when the British army under General Ross gained possession of the city and destroyed them, together with the President's house and other public structures, and an extensive library which had been purchased for the use of Congress. The wings of the Capitol are now re-built, and the central building has been commenced. The wings are each 100 feet square, and the whole building when completed will be a most magnificent edifice, presenting a front of 362 feet. 2. The President's house, situated about a mile and a half west of the capitol, on the avenue leading to Georgetown. It is 170 feet by 85, and two stories high. 3. Four spacious brick buildings erected in the vicinity of the President's house, for the accommodation of the heads of the great departments of government. 4. A comfortable marine barrack, with a house for the residence of the commandant of the marine corps. 5. An extensive navy yard, situated on the Eastern Branch, which forms a safe and commodious harbour. Here is an elegant marble monument, erected by the American officers to the memory of their brethren, who fell before Tripoli. 6. A small fort, which, from the extreme southern point of the land on which the city stands, commands the channel of the Potomac. And, 7. The general post-office, a brick edifice, about a mile W. N. W. of the Capitol, where the patent office is also kept. The style of the architecture of the Capitol is Corinthian, and that of the President's house Ionic; and both buildings are constructed of free-stone. The capitol square is inclosed by a strong and handsome iron railing; and being planted with trees, and otherwise ornamented, will afford a delightful walk for the inhabitants and visitors of the city. Similar improvements are going on at the President's square, which will add greatly to its beauty and accommodations.

Besides the buildings and establishments above enumerated, Washington contains a city hall, a theatre, a penitentiary, a circus, 2 masonic halls, 4 banks, including a branch of the U. States bank, a female orphan asylum, a Lancasterian School, 9 printing offices, an extensive cannon foundry, a paper mill, a window-glass manufactory, and 13 houses for public worship, 3 for Presbyterians, 2 for Episcopalians, 2 for Baptists, 2 for Methodists, 2 for Catholics, 1 for Friends, and 1 for Unitarians. Adjoining the city is a brick edifice for a college, 4 stories high, and 117 feet long by 47 wide, situated on elevated ground, nearly north of the President's house, and commanding an extensive prospect of the city, Georgetown, Alexandria, the Potomac river, &c. Among the other literary institutions are a medical society, a botanical society, and the Columbian Institute, which consists of 5

classes, viz. mathematical sciences, physical sciences, moral and political sciences, general literature, and the fine arts. There is a bridge about one mile long over the Potomac, on piles, built in 1809; three bridges are erected over the Eastern Branch, and two over Rock creek. There is also a canal connecting Tyber creek with the Eastern branch.

The amount expended by the U. States on the public buildings previously to their destruction by the British in August, 1814, was \$1,214,291, and there have been appropriated towards rebuilding the same, \$1,207,788. The value of the lands belonging to the U. States within the city on the 31st Dec. 1816, was estimated at more than \$7,000,000, and the lots which had been sold previously to that period had yielded to the national treasury \$689,195. Pop. 13,322, of whom 2,045 were slaves. The number of houses in 1822, was 2,229, of which about one half were of brick. Lat. 38° 58' N. Lon. of the capitol, 76° 55' 30" W. from Greenwich.

White Mountains, or *White Hills*, mountains, New-Hampshire, lying 30 m. N. of Winnipiseogee lake, and 70 N. Concord. They are the loftiest mountains in the United States. Within a circuit of 60 miles there are 6 peaks, whose elevation exceeds 4,000 feet, and Mount Washington, the highest summit, was formerly estimated at 10,000, but more recent and accurate calculations reduce it to between 6,000 and 7,000. Mount Washington is frequently visited by travellers who ascend it by various routes, but most usually from the S. E. commencing in the town of Conway, and following the course of Saco river, which has its origin high in the mountain. After climbing by the side of the mountain for a considerable distance, the trees begin to diminish in height, till at the elevation of about 4,000 feet, you come to a region of dwarfish evergreens, about the height of a man's head, putting forth numerous strong horizontal branches which are closely interwoven with each other, and surround the mountain with a formidable hedge, a quarter of a mile in thickness. On emerging from this thicket, you are above all woods, at the foot of what is called the bald part of the mountain, which is very steep and consists of a huge pile of naked rocks. After attaining the summit, the traveller is recompensed for his toil, if the sky be serene, with a most noble and extensive prospect. On the S. E. is seen the Atlantic Ocean, the nearest part of which is 65 miles distant in a direct line, and on the south, is seen Winnipiseogee lake. The barren rocks which extend for a great distance in every direction from the summit, add a melancholy grandeur to the scene.—The *Notch* or *Gap*, on the west side of the mountains near the source of Saco river, is also frequented by travellers. It is a deep and narrow defile, in one part only 22 feet wide. The whole mountain, which otherwise forms a continued range, appears as if cloven down quite to its base, perpendicularly on one side, and on the other at an angle of 45 degrees. The road from Lancaster to Portland, which passes through this gap, is crossed by the river Saco. Several brooks, the tributaries of the Saco, fall down the sides of the mountains, forming a succession of beautiful cascades, some of them within sight of the road. No part of the mountains is more interesting and picturesque than the scenery of this natural gap.

Williamsburg, p-t. James City co. Va. 60 m. E. Richmond, situated between two creeks, one of which falls into James, the other into York river. It was formerly the metropolis of the State, and is regularly laid out in parallel streets, with a square in the centre, through which runs the principal street E. and W. about a mile long, and more than 100 feet wide. At the opposite ends of this street are two public buildings, the college and a capitol. Besides these, there is an Episcopal church, a court-house, jail, and hospital. Pop. 1,402.

The college of William and Mary was founded here in 1691, in the time of king William and queen Mary, who liberally endowed it. The college flourished for a number of years in great prosperity, and in former times furnished for the service of the State many good scholars; but the war of the revolution gave it a shock from which it has not yet recovered. On the decease of bishop Madison, the late president, it seemed to be threatened with total extinction. Exertions, however, have been recently made to revive it, and sanguine hopes are entertained by some that it will again flourish. The library contains between 3,000 and 4,000 volumes, and the philosophical apparatus is valuable. There are nominally 6 professorships, but only 3 or 4 are occupied. The buildings are of brick, and sufficient for the accommodation of about 100 students.

The standard of measure according to the new French system, is a meridional circle of the earth, which for this purpose has been accurately ascertained by men of science. The whole circle is divided into 40 million parts, or the quadrant into 10 million parts, one of which is the unity of length called a metre. In order to express decimal proportions in this new system, the following terms have been adopted. The term *Deca* prefixed denotes 10 times; *Heca*, 100 times; *Chilo*, 1,000 times; and *Myrio*, 10,000 times. On the other hand, *Deci* expresses the 10th part; *Centi*, the 100th part; and *Milli*, the 1,000th part: so that *Decametre* signifies 10 metres; and *Decimetre*, the 10th part of a metre, &c. The *Metre* is the element of long measures; *Are*, that of square measures; the *Litre* is the element of all measures of capacity; and the *Gramme*, which is the weight of a cubic centimetre of distilled water, is the element for all weights. For bulky articles, like wood, the *stere* is the unity of measure. It is equal to a cubic metre, containing 35.3171 cubic feet English.

* These returns are imperfect. † Unknown. ‡ Number of churches in 1822, 1,411.
 † The number of destitute churches is obtained by deducting the number of ministers from the number of churches. Wherever one minister, therefore, officiates in two places, as is frequently the case in the Episcopal church, the number is not strictly correct. It serves to show, however, how many ministers are wanting to supply each congregation with one pastor.
 † NOTE. We have not at present the documents necessary to extend this table to the Friends, Universalists, Roman Catholics, Dutch and Associate Reformed Presbyterians, &c. We should feel obliged if any gentleman would republish the table with additions and corrections from authentic sources, and send us a copy of it in its improved form.
